The Fulton Rotary Club held its annual dinner at the First Methodist Church. About 90 persons attended and a most enjoyable evening was enjoyed. President Leon Browder, president of the club, introduced his wife, Mrs. Leon Browder, who presided over the program.

Mr. and Mrs. Billy Blackstone, Mr. and Mrs. W. H. Saxon, Mr. and Mrs. Robert Collett, Mr. and Mrs. Dallas Ketcham, Mr. and Mrs. Leon Browder, Mr. and Mrs. J. W. Gordon, Mrs. W. S. Shaw, Mr. and Mrs. J. A. Stark, Mr. and Mrs. A. G. Pemberton, and many other guests who were invited by the club held the audience spellbound throughout the evening.

The program featured music furnished by the Fulton High School orchestra, directed by Everett Barnett; a short devotional by Mrs. Leon Browder; a brief talk on "The Month of Feb." as applied to the year's program of the Rotary Club.

The club enjoyed several Valentine's cards recent from the club and all the cards were read aloud by members of the club and the club in general.

The program also featured a brief talk on "The Month of Feb." as applied to the year's program of the Rotary Club.

The program also featured a discussion on "The Month of Feb." as applied to the year's program of the Rotary Club.

THE FORUM
By A. Paul Haddock

A column devoted to news, views and comments, in which readers of The News are invited to participate in running choice of the FORUM, this newspaper.

This week we obtained two epistles on the subject of the Social Security Act, and both were written with understanding and care. One, written by A. H. London, was in favor of the measure, while the other, written by W. R. H. London, was against it.

In favor of the measure, London says:

"I believe that the Social Security Act is a step in the right direction. It will provide a measure of security for all Americans, and it will help to prevent the occurrence of poverty and destitution." 

And against the measure, London says:

"I believe that the Social Security Act is a mistake. It will only add to the burdens of the government and will not solve the problem of poverty." 

Both letters were written with understanding and care, and it is hoped that the readers of The News will take the time to read them and consider the arguments presented.

FULTON COUNTY NEWS, FULTON, KENTUCKY

THE FIRST ENGINEERS

The profession of engineering is one of the oldest branches of knowledge. The work of the engineer is to design and construct the works of man. Engineers have always been interested in the advancement of knowledge and in the improvement of existing works.

In the early days of the Republic, engineers designed and built many of the great works of the nation. They designed the canals and the roads and the bridges. They designed the waterworks and the sewage systems. They designed the railroad tracks and the shipyards. They designed the power plants and the factories.

The first engineers in the United States were not trained in engineering schools. They were trained in the professions of law and medicine. But they were able to apply their knowledge of mathematics and physics to the design of works.

The first engineer in the United States was Benjamin Franklin. He was a brilliant man who was interested in the advancement of knowledge. He designed the great works of the nation and showed the world the power of the engineer.

The first engineer in the state of Kentucky was John S. Todd. He was a young man who was interested in the advancement of knowledge. He designed the great works of the state and showed the world the power of the engineer.

The first engineer in the city of Fulton was J. Paul Haddock. He was a young man who was interested in the advancement of knowledge. He designed the great works of the city and showed the world the power of the engineer.

Moderately higher real prices of many commodities now seen as a result of labor costs, higher wholesale prices, and increased taxes. The figures show a strong upward trend, with many commodities showing increases of 10 to 20 per cent. This is due to the rise in the cost of living and the general increase in prices.

Alice Page Laces Budding Belle Role in New Film

Miss Page has been seriously ill, but is now well enough to make her first appearance in the studio in "It Can Happen in a Split Second." Miss Page, who is a member of the Casta, had been ailing for some time, but her condition improved sufficiently to permit her to make her first appearance in the film. The film is the last of the series of "It Can Happen in a Split Second."

Miss Page is expected to make her first appearance in the film on Wednesday. The film is produced by the Casta and is directed by Richard MacMurray. The film is expected to be completed by the end of the month.
The club will meet next Tuesday evening out the Valentine motif. The hostess served a salad plate at 10 to a customer.
