COUNTY AGENT

Let me remind you of a few things that you may want to do this spring to make sure your poultry is more profitable. We are all interested in raising more poultry and making more money. Here are some things you can do to help you with your poultry during the spring months.

1. Start with clean, healthy chicks. Make sure your brooder houses are clean and well-ventilated.
2. Give your chicks plenty of food and water.
3. Keep your chicks warm and dry.
4. Clean up after your chicks. Be careful not to let your chicks get too cold or too hot.
5. Keep your chicks healthy.
6. Be sure your chicks are vaccinated.
7. Always keep your chicks clean and healthy.

This was a good spring for many poultry producers in our area. The weather was good and the prices were right. I am confident that we will have another good year for poultry this year.

If you have any questions about raising poultry, please feel free to ask me. I am always happy to help you.

Sincerely,

Dr. Peter W. Prather

The study program is being used to educate the public about the importance of proper care of birds and young in the spring months. It is essential that your brood coop be kept clean and dry. Also, be sure to keep your eggs in water until you are ready to use them. Many people have had success with this method.

I want to urge you to start your chicken eggs on May 1st and let them stay in water until you are ready to use them. Many people have had success with this method. Remember that 100 baby chicks can be raised in your home every year if you take proper care of them. This is a great way to make money in the spring months.
