## Christmas Seals To Aid Tuberculosis

Washington, D. C.—The campaign against tuberculosis, made possible by Christmas Seals, merits the support of all people. President Roosevelt said this week in praising the activities of the National Tuberculosis Association.

The 33rd annual Christmas Seal Campaign of the National Association and its nearly two thousand affiliated groups throughout the country starts today, Friday, December 1st.

"As the Christmas season approaches, my mind is drawn to the fact that it is again time for all of us to give our support to the sale of Christmas Seals," President Roosevelt said.

"This is such a well established custom in the United States that it seems hardly necessary again to call the attention of the people to its importance.

"Tuberculosis still menaces the lives of all our citizens and it leads in the cause of death of those between the ages of fifteen and forty five. The fine work that has been done by the National Tuberculosis Association in the prevention of this dreaded disease merits the continued support of all the people of our country."

## THANKSGIVING

Another Thanksgiving has come and gone. While Thanksgiving has come to be more and more of a holiday and less and less of a day set aside to humbly give thanks to our Lord for the blessings we have received during the year, it would be well if we did pause this year and give a little serious consideration to our affairs and those of the world, returning devout thanks for the fortunate circumstances that surround us, in spite of our many problems and perplexities.

First of all we should be thankful for two precious heritages our forefathers gave us, heritages that it is worth everything in the world for us to preserve. These two fundamentals are freedom and opportunity. They are characteristic of the United States in a manner not matched in any other nation.

We should be humbly thankful, in a world at war, that we are at peace with all the nations, and that there exists in this country a public will to peace. We should be grateful for our system of representative democracy which guarantees that this public will to peace will be heeded by those who govern us.

We should be thankful for the high standard of living in this country, higher and more widely distributed than that of any other nation. But while returning thanks for this we should renew our determination to push forward the "American Way," so that our standards will go even higher and become more evenly distributed among all the people.

For it is not enough to merely be thankful for the many blessings we have in this great land. Our opportunity is also an obligation. An obligation to use the advantages we have here to the utmost, to preserve the freedom we are granted by not abusing or misusing it, to defend and preserve our democracy by making it work better and better for the good of all the people, to maintain our liberties by being ever vigilant and unselfish in our duties as citizens.

We must not let the war in Europe divert us from the problems we face at home. They must be solved if we are to continue to have the right to celebrate Thanksgiving this year. Democracy is on trial today right here in our own nation as much as in other parts of the world. Let us search our own souls and rededicate ourselves to the ideal of America.

## Extension of Group Hospitalization Is Sought

An advisory board of farmers' wives to extend group hospitalization to families with membership in the Kentucky Farm Bureau Federation was established recently at a meeting held in Louisville, according to Ben Kilgore, executive secretary of the Kentucky Farm Bureau Federation.

The plan will be an extension of the Louisville Community Hospital Service into counties that enroll at least 20 per cent of the Farm Bureau families, stated Mr. Kilgore.

This new service to farm families will change the conditions that existed not long ago when a person never went to the hospital except for a major operation. In recent years there have been many improvements and changes in the treatment of illness. These treatments require special equipment and highly technical laboratory examinations that can not be found anywhere except in a hospital. As a result, you find that your doctor is insisting that you go to the hospital for illnesses, that you would not have dreamed of going to the hospital for in the past.

This growing need has presented another problem. How can the farmers obtain and finance this needed care?

Dr. Lane Tynes, executive director of the Louisville Community Hospital Service, explained at the meeting of the farm women that, "The plan hinges on co-operation of Farm Bureau members in securing sufficient participants to keep overhead cost within reason behind the movement."

Miss Rebecca Boaz, student in Southern Illinois Normal School, Carbondale, spent the Thanksgiving holidays with her parents, Mr. and Mrs. Sam Winston, on Green street.

Mr. and Mrs. Earl Collins and sons, Jim and Dan, spent the week end in Memphis.

### Startling Movie Magic Created By Scenarists

When a magician can "stump" a trained studio technical expert it isn't news but when two scenar-

ists baffle both miracle workers with their story demands, genius is born. At the Walter Wanger studios, where Loretta Young and David Niven starred in "Eternally Yours," which begins a run at the Fulton Theatre on Sunday, actors performed feats of magic veteran conjurers never dreamed off. All because two scenario writers had dreams.

Little did Gene Towne and Graham Baker realize when they wrote the original screen play that not only studio experts but also professional magicians would have to tax their ingenuity to the utmost to perform the startling feats of legerdemain they wrote into their story.

Among these scenario nifties are the "creation" of Loretta Young in a transparent chemist's crucible; making her disappear from inside a trunk and "fade" from the surface of a sheet of plate glass. Undaunted by what they had done so far, the two writers also included a sequence in which Niven escapes from handcuffs while making a 15,000 foot parachute jump. Next they thought of having the star hypnotize a rabbit, produce bouquets of flowers, evening dresses and lighted cigarettes from thin air. Still not content, this intangible writing team decided it would be interesting to see a cage filled with doves materialize from the atmosphere on top of a bare card table and as an afterthought they wrote in a mind-reading sequence so Niven could tell members of his audience what they were thinking about.

With the story completed and Niven and Miss Young chosen for stellar roles and the supporting

### A LOVER OF FLOWERS

The longer I live, the more I believe that no place is so completely separated from the forces of civilization that it cannot and does not produce some souls that rise above the ordinary levels. Whether it is a biological fact or an interposition of Providence, I will not pretend to say; I will leave that to wiser ones than I can hope to be. Anyway, these blessed beings come to us, out of the treasures of racial backgrounds or as special creations.

One such person who blessed my own life and the lives of thousands of people whom I knew was Aunt Mary Maddox, the mother of Bill Maddox, the local scholar and linguist. As a young woman she had come with her husband and her small children all the way from North Carolina into the Jackson Purchase, to make her home in the wilderness. A whole neighborhood of related families came in the same migration. Before Aunt Mary left her settled home in the older state, she dug up bulbs and roots of flowers and saved seeds from the plants that she had loved there. These treasures she stowed away in the furniture in the covered wagon. When the caravan reached Kentucky, she planted these seeds and bulbs and roots in the virgin soil and cultivated them in loving remembrance of the home that she had left forever. All of this took place a whole generation before I was born, as Aunt Mary died at a very advanced age on my fourteenth birthday.

But here is the strange blessing that she unconsciously conferred on her relatives and friends: the few

flowers that she had brought with her became the ancestors of flowers by the thousands that graced the homes, big or little, in our remote country neighborhood. Whenever one of her children married and established a new home, Aunt Mary's flower beds gave their share of beauty to start off a flower bed in the clearings. The children expected this just as much as the boys expected a horse, a bride, and a saddle when they became of age. Even after all the inroads on the flower beds, I remember how large a bed of daffodils there was in my boyhood, all the thousands of bulbs raying out from the few that she had planted in the wilderness long before the Civil War. The daffodils that I grew in my flower garden came from this bed, as did also many other flowers: rosebushes, japonicas, rose amon, forsythia (blooming willow, we called it), and numerous potted plants. Sometimes when I hear people talk about ancestry, I like to take the flowers of old Fidelity and see how many of them could trace their descent right back through Aunt Mary's flower garden to North Carolina and post-Revolutionary days. Such a study would be a contribution to our understanding of how culture is transmitted through simple and humble means, how tangible and intangible means can show the value of our heritage.

Too much has been made of spectacular events that demanded and received applause. When we are as wise as we often imagine ourselves to be, we will go back and dig up some other aspects of our civilization that show how and how far we have come from savagery.

cast made up of Hugh Herbert, Billie Burke, C. Aubrey Smith, Virginia Field, Broderick Crawford, Zasu Pitts, Raymond Walburn and Ralph Graves—all that remained was to devise legitimate means of actually carrying out the many screen illusions with no recourse to camera tricks.

4. This year's supply of all cotton is 30 million bales, only about 1-2 million bales less than the world's record supply.

### Do You Favor Cotton Marketing Quotas for 1940?

Marketing quotas will be in effect only if approved by at least two-thirds of the cotton producers voting in the referendum on Dec. 9th.

The 1940 marketing quotas for a firm will be the cotton acreage allotment multiplied by the actual or normal yield, whichever is the larger, plus any carry-over cotton which could have been marketed without penalty in 1939.

### If Cotton Marketing Quotas Are In Effect In 1940.

1. Producers who plant within, or unknowingly overplant, their cotton acreage allotment will be eligible for any cotton loan offered.

2. Producers who knowingly overplant their cotton acreage allotment will not be eligible for cotton loans except on the 1940 cotton in excess of their marketing quotas, and then only at 60 percent of the rate for other producers.

3. Producers who plant within their cotton acreage allotment can market without penalty all cotton

## Minister's Wife Gains 20 Lbs. On Retonga

### Mrs. Williams Had To Live On Milk and Broths Before She Took Famous New Medicine. Eats Anything Now

Well known men and women are daily adding their testimony to the thousands who praise Retonga. Mrs. A. G. Williams, McEwen, Tenn., for twenty-five years a school teacher in Humphreys County, and wife of Rev. A. G. Williams, beloved Baptist Minister, now adds her good name to this growing list.

"For years I suffered with acid indigestion that burned my stomach like fire," stated Mrs. Williams. "I had to live on milk and broths, and I lost weight and got so weak I couldn't stand up long enough to cook a meal. My bowels were awful sluggish, and my whole body seemed full of acid and poisons. My muscles felt sore, the joints of my back ached terribly, and I had dizzy swimming headaches. I was so nervous sometimes I could hardly sleep a wink."

"I had lost hope of finding a medicine to help me but I read so much

MRS. A. G. WILLIAMS

about Retonga I tried it. My digestion improved from the start and soon I could eat anything without a particle of trouble afterwards. Retonga regulated my bowels, drove out all the toxic poisons, and the backaches and headaches disappeared. I sleep fine, I have regained twenty pounds and I am so much stronger I do all my housework without trouble. My husband is as enthusiastic over Retonga as I am, and we are happy to recommend this grand medicine to everybody."

produced in 1940 on their cotton acreage allotment.

4. Producers who overplant their cotton acreage allotment will pay a 3 cent per pound penalty on cotton marketed in excess of the actual or normal production of their acreage allotment.

### If Cotton Marketing Quotas Are Not In Effect In 1940.

1. No restriction will be imposed on the amount of cotton which may be marketed by any producer regardless of the number of acres he plants.

2. No cotton loans will be available on the 1940 crop.

3. Less land will be available for soil-building and food and feed crops.

4. Producers overplanting their cotton acreage allotment will not receive any conservation payments and will not receive price adjustment payments on cotton.

Marketing quotas have no effect on the cotton acreage allotment or normal yield for any farm, nor in the rate of conservation or price adjustment payment.

Marketing quotas can be used only when supplies are excessive. The farm program of which quotas are a part provides assistance toward helping cotton farmers to:

1. Get a fairer share of the national income.
2. Produce the food and feed needed for home use.
3. Maintain and improve the productivity of their soil.
4. Provide consumers with ample supplies of food, feed and fiber at fair prices.
5. Expand domestic and foreign consumption of cotton.

### Folks of All Stations Grandpa Murchison

Grandpa was one of the county's first settlers, so he's been around long enough to see a lot of things. He says we should advertise this way:

"Back when automobiles first came to town, they wasn't any what you might call SERVICE stations. An' right now, there's a heap o' places callin' themselves that without any right. Now, Illinois Service Stations really give you service. They fill your car with Torpedo Gasoline and Welch Motor Oil, the best money can buy—but they don't forget a lot o' little things like water, an' air an' cleanin' the car windows, which I think are every bit as important as motor fuel."
