The New Austin Bantam Car

Now On Display At the Snow-White Motor Company Garage On Fourth Street.

At last, the New Austin Bantam car is a car of which Fulton can be proud. It has arrived in Fulton and on exhibit at the Snow-White Motor Company Garage on Fourth Street, where it will be on display for the next several weeks. The car is being shown to the public as a step toward bringing more business to Fulton and surrounding territory.

To many eyes, the car is an exhibit for comparison. It is not the kind of car one would associate with a company which has been in the business of producing automobiles for only twenty-eight years. The car is the result of years of research and development.

The body of the car is a standard type, but the engine is a 40-horsepower, 4-cylinder unit designed especially for city driving. The car is equipped with all the modern conveniences, such as a radio, electric lights, and an automatic transmission.

The car is being driven by a member of the Austin staff, and interested persons are invited to inspect it at their convenience.

MID-SOUTH FAIR DATES ANNOUNCED FOR SEP. 10 TO 27

Memphis, Tenn.—The Mid-South Fair in Memphis this year will rank as the biggest fair ever, with an estimated attendance of 600,000. A number of prominent men and women will be in attendance, including Governor Prentice, who will be the guest of honor.

In the press of business, the important Part at this hod•. \`Mk hit ha,, been said milli, tei . ... the car andAlfillgel Company. Nlost of laelorY• 1'...ery Ihittle IA ster- t t,.,, t golf is a millionaire's roc- . 1 1

J. W. Farmers

Mayfield, June 24—J. W. Farmers, 65 years of age, prominent local official of Mayfield Farm Bureau, on East Broad way, was killed in an automobile accident at 1:30 a.m. of last night. Mr. Farmers had been attending the local board at the Farm Bureau headquarters.

The accident occurred when the car was struck from the rear by another car.

Mr. Farmers is survived by his wife, three sons, and five daughters.

The following children of Mr. Farmers are also represented: E. R. Farmers, M. W. Farmers, and Willie Grow.

Mr. Farmers is a native of Mayfield, and has been a lifelong resident of the city.

Women's Committee of United Methodist Church

Mrs. W. E. Good, of the home of Mr. and Mrs. W. E. Good, has been named Chairman of the Women's Committee of the United Methodist Church. Mrs. Good is a member of the church and has been an active member of the Women's Auxiliary.

The committee will be responsible for the management of the church, including the supervision of the church school and the religious education of the children.

Editor Inspects Coca-Cola Plant

At the Coca-Cola Plant in Paducah, the editor inspected the facilities and was impressed with the efficiency of the plant. The Coca-Cola Company is not only the largest soft drink manufacturer in the United States, but it also has a large foreign trade.

The editor found the plant to be well-organized and well-managed, with a large number of skilled workers.

BRIEFS

FULTON CAR ACCIDENT

A Bantam car was involved in an accident on Fourth Street last night. The driver of the car was taken to the hospital with minor injuries.

The car was traveling at a high speed when it collided with another car. The driver of the Bantam car was cited for speeding.

PASCAL DIES

Pastor of the First Methodist Church, Mr. Pascal, died last week. He was a well-known and respected clergyman, and his death is a great loss to the church and the community.

The funeral service will be held at the First Methodist Church this afternoon.

Butler, June 24—Mr. Butler, a well-known farmer, died last week after a long illness. He was a respected member of the community and his death is a great loss to his family and friends.

The funeral service will be held at the First Presbyterian Church this afternoon.

LUNG RAYS VERSUS POKER

A new method of treating tuberculosis has been developed, using X-rays in conjunction with proper diet and rest.

The method has been successful in many cases, and has been recommended by physicians.

A Wonderful Transformation

The Coca-Cola Company has undergone a wonderful transformation in recent years. From a small company founded in 1886, it has grown into one of the largest and most successful companies in the world.

The company is now known for its high-quality products and its commitment to social responsibility.

REV. E. R. ROVER

Reverend E. R. Rover, of the Central Church of Christ, Paducah, will be the guest speaker at the Mid-South Fair. He will talk on "The Power of Positive Thinking".

The Reverend is a well-known author and speaker, and his message is sure to be well-received.

Much Property Damaged

By Wind Storm

A wind storm last night caused damage to many homes and businesses in the city. The storm caused considerable damage, and many people were left without power.

The city has called in additional help to deal with the damage, and the storm is expected to cause further damage.
You can't paint a house with
APPLE-SAUCE!

It takes time all S.W.P. House Paint to give you a rich, durable and economical finish on your house. "Cheap" paint is not "cheap." Offer it a cheap-looking finish doesn't last a season. Figured over a five-year period, it costs more time as much as S.W.P., the finest house paint to be had.

Ask us to explain in detail

INFERTILE EGGS

**BEST PRESERVED**

**Only Fresh, Clean and Sound Should Be Used.**

Only those eggs that are fresh and sound should be used. Those that are soft, cracked, or leathery should be discarded. The eggs should be stored in a cool, dry place. The ideal storage temperature is 55°F (13°C).

**Avoiding Damage**

It is important to handle the eggs gently to avoid breaking or damaging them. The eggs should be stored in a way that allows for ventilation to prevent moisture buildup.

**Inserting Objects**

Never insert objects into the egg, even for the purpose of artificially hatching it. This can cause damage to the egg and affect its ability to hatch.

**Hatching Chambers**

A six millimeter jar can be used to hatching eggs, but it is important to ensure that the eggs are not crowded and that the temperature is maintained at the correct level. A six millimeter jar can hold 2 to 3 eggs.

**Ventilation**

Give good ventilation. The air should be fresh and free from odors.

**Preservation**

Best preserved eggs are those that are kept in a cool place. The eggs should be stored in a cool place to prevent spoilage.

**Wire Netting**

Wire netting should be placed around the roosts and the water containers to prevent the chicks from falling into the water or being captured by predators.

**Baby Chicks**

Baby chicks placed suitably will do very well. However, it is important to ensure that the chicks are healthy and not overcrowded.

**Fertilization**

To be absolutely sure that the eggs are fertilized, Oliver recommends having the eggs checked daily by a fertility test. This test can be done at most poultry farms.

**Southern Bell**

Oliver, extension poultry man at the Southern Bell, advises John from the College of Agriculture, Pennsylvania State College, to check the eggs daily and to ensure that the chicks are healthy.

**Give Good Ventilation**

**Dans**

Dans, from the National Association of Farmers, advises farmers to give good ventilation and to ensure that the eggs are not overcrowded.

**Best Preserved**

Best preserved eggs are those that are kept in a cool place and are not overcrowded. The eggs should be stored in a cool place to prevent spoilage.

**Ducklings**

Ducklings will not eat olives but will eat other foods. They should be fed a diet that is suitable for ducklings.

**Babysitter**

A babysitter can be used to help take care of the chicks, especially during the early stages of their development.

**Best Preserved**

Best preserved eggs are those that are kept in a cool place and are not overcrowded. The eggs should be stored in a cool place to prevent spoilage.

The Glorious Fourth

We have come a long way since the nation celebrated its first birthday. We have learned a lot of things. We have discovered that it is not enough to have wisdom to be prepared for it. We have found that times, like individuals, are not of trouble if they bust for it, but to get out by being ready to meet it if it comes. It is not enough to have wisdom to be prepared for it, but to get out by being ready to meet it if it comes.

The Fourth of July has come to mean more to us, since today it finds meaning more among the nations of the world. Today they look to us for both the strength and the wealth that are needed to maintain peace and they are glad to accept our help. The Fourth of July is our function, our advantage.

OUR MESSAGE OF SERVICE
There is going to be a lot of activity in the building line this year. Architects and contractors, carpenters and masons all, are busy sharpening up their pencils and their tools, and getting set for business. It is not the young married folks alone who are going to build homes—who dream dreams of happiness in homes of their own—but many others who have long, too long, been renting their roofs over their heads are trying to this year to realize their desire to have a home of their own.

Whatever you plan to do by way of...

Modern Affiliate Promotes Production of More Milk.

Because the sale of an increased supply of milk to the city or county cooperative means a larger supply of milk for city consumers, the local milk distribution concerns are helping their producers to do more to increase the supply of milk.

One Common Mistake in Feeding Baby Cows

We are anxious to help those who are feeding baby cows to avoid the very common practice of giving cows a mixed feed to have a better manure. A boy or girl must be strong and healthy to do their work well, and it can be done only if the food is right. Milk is the food that nature intended to give the baby cow, and if the cow is to produce high-grade milk, there must be high-grade food. If the cow is not given the right food, in some cases it may seem to be doing well, but later on the trouble may show itself in the form of ketosis or milk fever.

You may have a good feed but it is not giving the baby the right food, and the cow will not produce high-grade milk.

**CANNED FOODS IN THE ANTARCTIC**

In an article that appeared in a recent issue of the *Fulton Advertiser*, the following information was reported about the use of canned foods in the Antarctic:

"The Antarctic expedition, led by Captain Robert Falcon Scott, encountered numerous challenges during their journey to the South Pole. One of the major issues they faced was the preservation of food supplies in such a harsh environment. To address this problem, they utilized canned foods, which were not only a means of providing nutrition but also an effective method of preserving food. The cans were designed to withstand the extreme conditions and maintain the quality of the contents.

"A significant area of concern was the problem of cold storage. The temperature in the Antarctic can range from +10°C (50°F) in summer to -60°C (-76°F) in winter. In such conditions, maintaining the temperature of canned foods is crucial to prevent spoilage. The expedition used specially designed insulated containers to transport the canned goods. These containers were made of thick, durable materials to shield the contents from the harsh environment. The design and insulation were critical in ensuring that the canned foods remained edible throughout the journey.

"Another challenge faced by the expedition was the problem of space. The limited storage space on their vessels required careful planning in terms of the number and types of canned foods to be carried. They chose a variety of canned goods, including meats, cheeses, and vegetables, which were essential for maintaining a balanced diet. The cans were stored in a manner that allowed for easy access and efficient use of space. The expedition members were trained to handle the cans with care to prevent any damage.

"In conclusion, the use of canned foods proved to be a vital resource for the Antarctic expedition. They were not only a source of nutrition but also a practical solution to the challenges of preserving food in a harsh environment. The careful planning and use of these canned goods ensured that the expedition had a steady supply of nourishment during their difficult journey.
