One laborite is perceptible. The U. S. government is in the midst of the greatest depression since the war, and it is now a task to finance the war effort on the new tax bill approved Wednesday by the House of Representatives. The new bill will boost the government's spending for 1941-42, marking on anticipated spending for 1940-41, and even improved. The Homestead is Almost Over

The homestead is almost over for American farmers. They have been earning more in real wages since the defense program was a year ago than ever before. This new money has been spent almost entirely for saving, but now new federal taxes are about to cut into it.

There are a half billion dollars in new taxes, the first big reminder that we have to pay the piper. The bill went into effect until September. But actually a $100,000,000 special tax bill is in effect. This new one, added on what is now to be paid, will make a bit of difference to everybody.

And there is no assurance that the bill approved Wednesday by the House and Senate committee will be the last adopted this year. The Treasury plans to finance the war effort on this account of two-thirds income collected from taxes, one-third from borrowing.
