NAZI INTRIGUE IN THE NEAR EAST

Almost overlooked in the gigantic game of power politics that Germany was playing are Nazi machinations in the near east. The nation that can get Japan into the war, to force Britain and France to sign the treaty in the Suez Canal, can win in Europe and in the Atlantic war in the Pacific.

Britain and Russia are fully aware of the Nazi threat. The Japanese are not.

Since the collapse of the Nazi-sponsored revolution in Iraq and defeat of the Nazi-dominated French force in Lebanon and the Nazi Norton that is now in the Near East has centered in Iran. German tourists and technicians have flocked into the country. They moved to the new field from Iraq, Syria and Lebanon and more came in through Persia. Recently Foreign Minister Anthony Eden told the House of Commons that he had served notice on the Tehran Government that it must take "necessary measures now" to stop the infiltration of German agents and forestall an uprising such as the Rashid Ali coup in Iraq. British force stands guard on the Iraq-Iran border and an Indian army is reported to be ready to march through Afghanistan.

Iran, Iraq, Trans-Jordan, is important for its oil. It is also the back door to the Caspian oil fields, and the cross roads to India and the Suez Canal. Germany could gain no more valuable prize than this buffer zone between the British and the Russian empires. Britain and Russia are fully aware of Nazi plotting and are on their guard.

Duff-Cooper was willing to admit that after those annoying bombings London did need a bit of "bottling up," which we are grateful. And by the way, quite in order to address him as Mr. Coopper, quit—Courier-Journal.

PORTABLE VAT HELPS SMALL FLOCK OWNERS

Because a portable vat was available, many Scott county farmers dipped their sheep this year, for the first time. The portable equipment was especially appropriated by owners of small flocks.

The loss of wool in many flocks stimulated interest in dipping, according to County Agent H. S. Long, who believes dipping may increase the production of wool at least a half pound per ewe. This half-pound would more than pay the cost of dipping, it is estimated that at least 10,000 sheep will be dipped in the county this spring.

In the hands of those who would de scent sheep, it offers a weapon which is thrust at America's heart.
