### The New Austin Bantam Car

Now On Display At the Snow-White Motor Company Garage On Fourth Street.

At last, the New Austin Bantam, a car to run around in, has arrived in Fulton and now on display at the Snow-White Motor Co.'s garage on Fourth street, the authorized dealers for Fulton and surrounding territory.

This handy little car is designed for compactness. It is no larger than necessary to transport you and a companion anywhere. The wheelbase is 75 inches, twenty-eight inches less than any standard car now in production. The tread of the bantam is 16 inches less than standard. These proportions combined with its quick acceleration and general ability to dash in and out of traffic gets you places as comfortably and with less fuss and bother than a big cumbersome car.

This Bantam car will do 40 miles on a gallon of gasoline. Indeed in tests has repeatedly done better than 55 miles on a gallon. The crank case holds but two quarts of oil, so little does it use that it will not need refilling until the oil is changed at each 1,000 miles.

The light weight and exceptional pace of the Austin Bantam give you from 20,000 to 40,000 miles on a set of tires.

The cost of gas, oil and tires will be less than 7 cents per mile!

The Austin has won over 100 prizes—over 200 of which have been firsts—for speed, hill climbing and endurance on four continents. They were all made with regular stock Austins except that some were equipped with high lift camshafts and superchargers. The American Austin has a speed of over 50 miles an hour, plenty for the uses to which this bantam car will be put.

It is the lowest priced car on the market today. Call at the Snow-White garage and look it over.

#### J. W. FARMER DEATH'S VICTIM

Mayfield, June 23—J. W. Farmer, 68 years of age, prominent hotel operator of Mayfield, died at his home at the Farmer House, on East Broadway this afternoon at 1:30 o'clock from the effects of a stroke of paralysis suffered last night. Mr. Farmer had been in ill health for several months. Funeral services will be held 3 o'clock Tuesday afternoon at the First Baptist church. Interment will be in Highland Park.

Mr. Farmer is survived by his widow, Mrs. Dovie E. Farmer, and the following children: R. B. Dickson, Tenn.; Mrs. Charles Smith and Mrs. Joe Barger, Martin, Tenn.; Mrs. R. R. Smith, Mt. Avery, La., and Wilbur, at home. He is also survived by two sisters, Mrs. Cora Smith, Paris, Tenn.; Mrs. Mary Ann Aycock, Terrell, Tenn., and a brother, L. A. Farmer of Fulton.

#### Wife of Former Fulton Pastor Dies.

Mrs. R. W. Hood, wife of the Rev. R. W. Hood, pastor of the Fulton church here for several years, died Monday at her home in Collierville, Tenn.

#### MID-SOUTH FAIR DATES ANNOUNCED FOR SEPT. 20 TO 27

Memphis, Tenn.—The Mid-South Fair at Memphis this year will rank as the leading livestock exposition of the south as well as the biggest agricultural fair, it is indicated in preliminary announcements today. Fair week is to be from September 20 to 27 inclusive.

An exhibition of southern-owned dairy cattle by breeders and enthusiasts who have had little or no experience in the show ring but who are developing fine herds, is to be a feature this year. Special classes with liberal cash premiums are offered to these exhibitors of Jersey, Guernsey and Holstein dairy cattle. Educational displays and dairy products exhibits will be on a big scale. There will be special dairy cattle judging contests for both 4-H club members and Smith-Hughes vocational students in addition to \$3,000 in prizes for exhibits of dairy calves by 4-H club members.

General agricultural exhibits, including farm machinery displays, will be larger this year than ever before.

Officials of the fair are anxious that all mid-south farmers take an active part in the Memphis exposition, suggesting that they start now to develop farm products so they can show them. There are liberal cash prizes for practically everything that southern farms produce.

#### CHILD HEALTH DEMONSTRATIONS

Recent activities of the Mother and Child Health Demonstration and the Fulton County Health Department include: Child Health Conference at Madrid Bend, Crutchfield, Hickman, Bondurant, Koper and Sylvan Shade. Prenatal conferences at Hickman and Fulton, a day spent examining some of the employees at Mangel Company. Most of the Child Health Conferences have been well attended. The parents have been eager to attain and maintain higher standards of health of their children.

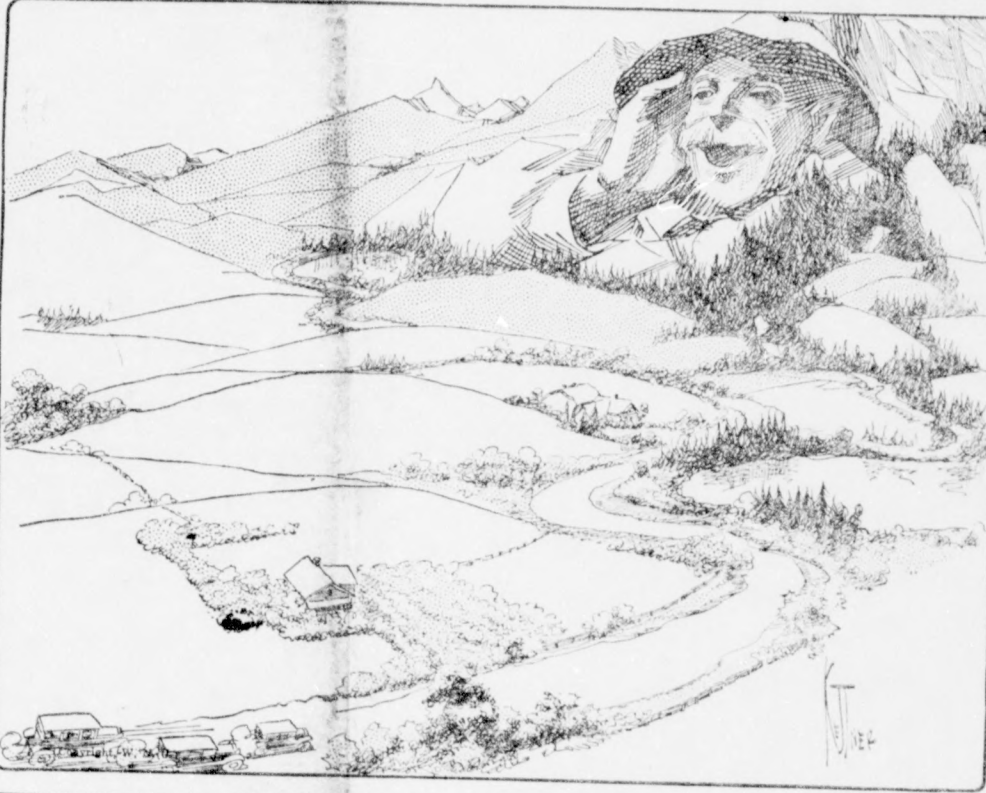

Mrs. Philena Brown, supervising nurse of McCracken County Health League, of Paducah, is spending a week here with Mother and Child Health Demonstration.

#### Woman's Committee of Utilities to Meet Today

The woman's committee of the Paducah District of the Kentucky Utilities company, composed of Paducah, Fulton, Hickman and Clinton, will entertain with a program and tea at the Fulton Country Club this afternoon at 3 o'clock. Miss Menia Jennings, District chairman of the women's committee of Paducah, E. C. Hardesty, manager here of the Kentucky Utilities Co., Mrs. Hattie A. Wood and Miss Mary Hill, of the local organization, are in charge of the arrangements.

By the time the average college boy of today succeeds in accumulating horsehide, the pigskin, the coonskin and finally the sheepskin, poor father hasn't much hide left either.

### The Great Outdoors Is Calling

### Editor Inspects Coca-Cola Plant

On our rounds this week we visited one of Fulton's outstanding manufacturing plants where they make that refreshing drink known the world over as Coca-Cola.

Mr. L. T. Bell, the genial manager, who has been in charge of the local plant since 1919, gave us a hearty welcome and took us through the plant on an inspection tour.

You know Hugh Smith, the Coca-Cola king of Union City, built a new home in Fulton last year for his factory here, and Mr. Bell takes great interest and pride in showing visitors through. It is a handsome building located on Burton avenue and the interior furnishings and equipment is the best money can buy, absolutely sanitary and spotlessly clean. Hot and cold water play an important part at this factory. Every bottle is sterilized and inspected before and after it is filled.

It is an interesting sight to watch the process of manufacture and bottling at this plant and note the route each bottle travels from the time it enters the wonderful bottling machine until it is placed in cases ready for delivery.

The Fulton Coca-Cola Company not only bottles Coca-Cola, but it makes pure soda water from real fruit juices of best quality.

The machine turns out 31 bottles per minute and the plant has a capacity of 750 cases per day. They operate three trucks in and out of Fulton, supplying all of the smaller towns in this territory.

You will enjoy a visit at this plant and Manager Bell will give you a hearty welcome at any time.

#### BURY J. C. PITTMAN

Mayfield, Ky.—Funeral services for J. C. Pittman, 77, resident of the Lynnville section of this county, who died Saturday evening at his home from illness of complications were held Sunday afternoon at the Lynnville Methodist church with the Rev. Potts of Sedalia in charge. Interment was in the Seay cemetery, south of Mayfield.

Read the advertisements in this paper.

#### REVIVAL AT CENTRAL CHURCH OF CHRIST

REV. E. H. HOOVER

Beginning Sunday, June 29, the Central Church of Christ will hold a two weeks revival, with E. H. Hoover, of Chattanooga, Tenn., doing the preaching.

Congregational singing will be led by Basil Doran, of Mayfield, Ky. We believe you will enjoy the preaching, and singing.

Evangelist Hoover is the minister of the large Central Church of Christ, in Chattanooga. He has labored with that church for fourteen years. He is a very spiritual man, and preaches the "Gospel of the Grace of God" in the spirit of the Lord Jesus.

We hope to make this meeting a blessing to Fulton and surrounding country. You are invited to lay aside your work and cares for one hour each day, 7:45 to 8:45 p. m., come and hear the Sweet Story of the Cross of Christ, and the Love of God for poor lost humanity, preached in the Spirit of Love.

#### ONE KILLED AND FIVE INJURED IN AUTO WRECK

In an attempt to avoid hitting a buggy on Jeff Davis Highway 3 miles south of Fulton last week Lloyd Nicholson, 30, of Helena, Ark., was instantly killed and five others suffered injuries when the Hudson car driven by Nicholson at a rapid speed, left the road and turned over. Those injured were James Nall, 14, Clinton, Ky., fractured rib; Jen Henry, 15, Columbus, Ky.; C. J. Lawrence, Helena, Ark., and his two sons, Russell, 7; and Charlie, 3. The injured were brought to Fulton and after treatment at Dr. Seldon Cohn's office, left for their respective homes. The body of the dead man was shipped to Fort Smith, Ark., for interment.

#### A WONDERFUL TRANSFORMATION

"Tin Can Park" on Fourth street, near the passenger depot, has passed out of existence and after being a disgusting eyecore for many years, today looks like a millionaire's playground.

For several weeks, Ralph Hornbeak and Charles Gregory, with a force of workmen, have been busy at work on the lot, beautifying and constructing the Topsy Turvy Miniature Golf Course, said to be the best 18 hole golf course in the state. Out of doors recreation is all the go now and Fulton is to be congratulated on having in its midst two young men capable of furnishing just that kind of clean, wholesome recreation that can be enjoyed by everybody. While it has been said that golf is a millionaire's recreation, not so in Fulton. Everyone here has an opportunity to take part in the sport. It is very fascinating and offers all the exercise one needs to keep the blood in circulation.

"The Topsy Turvy golf course will be open day and night," says Mr. Gregory, "but will absolutely be closed on Sundays."

Messrs. Hornbeak and Gregory are to be commended on their efforts and we feel that parents can safely entrust their children to their care when playing golf on their course, Fulton's ideal playground for old and young. At night the grounds are brilliantly lighted.

#### Work On Highway 51 Will Start Next Week

Contractors and engineers are busy getting things lined up preparatory to start work on resurfacing highway 51 from Fulton to Wickliffe. The contract is for concrete and work will begin next week.

#### CLINTON MAN ACCUSED OF HAVING STILL

Clinton, Ky., June 23—Curley Potts, charged with having a still on his premises, was fined \$300, sentenced to thirty days in jail, and placed under \$1,000 peace bond.

#### Brieflets

Another good way to tell Fulton mothers and daughters apart is by looking at their hands. Mother's are slightly red from dabbling in dish-water.

A news dispatch says Lithuania is exporting rags to the U. S. So that is where the tail ends we see hanging down from the new skirts come from.

Now that the average Fulton man has gotten around to wearing a straw hat his wife is looking at the early autumn styles.

If you have a hard time making ends meet, think of the poor little moth. She's always on the ragged edge.

Now they're advertising a book called, "What All Women Want." How did they get all that in one book?

You can say this for the modern Fulton girl—she dearly loves the spinning wheel. That is, if it happens to be on an auto.

King Alfonso of Spain has been made a member of the cigarmakers' union. You can't tell these days when a king may have to go to work.

Ice cream has been shipped successfully by parcel post. It should be marked, "If not delivered in five days, never mind."

What has become of the old-fashioned Fulton girl who used to say: "Mother, do I look all right?" before going to a party?

Gasoline costs 80c a gallon in the shiekas. We bet the sheiks there never take a dusky belle riding unless they mean to propose.

A chemist says the average human heart contains copper, silver and aluminum. But he forgot to add that many are 75 per cent marble.

Why is it that when some Fulton women go into a store to do a little shopping they go at it as though they were taking an inventory of the stock?

We might improve conditions by putting the brain under the hood of the car and the motor in the driver's head.

They say there will be music in heaven, but we hope that when we get there we won't find a lot of mosquitoes singing in the chorus.

#### Much Property Damaged By Wind Storm

Wednesday afternoon a severe wind storm swept through west Kentucky injuring several and doing much property damage.

#### HORTON-STRANGE

The marriage of Miss Helen Vanlea Horton, granddaughter of Mr. and Mrs. A. U. Horton, 123 Oak St., and Mr. Howard Thomas Strange, son of Mr. and Mrs. T. J. Strange, of Dyersburg, Tenn., was solemnized at the Cumberland Presbyterian parsonage, 406 Park Ave., Sunday, 1:30 o'clock. The Rev. L. E. McCoy performed the ceremony in the presence of a few relatives and intimate friends.

Mrs. Strange is a graduate of the 1930 class South Fulton High school, and is very popular and accomplished. Mr. Strange is a Fulton man and holds a responsible position with the Strand Amusement Co., at the Grand theatre.

They are at home at the Johnson boarding house, 315 Carr St.

## You can't paint a house with APPLE- SAUCE!

It takes fine old SWP House Paint to give you a rich, durable and economical finish on your house. "Cheap" paint is just "Applesauce." Often its cheap-looking finish doesn't last a season. Figured over a five-year period, it costs two, three, or more times as much as SWP, the finest house paint to be had.

Ask us to explain  
in detail

**Bennell's Drug Store**  
211 MAIN STREET, FULTON, KY.

### That New "Red Strand" Fence

Five Reasons Why  
It's the Fence to Buy

- (1) An extra heavy coating of zinc on open hearth steel wire that has copper in it gives Red Strand Square Deal fence 2 to 3 times longer life.
- (2) Full gauge wires last longer and make a stronger fence. Square Deal fence is never under gauge.
- (3) The famous Square Deal knot will absolutely not slip—guaranteed. It holds line and stay wires in a firm grip.
- (4) Stiff stay wires make for added strength and demand fewer posts. They prevent sagging and keep the fence trim and tight.
- (5) NO EXTRA PRICE—you get all these advantages in Red Strand Square Deal fence at NO EXTRA PRICE.

MADE ONLY BY  
KEYSTONE STEEL & WIRE CO.  
PEORIA, ILL.

**Kentucky  
Hardware &  
Implement Co.**  
FULTON, KY.

A nice gift. Send The Advertiser to a friend one year—only \$1.00.

### Water Valley, Ky. (Blair Vicinity)

Mrs. Harry Fite and little son, Ralph, and Miss Manola Bryan, of Birmingham, Mich., are visiting relatives and friends here.

Mrs. A. G. Stewart and little daughter, Anita Gene, visited Mrs. J. T. Robey last Thursday.

Miss Rebecca Robey visited homefolks last week end.

Mr. Andrew Robey has purchased a new Ford sedan.

Mr. Preston Brown has purchased a Ford touring car.

Mrs. Jessie Allen has been very ill but is much better now.

Mr. and Mrs. Hester Wiley visited Mr. and Mrs. John Boaz last Saturday night and Sunday.

Mr. W. A. Stewart and family visited Mr. Lofton Singleton and family, last Sunday afternoon.

Mrs. Leonard Wilson has purchased a nice new cook stove.

Mr. Don Burrow is driving a fish truck out of Hickman and supplying people of this and other localities with river fish three days of each week.

Crops and gardens are looking good here.

These hot days remind us that summer is really here.

### "The Rats Around My Place Were Wise," Says John Tutbill.

"Tried everything to kill them. Mixed poison with meal, meat, cheese, etc. Wouldn't touch it. Tried RAT-SNAP. Inside of ten days got rid of all rats." You don't have to mix RAT-SNAP with food. Saves fussing, bother. Break a cake of RAT-SNAP, lay it where rats scamper. You will see no more. Three sizes, 35c, 65c, \$1.25. Sold and guaranteed by Kentucky Hardware & Implement Co.

### IS YOUR CHILD HAPPY?

The happy child is usually the healthy child. The happy child is the obedient child. Overfatigue causes fretfulness, irritability, poor posture, etc. These long hot days especially do children require sufficient rest and sleep.

Sunbaths should be given before 9 a. m., or after 4 p. m.

No sweets between meals, as sweets satisfy hunger before the body needs are met. A fourth meal may be given of fruits or milk. In summer when the child is not hungry, do not force feeding but give fruit juices.

Call a doctor if there is any symptoms of illness.

Regularity is the keynote, regularity of eating, resting and elimination.

The growing child should not have the responsibility of managing the parents and the household. Dr. Emerson, of Boston, insists that the growing child should not be subject to the strain of putting up a bluff and suspense of whether they will get their own way or not. He says that this is one of the greatest causes of nervousness, underweight and unhappiness. A pampered and overindulged child is always unhappy. Children react to well ordered homes and wholesome environment.

Look to your child's happiness by looking to his health habits rather than indulgence and irregularity.

### Mr. R. C. King Tells a Wonderful Story About Rats. Read It.

"For months my place was alive with rats. Losing chickens, eggs, feed. Friend told me to try RAT-SNAP. I did. Somewhat disappointed at first not seeing many dead rats, but in a few days didn't see a live one. What were not killed are not around my place. RAT-SNAP sure does the trick." Three sizes, 35c, 65c, \$1.25. Sold and guaranteed by

Kentucky Hardware & Implement Co.

For a short time we will accept subscriptions for this paper and the Memphis Weekly Commercial Appeal—both papers one year for only \$1.25.

### SEES HEAVY CLAIMS ON FUTURE BANKERS

American Bankers Association Official Declares That Banking Changes Creating Large Bank Systems Will Call for Broader Social Viewpoints.

Larger scale group or branch banking will inevitably bring a new era of banking organization and operations to the United States and bankers will have to develop "new conceptions, new administrative methods and new economic views," Rudolf S. Hecht, Chairman of the Economic Policy Commission of the American Bankers Association, recently told the members of the American Institute of Banking.

The institute is the educational section of the association and he emphasized the point that the new era in banking demanded "that we must step up our education so that banking shall be fortified for new responsibilities."

#### What the Future Calls For

"We must broaden our social conception of banking," Mr. Hecht said. "Not only for the technical operations of the new banking must we fit ourselves, but both as individuals and an organized profession we must charge ourselves with serious consideration of the social problems that are involved. Already we hear murmurs and fears and doubts as to whether the changes that are coming about in banking in the extension of group and branch systems do not constitute the looming of a new financial menace, a monopolistic threat not only to the individual unit banker, but to the financial liberty of society in general. I am stating these things merely as facts that must be taken into consideration in our studies."

"Public opinion cannot be ignored by any business, least of all by banking, which is admittedly a public utility in character and is, therefore, subject to special supervision by the constituted authorities. If banking develops tendencies that give rise to public fears, we must so conduct ourselves as to reassure all doubts."

"For this is true,—that business succeeds only by serving society—that no business can permanently prosper which does not both render service to the public and at the same time convince the public that it is rendering that service. Banking, therefore, must take cognizance of what the public is saying of this new era in its development."

"It must be part of the technique of modern banking administration, whatever form our enlarged institutions take, to avoid the creation of monopolies, or even the appearance of such a centralization of financial power as to be able to exercise an undue influence over public or private finance or other lines of business. The public's right to the safeguards of fair competition must be observed."

#### Must Preserve Individual Initiative

"It must also be an item of management that individual initiative and opportunity shall be maintained. If America has outstripped other nations in the distribution of the benefits of its progress, it is due to the fact that there are no barriers of social caste or business tradition against advancement for character, ability, and initiative. American business has learned that it serves itself best by encouraging by every practical means individual ambition and initiative, and hurts itself most by repressing or neglecting them. Competition for efficiency, both within an organization and between organizations, will prevent any institution from long enduring in which maintenance of opportunity and recognition of initiative are not controlling principles of management. As heads of the greatest of our financial and industrial institutions stand men who started from the humblest of beginnings. Through all the grades of executive authority and reward stand men in positions of keeping, generally speaking, with their individual merits. I personally see no reason for fearing that the enlarged banking organizations which the future may hold would necessarily supply future bank employees with any less opportunity for achievement than unit banking."

"Again, a major consideration of administration in any multiple form of banking organization must be its public relations in every community it touches. Its foremost consideration must be actually and visibly to serve the economic upbuilding of that community. No system will be long tolerated whose local members work, or are suspected as working, to draw economic strength from one place to enlarge the financial power of another. The local unit bank has always been part and parcel of the communities where it lives—and no system can last which does not make it a major principle of operating technique to serve, and not exploit, the communities into whose business lives it enters."

Growth of Banking Education  
DENVER, Colo.—At the American Institute of Banking convention held here last month the growth in the effort among bank employees to provide themselves with banking education was shown by the fact, as reported by one speaker, that 12 years ago the institute had 80 study chapters, today 208, and that its enrollment in the study courses had grown from 11,000 to 45,000, or an increase of over 300 per cent. The graduates number nearly 11,000. The institute is the educational section of the American Bankers Association through which bank workers are given instruction in theoretical and practical subjects relating to their business.

### Watch the Water.

We read in a press dispatch from Akron, O., that 7 members of one family are near death there as the result of drinking from a contaminated spring while they were motoring. It simply bears out a warning we have previously issued to Fulton motorists. It is never safe to drink from a spring or well without first being sure of the quality of the water it is given forth. Unless it has been marked "Safe for Drinking Purposes," as some states are now doing, it is always best to go thirsty until you can find someone who actually knows whether or not it is pure. Looks do not mean anything. With the season of typhoid and kindred diseases upon us, it is unwise to take even the slightest chance of contracting what may prove a fatal illness. Carry your own water jar, for filling with pure water as you go along, or make sure of what you are drinking if you must depend on springs and wells. Don't take it for granted that the water is pure simply because it looks good.

### Our Changing Times

Straws still show which way the wind blows, and changing business conditions still serve to show how times have changed since our fathers were boys. We see where the J. B. Sickle Co., of St. Louis, the oldest saddle and harness makers in the United States, have gone out of business. Since away back in 1854 this concern was widely known throughout 15 western states. When St. Louis was frontier of the west and all wagon trains started from there, this was the city's best known business concern. But with the advent in recent years of the tractor and truck and passenger auto the harness maker found it harder and harder to keep going. Many of them turned to upholstery. In towns like Fulton ready-made harness and saddlery came to be a part of general merchandising, and the harness maker found a new competition undreamed of 25 or 30 years ago. There will always be a demand for harness and saddles, of course. But the harness shop, like the blacksmith shop, has seen its day and as a business both of them have just about passed into history.

### Does it Pay?

Scarcity of doctors in rural sections has commanded a great deal of attention from public men within the past few months. Numerous remedies to correct the evil have been proposed, and various reasons are assigned for the shortage. But none of them hit the spot. The answer is simply—bad roads. Far distant communities that can be reached by hard-surfaced roads have no difficulty in securing medical attention. But the man away back at the end of a mud trail is the fellow whose family suffers most and oftenest. Nowadays a doctor can drive fifty miles on an improved road in less time than it takes to cover two miles of horrible mud road. As a result, the sick suffer and die. There's far more to good roads than their saving in time and money. There is the matter of human life. If we will look at it from that standpoint, instead of figuring on how much money we can save, maybe we'll do less kicking about the cost of roads and take a little more interest in getting every mile of highway in our territory improved.

## THE GLORIOUS FOURTH

We have come a long way since the nation celebrated its first birthday, and we've learned a lot of things. We have discovered that it is not wise to make war, but the part of wisdom to be prepared for it. We have found that nations, like individuals, are sure of trouble if they hunt for it, but apt to escape it by being ready to meet it if it comes.

All of which is worth something to us as we come again to celebrate the birth of our country—its 154th birthday. This Glorious Fourth sees us farther from war than we have been at any time in history and with a greater hatred for war and the things that make war than we have ever had. The Fourth of July has come to mean more to us, since today it finds us meaning more among the nations of the world. Today they look to us for both precept and example. They honor us for our desire to maintain peace, and they are glad to join with us in seeking ways to make the happiness and prosperity and contentment of the whole world secure.

Fireworks and noise-making on the Fourth doesn't mean that we glory in warfare, or that we are boasting of our strength. It is just our way of celebrating an event that has had a lot to do with making the world both better and peaceful. We're happy because we are at peace with the world and we want the world to know it. There's no chip on our shoulder; no hatred in our hearts; no ill-will toward other nations. We've grown from nothing to the world's greatest republic in 154 years—and what nation wouldn't be happy to celebrate such an achievement? The Fourth of July offers us an opportunity to unburden our happiness, which is just another name for patriotism, and to work off a lot of excess enthusiasm. And this year, the same as for 154 years, we're doing it in the hope that some day the whole world will have occasion to rejoice with us over the fact that a nation can be peace-loving and patriotic at the same time.

### WEATHER SIGNS

It is always a good plan, on traveling into new country, to inquire of the natives regarding the prevailing weather signs and probabilities. For instance, there is always one wind that commonly brings rain, another that prevails only during fair weather, and so on.

Every district, too, has its old traditional signs, such as, for fair weather, cobwebs on wet grass; crimson sunset; swallows flying high; rainbow at night; heavy dew in the evening. Their bad weather indications are, woodpeckers and bluejays very noisy; swallows flying low; sun shining through watery haze; rainbow in the morning; a halo round the moon; dark clouds blown rapidly under lighter ones. There are only a few of the ancient rules, many of them being good enough, at least, to give fair warning.

Motorists around Fulton are now planning their vacations, or at least those fortunate enough to be able to take a little time off are doing so. So the suggestion that they pause along the route to talk over the weather with the natives of whatever section they happen to be driving in is a timely one. It may save a lot of traffic annoyances and disagreeable driving conditions. Consulting an almanac may still be popular with many people, but getting an actual line on the weather as you go along is far more satisfactory. Try it when you venture forth on any auto trip that keeps you on the road for several days at a stretch.

### OUR MESSAGE OF SERVICE

There is going to be a lot of activity in the building line this year. Architects and contractors, carpenters and masons all, are busily sharpening up their pencils and their tools, and getting set for business. It is not the young married folks alone who are going to build homes—who dream dreams of happiness in homes of their own—but many others who have long, too long, been renting the roofs over their heads are going to try this year to realize their desire to have a home of their own.

Whatever you plan to do by way of  
**BUILDING — REMODELING  
REPAIRING**

we want you to feel perfectly free to come in and consult our service department without the slightest obligation. Whether it's a big house or a bungalow, a new garage, new roof or new floor, a sun parlor or a sleeping porch, an alley fence, or built-in fixtures—we are prepared to give you unequaled service and low prices on Quality Material.

LET US HELP YOU MAKE YOUR  
DREAMS COME TRUE.

### FOOD LIKE YOU GET AT HOME

This is truly a home-like restaurant because it has endeavored to break down the prejudice based on the theory that restaurants could not serve food like you get at home. Many patrons will testify that there is no difference between our meals and the meals they get at home. That's the reason they come here so frequently to eat.

Years of catering to the appetites of particular people make it possible for us to serve appetizing meals.

The next time you want to eat away from home, bring your family here.

## Sunday School 'Lesson'

By REV. P. B. FITZWATER, D. D., Mem-  
ber of Faculty, Moody Bible Institute  
(Chicago.)  
(©, 1929, Western Newspaper Union.)

Lesson for June 29

REVIEW: THE GOSPEL OF THE  
KINGDOM CONTINUED

GOLDEN TEXT—Thou art the Christ,  
the Son of the living God.

PRIMARY TOPIC—Making Jesus  
Known.

JUNIOR TOPIC—Believing in Jesus

INTERMEDIATE AND SENIOR TOPIC—What Shall I do with Jesus?

YOUNG PEOPLE AND ADULT TOPIC—The Meaning of Christian Disci-  
pline.

The plan of review must always be determined by the teacher in the light of the grade of the school and the aptitudes of the pupils. For senior and adult classes the best method will be to recall that all the lessons of the quarter are from the book of Matthew, which has as its theme Jesus Christ, the Messianic King, and His Kingdom, and to present each lesson in its relation to this central purpose. The lessons have a threefold unity, namely, one book, one theme, one person.

Lesson for April 6. To prepare the disciples for the dark hour of the cross, Jesus sought to lead them to a clear apprehension of His purpose and mission. After Peter's confession of Him as the Messiah, Jesus showed to the disciples that He must come into His place of triumph through the tragedy of the cross.

Lesson for April 13. The greatest in the kingdom are those who possess childlike humility. The condition of entrance into the kingdom is true conversion, or birth from above.

Lesson for April 20. In this lesson we have divine instruction as to behavior in case of ill-treatment. Those who are Christlike shall suffer persecution. Those who have entered the kingdom by birth from above—those who have received forgiveness from God—will forgive their fellows.

Lesson for April 27. Riches are deceitful. Possessors thereof are prone to put their trust in them. It is most difficult for those who are rich to give place to spiritual things.

Lesson for May 4. Those who would be greatest in the kingdom should, like Christ the King, take the place of self-abasement. In love, Christ gave Himself for others. He substituted "the greatness of love for the love of greatness."

Lesson for May 11. To the nation which rejected Jesus as King and was endeavoring to kill Him, at one appointed time, in the councils of God, He officially presented Himself as King, in fulfillment of prophecy.

Lesson for May 18. Under the figure of a marriage, Jesus set forth the privileges and benefits of the kingdom. He used marriage, the highest ideal of love and friendship known to man, to show the benefits of the kingdom.

Lesson for May 25. In the Olivet discourse Jesus outlined the events in the world to take place in the interval between His crucifixion and His second coming. The parable of the ten virgins shows the right behavior of believers in this present age in view of the coming of the Lord.

Lesson for June 1. By talents is meant whatever faculties and powers one possesses as God's gifts, such as physical strength, reason, knowledge, speech, song, or money. All these should be employed so as to honor God who gave them. A reckoning time is coming when account shall be rendered for their use. This will be at Christ's second coming.

Lesson for June 8. Mary of Bethany, because of her keen apprehension, saw that the Lord's body would be broken and that His precious life would go out at a time when no one could lovingly minister to Him. She therefore anointed Him as against that dread day. When the disciples criticised her act, she was defended by Jesus.

Lesson for June 15.—Jesus did not die as a martyr or as an example, but to make an atonement for man's sin. The supreme value of the lessons for the quarter centers in the cross. Teachers, it is not a matter of getting your children to learn the lessons of a great teacher, but to induce them to have faith in Christ's sacrificial death.

Lesson for June 22. The resurrection of Jesus demonstrated His Messiahship and deity. The command of Jesus to preach the gospel in all the world is backed by His resurrection power.

#### The Oil of Joy

Christianity wants nothing so much in the world as sunny people, and the old are hungrier for love than for bread, and the oil of joy is very cheap, and if you can help the poor on with the garment of praise, it will be better for them than blankets.—Henry Drummond.

#### A Moral Pivot

The Hindu professor of modern history in a South India college said to me: "My study of modern history has shown me that there is a Moral Pivot in the world today, and that the best life of both East and West is more and more revolving about that center—that Moral Pivoting is the person of Jesus Christ."—E. Stanley Jones.

#### Force of Character Necessary

The most brilliant qualities become useless when they are not sustained by force of character.—Segur.

## Community Building

### "Safety" Put First in New York Model City

Some day it may occur to the powers that approve subdivision projects to ask the seemingly obvious question: "What has been provided to make for the safety of the people who are to live here?" One suburban development has made safety a prime consideration and as a result it is being featured as a phenomenon. A writer in a current periodical says Radburn, N. J., is without doubt "the safest populated spot in America." Radburn is a suburb of New York city laid out primarily as a residential district.

These are some of the safety features: A series of courts with about 20 houses each grouped about them. Dead-end streets giving the only access for motor cars to the courts. No sidewalks along motor roads, but pedestrians must keep to pathways through the courts or gardens. Only garages and kitchens and service entrances to the houses look toward the motor roads so that only persons wishing to go to automobiles have any reason to enter the vehicle area. Children go to school by the parkway paths without crossing motor highways, subways being provided wherever necessary.

The common sense of such an arrangement is apparent. It provides quiet, seclusion and safety for the home, factors worthy of the greatest consideration.—Kansas City Times.

### Maryland Plans Lining Roadside With Trees

An extensive tree-planting program along the principal highways of the state is planned by the Maryland department of forestry, according to F. W. Besley, chief forester.

A concerted effort is to be made by Mr. Besley and his assistants to obtain greater beauty along the Maryland roads.

Not only will the forestry department furnish and supervise the planting of roadside shade trees, but towns and cities of the state have the privilege of calling on the state forester for improvement in tree planting.

Mr. Besley plans to set out thousands of shade trees along roadsides and in the nurseries. Trees for planting on roadside property are furnished free from the state's nursery at the University of Maryland's college park headquarters.

"The forestry department has undertaken an educational program through the planting of trees. Planting trees along the principal highways is now recognized as an improvement second only in importance to the building and maintaining of the highways themselves," Mr. Besley said.

"While trees are furnished free at the College Park nursery, transportation charges must be paid by the applicant."

### Applicable to All States

Florida has miles and miles of splendid roadways that can be made all the more splendid and attractive through roadside beautification, such as already has been done, or is being done, in many localities in the state. There is growing appreciation in Florida of roadside beautification. This is as it should be, for Florida extends an invitation to the world, for its people to come here and enjoy the state's many natural beauties, not the least of which is the beauty along roadsides that have been planted with trees and shrubbery, and in many instances with flowers, all of which adds greatly to Florida's natural attractiveness.—Florida Times-Union.

### Foundation of Citizenship

The solidity, contentment and close family feeling that are found to the greatest degree in owned homes, leave an inevitable stamp on the children reared under these desirable conditions. They come early into contact with the ideals of home making, of ambition, economy, pride and responsibility, which are the very foundations of our culture. They reap the moral and physical benefits of light, air and play space and almost invariably make better associations than otherwise would be possible.—Cincinnati Enquirer.

### Good Example to Follow

As a result of its recent clean-city campaign, Sydney, New South Wales, claims to be one of the spotless cities in the world. The change from litter-strewn streets to tidy thoroughfares was effected by a city announcement that after a certain date anyone who failed to use the receptacles provided, and threw even a street car transfer on the street, would be fined. Officials say that almost automatically the litter problem ceased to exist.

### Zoning Regulations

There are 754 cities, towns and villages in the United States which have zoning regulations. Of the 48 cities having populations of more than 100,000, 56 are zoned. Taking the total number, 754, it is found that 475 have comprehensive ordinances regulating the use, height and area of buildings.

### A Hick Town

A hick town is a place where the merchants won't spend money to boost their community unless a stranger asks for it.—Los Angeles Times.

## McFadden News

Miss Mary Frances Bard spent Wednesday of last week in Murray, visiting friends and relatives.

Mr. and Mrs. James Underwood and Miss Willie Ora Paschall were week end guests in Hazel, Kentucky.

Mrs. Charles Burgess and Mrs. Charles Gore spent Friday with their parents, Mr. and Mrs. Luther Bradley.

Mr. and Mrs. H. L. Putman and son, Floyd, Miss Alma McGary and Mr. Harold Price spent Sunday in Murray.

Mr. and Mrs. Gus Paschall spent Sunday with Mr. and Mrs. Joe Paschall near Murray, Kentucky.

Miss Lillian Bard spent last Wednesday evening in Water Valley.

Mr. and Mrs. T. H. Howell, Mr. and Mrs. Herbert Howell, and Mr. and Mrs. Obey Cooke and family attended a birthday dinner given at the home of Mr. Rollie Howell, Sunday.

Mr. and Mrs. Tom Sams and daughter, Dorothy, spent Sunday with Mr. and Mrs. Jake Smith.

## Route 6 News

Mr. and Mrs. Ed Browder spent Sunday with Mrs. W. S. Bard and family.

Dr. Glen Donoho and wife and small son, also Mr. and Mrs. Lawrence Brown and family were Sunday guests of Mr. and Mrs. W. H. Donoho.

Mr. and Mrs. Phineas Webb spent the week end with Mr. and Mrs. Homer Underwood and family.

Mrs. Ed Gates, Mrs. T. J. Reed and Mr. Justin Atterberry spent Sunday afternoon with Mr. and Mrs. D. H. White.

Mrs. O. C. Wolbertson and daughter, Louise, were guests of Mrs. Roy Boaz, Saturday afternoon.

Miss Marie Wolbertson spent a few days of the past week with Miss Evelyn Boaz.

Mrs. Ed Gates, Mrs. Etta Nailing and daughter, Miss Mary Atterberry, and Mrs. I. W. Smith motored to Union City, Monday afternoon.

Miss Marei Wolbertson and Mr. James Satterfield spent Sunday in Hopkinsville visiting the latter's mother.

Miss Mary Fleming, who has been the guest of Miss Myra Underwood, of Jordan, for the past few days, has returned home.

## Willingham Bridge

The Union Ladies' Aid met with Mrs. Coston Sams, Wednesday.

Mrs. Fred Pasteur and son, Frank, of Princeton, Ky., were Thursday night guests of Mr. and Mrs. Tom Stallins.

Miss Mary Townsend spent Saturday night with Miss Louise Jeffress.

Mr. and Mrs. J. C. Sugg attended the Children's Day program at Harmony Sunday morning and then took dinner with Mr. and Mrs. Oscar Nugent.

Mr. and Mrs. Tom Stallins and Mr. and Mrs. Henry Walker and children spent Sunday with Mr. and Mrs. Burnie Stallins and children.

Miss Alma Knighton was Sunday guest of Mr. and Mrs. Coston Sams.

Miss Louise Jeffress spent Thursday with Miss Maxene Wade.

Morris Stallins of St. Louis is visiting in this community.

Mr. and Mrs. Coston Sams and sons visited Mr. and Mrs. Harry Sams Sunday evening.

Mr. and Mrs. Will Fuller are the proud parents of a baby girl born Sunday night.

Martha Hanes of St. Louis arrived Friday to spend part of the summer with her grandparents, Mr. and Mrs. Leighman Elliott.

Mr. and Mrs. Willie Barham and children spent last week in Tennessee, visiting relatives.

Miss Allie Mae Sugg of St. Louis is spending her vacation with her parents, Mr. and Mrs. J. C. Sugg.

Mr. and Mrs. J. C. Lawson, Sr., visited their son, Albert and wife, of Caruthersville, Mo., Sunday.

# Hundreds of thousands of Frigidaires

have never required any SERVICE

this is ONE reason why

Other reasons why 3 times as many Frigidaires are now in use as any other make of electric refrigerator

3 times as many Frigidaires are now in use as any other make of electric refrigerator .....

FRIGIDAIRE is sold with a definite guarantee—backed by General Motors. And still more important to you as a purchaser is the fact that year after year Frigidaire continues to give satisfaction—long after the guarantee has expired. If service should be required it is rendered instantly and without removing the machine from the premises.

We invite you to come in and inspect this wonderful Electric Refrigerator.

### AFTER A REST

"Jones ought to be looking well after being locked up at the police station."

"Why?"

"Shouldn't a man look well after arrest?"

### The Wifely View

"My dear, you spend too much."

"My dear," said the wife, "you're right—You just don't make enough!"

### What's the Hurry?

Voice (on telephone)—Oh, please tell the doctor to hurry round at once—my little girl has swallowed a needle.

Maid—Well, the doctor is very busy just now. Did you want the needle at once?

### The Culprit

Nurse—Come here and see what the doctor brought your mother.

Tommy—Yes, and I bet she blames me. He wouldn't have known where to live if I hadn't got the flu.—Sydney Bulletin.

### Just Like a Man

Mr. Timson—I see none of them women statues has any clothes on.

His Wife—Then statues are more'n 2,000 years old. I s'pose you think a woman's clothes ought to last forever.

### A Horrible Example

Bertie—Have you ever seen a wild monkey party?

Gertie—No; I can't say that I have.

Bertie—Then take a good look at me.

### Telephone Workers Are Proud of Their Chosen Vocation

At the close of the day's work telephone men and women have the satisfaction of knowing that they have had an important part in rendering an essential service to their fellow citizens.

In the Southern Bell System 23,600 of them, working as a highly skilled team, complete 8,000,000 local calls and 100,000 long distance calls every day and maintain more than 4,200,000 miles of wire, serving more than 1,000,000 telephones.

A job of this magnitude could be so well done only by intelligent, experienced workers who have a pride in their vocation and a sincere interest in the welfare and happiness of the communities they serve.

The courtesy and cooperation of the telephone folks who serve you is an expression of the desire of the entire telephone organization to render to the public the best possible service at the least possible cost.

Southern Bell Telephone & Telegraph Co.

### Ask Your Soldier Boy How "Cooties" Got Such a Hold.

He'll tell you that the battle-fronts of Europe were swarming with rats, which carried the dangerous vermin and caused our men misery. Don't let rats bring disease into your home. When you see the first one, get RAT-SNAP. That will finish them quick. Three sizes, 35c, 65c, \$1.25. Sold and guaranteed by

Kentucky Hardware & Implement Co.

For a short time we will accept subscriptions for this paper and the Memphis Weekly Commercial Appeal—both papers one year for only \$1.25.

## Here is ENERGY

Man's command of energy has always had a great deal to do with his well-being.

The energy of his own muscles, the energy of animals—and finally the energy brought to him over the electric power lines—all these he has commanded in increasing the amount of work he may do.

Most flexible and efficient of these is electric power. It is versatile, it is inexpensive, and it is delivered wherever it is needed, whenever it is required, and in great or small quantities as the user may desire.

This company's transmission lines serve the communities of a wide area with an ample, economical and flexible supply of electric energy for farm, factory and home.

## The DAIRY

### GOOD DAIRY FARM WILL HAVE SILO

#### Modern Affair Permits Pro- duction of More Milk.

Because the silo is an investment and not an expense, the good dairy farmer usually has one or more according to the size of his herd.

"Silos are growing in popularity," says A. T. Holman, agricultural engineer at the North Carolina State college. "Hundreds of modern silos were constructed in 1928 and a greater number will be built this year. We observe that farmers show a marked tendency to have a better silo than formerly, built from good materials and of the proper size. It permits the production of more milk at less expense, and as it lowers cost of production, it automatically increases profits and the labor income. The silo is the cow's fruit bin where green feed is stored and cured until most needed."

Silage must not be considered a substitute for grain, but is a supplement to it. Cows require both grain and silage or grain and pasture for the profitable production of milk. When winter comes and there is no pasture, the silo proves its value, but the silage is better than pasture in that it contains the corn grains in addition to the succulent leaves and stalks. Silage also appeals to the cow's taste.

A number of crops may be earned in the silo though corn is still the most popular. The size of the silo depends on the size of the herd, the rate of feeding and the length of the feeding period. The average feeding rate for the dairy cow is about 30 pounds per day, so when feeding ten to fifteen cows, the diameter should be 10 feet; 15 to 25 cows, 12 feet; 25 to 35 cows, 14 feet, and for 35 to 40 cows the diameter should be 16 feet. The height will be calculated by dividing the number of days in the feeding period by six when feeding off two inches of silage per day. If three inches are fed off, as should be the case in hot weather, the days of the feeding period should be divided by four and this will give the height needed when the proper diameter has been determined. It is better to have two silos than one extra large one, says Mr. Holman.

#### One Common Mistake in Feeding Dairy Calves

The most common mistake in feeding dairy calves from the bucket is feeding them too much. The amount that a calf should really have, divided over three feeds, seems so ridiculously small that most of us feel stingy about it and are tempted to add a little more. To avoid being generous at the calves' expense it is well to actually weigh the milk for each calf and stick to the rule. Many rules have been given, all emphasizing the danger of overfeeding, but as good a rule as any is one pound of milk to each ten pounds live weight. A fifty pound calf, therefore, would get only five pounds of milk daily, or two quarts. If fed twice daily this would be just a quart of milk at a feed. In some stables this rule is observed so closely that the calf is weighed every month to check up on the amount of milk that should be fed. At no time should a calf get more than 16 pounds of milk daily.

#### Cow Deserves Careful Attention to Her Feet

When a cow's toe nails, if we may call them such, become too long it makes the animal walk and stand awkwardly, and oftentimes makes a fairly good animal look worse than she really is. A sharp chisel is handy in removing the excess growth and the hoof can then be shaped with a rasp. It is very surprising how much a cow will let you do to her feet if you are quiet and careful in the way you go about it. You will be more than pleased with the result of your labor when you see how much better she handles herself after a good job of manuring.

#### Balanced Cow Ration

A balanced cow ration is a combination of feeds so blended as to provide the required amount of protein in proportion to the other elements, mainly carbohydrates. The protein is the most difficult to secure. The home-grown feeds do not provide this in sufficient amounts. In other words, in order to give a cow enough protein to make 20 pounds of milk she would have to use enough corn and oats to throw her digestive system out of order.

#### Location of Silo

In locating the silo one should also keep in mind the appearance of the farm buildings as a group. The silo is the most conspicuous building on the farm, especially if it be a high one. It towers up like a city set upon a hill. A silo has to be filled at least once a year. In locating, this should be kept in mind, for it is necessary to haul many loads of corn to the cutter. The cutter must be placed within at least eight feet of the silo for best results.

### "Six of One and—"

By CORONA REMINGTON

(Copyright.)

"DEAREST MOMS: "Would you be very disappointed if I brought a friend of mine along when I come on my vacation? I've talked so much about you and dad that she's crazy to meet you. I know you'd probably rather have me all to yourself, but—well, don't fail me, Moms. I've already invited her and she has accepted. Her folks live out in California and with only a week off she could hardly have time to get there and back.

"We're playing Durban next week, then Williamson the first half of the week after and Garlington the last half, then—Home!"

"Love from,

"CHARLES."

When Mr. Wilson had finished reading the letter she took it out to her husband.

"Read that," she told him. "Charles is the same open-hearted boy he always was. I reckon this is some lonesome little nobody he's met somewhere."

Mr. Wilson dropped his hoe, dusted his hands off on his overalls.

"I guess we'll have to let her come, mother. She's probably a pretty nice little girl or Charles wouldn't take up with her."

"Wonder what she does?" Mrs. Wilson mused.

"Actress, probably."

"Oh, I hope not. I'd hate to have an actress in the house even for a week."

Once they had decided to let her come Mrs. Wilson put heart and soul into her plans for the visit. She cleaned the shining old house from garret to cellar. She put up fresh frilly curtains in the windows and planned menus that would tempt the faded appetite of an actress. When at last the day came for the arrival of her visitors she put on her best dress and went down to the station with her husband to meet them. Almost before she had seen him Charles had enveloped her in an enthusiastic hug, then turned and introduced the girl beside him.

"Mother, this is Hazel Smathers," he said. "And there's dad! Gee what a welcome!"

Mrs. Wilson looked at the demure little figure standing beside her husband and she checked the impulse to feel sorry for her. "Probably a dreadful little vamp and I bet she is an actress, too," she thought, so she repressed her natural cordiality and met the girl with a cool smile. "Home was rather uncomfortable, Charles," she said. "Perhaps Mrs. Wilson was the least miserable of the group. Later Hazel was so appreciative of every little thing and praised the supper so extravagantly that Mrs. Wilson melted a little in spite of herself."

"We actors have such a hard life," the girl said, "and it's always jump from one cheap hotel to another! A good home-cooked meal is like a bit of heaven to us."

After supper Mrs. Wilson sent them all out and started clearing away the dishes. Mr. Wilson went to the front porch to smoke, and Charles and Hazel wandered down in the back yard. Out of the kitchen window Mrs. Wilson watched them eagerly. Charles dropped down on an old tumbledown bench and lit a cigarette. Hazel sat beside him, but not romantically close. Mrs. Wilson sighed with relief and went back to her work.

At last it was over, they went away. But a week later Mrs. Wilson nearly collapsed when she received a wire from Charles reading:

"Hazel and I were married this morning. We love you."

She found Mr. Wilson out in the garden and showed him the message. "He's married her. He's married an actress! I knew what would happen," she sobbed.

"Well, mother," he soothed, "I know it's hard on you, but she's a sweet little trick."

On the heels of the telegram came a letter postmarked Dolega, Calif.

"Dear Mrs. Wilson (it ran):

"Hazel has wired me her intention of marrying your son, Charles, next Monday. At first I was dreadfully grieved at the idea of my only girl marrying an actor, and I cried myself sick over it; then my husband said: 'Hazel's an actress herself. I don't see why you're making such a fuss about it. There are good men who are actors just like there are good women who are actresses.' Then the humor of the situation dawned on me and I couldn't help laughing. I guess they'll be happy because they're in the same kind of work."

I want to meet you soon and most especially my new son.

"Very cordially,

"CORA D. SMATHERS."

"Well, after all, isn't life funny?" laughed Mrs. Wilson to her husband. "Here I was looking down on Hazel for being on the stage and it never once struck me that our Charles was doing the very same work. . . . Six of one and—"

"Half dozen of the other," Mr. Wilson ended quietly. "Folks are like that."

#### Mightiness of Right

Might is right; so it is—the right to bear the burdens of the weak, to cheer the faint, to uplift the fallen.—Nashley.

#### Your Home

The first impression your visitor receives depends largely upon the appearance of your home. Well painted and tastefully decorated homes are both a financial and social asset.

## 55 PRISONERS

## GET PAPOLES

Frankfort, Ky., June 23 — Gov. Flem D. Sampson today paroled 55 prisoners at the Reformatory, upon recommendation of the state board of charities and corrections.

Six prisoners serving life terms, five of them for murder — were among the paroled. The life terms were John Nelson, sentenced for murder in Bell county, in 1930; Len Boone, for murder in Clark county in 1916; Will Lyons, murder, Fayette county, 1917; Irvin Anderson, murder and two charges of robbery, Jefferson county, 1918; James Dale, murder, Perry county, 1920; and James Turner, who was convicted in Harrison county in 1920 on a malicious shooting charge and sentenced to life because of a previous conviction.

Anderson was sentenced to life on the murder charge, and two terms of eight years and ten years, respectively, on the two robbery charges. The ten year term was to be served concurrently with the life sentence.

Several prisoners serving terms ranging from two years to twenty-one years for manslaughter, and others serving sentence for hog stealing, horse stealing, turkey stealing and mule stealing were among those paroled.

## POULTRY

(By J. T. Watkins)

Well, had you thought, it is only about two months now until the fair? Mr. Williams is getting the premium list ready to go to press, the different heads of the departments are putting the finishing touches to their part and I believe we are going to have a better fair than last year.

In the poultry show we expect at least 1,000 entries, or at least 1,000 birds entered in the show. We firmly believe we will have 500 entries from 4-H club members, and we should have that many from the grown ups.

We are also going to have quite a rabbit show in connection with the poultry show, and probably we may have the pigeons that were promised us last year. We will also have several features as added attractions.

We don't think we will give away any baby chicks this year unless some are donated, but we will try and have something in the line of prizes to give away each day for those who attend the poultry show and register their names with the clerk.

My gosh, ain't it hot? I was thinking today, I am glad I am not a setting hen cooped up on a lot of eggs in a small box.

I saw a lot of pheasant eggs being shipped to Kevil, LaCarter and other points in that neighborhood the other day. I am of the opinion it is too late in the year, but I think several of the poultry raisers in this locality should make arrangements to get some eggs early next year and stock several of the farms and in a few years there would be a good lot of pheasants in this country.

Watch your hen houses now for mites. This is the kind of weather that brings them out in swarms and droves. They stay hid in the day time and come out at night, and oh, boy, how they do pester the hens on the roost. The best way to get rid of them is to oil the roosts, dropping boards and all the cracks and nail holes with a good dose of kerosene and black oil such as is drained from autos, mixed half and half and painted on the roosts about every week will soon rid the house of them and every hen will extend you a vote of thanks.

Great many poultry raisers are beginning to be downhearted on account of the low price they are getting for their stock right now. Well, it is discouraging, but this slump is caused by the great number of persons who are out of work, not being able to afford the Sunday dinners of chicken. There is an old saying, "There is nothing so bad but there is something worse." If you can't get enough to justify you in selling your chickens why don't you try eating them yourself. When you stop selling, there will be a shortage on the market and you will see prices go up. The law of supply and demand will apply to chickens the same as wheat, corn or any other commodity.

Don't forget your membership in the poultry association, the dues are only one dollar (\$1.00) per year. This not only helps us to pay the expenses of the show, but it also shows your willingness to help boost the poultry industry. Another thing if you are not a member you won't win any of the Special Cash Prizes paid by the Poultry Association. Send in your dollar or bring it to the Chamber of Commerce and pay it to the stenographer.

The Fulton man who wants to get a word in now and then after he is married ought to try marrying a woman who stutters.

## MAYFIELD MAN IS FOUND DEAD IN FIELD

Mayfield, Kentucky, June 23 — "Drinking too much alcohol" was the reason attributed for the death of James H. "Jim" Copeland, who was found dead this afternoon in a clump of bushes in the county, according to a verdict returned by Graves County Coroner O. M. Merritt.

The body of Copeland, a prominent Mayfield salesman, was found by officers this afternoon near the home of Marvin Sutherland, on the Green McPherson farm, four miles east of Mayfield, after they had been notified by Dick Williams that he was dead. Williams told officers that he and Copeland had left Mayfield in an automobile Sunday afternoon and had driven through the county and had stopped near the Sutherland home and had gone into a field to rest. He said that they had been drinking whiskey during the ride and that while they were in the field, Copeland died. He told officers that Copeland died this morning about ten o'clock, but the coroner said that the condition of the body indicated that he had died sometime last night. Williams notified officers of the death of Copeland this afternoon about 2 o'clock.

While searching for Copeland's body, officers found a moonshine still about a hundred yards from his body. No arrests had been made tonight.

Copeland is survived by his widow, Mrs. Mollie Copeland, a daughter, Mrs. Gladys Gibson, of Mayfield; four brothers, Frank and Roy Copeland, Mayfield; Lube Copeland, Paducah; and Will Copeland, Paducah; two sisters, Mrs. Quint Trent, Mayfield, and Mrs. Belle Sullivan, Beulah; and his father, Dick Copeland, Paducah. No definite funeral arrangements have been made, but the services will be held sometime Tuesday afternoon.

## Grinchfield News

Services were held at the Methodist church here Sunday evening. A large crowd attended.

Mr. W. S. Yates, Mr. W. B. Melton and daughters, Mildred and Marguerite, Mr. Paul Heron, Mr. Travis Dacus, Mr. and Mrs. Gordon Rose, Miss Josephine Heron, and Mrs. Sallie Bryan, were the Sunday guests of Mr. and Mrs. J. I. Yates and family.

Mrs. John McClanahan has returned to her father's home after several days' illness in the Mayfield hospital.

Mr. and Mrs. Paul Williams motored to Paducah, Sunday. Mr. Hollis Strother, Mr. Glynn and William Dillon, and Mr. Fletcher Williams motored to the Lake Sunday afternoon.

Mr. and Mrs. O. R. Sanes spent Sunday with Mr. and Mrs. Walter Nichols.

The Eastern Star school of instruction met at Fulton, Saturday afternoon and evening.

Mrs. Walter Nichols and Mrs. Eula Seat attended the Easter Star meeting at Fulton, Saturday afternoon and evening.

Miss Francis McCole of Dyersburg, Tenn., is spending a few days with Mrs. J. D. Walker.

Miss Pearl Bruce has returned from a few days' visit in Hickman.

Mr. and Mrs. Lovelace Veatch spent the week end with his mother and father, Mr. and Mrs. Jim Veatch.

A large crowd attended a birthday dinner, Sunday at the home of Mr. Rawleigh Howell in his honor.

Mr. Bob Elliott is very ill at his home here.

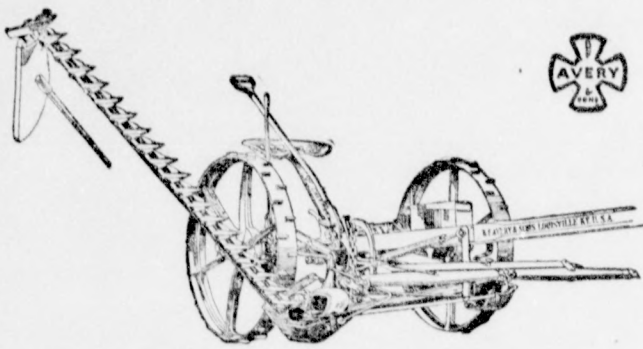

Mr. Lee Roy Kirby is visiting his mother, Mrs. Mina Kirby.

Mr. Beecher Love and family of Princeton, Ky., and Mr. Ernest Love and family, of Hodges, Ohio, are visiting their parents, Mr. and Mrs. Bob Love.

and Food the Best

It is a pleasure to go to this cafe for a lunch or full meal.

AVERY  
CHAMPION MOWERS

Why the Champion is "Champion"!  
Because (1) Lightest weight and draft (2) Regular or Vertical Lift (3) Permanent alignment of knife and pitman (4) Self adjusting (5) Correct lubricating system connections (6) Use hardened wearing plates and gear adjustments (7) Rugged strength and simplicity (8) 100 years' successful manufacturing experience.

## All that the name implies—

If you've ever wanted a mowing machine that would do the job easier, better and keep right on season after season, here it is—the Avery Champion.

## Regular or Vertical Lift

The Avery Champion cuts all kinds of grass under all normal conditions. It has tremendous cutting power and lasting power. No lost motion in the pitman, and the knife and the pitman are always kept in perfect alignment—assuring entire satisfaction wherever used.

The Avery Champion is made with either the Regular or Vertical lift. Both machines have the same valuable features with the exception that the Vertical lift enables you to

cut around trees and places where there are stumps and stones with the least possible effort.

## One or Two Horse

Avery Champions are built with either wood or steel pitman and are obtainable at your dealer's in one or two horse models. They have behind them more than a century of experience in the making of America's leading hay making machinery, and every Champion can be depended upon to deliver long, enduring service at least cost to you.

Before buying any mowing machine, look into the Avery Champion. It has won the approval of thousands of none-too-easily-satisfied farmers, and is sure to please you in every way.

KENTUCKY HARDWARE & IMPLEMENT CO.

## CANNED FOODS IN THE ANTARCTIC

It is a well-known fact that the great metropolitan cities of our modern civilization could not exist if the scientific method of preserving foods known as canning had not been invented, but the following article about the Byrd Antarctic Expedition quoted from a recent issue of The Canning Trade shows how this invention has also helped mankind to penetrate the wild and unsettled regions of the earth.

"A polar expedition," this article states, "not only travels on its stomach, but cannot replenish the larder by purchasing or commandeering coffee and bacon when supplies run low. So when Admiral Richard E. Byrd laid his plans for exploring the most desolate icebound region in the world his list of supplies included a variety of food items sufficient to provide an all-around diet and guard against monotony."

"As the Byrd Antarctic Expedition was the most comprehensive polar exploration project ever attempted, these food items were stocked in wholesale quantities, reaching a total of approximately 100 tons. The list included such staples as 2 1/2 tons coffee, 5 tons beef, 5 tons dried fruits, 5 tons bacon, 2 tons ham, 500 cases of ing weight and bulk, yet provided ample strength for handling in transit and for stacking. And— an important consideration—the cleats furnished secure grips for hands encased in heavy fur mittens."

"Preparing the expedition's stock of provisions for shipment on the 7,000-mile voyage to Antarctica was one of the major problems in advance of this unique undertaking. It was important that the weight of the various articles and the space they would occupy on shipboard be reduced to the minimum. Equally important was the problem of housing or caring for this precious stock

of food on the ice pack that was to be 'home' for two years."

"After a thorough survey of many types and designs of packing containers, the leaders of the expedition decided to pack the foodstuffs and other perishables to the largest possible extent, in boxes of uniform size and type, so that they could be used as building units. This necessitated a container that would open on the side, making its contents accessible while the box fulfilled its dual purpose as a 'brick' in the wall and as a container. The boxes were made of yellow pine a quarter inch thick, braced with cleats which framed the ends. The cleats were joined in grooves at the corners, but not nailed, thus permitting the side of the box to be opened and reclosed."

"A special feature, which incidentally provided a hinged effect for this opening side, was the use of a series of wires bound tight around each box and stapled to the wood, thus performing the major function of holding the box and contents together. The wires received exhaustive tests to prove that it would resist corrosion and the crystallizing effects of polar cold. The design thus eliminated the need for thick box walls, saving weight and bulk, yet provided ample strength for handling in transit and for stacking. And— an important consideration—the cleats furnished secure grips for hands encased in heavy fur mittens."

"Previous experience in polar exploration pointed to the need for a one-man package, as loads too heavy or bulky for one man to carry are left behind in an emergency. Accordingly the standard unit was made to contain six cans of No. 10 size and about 5,000 of these wire-bound boxes were used for packing supplies not of necessity requiring larger units."

"A further evidence of the thoroughness of Admiral Byrd's preparations appears in the method of treating the tins to protect the

precious foodstuffs. To safeguard against rust, each can was double coated with a maroon paint, chosen after thorough temperature and exposure tests. The cans were opened by cutting around the side so that no paint articles would fall into the food. The cans of coffee and some other dry foods were vacuumized in the process of sealing."

"According to reports the expedition carried out the plan of using the boxes to form the walls of 'igloo' storerooms, laying them in staggered formation like bricks laid up in running or stretcher courses. The walls were spanned by wooden roofs and the whole covered with tarpaulin, which in turn was buried under snow. A stenciled label on the opening side of each box showed the nature of the contents. Thus the commissary also constituted the kitchen, and the cook was surrounded by the tons of sausage, chicken, lard, cheese, milk, eggs, jam, pickles and other items that constituted his larder during the long siege. The cook performed his culinary functions on a regular coal stove. When he clipped the wires to open the side of a box and take a can of coffee from the shelf the box was reclosed, the procedure in no way affecting the solidity of the wall."

"The furrows sub-zero gales that sweep little America in the winter season, and make this region the most forbidding of any known to explorers, were responsible for the plan to set all of the housing units into the solid ice to a depth of four feet for protection. In order to 'ride up' when the savage blasts made outdoor movement hazardous, the camp units were connected by means of tunnels, also set into the ice. Boxes formed the tunnel walls, which were built to the necessary height, roofed and buried in snow. No doubt the camp is so solidly frozen into the perpetual ice that boxes containing tins of food, safely frozen, will be found by explorers many years in the future."
