Beautiful Farms In Fulton County

LEIGHMAN DRYSDALE
MASTER FARMER

Farm Bureau Committee Goes on Inspection Tour

Last week the committee picked by the farm bureau of Fulton county, which was composed of Enoch Browder, Ed Williamson, Judge McMurry and Joe Davis, visited five Fulton County farms from one extremity to another for the purpose of scoring the farmer on the business methods used in farming so that it might be determined who was the Master Farmer for this county.

In preliminary meetings all but five farms of the county had been eliminated, and it became the duty of the committee to visit these five farms and inspect them thoroughly.

The first farm to be visited was that of Henry Helm, who resides in the bottom below Hickman. Mr. Helm has demonstrated on his farm of more than 400 acres of the most productive soil to be found that it is practical for men to live in that low section and use real business methods. On this farm will be found purebred livestock with good housing conditions and plenty of fresh water pumped by electricity as well as all of the feed that are commonly grown on any stock farm. Mr. Helm is primarily a cotton grower but he does not confine his efforts to

that alone. He has fine fields of alfalfa and corn. Besides this, he has a good pasture of a mixture of clover and alfalfa. On this farm is to be found the only commercial orchard in this part of the county; however, this orchard has suffered considerable from severe cold of last winter.

Mr. Helm has an ideal country home with all of the conveniences that anyone would want either in town or in the country. His farm is situated on the highway with a good dirt road leading up to the residence, and the committee found that Mr. Helm had employed good business methods in his farm. His total score was 875 points out of the possible 1,000.

The committee then visited the farm of Mr. Jake Lattus, who lives in the hill section southeast of Hickman. Mr. Lattus's farm is very rolling and hard to cultivate but the committee found that he was using good methods in handling this hill farm to the extent that no washes on these hill sides were to be found. He grows corn, hay and livestock, and keeps a large portion of his farm in pasture. On account of the lack of the proper conveniences and improvements around his homestead the committee was unable to give him a large score.

The farm of Mr. Jim P. Maddox, in the Sylvan Shade neighborhood, was then visited, and the committee found this to be a most beautiful country home. Mr. Maddox's residence is located some little distance back from the road in one of the most beautiful lawns to be found anywhere. His house is new and modern, with most all the conveniences desired in any home. He operates a farm of 430 acres of rich land that has been properly taken care of. His yields are above the average and he employs the rotating system of his crops that will preserve the fertility of the soil. Mr. Maddox grows corn, wheat, clover and cotton, and raises a

(Continued on last page)

CONSTRUCTION OF HIGHWAY BRIDGES MAY START SOON

State Commission Hopes to Advise and Take Bids Within 60 Days

Construction of proposed Kentucky highway bridges will be started this year, the state commission having planned to advertise and receive bids within the next sixty days, Roy M. Shelbourne, Bardwell, highway commissioner for the western Kentucky district, said Saturday.

Contract for the sale of approximately fifteen million dollars of bridge bonds was made by the highway commission last week and bonds are to be sold to obtain funds for the acquisition of seven inter-state bridges over the Ohio river and seventeen intra-state bridges over Kentucky streams.

If the problems of litigation can be further eliminated, the bids may be received and the contracts awarded within that period. A test suit on the bond sale was favorably passed upon by Judge T. M. McGregor at Frankfort. His decision will be taken to the court of appeals for final decision before the three-months summer adjournment of that body on June 20.

Would Employ Hundreds

Construction of the bridges would be simultaneous, and hundreds of men would be given employment on the various bridges, would be a fine thing, but it is a visiting unit, members of the commission are hopeful that actual construction can be got under way this summer.

AMERICAN LEGION AUXILIARY ELECTS OFFICERS

The American Legion Auxiliary met at the home of Mrs. Moore Joyner in the Highlands, with Mrs. Joyner, Mrs. Jess Jordan, Mrs. Pete Roberts and Mrs. Earl Taylor as hostesses.

There were 20 members present.

This was the meeting to elect new officers for the Auxiliary and the following members were voted upon and elected:

Mrs. Bunn Copeland, President; Mrs. Ramsey, First Vice-President; Mrs. Sam Winston, Second Vice-President; Mrs. Earl Taylor, Secretary-Treasurer; Mrs. Homer Furlong, Historian; Mrs. Pete Roberts, Sergeant-at-Arms.

Mrs. M. K. Chowning had charge of the program, which was composed of a short reading from the American Legion Auxiliary Monthly Magazine, by Mrs. L. E. Bugg, and a contest, the winner of which was Mrs. N. B. Butterworth. At the conclusion of the business session, a delightful ice course was served by the hostesses.

RETAIN HOME AGENT

Hickman, Ky.—The Fulton County Board of Education has renewed its appropriation of \$400 toward the work of the home agent, it was announced, following the appearance of the advisory committee of the Fulton County Home-makers' Association before the Board, accompanied by Miss Zelma Monroe, assistant state agent, and Mrs. Myrtle Davis, home agent. It is believed this will allow the work to go forward next year. Representatives of the Cayce, Hickman, Jordan, Sassafras Ridge and McFadden Home-makers' clubs appeared before the board.

Reception Committee

Large Crowds Attend Meeting

REVIVAL MEETING AT FIRST BAPTIST CHURCH GROWS IN INTEREST

"Never hear of a revival meeting now in the South," the First Baptist church is being largely attended at each service, and Dr. Turner who is doing the preaching is delivering powerful messages with telling results.

Rev. C. H. Warren, pastor, is directing the singing, which is a pleasing part of the services.

A cordial invitation is extended everybody to attend these services daily at 10 o'clock in the morning and 8 o'clock in the evening.

LIONS WILL MAKE TRIP TO REELFOOT LAKE, JUNE 26TH

Members of the Lions club will attend the annual Lions' outing at Reelfoot Lake on Thursday, June 26, officials of the club announced. The outing is an event to which all Lions in the Kentucky-Tennessee district look forward eagerly each year. The clubs participating will include Paducah, Mayfield, Fulton, Hickman and Clinton, in Kentucky; Memphis, Paris, Union City and Covington in Tennessee.

Meet at Fulton

Arrangements for the Reelfoot outing were tentatively made at a noon meeting of spokesmen from the various clubs, who were guests of the Fulton Lions' club. Sam S. Sloan and A. L. Campbell represented the Paducah club. Dr. Robert A. Clark, district deputy for the Kentucky-Tennessee region, paid the Fulton club an official visit and in a talk, discussed some of the plans for the year 1930-31. Lion Campbell of the Paducah club is district secretary. He and Dr. Clark plan to visit each club in the district during the year.

Dr. Clark will be toastmaster at the Reelfoot luncheon on June 26.

Someone has suggested that raising bees will help the farmer. He might try. He is accustomed to being stung by most everything else he raises.

JEFFERSON DAVIS MARKER UNVEILED

Impressive Exercises Largely Attended on State Line

Before a large crowd here Saturday afternoon, the unveiling and dedication of the Jefferson-Davis Highway granite memorial marker on the Memphis Highway at the Tennessee-Kentucky line, just a mile from Fulton, was conducted. Heading the program, the American Legion drum and bugle corps formed down town and marched to the marker, arriving at 2 o'clock, at which time the program started.

Joe Davis, secretary of the Fulton Chamber of Commerce, extended a welcome to the visitors. Mrs. William Schwalmeier, division president of the U. D. C., of Tennessee, responded for her state; Mrs. John L. Woodbury, chairman of the Jefferson Davis National Highway, U. D. C., presented the history of the National highway.

Following the presentation of the memorial marker to Tennessee by Mrs. Homer F. Sloan, state director, Gen. Rice A. Pierce, of Union City, Tenn., Confederate officer, delivered a tribute. Mrs. Gipp Watkins of Hopkinsville, Ky., state director for Kentucky, presented the marker to the state of Kentucky.

During the beginning of the program a chorus under the direction of Mrs. Matthews, of Fulton, sang southern songs to close the exercises. H. T. Smith of Fulton extended greetings on behalf of the Col. Ed Crossland Chapter of the U. D. C. of Fulton, while the Rev. C. B. Cloyd gave the benediction.

THOMPSON-McMAHAN

A wedding of interest to their many friends took place June 8, in Chicago, at the home of the bride's sister, Mrs. W. F. Clark, when Miss Geraldine, pretty and accomplished daughter of Mrs. Martha Thompson, of Fulton, was united in marriage to Mr. William A. McMahan, of New York. Soon after the wedding, the happy couple came to Fulton, and after receiving congratulations and enjoying numerous social functions in their honor during the past week, Mr. and Mrs. McMahan left for their home in New York, Saturday, traveling overland in their Buick car.

Brieflets

The Fulton man who is anxious to invest in a going concern should first make sure that he knows which way it is going.

If we don't have faith in our fellowman, and he hasn't faith in us, how are we ever going to borrow an umbrella when it rains?

Henry Ford says a woman's place is in the home and yet when he invented the flivver he did more than any other man has ever done to keep her out of it.

Sometimes we can't help wondering whatever became of the old-fashioned Fulton man who used to use the under side of his coat lapel for a pin cushion.

An old form of farm relief was for a farmer to file a \$300 claim when the railroad killed his \$50 cow.

The old family driving horse wasn't so much for speed, but you could tie him to a fire hydrant if you wanted to without getting into trouble.

We've noticed that most Fulton women have a sense of humor. The more you humor them the better they like it.

According to the farm board weeds cost the American people three billion dollars a year. And that doesn't include widow's weeds, either.

There isn't much more that science can do for a modern kitchen, unless it invents an electric can-opener.

The Fulton boy who is looking for a job that requires push and pull might try being a trombone player.

An honest confession is said to be good for the soul. Yes, and it's also pretty hard on the reputation.

Any Fulton gardener who can't tell weeds from vegetables can learn by watching his neighbor's chickens.

Wonder if, when speed fiends get to heaven, they'll keep the repair department busy fixing their broken wings?

This old world would be a much nicer place in which to live if all wild life was confined to the woods and fields.

In other years around Fulton they used to kiss and make up. But now the make-up seems to come ahead of everything else.

HICKMAN WOMAN HURT

Hickman, Ky.—Mrs. Walter Taylor was seriously injured when the Taylor car turned over on the road near Hickman, and her arm was crushed, breaking the window glass and cutting her severely. None of the other occupants of the car were injured and the car was not badly damaged. The accident occurred when Mrs. Taylor, who was learning to drive, pulled over on a sharp curve to allow another car to pass and was unable to pull her car back out of the ditch.

Walter Goulder Dies

Walter Goulder, of the Boaz chapel community, died Monday at his home, following an illness resulting from heart trouble. He is survived by his widow, and one son, Herbert Goulder, who is an employee of the Fulton Hardware company at Fulton.

AS FORD SEES IT

The shortest cut to relief from business depression is an intensive development of agriculture and manufacture, with quantity production from the soil, declares Henry Ford in a recent interview.

"It is the only way to escape stagnation," Mr. Ford says. And residents of Fulton and vicinity who have been wondering how long it will be before we are back to normal will not find much joy in his additional statement that "it will take just as long to get rid of the depression as it took to accumulate it." He says manufacturers need to pep up the people's spirit, and this can not be done with talk. It takes action. One expenditure now, based on faith in the future is worth all the words anyone can say. "Issuing optimistic statements on one hand and lowering wages on the other won't better things," he asserts. "This is no time to lower wages and those who are doing it are hitting their country while it's down. What we call waste is only surplus and surplus is always the starting point of new uses. Everything that is produced from the soil can be used for some purpose. Industry has need for everything that the soil produces that is not used for foodstuff. Too many people on our farms believe that Santa Claus lives in the city. The thing we need is some way to educate people how to get away from the city. Half the people out of work in Detroit could find work on the farms."

Boiled down, Mr. Ford's recipe for making times better is to quit talking hard and get to work regardless of how much you may be making at the present moment. In other words, he argues that good times are not going to stay with the fellow who won't talk anything else but hard times.

BETTER DRIVING

Motorists have a lot of funny ideas as to what constitutes driving skill. To many speed is the thing. They seem to think that getting speed out of an auto requires courage, level headed thinking and absolute skill. But it does not. Any fool can step on an accelerator and guide an automobile. But most wise men don't do it.

Then there is the traffic in-and-out. Usually he comes up from the rear in a great rush, sounding his horn to clear the way. If other cars do not crowd over to the right he runs parallel with them and drops back only if he sees he cannot "horn in" to the line by making a vacant place. Most often he has his way because sensible drivers do not want to be mixed up in an accident. They give ground.

But we believe Fulton motorists will agree with us that the speeder is the greatest nuisance and the greatest menace. He is responsible for most accidents. He mistakes the speed of his own car and that of others, and is for ever getting himself and others into tight places. If other people were as aggressive and as foolish there would be twice as many accidents. It is time to put the speeder and the in-and-outer in their places. They cause accidents to careful drivers by crowding them off the road and sometimes bumping them into ditches. They increase the cost of motoring by creating unnecessary repair bills. Those who will not drive safely should be deprived of the right to drive, and the time is not far distant

when every state in the Union will have laws to that effect.

Everybody Can Help.

Every thirty seconds someone gets hurt in an American home. Uncle Sam has given out the figures, and organizations of club women throughout the country are launching a movement to reduce it. Usually it is a woman or child that is injured in the home, generally by slipping on the floor or falling down a stairway. Poor lighting is also said to contribute to the dangers. Brooms and mops and ironing boards standing at the top of dark stairways, over which some one can easily trip are also blamed for many broken bones—and numerous deaths. Fulton housekeepers are due to be asked pretty soon to join in this movement to reduce accidents in the home. We feel sure they will respond readily and heartily for, as in everything else that tends to safety, they are always anxious to do their part.

A Foolish Idea

The average Fulton motorist has long been of the opinion that the woman driver is not as capable, as cool or as careful as the man. But figures are being given out, the result of a recent nationwide survey made by Auto Clubs to dispute this belief. The report shows that women drivers are involved in only 6 percent of auto accidents. Since only one in every four drivers is a woman, that means that she is entitled to figure in 25 accidents out of every 100. That she figures in but 6 out of every 100 shows she drives if not with more skill, then with more care than the average man. But her critics will contend that she causes many accident that she doesn't get hurt in, but in which some one else is hurt. And right there is where we are going to sidestep the argument. We don't need any figures, for that statement, as you can see, is of it there may be lots of "ifs" in it. So, since we have troubles enough of our own already, we'll let someone else continue the argument.

New Kind of Gas.

With the tendency to crowd an ever-increasing share of tax burdens on the old family flivver, the discovery of a new and more powerful type of gasoline, a kind that will cut down fuel bills, is of interest to car owners. If gasoline can be made to do more then obviously its price is cheapened, and if one uses less his taxes come down in proportion. The new gas is said to have great power. This is brought about, it is stated, by restoring to gasoline two ingredients which have been largely removed by methods of producing and refining. One of these is natural gasoline and the other naphtha, which is claimed to be very effective in hot weather. It is claimed the blended product is far superior to the original product in that it may be completely vaporized and that blends can be made to suit the climatic conditions in all parts of the country. But the most important part of the discovery is that it can not be patented. Any refinery can use the formula for making it. To motorists that will appear as even more important than the discovery itself.

Luke Reilly Says, "The Rat Died Before Reaching the River."

"Since moving near the river 2 years ago, we've always used RAT-SNAP. Watched a vicious water rat, nibbling at RAT-SNAP outside the house. About 15 minutes later he darted off for the water to cool his burning stomach, but he died before reaching it." Three sizes, 35c, 65c, \$1.25. Sold and guaranteed by Kentucky Hardware & Implement Co.

The DAIRY

COWS DON'T MIND
FLIES IN SUMMER

Using Repellents Only Keeps
Animal Quiet.

Contrary to the general belief, annoyance of cows by flies is over-estimated, experiment station trials covering several summers have shown. This conclusion was reached when it was found that milk and fat production was not increased when the cows were sprayed with fly repellents.

The only advantage in using the repellents, says E. J. Perry, New Jersey state specialist in dairying, is that cows are less restless during milking time.

Furthermore, unless properly used, these mixtures do more harm than good. If their regular use the skin of the animal is covered with a sticky, gummy substance that is more objectionable than the flies. When a repellent is used the cows should be washed often enough to prevent such an accumulation.

Where a dairyman wishes, however, to use something to keep flies away, the following will be found a cheap mixture and one that is fairly satisfactory: One pound of kerosene, one half pint of kerosene. This is mixed into a creamy mass and rubbed on the backs and necks of the cows with a cloth or the bare hands.

Another satisfactory formula is: One pound of common laundry soap, four gallons of water, one gallon of crude petroleum, four ounces of powdered naphthalene.

Cut the soap into shavings and dissolve in hot water; dissolve the naphthalene in the crude oil and mix the two solutions thoroughly.

Indigestion or Scours Most Serious Obstacle

Indigestion, or scours, is perhaps the most serious obstacle in the way of successful calf raising. It usually results from a disturbance of the digestive tract caused most frequently by improper feeding, of which over-feeding is probably the most common. This is due to the fact that not enough care is taken to regulate the amount of milk fed. The only way to be sure that the calf is getting the correct amount of milk is to weigh the calf and feed each calf separately. The too common practice of allowing calves to drink from the same pail or trough should not be tolerated. Irregular feeding, sudden change of feed, feeding unclean milk or using dirty buckets and feed boxes may also cause scours. The disease is indicated by the characteristic foul smelling dung. Prevention of the trouble is always easier than its cure. At the first signs of digestive disturbance affected animals should be isolated. The amount of milk fed should be reduced by at least one-half and if legume hay is being fed, it should be replaced by timothy or prairie hay until the trouble disappears.

Have Silage Handy

Where silage is used in winter and summer it is better to have two silos than one. Where convenient, it is advisable to locate on the south or southwest side of the barn rather than the north or northwest. The biggest and most important matter is to have the silage close to the point of feeding, and at the same time be so placed that it will be in accord with all the requirements of a silo as to filling and feeding during the different seasons of the year.

Dairy Hints

When pastures are short, supply roughages. . . .

It usually pays to feed dairy cows grain even when on pasture. . . .

The difference between the keeping quality of whey butter and that of regular butter is insignificant. . . .

When the temperature of the cream is right very seldom will there be such a thing as difficult churning. . . .

Sweet clover pastures seem to give best satisfaction to dairymen who supplement the pasture with silage, hay, or grain. . . .

Many dairymen who complain over the high cost of producing milk could quickly correct this trouble by feeding more silage. . . .

Some farmers like to milk so well they keep ten poor cows rather than five good ones. . . .

Alfalfa hay is considered best for dairy cows, followed closely by clover and the annual legumes, such as soy beans and cowpeas. . . .

Protect Cows From Pests—Flies are a serious pest around the stable and milkhouse. Screened windows and darkened stables will help protect the cattle. Windows and doors to the milkhouse should be screened also.

When Harry Proposed

By H. IRVING KING

"ALLIE, I am in love," Harry Drayton popped this out at the end of a short silence in the conversation between himself and Allison Gower. He accompanied the remark with a sigh. They were on a hotel piazza; the moon was on the mountains and moonlight on the river. "You must have seen, Allie," went on the young man, "the—er—state of my heart. I—must know my fate tomorrow. I am sure you—"

"Oh Harry," cried Allison, "please don't say any more tonight—please don't. I will give you an answer tomorrow morning." She had risen from her chair and stood ready for flight.

Harry with a gasp sat up straight in his chair. "But Allie," he cried, "you don't understand what I am trying to—"

"Oh, yes, I understand," broke in the agitated Allie. "Goodnight, dear"—and she was gone.

"Well, of all the—!" Words failed Drayton for further remark. He sat staring out blankly into the moonlit night. He and Allison Gower had been friends from childhood. From the time he could remember, he had always confided in Allie. And now, when he had attempted to tell her that he was in love with Annie Blair, Allison had gone and taken his attempt as a proposal of marriage to herself.

"By George," he thought, "what's to be done? From the way she took it, her answer to my supposed proposal will be yes. Then I shall be in a pretty pickle! What's the way out? Dangled if I know." The more he thought, the more bewildered he became.

If Harry was in a daze so was Allie. She had always looked upon marriage as a most respectable and almost universal custom to which, some day, she might possibly be called upon to conform. But now it jumped from the realm of the concrete to the suddenness which was rather startling. There was Harry Drayton suddenly changed from a life-long friend and confidant into a would-be husband. If she really had to take a husband she could not just then think of anybody she preferred in that capacity to Harry. But how much better he was as just a friend.

There came a tap at the door. It was Annie Blair, who always stopped for a chat with her dear friend Allie on her way to bed. Allie sometimes wished that Annie, who was a great talker, would come in and visit, but her as a visiting angel.

And experienced—which she was not—that counsel from her could not but be of value. Allie said: "Annie, what do you think of marriage?"

"What a question," cried Annie. "I think it's something greatly to be desired, of course—provided you get the right man. And I expect to be married myself before long—in fact, I know I'm going to be. But you must not tell a living soul until I tell you to."

"Oh, Annie," cried Allison, "how did you feel when he proposed?"

"Oh, he hasn't proposed yet," returned Annie calmly, "but he's going to tomorrow."

"How—how do you know?" gasped Allie.

"How do I know?" retorted Annie. "How do these figures in the barometer know when to come in and go out in advance of the weather? I am as sure Harry Drayton is going to propose to me tomorrow as I am that I am going to accept him. Hasn't he told you he was in love with me? You and he are such chums and confidants that I supposed he had told you before this."

Now Allison Gower was a simple soul but not without sense and resource when driven into a corner. Next morning Harry Drayton received the following note signed "Allie":

"Dear Harry—I ought not to have been so perturbed last night when you confided in me your intention of proposing to Annie Blair; for of course I have long seen how you felt toward her. You may have thought it strange in me to run away as I did, but the fact is marriage is such a serious matter that no advice should be given without due consideration concerning it—no hasty approval or disapproval. I wanted time to think, and I have thought. And after due consideration I have come to the conclusion that Annie is just the one to make you a good wife. So I give you both my blessing in the capacity of an old maid sister and hope both of you will continue to make me your confidant."

Harry Drayton swallowed this letter "hook, line and sinker," as the saying is. True, he could not remember having mentioned Annie Blair's name in his attempted confidence—but then, of course, Allie must have seen. His attentions to Annie had been rather pronounced. He told Annie about it after he had proposed, and Annie said, "Oh, yes, of course," with a rather queer look on her face. But neither by word nor sign did she ever intimate to Allie that she suspected the truth. Perhaps she didn't.

Of course you want to know if Allison Gower was ever married. She was, and she knew that the young man she eventually married was going to propose to her two months before he did so—just as Annie had told her she would.

THE FINISHING TOUCH

"I am sending you some manuscripts," wrote a young and ambitious authoress. "I also inclose a letter of introduction from my clergyman, one from my Sunday-school teacher, and a paragraph from our local paper, announcing my adoption of a literary career. Is there anything else I can send you to interest you in my writings?"

"Dear Madam," wrote the editor in reply, "You need send me but one more thing—a good short story!"—Montreal Star.

How Does She Do It?

Mr. Goodthing—Here's your two bucks for a palm reading. Go to it.

Madam Zizzi—Look at me. You should always follow the advice of thin, dark ladies. You have a trusting and credulous nature. You have recently parted needlessly with a small sum of money and will soon be persuaded to give up more. But don't regret it. It will be put to a good use.

She Wanted to Know

"John," said Mrs. Dunbrell, "I didn't know they had electric refrigeration in the banks?"

"They don't; where did you get that crazy idea?" he demanded.

"Well, then, how do they get those frozen assets that banker was talking to you about?" she asked.

No Necker

Mae—So your date last night was a flat tire, eh?

Faye—Say, that boy might just as well have lost both his arms in the war as far as any free use he makes of them is concerned.

Practice Makes Perfect

Mrs. Newlyrich (to hubby)—Now be careful, George, at Gottrocks' dinner tonight. Don't eat with your knife.

George—Don't worry, Amanda, I've cut with my knife for 30 years and never cut myself.

WAS DOMESTICATED

"Never hear of a low? It isn't the backbones."

"She's quite domesticated. I hear. Knows how to cook and bake and everything."

"Nothing of the sort. Why, she couldn't even cause a traffic jam."

Playing the Game

The game of politics may end in just a woeful wreck. If you should mark the cards, O friend, or try to stack the deck!

A Question for Experts

The Lumber Baron—Going to boost the price of coal next season?

The Coal Magnate—I can't say just now. Our statistician is in consultation with our chief psychologist to decide just how much the public can stand.

Politics and Society

"Do you enjoy society?"

"No," answered Senator Sorghum. "Politics gives you a chance for a good fight. Society is liable to give you merely a chance for a family quarrel."—Washington Star.

Running the Flivver

"A woman now refuses to take a back seat."

"My wife doesn't do so," said Mr. Chuggins. "She takes a back seat with extreme equanimity and proceeds to drive from it."

ABSENT MINDED

"Jack is awfully absent minded."

"How so?"

"He scratched his wife and kissed a match the other night."

Silent Partnership

There are many bridegrooms who on marriage quickly sour when they see that it's more important as the H in hour.

Good Defense

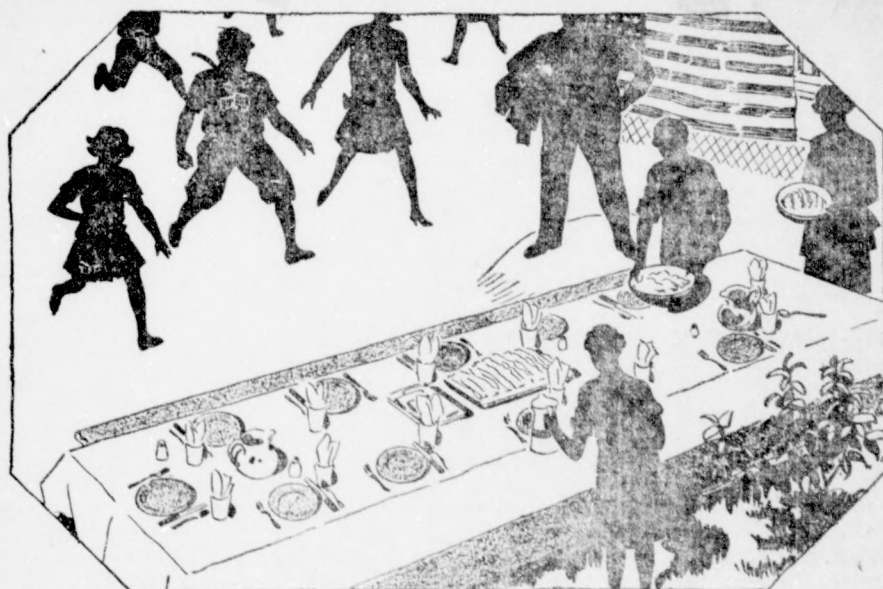

"Walter, Walter! There are burglars in the house. They're down in the pantry eating up my pies."

"Well what do we care, so long as they don't die in the house?"

If you are looking for a cool, comfortable Summer Suit at a reasonable price, we have it for you in the latest style and popular color. A nice assortment to select from.

Roberts Clothing Co.

FOOD FOR THE FOURTH

CRACKERS may pop, nigger chasers may dart about and pin wheels gyrate, or there may be just outdoor games if you're going in for a safe and sane Fourth of July, but there always comes a time on Independence Day when the pangs of hunger begin to assail us just as on ordinary days. The time's likely to be noon, because no patriotic citizen postpones his celebration much after dawn on this greatest of our national holidays. And the place is apt to be on the front porch, or even the lawn, because there must be lots of room for everyone who has come to participate in the fun.

The Fourth of July is generally hot, so cooling drinks are in order, and something sustaining after the strenuous exercise of running away from lighted crackers and dodging nigger chasers all over the lawn. One must store up vitality, too, for the evening's diversion when rockets hiss their heads off. Roman candles pop in the empyrean, and set pieces make a glare in the summer skies. So let's start with the following delicious menu which serves eight people.

Watermelon Cubes with Fresh Mint
Combination Meat and Vegetable Loaf
Creamed Potatoes with Cheese and Green Peppers en Casserole
Lettuce and Cucumber
Whole Wheat Sandwiches
Ice Cream Sandwiches
Spiced Gingerbread
Coffee

Recipes for Menu

Watermelon Cubes with Fresh Mint: Cut the melon in small, uniform cubes (or in tiny balls) and pile in cocktail glasses. Pour over canned or fresh orange juice, sprinkle with finely chopped fresh mint and tuck a sprig of mint in the center of each.

Combination Meat and Vegetable Loaf: Mix well together three-quarters of a pound of round steak, one-half pound of ground boiled ham, three-quarters cup dry crumbs, one and one-fourth teaspoon salt and one-eighth teaspoon pepper. Add one can of vegetable soup and two slightly beaten eggs. Put into a greased loaf pan and lay two slices of bacon on top. Bake for an hour in a 400° oven. Serve sliced, either hot or cold.

Ice Cream Sandwich: Cut

sponge cake in squares or rounds and split in two layers. Between the layers put a serving of vanilla ice cream, then pour over the following sauce, either hot or cold.

Chocolate Sauce: Melt two and one-half squares of chocolate over hot water, add one-third cup of boiling water and stir till smooth. Add two-thirds cup of evaporated milk and three tablespoons of corn syrup. Combine one and one-fourth cups of sugar, one-sixteenth teaspoon cream of tartar and one-eighth teaspoon of cinnamon and add. Cook over hot water for ten minutes. Serve either hot or cold. It is fairly thin when hot but quite thick when cold.

Spiced Gingerbread: Mix four whole cloves, one-fourth teaspoon allspice, one-half teaspoon nutmeg, one-half teaspoon cinnamon, one-third cup honey, two lemons (juice and grated rind), one cup orange juice, one cup pineapple syrup and one cup water. Let stand in ice box for at least an hour or longer. Then strain. Add two pints of cold ginger ale and serve. This makes twelve to fifteen punch glasses or eight regular glasses.

That New "Red Strand" Fence

Five Reasons Why
It's the Fence to Buy

- (1) An extra heavy coating of zinc on open hearth steel wire that has copper in it gives Red Strand Square Deal fence 2 to 3 times longer life.
- (2) Full gauge wires last longer and make a stronger fence. Square Deal fence is never under gauge.
- (3) The famous Square Deal knot will absolutely not slip—guaranteed. It holds line and stay wires in a firm grip.
- (4) Self stay wires make for added strength and demand fewer posts. They prevent sagging and keep the fence trim and tight.
- (5) NO EXTRA PRICE—you get all these advantages in Red Strand Square Deal Fence at NO EXTRA PRICE.

A nice gift. Send The Advertiser to a friend one year—only \$1.00.

(By J. T. Watkins)

One of my little friends came by the office the other day and called me out in front and said "why are you always writing about chickens and rabbits—I like to read about chickens but I don't like to read about rabbits." So there now I have finally got a line of what some folks think of my efforts in the journalistic fields.

Well, do you realize it is only two months until the great Fulton County Fair? Also the largest poultry show ever held at a county fair. Last year we had 741 chickens entered in the show and every one of them was standard bred. This year we want 1,000 entries, and will have them if you breeders will do your part. But we have the same breeders entering their stock each year and we have the same visitors telling us they have better chickens at home than have won the ribbons. Now I have a proposition to make to you braggarts—we will enter our stuff as we always have done, and we invite you, no, we challenge you if you have better stock at home to, enter it against what we have entered and let the judge decide where the ribbon belongs. My opinion is you are either afraid you can't back up your assertion or else you are a cold turkey and can't stand to be beaten.

Anyway, I would like to see about twenty-five new exhibitors enter our show. And about one hundred 4 H club members.

We will have the two silver cups again this year. These cups are donated by our Congressmen, one for the best bird entered from the first district of Kentucky, by Hon. W. V. Gregory, the other from the ninth district of Tennessee, donated by Hon. Jere Cooper. These cups are well worth trying to capture. They are quadruple plate, gold-lined and guaranteed for twenty-five years. They will be alike.

What's the matter with the prospective members? We should have at least fifty members by now, and we have only about a dozen. If you poultry raisers want to have a good show you must show your interest enough to join the association. One dollar for the year's dues is all it costs and you will be showing us you appreciate what we are doing. If we don't have a larger membership than we had last year, darned if I will join, and if I don't join you can't make me be the secretary, nor the show superintendent, and I won't have to act as a committee of one to solicit funds to pay the special premiums, and I won't have to spend time that I could be fishing, running around trying to put on a show when you don't appreciate it. Savvy?

You can pay your membership here in the Chamber of Commerce to Miss Dorothy Farabaugh, who is stenographer for the office. She will issue receipt cards to you upon your plunking down the dollar.

Now Jenks, I didn't say a word about rabbits.

"The Rats Around My Place Were Wise," Says John Tuthill.

"Tried everything to kill them. Mixed poison with meal, meat, cheese, etc. Wouldn't touch it. Tried RAT-SNAP. Inside of ten days got rid of all rats." You don't have to mix RAT-SNAP with food. Saves fussing, bother. Break a cake of RAT-SNAP, lay it where rats scamper. You will see no more. Three sizes, 35c, 65c, \$1.25. Sold and guaranteed by Kentucky Hardware & Implement Co.

IT'S A PRETTY GOOD PLAN TO FORGET IT

If you see a tall fellow ahead of the crowd,
A leader of men, marching fearless and proud,
And you know of a tale whose mere telling aloud,
Would cause his proud head to in anguish be bowed,
It's a pretty good plan to forget it.

If you know of a skelton hidden away
In a closet, and guarded and kept from the day
In the dark; whose showing, whose sudden display,
Would cause grief and sorrow and life-long dismay,
It's a pretty good plan to forget it.

If you know of a spot in the life of a friend,
(We all have such spots concealed, world without end),
Whose touching his heart-strings would play on and rend,
Till the shame of its showing no grieving could mend,
It's a pretty good plan to forget it.

If you know of a thing that will darken the joy
Of a man or a woman, a girl or a boy,
That will wipe out a smile or the least way annoy
A fellow, or cause any gladness to cloy,
It's a pretty good plan to forget it.

If you know of a thing, just a least little sin,
Whose telling would cork up a laugh, or a grin,
Of a man you don't like, for Lord's sake keep it in!
Don't don't be a knocker, right her stick a pin,
It's a pretty good plan to forget it.

FULTON CHILD HEALTH CONFERENCE

The regular Fulton Health Conference sponsored by the Carr P. T. A. will be held in the rest room of the Fulton High school, June 28, at 4 p. m. The ideal to which we strive is not merely for children to be out of a sick bed but that they have a perfect body with average weight and height, correct posture, not easily tired, resistance to infectious diseases, appetite for plain, wholesome food, ability to rest, mental alertness, sane attitude toward life, happy disposition, calmness and poise, physically, mentally and spiritually. Through the observance of the rules of food, rest and personal hygiene, health may be increased. To have a healthy instructed child, the parents must be instructed, the services of your family physician, his advice and the Child Health Conferences furnish these instructions if they are used. Authentic information, expert advice and well trained services are the tools which the community offers to fathers and mothers. The body and minds of their children are the materials on which to use their tools, the object of their labor is to produce a sound and beautiful human being. If this knowledge is used we shall see improvement of our race into a population of healthy, able, right thinking and successful men and women. No efforts are more worth while nor bring greater good than this advancement physically, mentally, morally and spiritually of our youth.

Mr. R. C. King Tells a Wonderful Story About Rats. Read It.

"For months my place was alive with rats. Losing chickens, eggs, feed. Friend told me to try RAT-SNAP. I did. Somewhat disappointed at first not seeing many dead rats, but in a few days didn't see a live one. What were not killed are not around my place. RAT-SNAP sure does the trick." Three sizes, 35c, 65c, \$1.25. Sold and guaranteed by

What price congestion?

GRADUALLY the nation is realizing that congestion costs more than it is worth.

The overhead costs of crowding hundreds of thousands of people into a limited area present a serious problem to manufacturers in metropolitan centers. The costs of congestion enter into their costs of production.

Here is the secret of the small town's new industrial importance—and its industrial opportunity.

The small town of today is equipped for industry because it shares in the widespread supply of electric power upon which industrial operations are based.

When Clarence Reformed

By CORONA REMINGTON

(Copyright.)

A MAN is an animal, and frequent, by a wild animal; but there are some, like Clarence Masey, for instance, who are most exceedingly tame.

Clarence was a good man—a fine fellow, in fact; but he had no eyes, and you could never expect him to do the unexpected. He was a book-keeper and liked it—never had been anything else.

Perhaps it was fate, or instinct, or human nature, or the great law of compensation, or the cussedness of things, that he should fall in love with Dorothy Dwight, the most dashing, vivacious little cashier that ever sat behind a register and wielded a lip-stick.

"I do love you, Clarence," she once said, "but you're slow! You haven't got any pep, honey. Not a bit."

That was the first time she had ever called him "honey," and it took the sting out of her rather painful criticism.

"I know it," he stammered humbly. "But you're good and you're decent, and you love me, and those three things count more than everything else put together."

"But I want to be just the kind of man you want me to be," he answered dolefully.

"Oh, you've got it in you all right. I see it in your eyes every once in a while, but the trouble is you've been brought up by two old maid aunts who probably made you go calling with them on Sunday afternoons when you ought to have been out snowballing some old man's hat off. Now, I want to meet those aunts of yours."

"But they don't even know I've got a girl," he stammered.

"Good; that's one more jolt coming their way. Trouble with you is you're scared of people. You've got a right to a girl, haven't you? Old enough to have one, aren't you? How long since you had a raise, Clarence?"

"Three years!" Gee! How often do you ask for one?"

"I haven't lately," he admitted. "In fact, not since I got the last one."

"Gee! Good lands," said Dorothy slapping a huge powder puff at her face. "Now, I'm going to tell you something. You're going to ask the boss for a raise and if you don't get it I'm not going to marry you."

"But, Dorothy, we're engaged!"

"Never hear of a girl jilting a fellow? It isn't the money I'm after. It's the backbone. You got ten minutes of your lunch hour left; the boss doesn't leave until two; you go up and tackle him right now, and all the time you're talking to him, remember it, good-by Dorothy unless you bring him around."

Five minutes later when Clarence walked into the president's office tiny beads of perspiration were standing out on his forehead. His hands were moist and his tongue felt the size of a feather pillow. He didn't want a raise, anyway.

"Well?" The voice was peremptory. Instant flight, death—would nothing come to the rescue?

"Well, what is it?"

"I—I want a raise," Clarence heard himself saying.

"A raise? Most people do. Do you think you are worth any more to the firm this year than you were last?"

A flush of anger spread across Clarence's face and he was amazed by his own retort:

"No, I don't, but I was worth more to the firm last year than I got, and I know darned well I'm not going to stay here another twenty-four hours unless I get a raise."

"By George, Masey, I didn't believe you could do it. I had an idea you were a meek sort of chap."

"Thank you," said Masey truculently. Leaving personalities out, do I get the raise?"

"Why, bless my soul, I thought I was a judge of human nature, but I've found out I'm not. Pardon the personalities, I guess you will get the raise."

"All right. Thanks," said Clarence loftily, as he walked out with his head in the air.

"I knew you'd get it," said Dorothy joyfully as he walked past the little cage. "Clarence, honestly, you look two inches taller than I ever saw you before. Somehow you're different. I thought I knew you, but now I don't believe I do after all. Men are such mysteries," she sighed happily.

That night at supper Clarence broke the news to his aunts.

"Going to get married," he said.

"Pass the bread, please."

"Oh, Clarence, you? Marry?" Aunt Hannah squeaked faintly.

"I'd like to know why in thunder not," he demanded.

"Dear, dear," said Aunt Agatha. "I can hardly believe it's our little Clarence—he was always such a gentle, sweet boy."

"Oh, h—!" said Clarence fervently, and went up to his room.

A few minutes later he heard his aunt's voice in the hall below. She was evidently talking over the phone.

"Yes, we're awfully proud of him. Of course he talks to us as if we were brainless babies, but most men think women are that, anyway."

"Lord love Dorothy," sighed Clarence giving credit where credit was due.

DAIRY

IMPROVEMENT OF THE DAIRY HERD

Records Create Friendly Competitive Spirit.

Numerous advantages of Dairy-Herd-Improvement association work are listed in a summary of the results of the association's activities for the year ended July 1, 1928, which has just been published by the Colorado Agricultural college.

Cow-testing records kept by the association enable dairymen to cull unprofitable cows, select heifers for the young herd, determine the worth of the bull and intelligently conduct feeding operations, the report states.

C. A. Smith, fieldman for the state dairy commissioner, prepared the summary, which states that the association records "create a friendly competitive spirit between dairymen, which tends to raise the production of the herd and makes for more efficient management."

He adds: "Dairy-herd-improvement association records are becoming more and more necessary to the successful sale of surplus females. The man who is going into the dairy business today wants animals with authentic production records behind them. The dairyman who has such records on his cows can command a premium price on his sale stock."

The association work also presents an opportunity for a community to make a name for itself as a center for high-class stock of a particular breed.

The cow testers' records show that the man who fed a balanced ration according to production had a successful winter feed, took the chill off the water in winter time, supplemented pasture with grain had the larger return above feed cost. Copies of the report may be obtained from the extension service of the state agricultural college.

Let Dairy Cow Market

Home-Grown Grain Feed

The dairy cow furnishes a better market today for feed than ever before, says H. R. Searles, dairy specialist with the agricultural extension division, University of Minnesota.

Mr. Searles has been comparing feed costs and finds that while the price of dairy feeds have increased 24 per cent since 1914, butterfat prices have mounted about 70 per cent to the same point.

In 1914, with butterfat selling at 15 cents a pound, the 300-pound cow returned \$30 at a feed cost of \$45, or a return over feed cost of \$45," says Mr. Searles. "In 1927, with butterfat at 51 cents a pound, the 300-pound cow returned \$153 at a feed cost of about \$56, leaving a return over feed cost of \$97. This cow, then, in 1927 returned \$52 more over feed cost than she did in 1914. Translated into terms of return over feed costs, the increase in favor of 1927 has been around 115 per cent."

"It pays to feed grain to good cows. For the man who has the cows they are a better market for his feed grain than the elevator. If he is short of grain he can afford to buy it at present prices. The proper grain ration fed with roughage will greatly increase his income for the roughage he is selling through the cow."

"Cow testing association reports show that as the production of butterfat increases from 100 pounds per cow to 300 pounds, the price received for the roughage the cow eats increases from \$5.50 per ton to \$39 per ton."

Outdoor Exposure Quite

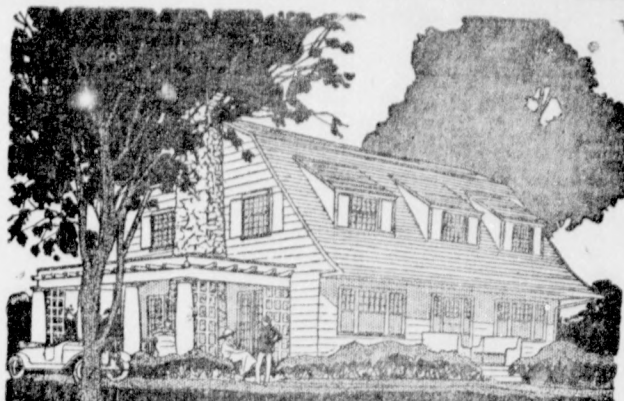

Harmful to Dairy Cows

Tests at state experiment stations show that a dairy cow drinks about four gallons of water for each gallon of milk she produces. This means that a cow giving five gallons of milk a day must have approximately 20 gallons of water.

Dairymen have observed that cows compelled to drink at an unheated outdoor tank in cold weather do not take as much water as they need. They also consider outdoor exposure harmful to the cows when the winds are cold and the weather stormy. Members of dairy herd improvement associations often find that the installation of automatic drinking cups in their barns increases the production of their cows 9 or 10 per cent. A Minnesota dairymen says that keeping a constant supply of fresh water before his cows in drinking cups saved him an hour's labor a day. He considers his investment in drinking cups one of the most profitable he ever made.

Ideal Dairy Barn

Two requirements of a dairy barn wall must be met in order to provide warmth. The wall must be airtight to prevent drafts and it must be built of materials and after a plan which reduces heat loss by radiation to a minimum. Incidentally, when both these requirements for warmth are met the problem of successful and effective ventilation is greatly simplified. Walls constructed for warmth combined with an approved ventilation system eliminate frost on walls.

Your Home

"WORK AT HOME" FAKES

Organizations throughout the country known as Better Business Bureaus, and there are branches in every city, are striving hard to weed out the fake "want ad" promoters now reaping a rich harvest through mail order papers. The government can't stamp out all of them so these bureaus are lending a helping hand. They are giving particular attention to the little ads that promise women easy money for work done at home. They find that in almost every instance the woman is asked to pay for an "outfit" with which to do the work, the cost of which is more than she will ever be able to get for whatever work she might do. Hundreds of thousands are fleeced every year by this type of advertising, and we feel sure residents of Fulton and surrounding territory have contributed their share to such fakes. The ads are alluring; they sound good, and usually the promoters manage to stay just within the law. But there is one sure way to avoid being "gypped" by them. That is to follow the advice of the Better Business Bureaus of the country and "Investigate before you invest."

HOLT-MALLORY

At a quiet ceremony at the family home on Jefferson street, Miss Sammie Kathleen Holt became the bride of Mr. Frank Gilbert Mallory, at ten o'clock, Sunday morning.

The impressive ring ceremony was read by Rev. C. H. Warren of the First Baptist church, while the couple stood before an improvised altar of banked ferns and flowers.

A program of pre-nuptial music rendered by Mrs. W. A. Love, Violinist; Miss Annie Lucille Goldsby, Vocalist, and Miss Mary Nelle Nail, pianist, included a violin solo, "Traumeri," two vocal solos, "Ah, Sweet Mystery of Life," and "I Promise." The wedding party entered to the strains of the "Bridal Chorus," from Lohengrin. Miss Vera Holt was maid of honor to her sister, while Mr. Mallory was attended by Mr. George Herndon of Hopkinsville, Kentucky.

The bride, who presented a charming picture in her gown of oyster taffeta and tulle, with accessories harmonizing, entered on the arm of her father, Mr. S. J. Holt. She wore a corsage of roses, sweet peas and lilies of the valley. "The Rosary" was softly played thruout the ceremony by Mrs. Love and Miss Nail, who also rendered "Souvenir," immediately afterward.

An informal buffet luncheon followed the wedding. The color scheme of yellow and green was carried out in the house decorations and the luncheon.

Mrs. Mallory is a popular member of the younger social set of Fulton, a girl of charming personality. Mr. Mallory is a young business man of sterling qualities and great popularity.

Mr. and Mrs. Mallory will reside in Mayfield.

Beans For Economy

IN these days of summer wardrobe and down payments on the new car, any economies we can effect in our eating expenses are apt to be welcome as long as we eat healthful foods.

Consider the possibilities of canned beans. They're both economical and nourishing, and they can be used in any number of ways. Here are two recipes, for instance, that cost respectively twelve and twenty-six cents.

Battered Beans: Heat the contents of a 10½-ounce can of stringless beans in their own liquor for about five minutes. Add salt, pepper and one and one-half tablespoons butter. This serves four.

Baked Beans with Bacon: Fry one-fourth pound bacon. Remove about half of the fat and to the rest add one sliced onion and sauté golden brown. Add the contents

Salads and Sandwiches

Orange and Green Salad: Marinate thoroughly in French dressing the contents of a No. 2 can of tiny stringless beans. Two tablespoons capers and one-half cup shredded peppers. Just before serving add one cup of shredded cabbage which has been crisping in ice water. Arrange on lettuce leaves, and grate a raw carrot over top. Serves eight.

Baked Bean Sandwiches: Mash one-half cup of cold canned baked beans, add two tablespoons chili sauce, one tablespoon chopped capers, two tablespoons dill pickles and salt and paprika, and spread between buttered slices of brown bread.

OUR MESSAGE OF SERVICE

There is going to be a lot of activity in the building line this year. Architects and contractors, carpenters and masons all, are busily sharpening up their pencils and their tools, and getting set for business. It is not the young married folks alone who are going to build homes—who dream dreams of happiness in homes of their own—but many others who have long, too long, been renting the roofs over their heads are going to try this year to realize their desire to have a home of their own.

Whatever you plan to do by way of
**BUILDING — REMODELING
REPAIRING**

Let us give you the opportunity to feel perfectly free to come in and consult our service department without the slightest obligation. Whether it's a big house or a bungalow, a new garage, new roof or new floor, a sun parlor or a sleeping porch, an alley fence, or built-in fixtures—we are prepared to give you unequalled service and low prices on Quality Material.

LET US HELP YOU MAKE YOUR
DREAMS COME TRUE.

FOOD LIKE YOU GET AT HOME

This is truly a home-like restaurant because it has endeavored to break down the prejudice based on the theory that restaurants could not serve food like you get at home. Many patrons will testify that there is no difference between our meals and the meals they get at home. That's the reason they come here so frequently to eat. Years of catering to the appetites of particular people make it possible for us to serve appetizing meals. The next time you want to eat away from home, bring your family here.

Lesson for June 22

THE RISEN LORD AND THE GREAT COMMISSION

GOLDEN TEXT—Go ye therefore and teach all nations.
LESSON TEXT—Matthew 28:1-20.
PRIMARY TOPIC—Carrying on Jesus' Work.
JUNIOR TOPIC—Our Marching Orders.
INTERMEDIATE AND SENIOR TOPIC—Our Marching Orders.
YOUNG PEOPLE AND ADULT TOPIC—The Great Commission.

I. The Empty Sepulchre (vv. 1-7).
1. The earthquake (vv. 1-4). This occurred when the glorious angel descended from heaven to roll the stone away from the tomb. This work of the angel was not to allow Jesus to escape, but to show that the tomb was empty. Christ needed not even the help of the angel, for He came forth from the grave by His own power as the seal of His atoning work on the cross (Rom. 1:4). The open tomb and the angel sitting upon the stone with calm dignity is a graphic picture of Christ's triumph over the devil, and the terror of the keepers is a sample of what all of Christ's enemies shall one day experience when He comes in glory to reign as King.
2. The angel's message to the women (vv. 5-7).
(1) Fear not (v. 5). While the enemies had occasion to fear, these women who loved the Lord received good news from the empty tomb. The empty tomb puts an end forever to all doubts and fears. Let every teacher endeavor to show the greatness of the fact that the tomb was empty, for it shows that we have a living Christ. The resurrection of Christ should be the major theme of those who give out the Christian message. (2) "Come, see" (v. 6). The angel told the women that the Lord had risen and invited them to see the place where He lay. The Lord made special effort to convince the disciples of the reality of His resurrection. He remained with them for forty days, giving them many "infallible proofs." (3) "Go quickly" (v. 7). Having seen for themselves, their responsibility was to go and tell the message. Experience is necessary before testimony. They were to go quickly to the disciples with the message, assured that the Lord would go before and meet them.

II. The Risen Lord Meets the Women (vv. 8-10).
The women quickly obeyed the command of the angel, and were running to bring word to the disciples. Jesus met them on the way. Those who have an experimental knowledge of Christ should go speedily to tell others of it. When they saw Jesus—that He was really the Lord—they worshiped Him.

III. Paying Money to Circulate a Lie (vv. 11-15).
That Jesus arose from the dead could not be denied even by the Sanhedrin. They saw only one way out of the difficulty; that was to bribe the keepers to tell a lie. They had paid money for His betrayal—now they paid more money to circulate a lie about His resurrection. This shows the wonderful power that money has over the lives and consciences of men. It not only induces people to lie, it even muzzles the mouths of some teachers and preachers.

IV. The King's Great Commission (vv. 16-20).

1. The royal authority (v. 18).
By virtue of His divine authority, He issued this command to the disciples. In order to prepare them for the reception of this command, He declared unto them that all power in heaven and earth had been given unto Him.
2. The commission itself (vv. 19, 20).
It consists of three parts. (1) Go and teach all nations. This is the first and primary business of the disciple. This command has been issued to all disciples by the risen and mighty Lord. (2) Baptize them in the name of the Father, Son, and Holy Spirit. Those who have become disciples of the Lord should receive the rite which signifies that relationship to Him. (3) Teach them to observe all of Christ's commandments (v. 20). Those who have become Christ's disciples should be taught conformity to His will.

3. The available power (v. 21).
Those who obey Christ in carrying out this commission shall enjoy His abiding presence.

Prayer the Golden Key
Prayer is a golden key which should open the morning and lock up the evening.—Bishop Hopkins.

Making Short Cuts
There are plenty of cuts across corners that one can make in life, in education, in business, in politics, in religion. But there is really no short cut to any promised land.—Edgar Whittaker Work, D. D.

Should Have Jesus With Us

SEEK GOOD ROADS

Mayfield, Ky.—County Attorney Seth T. Boaz and County Judge Clyde Burnett left Monday night for Frankfort to attend a meeting of the state highway commission in behalf of Graves county roads.

ATTACK BY MASKED MEN ENDS IN DEATH

Princeton, Ky.—Clarence Kyle, 27, farmer, died late Monday afternoon at the hospital here from wounds received from two masked men who waylaid him late Sunday night while he was on his way to his farm near Dawson Springs after attending church.

REV. E. A. TUCKER BURIED AT MURRAY

Murray, Ky.—The Rev. E. A. Tucker, presiding Methodist elder of the Lexington district, who died Sunday at Mason Memorial hospital, was buried Monday. He formerly was pastor at Murray and Hickman.

WOMEN WILL PLAY FOR STATE GOLF TITLE THIS WEEK

Covington, Ky.—Women golfers from all sections of the State are grooming for the women's State championship at the Ft. Mitchell Country Club in Covington, which starts Tuesday, June 17.

DRY AGENT TO PRISON

First Convicted of Killing to Serve Two Years

Louisville.—Commitment papers for Roy V. Miller, the first federal prohibition agent convicted of killing a woman, were filed in the federal court here Monday. Miller was charged with the murder of a woman in Warren, Ky., in 1923.

MAYFIELD CITIZEN DROPS DEAD AT HOME

Mayfield, Ky.—John W. Christie, 58, dropped dead at his home on South Third street Monday night. His death was said to have resulted from high blood pressure and heart trouble.

MILLION DOLLAR RAIN FALLS IN STATE

Louisville, Ky.—A rain said to be worth \$1,000,000 to the farmers of this area, fell here Monday, ending a long drouth. S. W. Anderson, Jefferson county agricultural agent, who described it as a million dollar rain, said it would be salvation of the corn, potato and tobacco crops. A few more days of drouth would have wiped out the potato crop, he said.

Route 5 News

Mr. and Mrs. Harvey Vaughn's little daughter, Melva June, is very ill with colitis. Mrs. Tilman Oliver has had an attack of appendicitis. Mr. Beckam Vaughan has been suffering with gallstone colic. Mrs. Vaughan has been having trouble with her gums after having had some teeth removed. Mrs. Calvin Orr is recovering from an illness caused by indigestion. Mrs. Meakin Nanney has been ill for two weeks with a touch of malaria or typhoid. Mr. Jess Bunton, who lives at the Hendon place is in a very critical condition mentally. His brother has been called to advise with Mrs. Bunton in regard to his condition. Guy Finch left Wednesday for Fort Oglethorpe, Ga., to enter the Citizens Military Training Camp for one month. These college boys think

they can get on a highway and go anywhere, and it seems they get quite a kick out of it. "Hitch Hiking" they call it, and they do get away with it all right. Guy met an accommodating lawyer from Nashville at the Usona hotel, Wednesday morning, rode with him to Nashville, was picked up by a Vanderbilt student on his way to a college affair at Tullahoma. One more ride put him in Chattanooga at 12 o'clock, Thursday, one day ahead of schedule. This day was spent in sight seeing in and around Chattanooga, which is so rich in beautiful scenery and historic lore.

Mrs. A. J. Butts, Mrs. Ion and Roy Watts, Mrs. Finch, Doris, Robbie Watts and Emily Thompson canned chicken for Mrs. Butts, Thursday. Four big roasters were dressed and put on ice Wednesday. Cooked one hour in the pressure cooker, boned, canned and cooked 45 minutes in the can under 15 lbs. pressure, Thursday. Results, 16 No. 2 cans of chicken on Mrs. Butts emergency shelf and an enjoyable day for the ladies.

Miss Helen Killebrew entertained a number of the younger set with a birthday dinner, Sunday.

Mr. and Mrs. Lee Jones and son, Henson, spent a few days last week with Mr. Jones' brother, Stanley, of near Pilot Oak.

Willingham Bridge

Mrs. Leighman Elliott visited Mrs. Elbert Bondurant, Tuesday afternoon.

Several from this community visited the Child Health Conference at Lodgston Tuesday afternoon.

Mr. Cornelius Bondurant of Caruthersville, Mo., is visiting relatives and friends of this community.

Mrs. Willie Jeffress and daughter, Louise, spent Wednesday with Mrs. Herman Harrison.

Mrs. J. Stallins and daughter, Tommie, visited Mrs. Elbert Bondurant, Thursday afternoon.

At Leighman Elliott spent Wednesday with Mrs. Raymond Elliott of near Cayce.

Mr. and Mrs. Henry Walker and children, Mr. and Mrs. Burnie Stallins and children spent Sunday with Mr. and Mrs. Tom Stallins and family.

Mrs. Herman Roberts and daughter, Mildred, and Louise King were Monday afternoon guests of Mrs. Leighman Elliott.

McFadden News

Mrs. Sid Haworth and daughters, Willie and Avil, of Bardwell, and Miss Clevea Emalynn Bard, of Murray State Teachers College, were Saturday evening guests of Mr. and Mrs. Cleveland Bard.

Mr. and Mrs. Herbert Howell and Mr. and Mrs. Sam Hodges and children spent Sunday with Mrs. J. R. Powell.

Mr. and Mrs. Charles Burgess were Sunday guests of Mr. and Mrs. Luther Bradley.

Mr. and Mrs. Jake Smith spent Saturday night and Sunday with Mr. and Mrs. Louis Sams near Bardwell.

Miss Margarette Bard of Fulton spent a few days of last week at the home of Mr. and Mrs. Cleveland Bard.

Mr. and Mrs. Obey Cooke and family spent Sunday afternoon with Mr. and Mrs. Lee Underwood.

Mr. and Mrs. James Dawes spent the week end with relatives in Benton.

Miss Alma McGary is spending the week with her aunt Mrs. E. L. Putman.

Mr. John R. McGeehee spent Sunday with Mr. Will McGeehee in Cayce.

Miss Elizabeth Hampton of Cayce spent last week with Mrs. S. A. Bard and Miss Hatie Hampton.

Mr. and Mrs. John Daniel are spending the week with the latter's parents Mr. and Mrs. C. J. Bowers.

France is said to be the only big nation without a national sport. They seem to get most of their fun out of gouging the tourists.

Beautiful Farms In Fulton County.

(Continued from first page)

considerable number of livestock. He has a nice herd of cattle; a beautiful flock of sheep, and his wife grows purebred white wyandot chickens. Mr. Maddox has not limed his farm but grows clover fairly well. His pasture consists of a mixture of grass, Japan clover and some red clover. His total score was 930 out of a possible 1,000 points.

The committee next visited the farm of Leighman Drysdale in the Palestine community. Mr. Drysdale does general farming besides growing livestock and running a dairy. Several years ago he bought his farm which was in low state of cultivation, and by successful handling he has improved it until today it is producing good results. He has limed the fields and today has 60 acres of his 140 acres in clover. He grows tobacco, corn and hay besides his pasture. He has some purebred livestock and the rest of them are of high producing grades. Mr. Drysdale has a clean and up-to-date dairy farm from which he sells whole milk to his patrons in Fulton. Running water is furnished his livestock and his premises are kept clean and orderly. Mr. Drysdale's home provides all the conveniences anyone might desire. Through the use of excellent business methods he has made more than 6 per cent on his entire investment over a period of three years after all expenses were deducted. His yields are being increased from year to year and his soil made richer. His score was 945 out of a possible 1,000.

The last farm to be visited was that of Ed Thompson, who also lives on the Middle road in the Palestine community. Here is to be found a farm that is laid out in an ideal way. There is no ditch on the farm that would interfere with cultivation; every fence is in the very best repair and his buildings of all kinds are in good shape. At the present time painters are going over them again. Mr. Thompson has limed his land and grows tobacco, corn, wheat and clover, besides his excellent pastures of a mixture of grass and clover. He grows livestock, some of which are purebred, but does not grow purebred chickens. His house is modern and beautiful, with every convenience that his family desires. Good business methods have been employed on this farm and excellent results have been obtained. His crop yields are far above the average for the county. His score was 935 out of a possible 1,000 points.

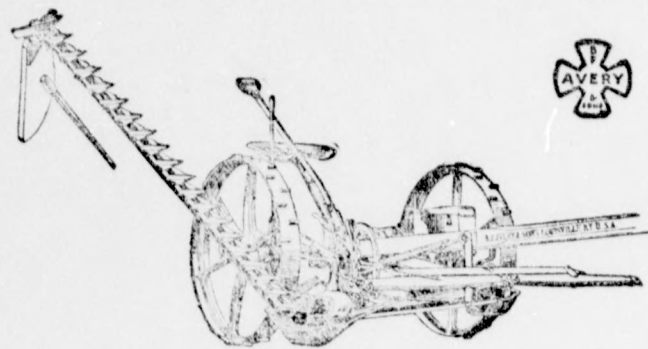

In four of the homes visited Monday, the committee found electricity used for lights and power from which fresh water was pumped for the houses and the barns. Bath rooms were used with the proper sewer disposal, houses were well painted, and shrubbery and flowers tastefully arranged. In these homes were to be found the modern labor saving devices, such as vacuum cleaners, electric churns, irons, toasters and electric washing machines. Plenty of shade with beautiful grass growing in the yards made wonderful settings for homes that provide happiness for the owners. If more farmers throughout our section would employ these good methods of improvement and follow diversified farming; growing livestock of the better grades and beautify their homes, there would be less trouble on the part of the parents to interest their children in keeping up the old homestead.

It would benefit any citizen to take a few hours off and drive out to some of these farms and see what really can be done.

The committee feels very much indebted to Mrs. Jim Maddox for the wonderful lunch served them in her home.

For a short time we will accept subscriptions for this paper and the Memphis Weekly Commercial Appeal—both papers one year for only \$1.25.

AVERY CHAMPION MOWERS

Why the Champion is "Champion"!
Because (1) Lightest weight and draft (2) Regularity of Vertical Lift (3) Permanent adjustment of knife and pitman (4) Self adjustment (5) Correct lubrication (6) Strong connections (7) Case hardened wearing plates and gear adjustments (8) Rigidity of frame and simplicity (9) 100 year successful manufacturing experience.

All that the name implies—

If you've ever wanted a mowing machine that would do the job easier, better and keep right on season after season, here it is—the Avery Champion.

Regular or Vertical Lift

The Avery Champion cuts all kinds of grass under all normal conditions. It has tremendous cutting power and lasting power. No lost motion in the pitman, and the knife and the pitman are always kept in perfect alignment—assuring entire satisfaction wherever used.

The Avery Champion is made with either the Regular or Vertical lift. Both machines have the same valuable features with the exception that the Vertical lift enables you to

cut around trees and places where there are stumps and stones with the least possible effort.

One or Two Horse

Avery Champions are built with either wood or steel pitman and are obtainable at your dealer's in one or two horse models. They have behind them more than a century of experience in the making of America's leading lawnmaking machinery, and every Champion can be depended upon to deliver long, enduring service at least cost to you.

Before buying any mowing machine, look into the Avery Champion. It has won the approval of thousands of none-too-easily-satisfied farmers, and is sure to please you in every way.

KENTUCKY HARDWARE & IMPLEMENT CO.

CANNED FOODS IN THE ANTARCTIC

It is a well-known fact that the great metropolitan cities of our modern civilization could not exist if the scientific method of preserving foods known as canning had not been invented, but the following article about the Byrd Antarctic Expedition, quoted from a recent issue of the Canning Trade shows how this invention has also helped mankind to penetrate the wild and unsettled regions of the earth.

"A polar expedition," this article states, "not only 'travels on its stomach,' but cannot replenish the larder by purchasing or commandeering coffee and bacon when supplies run low. So when Admiral Richard E. Byrd laid his plans for exploring the most desolate icebound region in the world his list of supplies included a variety of food items sufficient to provide an all-around diet and guard against monotony."

As the Byrd Antarctic Expedition was the most comprehensive polar exploration project ever attempted, these food items were stocked in wholesale quantities, reaching a total of approximately 100 tons. The list included such staples as 2 1/2 tons coffee, 5 tons beef, 3 tons dried fruits, 3 tons bacon, 2 tons ham, 500 cases of eggs, 2 1/2 tons cereals, 2 tons each of corned shoulder, tongue and sparerib, 1 ton each of lard, jam, chicken and powdered milk, 15 tons of candy. The personal tastes of the adventurers were not overlooked; 500,000 cigarettes, tobacco approximating a ton and an ample stock of pipes doubtless helped to ease the long days of loneliness.

"Preparing the expedition's stock of provisions for shipment on the 7,000-mile voyage to Antarctica was one of the major problems in advance of this unique undertaking. It was important that the weight of the various articles and the space they would occupy on shipboard be reduced to the minimum. Equally important was the problem of keeping the food from becoming stale or rancid during the long voyage."

It is a well-known fact that the great metropolitan cities of our modern civilization could not exist if the scientific method of preserving foods known as canning had not been invented, but the following article about the Byrd Antarctic Expedition, quoted from a recent issue of the Canning Trade shows how this invention has also helped mankind to penetrate the wild and unsettled regions of the earth.

precious foodstuffs. To safeguard against rust, each can was double coated with a maroon paint, chosen after thorough temperature and exposure tests. The cans were opened by cutting around the side so that no paint particles would fall into the food. The cans of coffee and some other dry foods were vacuumized in the process of sealing.

"According to reports the expedition carried out the plan of using the boxes to form the walls of 'igloo' storehouses, laying them in staggered formation like bricks laid up in running or stretcher courses. The walls were supported by wooden roofs and the whole covered with tarpaulin, which in turn was buried under snow. A stenciled label on the opening side of each box showed the nature of the contents. Thus the commissary also constituted the kitchen, and the cook was surrounded by the tons of sausage, chicken, lard, cheese, milk, eggs, jam, pickles and other items that constituted his larder during the long siege. The cook performed his culinary functions on a regular coal stove. When he clipped the wires to open the side of a box and take a can of coffee from the shelf the box was resealed, the procedure in no way affecting the solidity of the wall.

"The furious sub-zero gales that sweep Little America in the winter season, and make this region the most forbidding of any known to explorers, were responsible for the plan to set all of the housing units into the solid ice to a depth of four feet for protection. In order to 'hole out' when the savage blasts made outdoor movement hazardous, the camp units were connected by means of tunnels, also set into the ice. Boxes formed the tunnel walls, which were built to the necessary height, roofed and buried in snow. No doubt the camp is so solidly frozen into the perpetual ice that boxes containing this food, safely frozen, will be found by explorers many years in the future."
