How Your Electricity Is Produced

You already know a power house or a hydro station is summer into power. We are not the only city with such a power plant, but the one in Fulton is unique because of its location.  

The first step in the process of converting the sun's energy into electricity is through hydroelectric power. A dam is built across a river, and the water is released through a series of turbines that turn the blades of a large water wheel. The wheel is connected to a generator, which produces the electricity.  

The electricity is then transmitted to homes and businesses through a network of power lines. These lines carry the electricity from the power plant to the point of use, where it can be used to power appliances and devices.  

The electricity is then distributed to homes and businesses through a network of power lines. These lines carry the electricity from the power plant to the point of use, where it can be used to power appliances and devices.
LOYALTY TO YOUR OWN!

I BUY AT HOME!

The following message has been submitted to THE NEWS by a citizen of this community

I Buy at Home ...

- BECAUSE my interests are here.
- BECAUSE the community good enough for me to live in is good enough to buy in.
- BECAUSE I believe in transacting business with my friends.
- BECAUSE every dollar I spend at home works for the community in which I live.
- BECAUSE the man I buy from stands back of the goods.
- BECAUSE I live here and hope to remain.
- BECAUSE the man I buy from pays his part of the town, county and state taxes.
- BECAUSE the man I buy from helps support my schools, my church, my home.
- BECAUSE when ill luck, misfortune or bereavement come, the man I buy from is here with his kindly greeting, his words of cheer and his pocketbook, if need be.
- BECAUSE I believe in my own community, and know that only by co-operative effort can we make it a better community in which to live.

It Costs Less to Buy in Fulton

The Fulton merchant, like the big city merchant buys in bulk lots, thereby retailing at prices comparable with, and frequently lower than the larger city merchants.

He can sell his goods at equal or even more reasonable prices than they—his operating costs, taxes, etc., are not on the large-city scale, thus he does not have to add a large overhead to his selling prices.

By truthful and advantageous advertising he brings the BEST quality goods at the LOWEST possible prices.

He is always striving to serve you, and thus retain your good will. He serves you because he knows you well. He is your friend.

He is loyal to his community. His taxes, rent, payrolls, purchases and contributions to local charitable events promote the welfare of the Greater Fulton area.

You’ll find all of your requirements may be served to the best possible advantage by a glance through the columns of THE NEWS when Fulton’s most progressive merchants advertise the latest and best and most economical goods, and services.

Contributed In Interest Of A Bigger And Better Community

About Salesmanship

In a radio talk some time ago, W.J. Crawford made some incisive remarks concerning statements made by current salesmen regarding prices or services. He observed that certain sales methods are often used which contribute to the buyer's discomfort. As a result, many people become discouraged with respect to buying certain goods and services. Crawford believes that the buyer should be treated with respect and dignity, and that if the customer is not satisfied with the product or service, he should be encouraged to express his dissatisfaction in a frank and honest manner.

A M O D E R N M A R T I N

In the square of mart, the buyer which will lead to the ultimate downfall of mart may not be British or French military power, but rather something else entirely. One of the most common complaints against mart is the way the customer is treated. Many suppliers and merchants are known to be rude and unprofessional, which can lead to a loss of business. One way to combat this problem is to provide superior customer service, which will encourage people to return to the mart in the future.

M O D E R N  E L E C T R I C  C O O K I N G

Modern electric cookers are much cleaner than any other method because they use less oil and gas. Full range insulation prevents best cooking results assured. Without smoke, heat and fumes, keeps kitchen cool and saves electricity. Electric cookery is much cleaner than any other method because it saves time, keeps kitchen cool and saves electricity. Electric cookers are more pleasant to use than any other method because they are quiet and smooth.

MODERATE PRICES AND EASY PURCHASE TERMS

As a result of Norman's report on the central of the struggle, many other important matters have already given birth to the discussion of Hitler's regime's economic and social policies. As a result, the German economy has been forced to change drastically, and many industries have been forced to close down or merge with others.

A group of small boys in St. Petersburg, Russia, who found an abandoned school and turned it into a playground, is now fighting for the right to keep it open. Some parents, who are a little worried about their children going to the playground, are opposing the boys' efforts, and they are trying to get the boys evicted from the school. But the boys are determined to keep the playground open, and they are fighting for the right to keep it.
