## State Plans Road Paving

Bids for Improvement of 207 Miles of Highways Over Ky. Will Be Opened Sept. 5 By Commission

ROADS CALL FOR \$2,000,000 EXPENDITURE

Frankfort, Ky.—Bids for the improvement of approximately 200 miles of highways over the state, and for the construction of four concrete and steel bridges, will be opened by the state highway commission September 5. The road projects, which provide largely for surfacing, involve an estimated expenditure of approximately \$2,000,000.

The bridges are to be located over Craig's creek in Gallatin county on the Warsaw-Carlton road; over Kininick creek in Lewis county on the Vanceburg-Fullerton road; over Licking river at West Liberty in Morgan county; and over the Kentucky river at Chavies. The Craig's creek and Kininick creek bridges will cost approximately \$50,000 each; the Licking river bridge will cost approximately \$60,000; and the Chavies bridge will cost about \$40,000 it is estimated. One mile of grade and drain also is to be constructed at the West Liberty bridge.

The date of opening bids originally was set for August 22, but was changed to September 5 by the commission. Another large road letting is to be awarded during the early part of October.

Road projects on which bids are to be received September 5, follow:

Henderson county, Henderson-Morganfield road (U. S. 60) 11.5 miles, surfacing.

Marshall county, Benton-Murray road, 8.2 miles, surfacing.

Marshall county, Benton-Paducah road, 3.9 miles, surfacing.

Crittenden county, Marion-Morganfield road (U. S. 60), 13.2 miles, surfacing.

Calloway county, Murray-Hazel road, 6.9 miles, grade and drain.

Lincoln county, Stanford-Hustonsville road, 4.6 miles, grade and drain, and surfacing.

Jessamine county, Buckeye road, 5.3 miles, surfacing.

Adair county, Columbia-Liberty road, 4.8 miles, reconstruction.

Ohio county, Beaver Dam-Rockport (Ky. 50) 5.9 miles, surfacing.

Grayson county, Cox-Peonia road, 6.1 miles, surfacing.

Muhlenberg county, Central City-Rockport road (Ky-50), 8 miles, surfacing.

Allen county, Scottsville-Tennessee state line (U. S. 31E) 9.2 miles, surfacing.

Union county, Morganfield-Wanamaker road, 9.6 miles, surfacing.

Jackson-Clay counties, McKee-Manchester road, 20.5 miles, surfacing.

Martin county, Inez-Kermit road, 10.7 miles, surfacing.

Perry-Knotts counties, Dwarf-Hindman road, 12.9 miles, surfacing.

Perry-Leslie counties, Hazard-Hyden road, 18.5 miles, surfacing.

Fleming county, Fields highway, 11 miles, grade and drain and surfacing.

Bath county, Fields highway, 12.9 miles, grade and grain, and surfacing.

Powell county, Natural Bridge road, 2.8 miles, surfacing.

In Paris they are making jewelry out of rubber. Maybe that's because so many engagement rings bounce back.

LARGE PREMIUM LIST FOR MID-SOUTH FAIR

Memphis, Tenn.—Awards totaling \$50,000 in cash will be divided among men and women, and boys and girls of the mid-southern states in the form of premiums for exhibits at the Mid-South Fair in Memphis this fall, it was announced here today. More than one-fourth, \$13,500, has been appropriated by the State of Tennessee through its agriculture department in recognition of the importance of the Memphis exposition.

Full endorsement of the great development of dairying in the mid-south is seen in the fact that the largest department awards will be made for the dairy cattle show. It will have \$7,530 in prizes in the main division and an added \$3,000 for dairy cattle exhibited by 4-H club boys and girls. There will be \$200 additional for premiums in the dairy products show.

In addition to the dairy cattle premiums, there will be \$5,050 for the beef cattle show, \$1,650 for the sheep show, \$4,470 for swine and \$2,000 for poultry so that the "farmer's barnyard" will come in for approximately \$25,000.

Additional prize money will be given for the agricultural and horticultural departments, pigeon and rabbit shows, for Smith-Hughes vocational work, special 4-H club events, for the women's department, school activities, etc.

These items do not take into consideration the liberal purses that will be given for the racing events each afternoon, one of the big features of the fair's entertainment.

Premium lists, or the official catalog, are being mailed to many prospective exhibitors, and are available free to all contemplating showing any kind of products, Secretary Frank D. Fuller announced today. The dates of the Memphis fair this year will be September 20-27 inclusive.

## W. O. Shankle, Former Mayor of Fulton, Moves to Paducah

Mr. and Mrs. W. O. Shankle and family will leave for Paducah Monday, to make their future home. The best wishes of their friends go with them for health, happiness and prosperity.

Dr. Curlin and family will occupy the Shankle home on Edgely street.

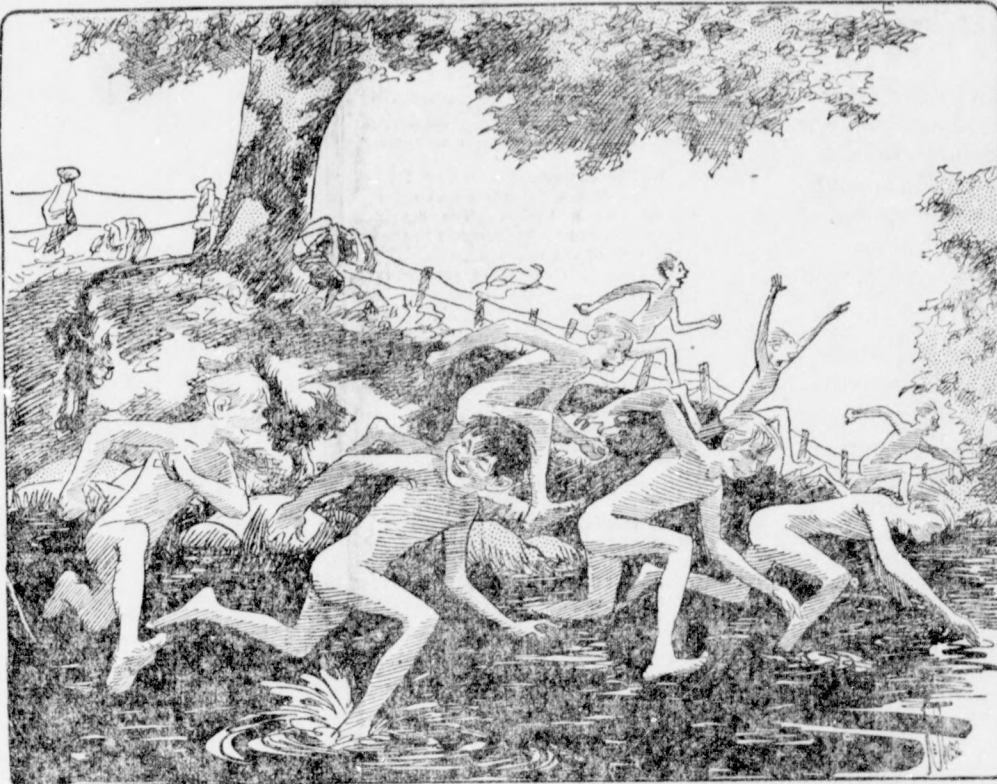

## FULTON GOLF TEAM DEFEATS DYERSBURG

The Fulton golf team beat Dyersburg team twenty-four to seven, Sunday, in the West Kentucky - Tennessee Golf League at the Country Club.

The Dyersburg players and their scores are as follows: Walter Draper, 84; C. C. Calcutt, 89; Frank Craddock, 92; Willard Draper, 90; Earl Ozmert, 98; Klein Baird, 92; Percy Conyers, 92; Campbell Lewis, 99; Burton Shibley, 96; Sid Jarrell, 114; Oscar Dittmore, 108; W. S. Cole, 98.

The Fulton players and their scores are as follows: Wilson Randle, 80; L. H. Weak, 83; Claude Freeman, 83; Bob White, 93; Frank Carr, 84; S. J. Holt, 86; S. P. Critz, 88; J. W. Gordon, 98; E. N. DeMyer, 98; W. P. Ayers, 93; W. Daniels, 92; Herbert Carr, 96.

## Relief in Sight

## W. L. Hampton and W. S. Atkins

### ANNOUNCEMENT

Messrs. W. L. Hampton, former county judge of Fulton county, and W. S. Atkins of the Atkins Insurance Agency, will represent the National Union Fire Insurance Company, of Philadelphia and will solicit business in the farm department in this territory.

Mr. Hampton will have charge of the new department. The company will be known as Hampton & Atkins Agents, and the office will be located with the Atkins Insurance Agency at 203 Commercial Avenue, Fulton, Ky.

Dedendable and courteous service will be rendered the assured. Your business will be appreciated.

### LET CONTRACT FOR LAST GAP OF NO. 43 ON AUGUST 8

### Will Bring Another Paved Highway Into Fulton

The gravel road between Martin and Fulton, the last section of gravel in Route 43, will be let for concreting on August 8, according to information furnished Esq. S. A. McDade by Judge Buchanan, of Obion County. Obion county officials have been working hard at getting this work started, and it is now ready to let. This will forge another link in the great chain of paved highway about this city, and when it is completed, with the paving of Route 51 north, Fulton will be on all paved north and south roads in two directions. Route 45 will also be paved within the next year and then Fulton will have paved roads in all directions.

Esq. McDade also stated that Tennessee road officials would soon come here for the purpose of going over the State Line road toward Dukedom and Boydsville, with a view of aiding in developing this highway.

### NOTICE

All who have claims against the estate of L. Herring are requested to present same.

### INSTRUCTING THE MOTORIST

The American people may have thought, when they reached adult age, that they had finished their education. But now that some 25,000,000 of them are driving automobiles, they have to go to school again, with traffic cops, licensing authorities, and courts, as teachers.

Many of them are dull pupils, deserving a good long seat on the dunce school. Many are so stubborn, that one can imagine them as soon emerging quite tearful from a special session with the teacher.

Complaint is made that some of the officers who officiate as their instructors, bowl them out too roughly. But if such critics have been dealing for years with motorists who think anything goes provided no officer sees them, they might not preserve all their fine party manners.

Constant violation of well known traffic rules must wear the patience of the officers down to the last thread. The authorities of a town will erect No Parking signs in places where a clear street is necessary, but many motorists can't see these notices. Having such poor vision, they do not seem fit to operate cars on the road.

Or they will often park cars, directly against a fire hydrant, which might cause very harmful delay if the firemen were called to the spot. They ignore traffic signals set against them, if no officer is looking. Speed limit laws they regard as humorous literature.

What shall we do with all these lawless folks? If they were back in school, they would be sent home for parents to deal with. Now it is assumed that they have graduated from the bad boy stage, and wish to qualify as real citizens. If they are still kids in adult disguise, they should expect the discipline that is handed out to refractory children.

When clocks are run down they are sometimes wound up. And pedestrians are a good deal that way, too.

Nothing can burn a hole in a Fulton man's pocket quicker than an ad offering oil stock at a few cents a share.

There was a time when a Fulton mother would intervene if her daughters scurried about each other's clothes. Nowadays she's usually mixed up in the argument herself.

## Brieflets

Why is it that nothing looks as much like wasted energy as a couple of pretty Fulton girls kissing each other?

Incidentally, the radio gives the country a line on the number of fellows in America who think they are funny.

The honeymoon is over when he asks her what she has cooked for supper before he has kissed her.

We've heard it said that not one man in Fulton has run into a telephone pole since Dame Fashion lengthened the skirts.

When all is said and done, a back-seat driver is no worse than an arm-chair housekeeper.

The average Fulton boy is like a thermometer. If you make things hot enough for him at the bottom he'll climb.

Now that electricity has solved the problem of woman's household drudgery, the problem arises of finding someone to run the appliances.

The main trouble with the school of experience is that you never graduate from it.

Any little boy around Fulton can become president. But if he wants to become a senator he had better start saving his money early.

George Eastman gave away a million kodaks when his company celebrated its fiftieth anniversary. Wonder if Ford will do the same thing when his River factory is that old?

It has been our observation that while most Fulton girls are not anxious to take up cooking they certainly do love to put it down.

Now that there's getting to be a gas station on every corner, where would the saloons go if they did come back?

If science is as wonderful as it claims, why doesn't it cross the rubber plant with a steel plant and grow tires with metal rims?

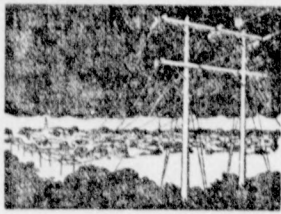

Always remember that a rabbit's foot is a poor substitute for horse sense.

Getting their knees out of sight may help some, but getting down on them more often might help the modern generation of girls more.

### CANDY AND GRAY HAIR

Believe it or not, but we Americans consumed 1,382,243,387 pounds of candy in 1929. That was 117,000,000 pounds more than we ever ate in a single year before. And candy makers are claiming that radio is responsible for the increase. They say more candy is eaten by people in the evenings while "listening in" over the radio than at any other time of day. Candy is also standard equipment for the young fellow who takes his girl to the movie shows, and so widespread has the candy habit become that it's nothing unusual to see Fulton citizens who once reached into the pocket for a chew of tobacco, now drawing forth a piece of candy to munch on instead. Peanuts and popcorn also show increased sales. In fact, it seems that our whole life has changed and that the things we once thought fit only for kids are now the things we are enjoying most. But it's a good sign. Anything that helps to keep up from worrying over gray hairs is a blessing, no matter if it does come in the shape and form of a sack of peanuts or a piece of candy.

## Your Power Supply —and Your Neighbor's

THE grouping of electric service requirements of a widespread area into one large electric system has brought about today's efficient power supply in small communities. Just as in the large city, mass production and mass distribution of electricity become possible. Greater efficiency in operation, and hence greater economy result.

The transmission-system type of electric power supply is among the outstanding industrial developments of the past fifteen years. Supplanting isolated local plants, it has brought greater efficiency, greater dependability and wider distribution of electric service to small towns and rural areas.

## FOOD LIKE YOU GET AT HOME

This is truly a home-like restaurant because it has endeavored to break down the prejudice based on the theory that restaurants could not serve food like you get at home. Many patrons will testify that there is no difference between our meals and the meals they get at home. That's the reason they come here so frequently to eat. Years of catering to the appetites of particular people make it possible for us to serve appetizing meals. The next time you want to eat away from home, bring your family here.

## Sunday School 'Lesson'

(By REV. P. R. FITZWATER, D. D., Member of Faculty, Moody Bible Institute of Chicago)  
(©, 1920, Western Newspaper Union.)

### Lesson for July 20

#### MOSES, A COURAGEOUS LEADER

LESSON TEXT—Exodus 1:8-14; 2:1-22; 3:1-14.

GOLDEN TEXT—By faith he forsook Egypt, not fearing the wrath of the king; for he endured, as seeing him who is invisible.

PRIMARY TOPIC—Moses Doing Hard Things for God.

JUNIOR TOPIC—Moses' Call to Leadership.

INTERMEDIATE AND SENIOR TOPIC—Daring the Impossible.

YOUNG PEOPLE AND ADULT TOPIC—Leader, Liberator and Lawgiver.

#### I. The Enslaved People (1:8-22).

After Joseph's death Israel quickly grew into a nation. The amazing growth of the nation aroused the envy and fear of the new king.

1. Heavy measure of service (vv. 10-14).

Cruel taskmasters were placed over the men, forcing them to labor in building treasure cities as well as in field service. However, the more they afflicted them, the more did they multiply and grow.

2. The midwives were ordered to murder the male infants.

This measure also failed, as the midwives feared God and chose to obey Him.

3. Commanded that the male children should be cast into the river (v. 22). In God's providence this mandate failed.

#### II. Moses, the Deliverer, Prepared (2:1-22).

1. His birth (vv. 1, 2).

Both his father and mother were of Levitical stock. Being of the same tribe, they would have a common bond of interest and sympathy. There was something striking about the child which caused his parents to believe that he was sent of God.

2. His preservation (vv. 3, 4).

Because his mother had faith she did not ignore the proper use of means. She was doubtless familiar with the place where Pharaoh's daughter came to bathe and believed that somehow through her the child could be saved. She placed the ark of bulrushes at the particular place where it would attract attention. Though the hand of God was directing in the carrying out of His plan, the steps in the process were entirely natural.

3. His education (vv. 5-10).

Moses was educated, first, at his mother's knee. Here his mind was filled with the word of God and acquainted with the Jewish hopes and prospects. Doubtless here the indomitable purpose was fixed "rather to suffer affliction with the people of God, than to enjoy the pleasures of sin for a season" (Heb. 11:24-26). Again, he was educated at the Egyptian court where he became acquainted with all the wisdom of the Egyptians (Acts 7:22).

4. His exile and marriage (vv. 11-22).

Moses was obliged to take his flight from Egypt at the age of forty, because he attempted to enter upon his work as the deliverer of his people (Acts 7:25). He was conscious of his mission, but was mistaken as to the time. His rejection by his brethren was a type of Christ's rejection by the Jews. During this time of rejection he secured a bride, Jesus Christ, his great antitype, while now in the place of rejection by His brethren, is getting a bride from among the Gentiles. Just as Moses after awhile returned and delivered his people, so will Christ return and deliver His people, the Jews, who rejected Him.

#### III. Moses Called to Deliver His People (3:1-14).

1. The Lord spoke from the burning bush (vv. 1-6).

It was while keeping the flock of his father-in-law in the desert that the Lord appeared to Moses in the vision of the burning bush. This bush, enveloped in flames, yet unconsumed, symbolized the people of God encircled in the very fire of God.

2. Moses' commission (vv. 7-10).

In this commission God showed His active interest in His people. Because of His grace He obligated Himself to deliver them out of the hand of the Egyptians and bring them into the chosen land; therefore God commissioned Moses to bring forth the people out of Egypt.

3. Moses' objections removed (vv. 11-14).

Four objections were offered, each one of which God met and removed. (1) Personal unworthiness (v. 11). (2) The difficulty of the people to understand Moses' relationship to God (vv. 13, 14). (3) Unbelief on the part of the people (4:1). (4) Lack of eloquence (4:10).

#### Value of Religious Belief

I should prefer a firm religious belief to every other blessing; for it makes life a discipline of goodness, creates new hopes when all earthly hopes vanish, and throws over the decay, the destruction of existence, the most gorgeous of all lights; awakens life even in death.—Sir Humphrey Davy.

## Community Building

### Community's Big Task, to Avoid Deterioration

There is a fine element of enthusiasm in creating greatness, which too frequently fails in defending and maintaining greatness achieved, says a writer in the Detroit News. The principle works in the simplest phases of community life. The young couple with all-absorbing zeal toil to complete the new house and view with huge content its varnished floors and newly decorated walls and well-fenced garden. But too easily they slip into the relaxed mood with the sense of an objective reached. The varnish mars; the walls soil; the garden fence is broken and the owners lose the pride of possession which came to them in the struggle to obtain. Not different may be the fate of any civic enterprise, however imposing and costly. There is "upkeep" to be reckoned as an essential with every community undertaking and the biggest task is to keep community enthusiasm up to the supporting point.

Too often with tremendous enthusiasm a people bring about changes in their government and establish it in conformity with high ideals; then trusting too confidently to the perfect machine, forget their obligations. How quickly comes deterioration. "Neglect of the city's business by business men, explains many evils of which business men often complain," writes a critic of civic affairs.

The citizen forgets that "Keeping a city great is a bigger task than making it great."

### Real Estate Investor Must Wait for Profit

Real estate, like growing things, requires a certain period of time to mature as an investment. The length of this time varies with the location with the development activities in the surrounding area, and the honesty, the seriousness of purpose and the financial ability of the developer.

While the completion of a new highway or transportation line will greatly accelerate this maturity and thus reduce the logical term for the investment, it is very apt to be followed to a period of repose and, in the long run, the maturing process is practically stabilized.

It is much like the forcing of plant life. The harvest may be artificially hastened, but at the cost of plant vitality, and the plant or tree requires the reawakening of the growing season to recover from the experience.

### Beautify the Home Place

Many realtors say that the right kind of planting and gardening adds to the financial value of property at least 20 per cent.

Amateur gardeners, however, must be careful to lay their plans skillfully lest the effect be marred and the value all lost, it is pointed out.

The landscape problems of the small home owner of course vary greatly from those of the man with a large estate.

The latter may go in for formality and elaborate effects while the man who has to deal with limited space will find his planting must serve a two-fold purpose; that of being useful as well as ornamental.

### Builder Should Look Ahead

Restrictions providing that houses in certain areas must reach a certain cost level or even be of architectural design harmonious with its neighbors now control many residential sections throughout the country, but there are many places where no such restrictions exist, where the entire matter is up to the home builder, and where it would pay him to be extra careful to see that no mistakes are made in the improvement he puts on his lot.

### Design Essential

If the garden is to avoid formal lines, then there is a nice little problem in proportion. Repetition, but once, rhythm and accent play their part in the formal design. The holder of a completed garden may not be conscious of anything but the beauty of the picture, but the requirements of good design have to be met if there is real beauty expressed.

### Markers on Highways

Markers describing historical points of interest for the benefit of tourists are to be erected along Massachusetts highways within a year. One hundred such markers are to be put in place as soon as possible, and plans call for the erection of 100 or 200 more later. The markers will be fashioned after those now in use throughout Virginia.

### Homes Affect Bodies

In order to grow strong capable and stalwart men and women, it is also utterly necessary for children to have the benefit of good home surroundings and proper home influences.

### Healthy Conditions Vital

But few things, if any, contribute to the cultural and refined tastes of an individual more than inviting and healthy living conditions.

### Appearance Everything

A community's appearance, in the main, determines property value and community value.

## FARM POULTRY

### CLEAN GROUND IS BEST FOR RANGES

#### One of Most Important Points in Growing Pullets.

Clean ground for ranging is one of the most important points in the growing of healthy pullets which will become vigorous and profitable layers. It is pointed out by the poultry husbandry department of the Ohio State university.

A large percentage of the mortality in the growing flock, as well as in the matured laying flock, is caused either directly or indirectly by intestinal parasites," P. B. Zumbro, poultry specialist, says in a recent extension service publication. "These parasites, as well as many disease germs, are carried over from year to year in the soil."

Zumbro urges that chick ranges be on land on which no other chicks have been raised or old hens ranged, for at least two years. Alfalfa, he says, makes one of the best chick ranges. Clover is almost as good, and blue grass comes next.

"Many poultry men think an alfalfa or clover field is too valuable for rearing chicks. This is a mistake. Poultry grown on good range will give a return equal to that from any five stock, or better. Good results can be obtained by having two or more ranges, and a crop can be grown in the meantime. This method will provide clean range and will enable the owner to have the brooder house near the farmhouse, saving time in going to and from the house. When this method is used, one acre of land should be provided for each 500 chicks."

Wonderful Feats With Turkeys Are Reported

Really wonderful results with turkeys are reported from the Ontario government turkey farm in Norfolk county. Years ago this province used to raise turkeys by the thousands but disease got in and flocks have been diminishing to such an extent that each year thousands of birds are brought in from the West. The disease puzzled people and except where there was unlimited range the raising of turkeys languished. Even in the places where there was plenty of range, such as in the rocky districts on the edge of forest lands, difficulties in the shape of foxes and wolves were encountered. It looked for a while as if there would be practically no turkeys raised in Ontario. But Prof. W. R. Graham took hold of the thing and he soon found out that the disease came from the ground and the germs were so hardy that they could live over in the coldest weather. He adopted the plan of feeding everything in troughs and moving these troughs each day and his results have been unusually successful. Losses have been light on the experimental turkey farm and some excellent birds raised.

### Poultry Notes

It pays to worm the poultry.

It requires 21 days to hatch hen eggs.

Care must be taken that chicks do not crowd in corners and smother.

Shut the sheep in at night, allowing them to bed in the corral or shed.

Coccidiosis usually occurs in young chicks from two to six weeks of age.

When the pullets are about eight weeks old, they can be removed to the rearing ground.

Tapeworms have been named as the cause of death of 50 per cent of the chickens in some flocks.

Changing breeds every year has never yet been found a safe foundation for a profitable poultry business.

A month lost in growing out pullets means the loss of a month's production next fall when eggs are a good price.

Any variety of wheat is good for poultry. In fact, small undeveloped shriveled wheat if dry is even better than the fully developed kernel.

The farmer who produces eggs of uniform color, weighing an average of 23 ounces per dozen, and which are held in a cool cellar, can ship to eastern markets by express to advantage.

The profit from the farm flock depends to a large extent on the number of eggs the hens lay.

Hens cannot lay eggs without protein. Skim milk is one of the best forms of protein for use with all classes of poultry.

Mongrel geese plucked regularly yield one pound of feathers a year. Pure-bred geese yield twice as many and, besides the good prices of feathers obtained, the goose is worth as

### In Their Buzzy Wagon

By CLARISSA MACKIE

(Copyright 1934)

"THIS dithering across country is not as joyful as it sounds," growled Mr. Bellamy, as he munched a dried beef sandwich.

"Don't call my Rolway a 'ditherer,'" objected Jack Bellamy. "Where's the thermos bottle, dad?"

"Where?" he echoed in a parched tone. "Your impeccable Wilkins has failed to put one in the hamper."

Jack growled as he looked around the rather forsaken country through which the well-oiled motor road wound like a black snake.

Something black showed on the reflector beside the driver. Jack craned his head around to scan the shabby car in the rear; it was an ambitious little closed car, much the worse for wear, but it rattled bravely along, keeping closely in the wake of the monster. Suddenly there was a loud report and the Rolway listed a little. Jack stopped the car at the side of the road, with a warning backward flap of his hand.

"Tire, front—flat," explained Jack, as he got out and removed his coat.

Mr. Bellamy paused as the shabby little ditherer came up and stopped in front of them. A girl's charming face looked out at them.

Beside her sat another girl, fair and blue-eyed, in the same attire. The healthy tan and rosy color testified to their delightful gypsying across country, too.

They saw only Mr. Bellamy, for suddenly Jack was on his knees examining the gears of the Rolway.

"Haven't any water on board, have you?" asked Mr. Bellamy.

"I am sorry—we have drinking water, not enough for—"

"Don't want it for the car—dying of thirst," explained Mr. Bellamy.

"The poor thing!" exclaimed the other girl. "I will get it, Dorothy."

At the sound of Dorothy's name the head of Jack Bellamy emerged turtle-wise from beneath the car, his expectant eyes seeking the dark-haired girl. She saw him at the same moment and saluted.

"Oh, see the pretty man," breathed Helen as she passed Dorothy with a thermos bottle in her hand.

"Idiot," growled Dorothy, wondering what adverse fate had brought her to the same trail with Jack Bellamy, whose erratic father had refused to allow his son to marry a poor, unknown girl. They had lost sight of each other, and now she and Helen Gray, jogging along in their beloved "buzzy wagon," journeying from town to town and sketching by the way, had found themselves trailing a gorgeous car that blocked the narrowing road. And it had proved to be the car of Jack's objectionable and obnoxious parent, and Jack was looking at her with surprised, devouring eyes. She shook her head slightly, disowning his acquaintance.

Mr. Bellamy drank deeply from the silver cup again and again. It was a shining cup—Dorothy's christening cup—and bore her name. The horn-rimmed spectacles of Mr. Bellamy peered closely at the inscription.

"Dorothy Meares — Meares — that your name?" he asked sharply.

"Yes," admitted Dorothy, recognizing her lost color.

"I knew a Meares. Old friend of mine. We used to hunt in Canada together, long ago. What was your father's name?"

"Nathaniel," she said reluctantly.

Bellamy looked disturbed, and his face softened. "He was my friend. And now he has passed away, my dear?"

"Two years ago, at Seattle," she answered.

He nodded. "I heard that. A brave man and a thoroughly honest friend; one in a thousand. I am very glad to meet his daughter. My name is Bellamy, Angus Bellamy."

"Thank you, Mr. Bellamy. My father always kept your picture in his study, the one in which you were leading a monster trout."

"Right! Jack, come here and meet the daughter of an old friend of mine. Miss Meares, this is—"

Dorothy's slim form stiffened. "I have met your son, Mr. Bellamy."

"Jack, you never told me."

"Frowned on Jack, who looked equally stiff and distant."

"Miss Meares is the young lady I wish to marry, dad," he said at last.

"What?" bristled Mr. Bellamy, immediately mindful of the undesirable girl Jack had wanted to marry.

"What? What?"

"One of Dorothy's pies," irreverently broke in Helen Gray, as she came forward with a huge flakey apple pie in her hands. "I am starved, and it is twenty miles to the next town—who will have a slice of pie?" She put her hands on the running board of the Rolway. She flashed a silver knife and passed pieces of delicious pie around on paper plates.

Mr. Bellamy ate, and mutely passed his plate for more. "Anyone who can make a pie like this . . . the daughter of my best friend . . . Dorothy, my dear, go and make it up with Jack!"

Dorothy led Jack to the shabby, open little car that she and Helen owned together. She bent and swept a kiss at the open door.

"The dear old buzzy wagon . . . it brought us right to you!"

"I want to kiss it myself," grinned Jack, "only it's a great pity to waste 'em!"

## MOST TORNADOES NOT DANGEROUS

### Motorist Should Drive Car North or South.

In spite of their ferocity, tornadoes offer little peril to motor tourists if four general rules are kept in mind and obeyed when a twister is sighted, points out the touring bureau of the Chicago Motor club.

"Inasmuch as nearly all tornadoes move in generally easterly direction, the car should be driven north or south, out of its path," the bureau stated in a bulletin. "One should be careful, however, not to drive into a second one."

#### Get Into Cyclone Cellar.

"If the car is disabled, get into a cyclone cellar, if one is near. Failing in both of those plans, take refuge in the cellar of a frame house, on the side nearest the storm. Should the house topple, the debris will be blown away from you. If there is no other recourse, then to face the storm in the open, lie flat on the ground, or preferably in a ditch some distance from trees or poles. Shield your head with seat cushions."

Tornadoes are, the bureau explained, traveling whirlwinds. Their destructive area at any one moment is not greater, on the average, than two or three square city blocks. While the rate of whirl at its axis may be three or four hundred miles per hour, it seldom travels across the country faster than sixty miles per hour.

#### Tornadoes Move Northeast.

Most tornadoes move toward the northeast, while a few travel toward the southeast. The chances are about fifty to one that the direction in which it is seen to be moving is the one which, with but slight variations, it will pursue until it dies out.

### Controlled Lights Are Favored for All Storms

Controlled lighting offers the most satisfactory solution of the difficulties of driving through fog or snow and rainstorms.

Fog generally hangs just above the ground and lighting equipment which can be adjusted to get underneath the fog for a short distance ahead of the car so that the driver may see the edge of the road is the most desirable. A road light, attached below the front bumper, is effective. Dimming equipment which tilts the beams of the headlights downward have an advantage over some other types of dimmers.

Controllable "spotlights" or search lights which can be trained on the edge of the roadway are desirable equipment for driving under these conditions. Fog continues to be hazardous and calls for unusual caution on the part of the motorist, just as it continues to trouble the airplane pilot and the sailor.

In the same way controllable lighting equipment is best for driving in heavy snow and rain, from the standpoint of path illumination.

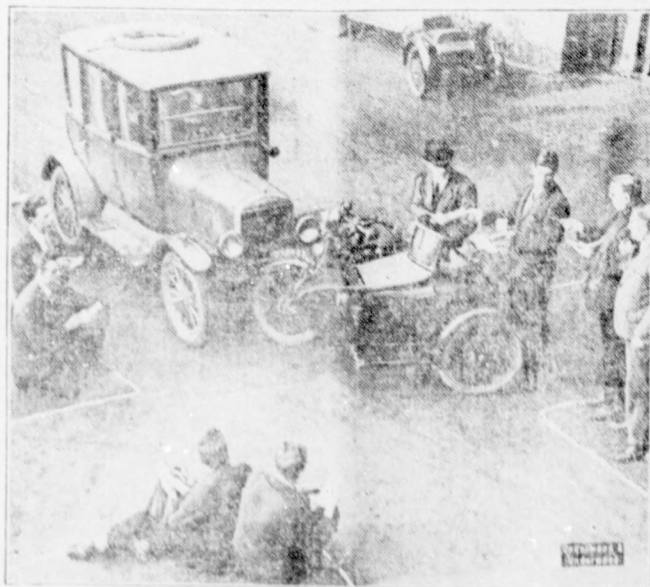

In inclement weather accidents are fewer in proportion to the hazards involved than they are on bright, clear, and dry nights, because drivers naturally use extreme caution.

### Small Gas Engine Most Versatile Farm Worker

Some one has said that the small gas engine will do practically anything a hired man can do except take the hired girl to town on Saturday night. In fact, a gas engine is one of the most versatile chondrions on the farm.

At least 20 or 25 farm jobs can be done with gas engine power, for only a few cents per hour of work. A gas engine will eliminate the drudgery of operating a washing machine by hand. It will pump the water, drive the water system or operate the farm light plant. Other common jobs are grinding feed, sawing wood, operating the grain elevator, running the grindstone, mixing concrete and many more.

### AUTOMOBILE ACCIDENT IS MADE TO ORDER

An improvised road smash at the police school at Wolverhampton, England, to facilitate the teaching of proper procedure in case of accident to rookie cops. The white lines represent the curbs.

### THE MOTOR QUIZ

How Many Can You Answer?

Q. How often is the oil circulated through the engine's oiling system at average driving speed?

Ans. From 100 to 150 times an hour.

Q. How is spark plug preignition revealed?

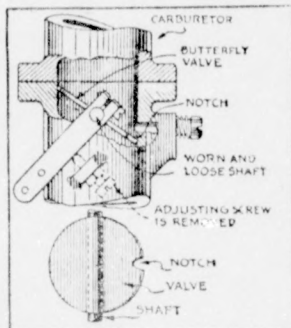

Ans. The engine loses power and the driver often thinks he is running out of gas; a pinging noise is sometimes heard; missing at continuous high speed.

Q. What factors are necessary for perfect carburetor performance?

Ans. Proper carburetor adjustment, good compression and ignition.

### Repairing Poor Idling of Motor Car Engine

The effective opening past the butterfly valve, to allow the motor to idle at a slow speed, is surprisingly small. After the car has been in use for several years, the shaft on which the butterfly is mounted and its bearings become worn. The result is that the butterfly never closes to the same position twice running; in addition, a considerable amount of air leaks through around the shaft bearings. A

With adjusting screw removed, file a notch in the butterfly valve to govern the idling speed of the motor, when the bearings admit air.

simple way to cure this trouble is to remove the adjusting screw entirely so that the butterfly closes tight. File a small notch in the edge of the butterfly valve as shown. The notch should be filed in the side of the butterfly valve on which the low speed nozzle is located and the size of the notch will govern the idling speed.—Popular Science Monthly.

### AUTOMOBILE FACTS

A Frenchman has invented a car which jumps from the ground and travels considerable distance in the air.

Despite the fact that the latest automobile engines run hotter, the proper block water temperature still averages 170 degrees.

There is an English passenger car which has the engine directly over the rear axle where it used to be in many of the first American automobiles.

More than 6,300,000 automobiles and trucks were produced by auto manufacturing countries of the world in 1929, which is a new record for world production.

Do the wheels creak when the car turns a corner? It may be a loose lug. Loose lugs, permitting the rim to wobble, cause one of the most rapid forms of tire wear.

Federal aid highway systems were freed of 385 railway grade crossings during 1929, according to the United States bureau of public roads. Georgia headed the list with 82 eliminations.

The cost of automobile accidents to the United States is about \$2,500,000 every 24 hours, the American Research foundation reports. The 1928 cost totaled more than \$900,000,000.

## We Can Help You Make Money

The right kind of printed forms will help your business prosper by saving your time and keeping your records in proper shape.

Our service as printers is not limited to taking your order and putting some ink on paper according to your directions.

We are able to make suggestions for business printing that may save considerable money for you. Our plant is completely equipped and we carry a stock of

**HAMMERMILL  
BOND**

**The Utility Business Paper**

in order to give you the quickest service possible.

## Shelf Fishing

FISHING calls for patience, but not so much of it if you're just fishing a can off the pantry shelf. And where else can you catch anchovies, clams, codfish, crabs, crawfish, haddock, herrings, lobsters, mackerel, salmon, sardines, shad, shrimps, tuna fish, and even turtles, all in one place? Just a twist of the wrist with a can opener, and you can have any of these fine products before you without any tedious waiting or a bit of sunburn. That's one of the luxuries of modern life.

Another luxury is the fact that so many good recipes have been devised for the use of these products that your only problem is to choose between them. Try, for instance, this recipe:  
**Tuna Loaf with Celery Sauce:** Shred the contents of one 7-ounce

can of tuna fish, and add two slightly beaten eggs. Add one cup of bread crumbs, three tablespoons milk and salt and pepper. Put in a buttered loaf pan, and steam or bake forty-five minutes. Turn out and serve with a sauce made by heating undiluted one can of celery soup. This serves four.

**A Tasty Pudding**

**Corn and Salmon Pudding:** Mix in the following order the contents of a No. 2 can of corn, one tablespoon melted butter, one-half teaspoon salt, one-eighth teaspoon pepper, one small can salmon and one tablespoon heavy cream or evaporated milk. Be careful not to break up the salmon too finely. Bake in a buttered baking dish in a moderate oven (350°) thirty minutes. Serves eight.

**Phone 794 for Job Printing.**

## DAIRY FACTS

### DRY COW FEEDING IS BIG PROBLEM

Condition of Individual Animal Governs Ration.

Rations and feeding practices suitable for dry cows depend somewhat on the condition of such cows at the close of their lactation periods. In the process of selection and breeding, a great many cows are so persistent in producing large quantities of milk that it is practically impossible to keep them in good flesh during the entire lactation period. This means that they are in poor condition at the close of the lactation period. Practical dairymen are agreed that such cows must have from six to eight weeks of rest following each lactation if they are to produce large quantities of milk year after year. The feeding of such cows during the dry period should be such as to enable them to regain the losses sustained in the previous lactation and before the onset of the demands of the succeeding lactation. The same principle of management is recommended for cows not capable of producing as much but in less degree, says Howard's Dairyman.

No special ration is needed for dry cows. As in making rations for cows in milk, the roughage to be fed is the basis on which to compound grain mixtures. The condition of the individual cows governs the amount of grain to be fed. The needs of dry cows on good pasture are very easily met by a simple mixture composed of 200 pounds ground corn or ground barley or hominy feed, 200 pounds ground oats, 200 pounds bran, and 100 pounds linseed meal or cottonseed meal, or a mixed feed containing 30 per cent of digestible protein.

In winter feeding with silage and alfalfa hay available the addition of 50 pounds of the high protein feed to the mixture given is satisfactory. For silage and other legume hay add 100 pounds more of one of the high protein feeds. Silage and mixed hay should have the protein content of the grain mixture still further increased by the addition of 75 pounds high protein feed to the amount given for silage and legume hay, the total amount being 275 pounds.

### Replace Broken Windows Before Blustery Season

Before the blustery weather and fall rains set in all broken windows in the cow stable should be replaced. A little time and a trifling outlay for glass and putty may be the means of preventing an outbreak of garget in the herd during the winter.

Inflammation in the udder is often caused by exposure to drafts. This may develop and encourage garget, a contagious disease which, if not checked, may spread to other members of the herd, cutting milk production sharply. It may also cause the loss of quarters of udders which become badly infected.

Two or three years ago I visited a herd where a splendid cow was suffering from garget. Her stall was located near a window and a few days before she freshened one of the window panes had been broken. A cold east wind blew in on the cow all night with the result that a little swelling developed in the udder and some thick milk came from two quarters a few days later. Garget set in and after some time one quarter ceased to yield any milk and the other was not normal. The next time this cow freshened she was sold for beef. This was an exorbitant price to pay for less than one square foot of glass.

### Silo for One Cow Plan Now in Vogue in Japan

What would our American farmers think of equipping their farms so that each cow would have her own silo? In Japan, they don't quite do this, but many farmers keeping one or two cows have a silo. The department of agriculture of Japan, reported in 1925, 4,381 silos of less than five tons each. Now a cow needs about four tons of silage per year so these less than five-ton silos could be classified as individual silos, or one cow silos.

Another thing of interest concerning the silos of Japan is the fact that the vines of sweet potatoes come next to corn in material used for filling. All kinds of green, succulent forage and material grown on the farm are cut up and put into the silo where it is preserved and fed out during the winter season.

Silos are making rapid progress in Japan according to the report, and are being widely used by the stock keepers.

### Soy Beans and Corn

Soy beans alone do not make a satisfactory stage. It is best to combine them with corn in the proportion of two or three to one; that is, two or three pounds of corn to one of soy beans. It is also best to mix the soy as they are blown into the silo, rather than to put in a layer of beans and then a layer of corn. Mixing in this way you should be able to get a satisfactory silage. Soy beans intended for silage should be cut before the beans in the pods harden.

## POULTRY

### CAUSE OF SCABBY LEGS IN POULTRY

The unsightly disease which affects the legs of fowls, causing them to swell and become distorted, is due to a mite, a small insect which is similar in appearance to that which causes scab in sheep. It is roundish-oval and semi-transparent, about one eight-hundredth of an inch in length, appearing, when magnified 400 diameters, about half an inch long. Beneath the scales there are spongy, scabby growths, in which the eggs and pupae of the mites are to be seen in great numbers. The pupae are very similar in shape to mature mites, but are very much smaller, appearing, when viewed with the above-mentioned power, about one-tenth of an inch in length. The disease, being of a similar character to the scab in sheep, or the mange in dogs and cattle, may be cured by the same treatment. Fowls were cured of this disease, before accurately knowing the cause, by applying to the legs a mixture of lard with one-twentieth part of carbolic acid. This should be applied with a stiff brush, such as one of those sold with bottles of muckilage. A very small painter's sash-brush would answer the purpose; but some thing must be used by which the medicated grease can be applied thoroughly to the crevices between the scales.

A mixture of equal parts of lard or sweet-oil and kerosene will be equally as effective as the carbolic acid mixture. It is probable that lard, or oil alone, would be effective, but the kerosene more easily penetrates between the scales and the carbolic acid is sure death to the parasites. The remedy being so simple, it will be inexcusable if this disagreeable affliction is suffered to remain in a flock; while, however, one fowl is troubled with it, it will certainly spread, as the mites will burrow beneath the scales of the other fowls. If precautions are generally used, the parasite can be exterminated. Whenever affected fowls are sent out, the disease goes with them.

### Pullets Grown Rapidly Will Give Best Profit

A study of the relation of certain factors in the single comb White Leghorns at the University of Idaho agricultural experiment station showed that the more a pullet weighed when she started laying—the heavier—were the first ten eggs she laid. The largest pullets, as measured by their maximum weight for the year, laid eggs that averaged the heaviest for the year.

This is an important consideration because in the past, early maturity, as indicated by a small number of days from the date of hatch to date of first egg, has been emphasized. It is quite natural to expect that the pullets that begin laying early weigh less when they start to lay than those that take a longer time to mature. Rapid bodily maturity is, therefore, as essential as rapid sexual maturity, as indicated by the laying of the first egg.

No correlation was found to exist between the size of the pullet and her yearly production. The large pullets laying a large egg would seem desirable. The large pullet, however, matures too slowly and is a less efficient egg producer. Efficient management calls for pullets of medium size, matured normally, both bodily and sexually. The indications are that such pullets have the best chance of being producers of standard eggs as well as an equal chance of being high producers.

### Wisconsin Experts Give Rations for the Chicks

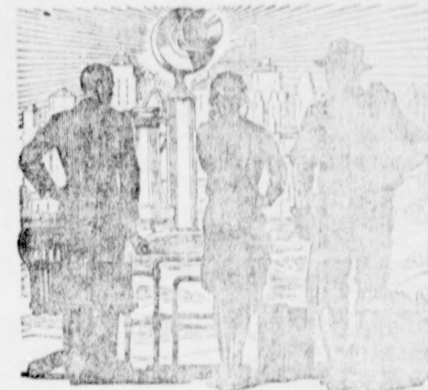

For chicks the first ten days Wisconsin experts recommend this corn cake: Finely ground corn, 1 pint; wheat bran, 1 tablespoon; soda, 1 teaspoon; full; sour milk, 1 teaspoonful. Bake one hour and feed four times a day. Mix a little dry grain chick feed into the litter to induce exercise.

After the first few days the following mash is recommended, either fed dry or mixed crumbly with water or sour milk: Corn meal, 150 pounds; wheat bran, 100 pounds; rolled oats, 25 pounds; meat scrap, 20 pounds; oil meal, 5 pounds; salt, 3 pounds.

The poultry department of Cornell university recommends this ration for fattening, with milk, and fed wet. Corn meal, 50 pounds; white wheat middlings, 20 pounds; ground heavy oats, 10 pounds. This is to be mixed to a batter, fresh at each feeding, with buttermilk or skim milk. It will require approximately two pounds of milk to one pound of mash.

### Hatchability of Eggs

The hatchability of eggs depends mostly on the constitutional condition of the breeding stock that is to produce the eggs. Next it might be said that the constitutional vigor of the breeding stock greatly depends on the conditions under which they are kept that is if they are properly housed and fed. Hens and well-matured pullets may both be used for breeding purposes with success, but great care should be taken that both hens and pullets are healthy.

### This Vital Service Requires Loyalty, Experience, Skill

A happy, satisfied personnel having confidence in the Company, pride in their vocation and interest in the customer is necessary in order to render high grade telephone service.

Of the 23,600 people in the Southern Bell Telephone system 41 per cent of the men and 30 per cent of the women have had more than five years continuous service.

They have chosen this for their life work because of the permanency of the business, the opportunities for advancement and the knowledge that the Company has a keen interest in their personal welfare, health and happiness.

They are friendly, home loving folks, performing their daily duties cheerfully and efficiently, and when emergencies arise exemplifying the spirit of service by acts of heroism.

The interest and effort of this group of people is directed toward rendering you the best possible service at the lowest possible cost.

**Southern Bell Telephone & Telegraph Co.**  
(INCORPORATED)

**More Eggs with Wayne Egg Mash**

It's great fun to gather the eggs both winter and summer where hens eat this high quality egg mash.

Keep your mash feeders filled with Wayne all the time. Then watch your egg records climb—and your cost of eggs per dozen go down.

If you'll give Wayne Egg Mash a fair trial—we know you'll soon come back for more.

## THE DOCTOR KNOWS

We happened to be present a few days ago when a local physician was asked by a Fulton man what, in his opinion, contributes mostly to illness during the summer months. The medical man did not hesitate in giving his answer. "Over eating" was his reply. He explained that the system is not in condition to properly assimilate heavy meats, or a big quantity of grease as quickly in summer as in winter. The digestive organs function better on vegetables and lighter meats, like chicken and fish, in summer time, he said. But, he explained, too many people believe that to sustain strength they must eat as liberally of beef and pork in hot weather as they do in cold. The result is such foods serve to increase body temperatures by heating the blood, the system is weakened, and illness results. "Too many people dig their graves with their teeth," the doctor asserted. And his statement is worth studying over, now that hot days are here in earnest.

## THE LAST HOPE LEFT

Advertising isn't meant to be seasonal; advertising the year 'round will help business the year 'round. There may not be a direct rash, but it draws a steady trade, and makes transient customers permanent ones. Advertising will build a constant and steady trade that cannot be built by any other method. But it will not sell goods of an inferior quality and it will not improve business in a musty store where goods are displayed unattractively. It will not hold trade at a store where clerks are not polite and considerate. It will not hold customers where service is not reasonably prompt. Competition is keen, but the business man who keeps his eyes open to new ideas and puts those ideas into practice—which includes a steady and liberal use of printer's ink—is bound to get his share of the business. The home paper is the last surviving hope of the home merchant in a day when mail-order catalogs and house-to-house salesmen are as thick as flies in this and every other community.

## AUSTIN SPRINGS

Uncle Bill Bynum has been on the sick list suffering from a stomach and bowel ailment. Mrs. Milas Dismang will return to her home in Arkansas in a few days. She attended the illness and recent death of her father, Matt R. Ainley. Joe Van, youngster of Mr. and Mrs. Walter Cunningham, of the Lone Oak vicinity, is seriously ill with acute indigestion. Two physicians have attended him. Mr. and Mrs. McKinley Bynum and daughter, Hilda Virginia, Raymond Bynum, Ernest Smoot, and Ruel Ford have returned to Akron after a delightful visit among home folks.

Mrs. Joe Westbrook is on the sick list suffering from malaria. She is under the care of a physician. Mr. and Mrs. L. B. Lassiter visited relatives, Mr. and Mrs. John Wells last Sunday. A very pleasant day was spent among the kin and they report the country awfully dry, but with an extra good tobacco crop.

A young lady arrived at the home of Mr. and Mrs. Earl Harrison a few days past.

Sunday school has been organized at Salem Baptist church. A good enrollment and attendance is had. Now officers and teachers are appointed and there is a real live awake Sunday school each Sabbath day at 10 o'clock. Everybody is cordially invited. The church just received a

new coat of paint at the hands of skilled painters last week. The series of gospel meeting begins next Sunday, held by the pastor, Rev. T. T. Harris, assisted by Rev. Miller. A good meeting is hoped and prayed for and may there be many souls saved.

Mr. Grant Bynum had a barn raising at his farm last week when a tobacco barn 24 by 32 feet was raised. A very sumptuous dinner was served at the noon hour. Ham, chicken, cakes, pies and other things that go with them. In the afternoon plenty of ice cold lemonade was served and the day was very much enjoyed as well as lots of work done.

Mr. and Mrs. Bill Farmer of St. Louis have arrived for a visit among home folks.

## Water Valley, Ky.

(Blair Vicinity)

We are experiencing some severe hot weather and crops are suffering from the extreme heat and lack of rain. Stock water is a great problem with most farmers in this locality. Mr. and Mrs. Cheslea Lee and son, Lacy, visited Mr. and Mrs. A. G. Stewart last Sunday.

Mr. and Mrs. Robert Jackson of California, visited in the home of Mr. John Robey, a few days last week. Quite a number of men of this community went fishing last week. They report a very nice catch.

Don't forget the "Robey Reunion" next Sunday, July 20. It meets at the home of Mr. Cheslea Lee this time and a large crowd is hoped for.

School opens at Blair school first Monday in August. Mr. and Mrs. Watson Robey visited Mr. Billie Burrow and family, Sunday.

## Beelerton News

Last Tuesday, Mr. and Mrs. Robert Jackson, of Los Angeles, Cal., spent the day with Mr. and Mrs. Richard Mobley. Mr. and Mrs. Jesse Hicks and daughter, and Mr. and Mrs. Alzo Hicks and son visited in Hickman, Sunday.

Miss Sarah Emma Best is visiting relatives near Crutchfield this week.

Mr. and Mrs. Irl Hicks and family spent Sunday with Mr. and Mrs. Jasper Bockman.

Miss Katherine Mobley had as her guests, Thursday, Misses Inez and Claudia Freeman, of Sweetwater, Texas; Misses Mary Adeline and Gwynell Weatherford, of Clinton, and Miss Evelyn Byrn.

Mr. and Mrs. Will Guyn spent Sunday with Mr. and Mrs. E. J. Bennett, of Clinton. The Christian Endeavor meets each Sunday night at Mt. Zion church. Everyone is cordially invited to attend.

Mr. and Mrs. Aaron Kirby spent Saturday night with Mr. and Mrs. Dick McAlister.

Mr. Russel Bockman spent Saturday night with Mr. and Mrs. Raymond Vaughn.

A number of people of this community attended the funeral of Mr. Wayne Vaughn, Monday afternoon, at Pleasant Valley.

Mr. and Mrs. John Pharis had as their guests, Sunday, Mr. and Mrs. Robert Floyd; Mr. and Mrs. Linward Pharis of Greenville, Tennessee, and Mr. and Mrs. Everett Gardner.

Mr. and Mrs. Lenard Duke and family spent Sunday with Mr. and Mrs. Mack Shelton, and family.

Mr. and Mrs. A. B. Phelps had as their guests, Sunday, Mr. and Mrs. Lundy Wilson and family and Mr. and Mrs. Guy Brown and little daughter, Marylene.

Mr. and Mrs. L. D. Alexander and son spent Sunday with Mr. and Mrs. Lee Fite and family.

Miss Zelna Pillow, of Murray State Teachers College, spent the week end with her parents, Mr. and Mrs. Will Pillow.

Miss Pauline Davis has returned home, after attending school at Murray State Teachers College for the past year.

For a short time we will accept subscriptions for this paper and the Memphis Weekly Commercial Appeal—both papers one year for only \$1.25.

## Route 6 News

Mrs. Ed Gates, Mrs. T. J. Reed and Mr. Justin Atterberry, in company with several friends and relatives, spent a very pleasant day at Edgewater beach, last Friday.

Mrs. George Sams has been confined to her bed for several days, at the home of her daughter, Mrs. Priestly Holt, of Fulton.

Mr. and Mrs. Phineas Webb, of Fulton, were Sunday guests of Mr. and Mrs. Homer Underwood.

A goodly number were in attendance at the baptizing at the large pond of Mrs. Luther Byers, Sunday afternoon.

The rite was administered by the Rev. Samuel Price. An addition of three new members was made to the Baptist church of Rice City.

Mrs. Homer Underwood and children were Monday evening guests of Mrs. J. W. Smith.

Miss Ruth Willey is the guest of Miss Louise Wolberton at this writing. Their guests Monday evening were Mr. Syd Fleming, Miss Mary Fleming, and Mr. Freeman Newton.

Mrs. T. J. Reed had as her guests, Monday, Mrs. Emma Bryan and Mrs. Gertie Harding of Fulton, and Mrs. Harry Fite and small son, and Miss Manola Bryan, of Detroit.

Mrs. Lula Bard, Mrs. Ed Gates and Mr. Justin Atterberry were Sunday afternoon guests of Mrs. T. J. Reed.

Mr. Marvin Laird has been confined to his bed for the past few days, suffering the results of a congestive chill of a few days past. We hope for Mr. Laird a speedy recovery.

Mrs. O. C. Wolberton and daughter, Louise, was at the bedside of the former's mother Mrs. Geo. Sams, Monday afternoon.

The pump is running full time now to supply water for the concrete work on No. 51 highway. We are glad to see the work beginning so nicely.

John Stewart Arrested  
Charged With Killing  
Reuben Brann

Reports from Dresden Wednesday said that Reuben Brann, Chestnut Glade farmer, was shot and killed. His father-in-law, John Stewart, was arrested and charged with the crime.

## McFadden News

Mr. and Mrs. C. J. Bowers and family spent Sunday in Mont Pelia, Tennessee.

Mr. and Mrs. J. T. Bard and daughter, Lillian, spent Sunday with Mr. and Mrs. Clarence Bard, of Fulton.

Mr. and Mrs. James Dawes spent Sunday afternoon in Union City.

Miss Ruth Hampton of Hickman spent the week end with her parents, Mr. and Mrs. W. L. Hampton.

Mr. Coy Putman of Murray State Teachers College spent the week end with his parents, Mr. and Mrs. H. L. Putman.

Mr. and Mrs. Walter Carver and Mr. and Mrs. Sidney Carver of Detroit, were Tuesday guests of Mr. and Mrs. C. L. Herrington.

Mr. and Mrs. Cleveland Bard and family and Mrs. Herbert Howell spent Sunday in Murray, with Miss Clevia Bard.

Mr. and Mrs. H. L. Putman and sons spent Sunday with the former's sister, Mrs. Price, near Mayfield.

Mr. and Mrs. Jake Smith spent Sunday afternoon in Fulton with Mr. and Mrs. Presley Holt.

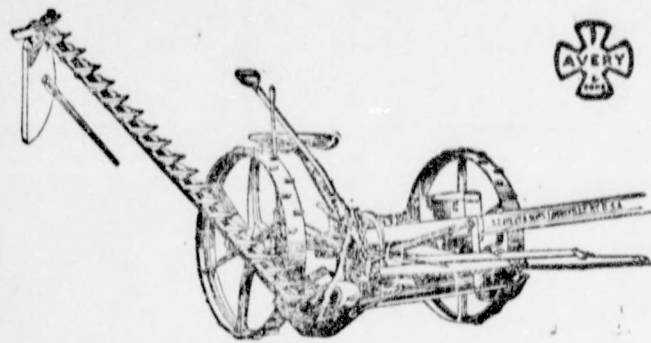

Mrs. Herbert Howell spent Wednesday afternoon with Mrs. Raymond Walker.

Mr. and Mrs. D. D. Cooke and family spent Sunday with Mr. and Mrs. Tom Hicks.

Mesdames Ellen Lynch, Herbert Howell, J. R. Powell and son, J. R., Jr., spent Thursday with Mr. and Mrs. Sam Hodgins.

Mr. and Mrs. Raymond Walker and family left Sunday night for New Mexico to visit Mrs. J. K. Walker.

Mr. and Mrs. S. A. Poole and daughter, Virginia, of Clinton, were Sunday guests of Mr. and Mrs. T. H. Howell.

AVERY  
CHAMPION MOWERS

## All that the name implies—

If you've ever wanted a mowing machine that would do the job easier, better and keep right on season after season, here it is—the Avery Champion.

## Regular or Vertical Lift

The Avery Champion cuts all kinds of grass under all normal conditions. It has tremendous cutting power and lasting power. No lost motion in the pitman, and the knife and the pitman are always kept in perfect alignment—assuring entire satisfaction wherever used.

The Avery Champion is made with either the Regular or Vertical lift. Both machines have the same valuable features with the exception that the Vertical lift enables you to

cut around trees and places where there are stumps and staves with the least possible effort.

## One or Two Horse

Avery Champions are built with either wood or steel pitman and are obtainable at your dealer's in one or two horse models. They have behind them more than a century of experience in the making of America's leading hay making machinery, and every Champion can be depended upon to deliver long, enduring service at least cost to you.

Before buying any mowing machine, look into the Avery Champion. It has won the approval of thousands of none-too-easily-satisfied farmers, and is sure to please you in every way.

KENTUCKY HARDWARE &amp; IMPLEMENT CO.

## HOME LABOR SAVED

WITH the advent and national distribution of canned foods, much time and labor was saved for the housewife. The peeling or seeding of vegetables and fruits, and the skinning and cleaning of fish and chicken became a thing of the past, so far as canned foods were concerned, and the housewife was also spared the necessity of standing over a hot stove for long periods.

But all of her problems were not solved. For generations well-informed mothers have prepared, with great labor, vegetable purées to supplement the milk diet of their babies after six months of age; hospital staffs have spent weary hours preparing the smooth diets of pureed vegetables which modern medicine recommends in the treatment of gastro-intestinal diseases; and hostesses have exhausted themselves and their servants in preparing the delicious soups and soufflés made of pureed vegetables and fruits which they wanted to serve for the delectation of their guests.

## A New Era Dawns

Now the necessity for all that labor in the home has been eliminated. The manufacturers of a widely advertised and nationally distributed brand of foods, well-known to all housewives, have put on the market small cans of pureed vegetables and fruits, with all the labor of preparation performed in the factories, and nothing left for the housewife to do but open the can.

This assortment of pureed foods includes peas; tomatoes; spinach; carrots with pureed tomatoes, cereal flour and beef broth added; mixed vegetables with beef broth; prunes;

and apricots. The cans of mixed vegetables contain pureed carrots, peas, spinach, tomatoes, celery, lima beans, corn and beef broth. These products are packed in 6-ounce and 10½-ounce cans, and have already proved their popularity. They may be merely heated and used as vegetable side dishes, or to thicken soups, or simply made into timbales.

## A Splendid Product

No mother should adopt a diet for a baby, or sufferer from gastro-intestinal disorders select a diet, without consulting a physician. The fresh vegetables used for these purées provide the required range of vitamin values, and include some with beef broth and cereal flour, providing a desirable variety for infant feeding, and insuring an adequate diet, but the baby's doctor should be consulted for quantities in feedings, and for rotation of the various purées, and his advice should be especially sought as to the relative amount of the purées containing beef broth.

The vitamin values and food constituents so important in fresh vegetables, are conserved in these pureed vegetables to an extent not possible in home kitchens where the cooking is done in open vessels exposed to oxygen.

## Some Succulent Soups

The tale of this new product would not be complete without some of the following tested recipes which have been evolved for its use.

**Pea Soup:** Combine one 6-ounce can pureed peas, one-fourth cup evaporated milk, three-fourths cup water, two teaspoons butter and one-half teaspoon salt. Heat to boiling,

beat well and serve hot. Serves two to three.

**French Spinach Soup:** Mix together the contents of one 10½-ounce can pureed spinach and one 6-ounce can of evaporated milk, two and one-fourth cups water, and one tablespoon butter. Heat to boiling. Stir a little of the mixture into one egg yolk. Combine mixtures, beat well, heat to boiling and add three-fourths teaspoon salt. Serves five to six.

**Cream of Carrot Soup:** Heat to boiling in separate pans the contents of a 10½-ounce can pureed carrots, and one 6-ounce can evaporated milk diluted with two and one-fourth cups of water. Beat the carrots into the milk, and add one tablespoon butter and three-fourths teaspoon salt. Serves five to six.

**"Whole Meal" Supper Soup:** Put the contents of a 10½-ounce can pureed mixed vegetables, six tablespoons evaporated milk, one cup and two tablespoons water, two teaspoons butter and three-fourths teaspoon salt into a saucepan. Mix well and heat to boiling. Serves two to three.

## To Make Timbales

To make Timbales from any of these pureed vegetables, add one beaten egg, a pinch of salt and one teaspoon of melted butter to one can, 6 ounces, of any one of them, and mix thoroughly.

Bake in buttered timbale molds in a slow oven (325° F.) for twenty minutes or until a knife blade comes out clean when inserted. Serve with any of the following sauces: Mushroom, cream, cheese or egg. Serves three.\*
