## Thirty Thousand Baby Chicks

We want you to be sure and read the Poultry column in this week's issue. Each week we run this column of poultry news, but this week we are printing the best news this column has given us for several weeks.

Swift and company are doing something great for this whole community. They are offering 30,000 baby chicks in lots of 250 to good, reliable chicken raisers and making a plan whereby they can be easily paid for, in fact, you make the chickens pay their own bill and leave a surplus of cash and chickens for the raiser.

These chicks will all be of the American breed and standard bred poultry, and will put several thousand dollars in circulation in this locality.

First the Hatchery pays the farmer for his eggs. Second, Swift & Co. pays the Hatchery for the chicks. Third, the farmer pays the feed stores for feed. Fourth, the farmer takes his stock to Swift & Co. and pays his loan, or for the chicks. Fifth, Swift & Co. pays the farmer "cash" for all the surplus stock he has for sale.

There is no reason why anyone should go hungry next winter, if each one will take advantage of opportunities offered. This offer of Swift & Co. should supply everybody with plenty of chickens and eggs, which always find a ready cash market.

Then with the Red Cross putting out over \$200 worth of garden seed, to be followed by an extensive canning campaign, everybody should have their shelves filled with eatables for next winter.

### DO YOU REMEMBER WHEN—

Everybody likes to refer back to "the good old days," and to ask you if you can "remember when." So we are in a mood to ask the same question a few times this week. We are wondering if anyone in this neighborhood remembers when all of the poor singing was done in a barber shop instead of over the radio; when a button-hook was as important around the house as a can-opener is now; when "calling hogs" was considered a calling; when tramps came around to the back door instead of riding up in a flier; when a dare-devil was a young fellow who rode past his girl's house on a bicycle with his hands off of the handle-bars to show off; when every member of the family had time to get home for all the meals; when those who didn't get to see a circus once a year were satisfied with a performance of "Uncle Tom's Cabin" now and then.

### NOT MUCH LEFT

With the big industries over the country working a reduced number of men, more applicants for free government land than ever before are appealing to Washington for acreage. Land offices are reported to be swamped with requests, many seeming to be impressed with the belief that Uncle Sam still has millions of acres of fertile land to give away.

Fulton people will be interested in knowing what kind of an answer is being made to all requests. It is to the effect that free land is now only a lure; there are no more acres for homestead purposes. Several western railroads have vast acreage along their lines, and while it can be had for a little of nothing, it is not exactly free. A fee must be paid on it, and then the purchaser must pay for improvements.

The government has some left that can be secured in the same way. But it hasn't any at present that can be had for the mere asking, nor does it expect to have in the very near future.

### A WISE PRAYER

For the first time in history a prayer has been applauded, according to a report from Albany, N. Y. When the chaplain of the New York legislature opened a recent session of that body with prayer, he said: "Almighty and Everlasting God, from whom alone cometh wisdom and power, grant us wise laws and fewer of them, and to Thee shall be all the glory and the praise. Amen." When he had finished there was loud applause, and if the taxpayers of Fulton and surrounding territory had been present, they would have joined in. If there is one thing on which everybody in this county is agreed it is that we have more laws than we need, and not strict enough enforcement of the ones we have. It is to be sincerely hoped that the Albany chaplain's prayer will be answered, not only for New York state, but for our own state as well.

### TWO NEGROES ESCAPE

Trace of the two negroes, who terrorized and robbed the family of Pink Dillon, farmer, three miles of Fulton at midnight Wednesday of last week, and who had previously attacked two women at the home of Sam Howell, living in a suburb of Fulton, had been lost but Sheriff Johnson, officers in Kentucky and Tennessee, and in Missouri are still on the look-out for the pair, who were last seen at Hickman in a sedan, stolen from the Dillon home.

A description of the two thugs was broadcast. A diligent and thorough search has been made in this community and adjacent territory.

Late reports say the stolen car was found in St. Louis. Several suspects have been arrested.

### MALARIA CONTROL CAMPAIGN

It was announced today by Dr. Hugh E. Prather, director of the Fulton County Health Department, that, as a result of the special appropriation by congress, for rural sanitation, Capt. W. S. Johnson of the County Health Department, has been appointed Special Sanitary Inspector and will devote his time to a campaign for malaria control in Fulton county.

Mr. Burnie Stallins of the Lodgeport district will succeed Capt. Johnson as County Sanitary Inspector and will begin work at once under the general supervision of Capt. Johnson.

### ACHIEVEMENT DAY IN MAY

The Crutchfield girls are getting their demonstration teams ready for Achievement Day which will be in May. Walker will demonstrate the making of partitions for dresser drawers which keeps clothes from becoming crushed and helps keep the dresser orderly. Rachel Easley and Ruth Cherry will demonstrate some sewing process.

The club girls will make button holes next Friday at their meeting. Mayme Wright is the local leader.

This is the first club in the county to begin their active work on demonstration teams.

He's Gone

## Spring Is Here-- Time To Clean Up

### EVERYBODY JOIN IN

The fact that the country is now emerging from what has been, generally speaking, an open winter doesn't mean that anyone is particularly sorry to see it depart. There seems to have been the usual amount of fires to build and ashes to carry out; housewives have seen just as much dirt "tracked in" as ever. So Spring is welcome. It's a relief to Fulton citizens to be able to once again work outside in comfort. For this reason there should not be one single yard, street or alley neglected in the spring clean-up campaign so necessary to the health of every community. Disposing of the rubbish, ashes and litter that have accumulated during the winter months really isn't a task when one stops to consider the benefits that result from such work. Preventing an epidemic that might claim many victims certainly is incentive enough to make everyone go at it smilingly and willingly.

The community is apt to be just about as healthy as its citizens will it to be. The first assurance of good health is cleanliness, and that goes for the house and yard the same as it does for the physical body. Disease doesn't appear or linger as long in a community where spring-cleaning is general—where everybody joins in. But one or two spots neglected now may result in a serious epidemic a little later on. It is to be hoped there will not be a single "drone" in the local hive this spring. It should be a banner clean-up season, for just now there are plenty of places to put our dollars instead of applying them to doctor bills that could have been avoided.

### Illinois Central Discontinues Passenger Trains

Effective Sunday, March 22nd, local passenger trains 133 and 110 now operating between Fulton and Memphis, will be discontinued. 133 is now scheduled to leave Fulton 5:35 a. m., arriving Memphis 9:10, and 110 scheduled to leave Memphis 4:35 p. m., arriving Fulton 8:30 p. m.

### NAMED VALEDICTORIAN

Miss LaNette Nelson has been awarded the honor of being valedictorian of the senior class of the Cayce High School, L. A. Rains, principal, has announced. Miss Mary Milton Wade has been made salutatorian. Others honored are: Giftorian, Mary Louise Townsend; grumbler, Richard Bellet; class poet, Mary R. Sublette; prophecy, Nora Lee Palsgrove; farewell address, Dori Pewitt; historian, Archie Cloys; class will, Helen F. Flippen; class president, Murrell Jeffress.

### SIX MEDALS TO BE AWARDED

The American Legion and Legion Auxiliary will give six school award medals this year. Two will be given at Cayce School, two at South Fulton and two at Carr Institute. The awards will be made to the boy and girl of each of these schools who have registered the highest marks in the eighth grades on the following basis:

Honor: Strength and stability of character, high standard of conduct, keen sense of what is right, adherence to truth and conscience and devotion to duty and practice of clean speech, 20 per cent.

Courage: Bravery in the face of opposition and danger, and grit to stand up for the right and do one's duty, 20 per cent. Scholarship: Ability to lead and to accomplish through group action, 20 per cent.

Service: Kindliness, unselfishness, fellowship, protection of the weak and promotion of the welfare and interests of associates without hope of personal reward, 20 per cent.

The medals are on display at the P. M. Weeks' Sons store.

### Good Woman Passes Away

A loving wife and mother passed away at her home on Maple avenue Wednesday morning, March 18, when the gentle spirit of Mrs. Maggie Torrence Bell took its flight.

This good woman will be sadly missed in the family circle and by her neighbors and friends who loved her for her kindly deeds.

The deceased was a loyal member of the Southern Presbyterian Church and was faithful to its teachings.

Mrs. Bell is survived by her husband W. A. Bell, and the following children: Mrs. Charles Armstrong of Denver, Colo., Mrs. George Scholl of Memphis; Mrs. Shirley Parfett of Jacksonville, Fla.; Ed Bell of Nashville, Tenn. and Ernest Bell of Fulton.

The funeral service was held Thursday in the First Presbyterian church conducted by Rev. J. S. Robinson and Rev. R. A. Wood, interment followed in Fairview cemetery in charge of the Fulton Undertaking Co. The Advertiser joins with other friends in sympathy for the bereaved.

## Brieflets

The Fulton man with the poorest imagination is the one who can read through a long patent medicine ad without imagining he has some symptoms described.

Many a motorist has found to his sorrow that a telephone pole is a poor substitute for brakes.

It takes all kinds of people to make a world, and that includes the neighbor who borrows your paper before you are through with it and then forgets to bring it back.

One thing the average housewife can't understand is why an unwelcome company always stays the longest.

There's this to the credit of the man who kills himself—he generally gets the one most responsible for his troubles.

What a funny world this is. Nobody will take your last cigarette, but anybody will take your last dollar.

Ask any Fulton married man and he will tell you that the first essential to happiness is learning what not to say and when not to say it.

It's hard to convince a fellow who has just violated the law that there is anything grand about a grand jury.

One hundred thousand dollars has been donated by an eastern man for the study of the common cold. That's nothing to be sneezed at.

Another thing hard to find in Fulton is a man who can fasten up his underwear with a safety pin while only using one hand.

An Omaha dentist pulls his own teeth and does his own bridge work. But how does he know how much to charge himself?

Many a woman who looks like Prosperity has a husband who looks like Depression.

More than one Fulton married man has learned from experience that it is foolish to say he won't do anything—until he has first consulted his wife about it.

The snob who "high hats" you in the city may some day want to borrow your tow-line in the country.

Another nice feature of Old Dobbin was that you could now and then trade him in and get something to boot.

Any Fulton motorist who can whistle while he is changing a tire in the rain deserves to be called an optimist.

### ANNIVERSARY DAY PROGRAM

The Epworth League of the Methodist church will have an Anniversary Day Program at the church Sunday evening, March 22nd at 7:30 o'clock. This program will take the place of the regular evening service and is looked forward to as being one of the biggest events that has ever been sponsored by the League.

Please tell all of your friends and come help make this a success.

### ONE DOSE GERMAN REMEDY ENDS GAS

"I was sick and nervous with indigestion and stomach gas. One dose of Adlerika helped. I eat anything now and sleep good."—Henry Dodd.

You can't get rid of indigestion or gas by just doctoring the stomach. For gas stays in the UPPER bowel. Adlerika reaches BOTH upper and lower bowel, washing out poisons which cause gas, nervousness and bad sleep. Get Adlerika today; by tomorrow you feel the wonderful effect of this German Doctor's remedy. Bennett's Drug Store.

## Community Building

### Benefit to Community in Attractive Roadway

Beautiful and attractive roadways add immeasurably to the desirability of a locality of homes, Grover O'Neill, chairman of the roadside committee of the Long Island Chamber of Commerce, told the members of the chamber at their annual meeting.

The commercialization of our arterial highways, it was pointed out, will defeat our major objective by slowing up traffic and making our entire residential environment unattractive. "There should be," he explained, "a concentration of our business activity to established business centers, or those places which a comprehensive plan indicates to be in the public interest. In the business areas themselves, we should endeavor to make these as attractive as possible. Unless we are prepared to discipline ourselves, as a community, in order to achieve our greatest goal, our growth will be seriously retarded and our communities will not be tied in to the metropolitan development, but will remain isolated and local."

"To obtain roadside attractiveness we must secure the co-operation of the property owner and in this we are confronted with the character of the owner as to whether he will co-operate for the improvement of his community or remain entirely selfish. We must also arouse public opinion in favor of roadside attractiveness to the point of action. Suitable legislation should also be obtained to bring the state and county into a position to do their full share toward creating and maintaining roadside attractiveness."

### City and Rural Peoples Being Drawn Together

Largely imaginary differences between urban and rural populations at times have constituted a serious obstacle to needed legislation. But forces that have been at work in the last decade or two ought eventually to mean the total disappearance of the antagonistic points of view. Certainly, in many respects, the differences between the two groups have gone. Facts revealed by the census and obtainable from other sources point to the changes that have occurred.

For example, an official of the United States office of education points to the rapid extension of school facilities which have given thousands of rural communities advantages in this respect equivalent to those of the cities. Much remains to be done, of course, in this field. But there are numerous additional factors in the situation. They include the influence of good roads, the motor car and frequent travel, the growth in circulation of newspapers, books and magazines, the wide reach of the motion picture and, especially, of the radio.

The combined influence of those developments is certain to contribute to better understanding as well as a disappearance of superficial differences. Regional planning is a notable outcome of new recognition of mutual interest.—Kansas City Star.

### Pays to Build Well

The benefits of quality building are reflected in every operation on a house. The workmen prefer to work with good materials and will naturally take more interest and more care in their work, the net result of which is a better job. The finance companies today recognize that a safe loan cannot be made on a house which is not well built and have become much more circumspect and exacting in their requirements. Formerly they were satisfied with a few casual inspections to insure that the house was on the right lot and of the right dimensions, that no restrictions were violated, and that it was brick veneer or stucco or whatever was called for.

### Tax Imposed by Fire

Fire losses and the cost of fire insurance levy a \$10 indirect tax on every man, woman and child each year, statisticians for the Holland Institute of Thermology estimate. The annual per capita fire loss is \$5, and the cost of fire protection is about equal. The figures were developed as part of the research work in national fire prevention week.

### Let Specialists Guide

When you build it is always well to consult with an architect, a competent builder and a reliable building material dealer before the design is finally selected and the contract entered into. Through education and practical experience these specialists have learned many things about home building.

### Public Play Areas

The Playground and Recreation association was organized in 1906 by Theodore Roosevelt, Luther Halsey Gulick, Jacob Rius, Jane Addams and others. At that time only 41 cities had public play areas under leadership. The number has now increased to about 900 cities and towns.

### Guaranteed House Here

The guaranteed house is here. Many builders of homes in all price classes are giving guarantees against defects for reasonable periods. The general belief is that in a short time only the guaranteed house will be in demand.

Improved Uniform International

## Sunday School Lesson

(By REV. P. B. FITZWATER, D. D., Member of Faculty, Moody Bible Institute of Chicago.)  
(©, 1921, Western Newspaper Union.)

### Lesson for March 22

#### THE USE AND ABUSE OF GOD'S GIFTS. (Temperance Lesson)

**GOLDEN TEXT**—And he not drunk with wine, wherein is excess; but he filled with the Spirit.

**LESSON TEXT**—Luke 12:13-18.

**PRIMARY TOPIC**—Jesus Tells Us How to Use God's Good Gifts.

**JUNIOR TOPIC**—Jesus Tells Us How to Use God's Good Gifts.

**INTERMEDIATE AND SENIOR TOPIC**—The Sin of Drunkenness and Gluttony.

**YOUNG PEOPLE AND ADULT TOPIC**—The Enslaving Power of Strong Drink.

#### I. Warning Against Covetousness (vv. 13-15).

1. The occasion (v. 13). The occasion of this warning was the request of one of the company that Jesus be the umpire regarding a disputed estate. Two brothers were in trouble over an inheritance.

2. Jesus' reply (v. 14). He said, "Man, who made me a judge or a divider over you?" He refused to enter the sphere of the civil law. Christ's mission was pre-eminently spiritual.

3. The warning (v. 15). The clear implication is that if the attention is given to inculcating right principles in the hearts of the people, civic and economic problems will largely adjust themselves.

#### II. The Parable of a Rich Fool (vv. 16-21).

The parable of this rich planter shows clearly that to be concerned with earthly riches while neglecting God is the height of folly. Observe:

1. The increase of his goods (v. 16). This clearly implies that his riches were rightfully obtained, for the ground brought forth plentifully.

2. His perplexity (v. 17). His land was producing more than his barns would hold. He was at a loss to know what to do. No thrifty man wants to see the legitimate fruits of his toil perish. If he had possessed right views of life and a sense of stewardship before God, he would have seen that his barns had enough for his personal needs and then have distributed the surplus to the needy.

3. His fatal choice (vv. 18, 19). He chose to enlarge his barns and give up his life to ease and luxury. He made plans without consulting God.

4. His awful indictment (vv. 20, 21). God called him a fool. His plans were cut short by an immediate death sentence.

#### III. The Certain Cure for Anxiety (vv. 22-34).

Having shown the folly of rich men who gained gold and lost God, Jesus now urged the disciples to trust God and dismiss all anxious care.

1. The argument (vv. 22, 23). It is summed up in one brief sentence, "The life is more than meat and body is more than raiment."

2. The illustrations (vv. 24-28). (a) God's care for the fowls (vv. 24-26). The ravens do not sow nor reap. They have not storehouse nor barn yet they live, for God feeds them. If God does not forget the fowls, certainly he will do more for his children. (b) God's care for the flowers of the field (vv. 27, 28). If God is so careful of the flowers which appear but for a day, how much more will he clothe his children?

3. The exhortations (vv. 29-34). (a) The getting of food and clothes should not be man's chief concern. (b) Seek the kingdom of God (v. 31). Those who make God's kingdom first shall have all their needs supplied (Phil. 4:19). (c) Be not afraid (v. 32). God's good pleasure is upon his own, and all good things he will give. (d) Practice self-denial in order to be able to give to those in need (vv. 33, 34).

#### IV. Be Ready for the Coming of the Lord (vv. 35-48).

Having warned the disciples against the acquisition of worldly goods while forgetting God, and shown them the needlessness of anxiety for food and clothing, he showed them the blessedness of being in a state of readiness when the Lord shall come. This attitude of heart he made clear by two parables:

1. That of the returning lord (vv. 35-37). The Lord will be so pleased with those who are waiting for him that he will take delight in sitting at the banquet with them and even serving them.

2. The thief in the night (vv. 38-40). This parable shows that the time of the Lord's coming is not known. The proper thing is to be ready.

3. Reward will be given to the faithful (vv. 41-48). The faithful servant will be promoted at the coming of the Lord. Awful judgment will be meted out upon the unfaithful servant.

#### Search the Scriptures

The Bible is the book of all others to be read at all ages and in all conditions of human life. . . . I speak as a man of the world to men of the world, and I say to you, "Search the Scriptures."—John Quincy Adams.

#### Keeping the Commandments

Keeping Christ's commandments keeps the eye clear and the temper sweet and the will submissive and the affections pure; in these lie rich rewards.—Cuyler.

# Gospel Meeting

## BEGINNING

SUNDAY MORNING, **APRIL 5th**

THE

## Central Church of Christ

AT FULTON, KY.

Will conduct a series of Meetings.

**JOHN T. SMITHSON,**  
the local minister, will do the preaching.

Come, and bring your friends, it will do them good.

To honor God, to Edify the Church, to Save Sinners, is the object of this Meeting

### AVERAGE MOHAIR GOAT FLEECE WILL COVER CHAIR

### Pile Renewed by Soap and Water

ORIGINALLY grown in Turkey and South Africa, the angora or mohair goat is now raised principally in the United States in order to meet the demand for the mohair fleece. Its popularity is accounted for in that it is the most enduring of all animal fibers and therefore especially suitable as an upholstery material which is destined to receive hard wear, as in automobiles and railway coaches. The weight of mohair fleeces varies considerably, as do their length and fineness. Some of the fancy strains of mohair goats will grow hair so long that it has to be braided up on its back to keep it from being caught in the underbrush, and their fleeces when clipped will weigh as high as 22

pounds. This, however, is most unusual, as the average mohair fleece weighs 4.3 pounds, enough when scoured, spun and woven, to make sufficient mohair velvet or velveteen to upholster a living room chair such as the one shown above.

Fine furniture has for decades been upholstered in mohair velvet, and only in recent years has it been possible to get it in such variety of up-to-the-minute colors, designs and styles. More especially, the housewife will appreciate that mohair velvet is scientifically mothproofed at the mill, so that by selecting furniture so upholstered she need no longer dread the housewife's old-time bugaboo—the ravaging house moth.

In addition to its popularity as a fine upholstery fabric, mohair velvet is used for rugs, draperies and outer apparel.

### Foods You Can't Forget

WE'VE all encountered them—delicious dinners with one dish especially the recipe for which you just can't help begging from your hostess. These are the foods that you can't forget, and a file of such recipes, accumulated from time to time, will go far toward making you a famous hostess.

Here are two such recipes picked up recently by a man with a reputation as an epicure.

**Stuffed Cherry Salad:** Remove the seeds from one pound or one No. 1 can of Royal Anne cherries, and stuff them with the following filling—Mix together thoroughly one cake of cream cheese, one-third cup of crushed pecans, three tablespoons mayonnaise, a dash of cayenne pepper, and salt to taste. Serve on lettuce leaves with French dressing. This will serve seven persons.

#### A Succulent Stuffing

**Chicken Dressing:** First of all be sure to brown your bread crumbs in the oven before mixing them with the other ingredients. Then moisten with about one-quarter cup of chicken broth and mix together one quart of the browned bread crumbs, one-quarter cup butter, one cup celery, one cup chestnuts broken in pieces, and salt and pepper to taste. You'll find this far better than the ordinary chicken dressing, and it will make many of your guests wonder how you manage to make your roast chicken taste so good.

**3,500,000 U.S. ANGORA GOATS PROVIDE MANY USES—MOHAIR CHIEF PRODUCT**

**COATS SERVE MAN IN ENDLESS WAYS**

**Airplanes and Indoor Golf Courses Use Fabric Made from Angora Fleece.**

PERHAPS you have sometimes wondered why all railway seats are upholstered in the same material, the familiar mohair velvet that in our childhood days was invariably a bright red or green and always of one or two standard patterns. Today even train interiors have become color-conscious and soft greens and taupes and warm blues are seen but are still of the same mohair velvet to the extent, it has been estimated, of twelve million yards in the trains of the country.

The reason for this is that no other fabric has been found that will stand all the hard wear and tear that 24-hour service means. Made from the fleece of the angora goat, mohair velvet or velmo, is one of the most popular and serviceable of fabric materials. One hundred million yards are in use on automobiles alone and many more on motor busses and for the interiors of airplanes.

In addition to this, velmo is also used for upholstering furniture, for draperies and even for rugs and is

especially in favor with the housewife because it is chemically moth-proofed in manufacture. It is also used for theatre curtains and chair coverings, because of the sound absorption the deep pile fabric affords, which is an important consideration in talking picture theatres. Like everything else, mohair velvet has "gone modern" and can be had in an endless variety of colors and patterns and weaves. Over five hundred shades of green alone are reported by one New England mill.

But an upholstering fabric is by no means the only service the mohair fleece renders. The finest indoor golf courses are made of a rich, deep pile mohair velvet. Lap robes and steamer rugs, lifelike stuffed animals, trimmings for house slippers and even wigs and transformations are made from this snowy fleece which more closely resembles human hair than any other known fibre.

Each fibre is much stronger than wool and due to its unique physical structure takes a fadeless dye. Because of its sleek surface, it does not readily retain dust and dirt and in fact, the pile surface acts as a brush and makes the traveler's clothing actually cleaner at the end of the trip than it was before!

So great has the demand been for this fleece that within a comparatively few years, the industry of angora goat raising has been transferred from Turkey and South Africa to the United States, which now leads the world both in the production and manufacture of mohair fleece.

**FURNITURE CHANGES KEEP MOHAIR IN VOGUE**

**SOME FACTORS IN MOHAIR'S PERMANENT POPULARITY**

<b>LONG WEARING</b> WEAR COMES ON ENDS OF FIBRES AS HIGH AS 40,000 FIBRES TO THE SQ. INCH	<b>COMFORTABLE</b> ~ ERECT PILE PREVENTS SLIPPING	<b>BEAUTIFUL APPEARANCE</b> MOHAIR NOW CHEMICALLY TREATED TO PREVENT MOTH DAMAGE
<b>EASY TO CLEAN</b> MOHAIR FIBRES ARE MOVED OFF—QUICKLY REMOVED BY VACUUM CLEANER OR BRUSH	<b>MOTH-PROOF</b>	

**LONGEST WEARING FABRIC IS MOHAIR**

**Great Durability Explains Its Perennial Popularity for Furniture Use.**

STYLES may come and styles may go, in furniture as in everything else, but one kind of upholstery—mohair velvet—remains in constant popularity ever since the invention of power machinery put it within the reach of everyday folk, and not just of kings and nobles, as in previous centuries.

The demand for furniture covered with fabric made from the fleece of the angora goat has increased steadily until now the United States leads the world in angora goat raising and consequently in the production of mohair materials.

Its great durability is undoubtedly the chief reason why mohair velvet is an upholstery perennial. Not even the beauty and luster of its soft texture would suffice to win the housewife's repeated approval if mohair velvet, or velmo as it is often called, did not surpass all other materials in wearing quality. This is partly because the mohair itself is the longest wearing animal fiber known and partly because it is a pile fabric, with the wear coming on the ends of the fiber instead of along the sides. As high as 40,000 of these sturdy fibers are found to the square inch of mohair velvet.

Some knowledge of the physical structure and chemical composition of the mohair fiber is necessary to understand why it makes a superior upholstery fabric. Seen under a microscope, the mohair fiber is smooth and shiny, with fewer scales or serrations than on the wool fiber. This means that it does not attract dirt so quickly, that dust tends to slide

off the smooth hairs and that actual dirt is easily removed with a swift brushing or with soap and water if necessary, without affecting the color. Then, too, mohair takes a fast, acid dye, so that the effects of sun and strong light need not be feared.

Like all animal fibers, mohair is normally attractive to the pestiferous house moth, but now science has perfected a means of effectually and permanently mothproofing mohair velvet. It has been noticed that moths will actually die in preference to attacking the fabric. When one considers the tremendous amount of damage done annually by this innocent looking little insect, it is obvious that for this feature alone mohair recommends itself as the ideal fabric for fine furniture.

But though mohair velvet remains popular season after season, its colors, patterns and weaves change with the current fashion. Beautiful solid colors, or two-tone weaves, period designs, modernistic effects or conventional patterns may all be had in mohair velvet. Sometimes the pile is cut to form the pattern, the remaining pile being stamped with a floral or other design. In other places, the pattern is formed by cutting certain of the loops and the fabric is then called frieze. If the uncut portion predominates, it is called friezeette. Then again, the material may be hand-blocked in striking designs or woven on a jacquard loom with various colored mohair yarns.

Then, too, mohair velvet has been found to be virtually fadeless, unchanging after years of constant exposure to the sun and elements. This is because of the unusual construction of the mohair fiber, which is tubular and very attractive to acid dye. The unusual long service which mohair velvet gives is due to the fact that, being a pile fabric, the wear comes on the ends of the fibers and not along the sides. It does not really hold dust, because the surface of the fibers, unlike those of wool, are smooth and glossy. Actual soil is easily removed with soap and water.

**MUCH INTEREST IN NEW ORGANIZATION**

McConnell, Tenn., March 13.—A record session of the McConnell Truck Growers club re-assembled here today, at which a constitution was adopted and there was a board of governors elected.

Those named to places on the board were: H. D. Scott, R. H. Mose, Bill Jolley and C. S. Earp. At an executive session of the board held openly and along with the general meeting H. D. Scott was elected chairman, and Frank Sellars, secretary. Such other officers as may become necessary are to be elected at a later date.

Committees named to solicit additional acreage came forward with highly gratifying reports, and as a result of their

efforts twenty-four new members were added to the rolls. The organization has passed far beyond the uncertain stage and is now firmly established in the heart and mind of the people as an absolute, tangible industry raising up its mighty bulk right in their midst.

The success of the program has gone far beyond the widest hopes of its proponents, and there is now thought of pulling up the goal stakes originally set at seventy-five acres, and carrying them further out to plant them again on the 150 acre line. While tomatoes have been the central commodity upon which the drive has centered, it is found that the acreage in beans as a side issue, has assumed proportions that will justify car lot shipments within themselves. "We can put her across big and we are going to do it—watch us," was the battle cry sounded by our good friend, Mr. I. T. Cloys, and in his tone of voice was the same strength of determination that rang beneath the battle smoke in the depths of the Argonne when that great voice spoke—"They shall not pass."

Mr. Cloys does not stand alone. Mr. Moss, Mr. Sellars, Mr. Fergusson, Mr. Jolley, all of the others—every one stands at his side and

echoes the cry, "We will put her across big." They will do it too, because they mean it. Such team work and such determination cannot be beaten.

Messrs. Williams, Fergusson and Cloys were appointed on a special committee to work out details incident to the growing of beans, and to promote a greater acreage of that commodity. Other committees were appointed to cover different questions arising in the progress of the work being done, and are to report at the next meeting which will be held Friday, March 20th.

Farmers from the committee of Pierce, Harris, Ruthville, Fulton and Martin were in attendance at today's meeting, and among the new members taken in were: DeWitt Collins, J. Pea Collins, J. D. Fergusson, J. T. Caldwell, Dan McCrary, J. A. Fergusson, Jno. W. Fergusson, C. K. Hatcher, J. T. Reese, Ocie Moss, T. O. Morris, G. W. Tegitoff, C. H. Williams, A. W. Green, Roy Bailey, H. P. Allen, W. F. Boyd, J. W. Jolley, R. S. Collins, A. L. Blaylock, Roy Vowell, D. M. Counce, H. C. Roach and Louis Welch.

A nice gift. Send The Advertiser to a friend one year—only \$1.00.

### Old World Recipes By HELEN SCHAUFFER Domestic Science Expert

TO most of us old China means incredibly lovely bits of pottery, delicate color prints, gorgeous silks and intricately embroidered fabrics, along with fragments of lovely poetry. Many of us do not know that these ancient were also epicures of the highest order. We are under the impression that the Chinese have subsisted since before Confucius upon chowmein, chop suey and rice, with now and then a bird's nest soup. As a matter of fact, their diet presents a bewildering variety, ranging all the way from peacocks' tongues to the most delicious pork dishes, recipes for three of which are given here.

Helen Schaffer

**Pork Chops with Ginger**—Pepper loin chops and dredge in flour which has been mixed with one tablespoon of sugar. Sauté with a little fat until brown on both sides. Add to the chops, salt, one cup of

water, one-half teaspoon of lemon juice and a small piece of preserved ginger for each chop. Cook uncovered until tender. Do not turn the chops.

**Roast Pork with Chestnuts**—Wipe four pounds of loin of pork. Pepper well and dredge with a little flour. Shell and peel two cups of chestnuts. Peel and cut into small quarters two cooking apples. (One cup of dried apples may be substituted). Boil these for five minutes in two cups of water with two tablespoons of sugar. When the roast has been in the oven for three-quarters of an hour surround it with chestnuts and apples. Pour the syrup over the whole. Baste frequently until pork is brown and tender.

**Pork Chops Baked with Pineapple**—Cover the bottom of a shallow baking dish with slices of fresh or canned pineapple. Sprinkle with two tablespoons of sugar. On top of these lay peppered pork chops. Place in a hot oven for ten minutes. When the pork fat has fried out a little, salt well and pour pineapple juice sweetened with one teaspoon of sugar over the chops. Bake from twenty to thirty minutes. Garnish and serve.

### David Knitting for His Nerves

By DOROTHY DOUGLAS

(Copyright.)

"You have simply got to take up knitting," said the great nerve specialist. "Get some wool, a pair of needles and go down to Atlantic City and sit on the board walk and knit."

"Me knit! I certainly would look cute sitting on the beach like some Aunt Jemima knitting pink wool and all the idlers stopping to roar at me. No, thanks!"

"You prefer, then, my young fellow, to end your days in a home for neurasthenics, babbling forever about spring blossoms or trying to find a nice easy place to jump off the roof." The doctor became more serious. "Don't be a coward about life. Face it out. Perhaps a short summer of knitting, just simply giving your hands something to do, will set you on your feet."

David laughed. His nerves were not quite gone and, after all, life had heaps to offer. He would be a sport and obey the doctor's orders. Anything was better than the state he was in. Only yesterday he had shrunk from crossing the street alone and nothing could induce him to go into the subway. Certainly knitting was preferable to that mangled state of nerves.

So David packed his case, told his sister all about it and she gave him good advice as well as knitting needles and wool.

But the brainstorm that was the most brilliant of her career was her suggestion that David put on Aunt Effie's clothes when he came from his bathhouse.

"Her bonnet, with the string to tie it on and her great cloak and ample skirts—why, David, you could sit on the sand and knit prize sweaters and no one would even cast a glance at you."

"You're the prize brick, Sis," laughed David. "I'll put Aunt Effie's clothes on and knit till I haven't a nerve left."

Consequently, the old lady sitting daily on the white sand attracted little or no attention. David gradually learned to knit mechanically while he breathed in deep draughts of nature's healing breezes. His nerves were responding to calm thought and in forgetting himself in the new guise he felt immensely improved.

It was Elsie's wee dog that first upset the apple-cart of calm thought. The dog, dashing about in quest of fun, found David's woolly ball, began playing and ran joyfully off across the sand.

And David, because he always kept rather stationary when wearing Aunt Effie's clothes, just sat and watched.

And Elsie, seeing the old lady's predicament and the havoc being wrought with the wool, gave chase after Fido.

It was then that David's calm deserted him. Elsie, in drenching and most becoming of bathing suits, in hot pursuit of a small dog, caused not only a burst of laughter from David, but also a heavy heart throb. Elsie, with fair hair blowing about in the breeze and as graceful as a nymph, made David tensely conscious that there were bits in the feminine world distinctly wonderful.

After a final desperate plunge the small dog was captured.

David's heart beat fast. The girl was approaching him to offer an apology.

"I'm so very, very sorry," she said in the sweetest of voices. "Fido is always doing something awful."

"But this is not awful," David quickly told her and when Elsie jumped back, startled at the great boom of his voice he realized that he was supposed to be a lady.

"But he has unraveled all your lovely knitting," Elsie managed to say and looked ruefully down at a mere strand of what had been a fairly well formed sweater. "Couldn't I knit it back for you? I will slip into my bathhouse and get into my frock and come back here. You will wait?" she questioned.

"I certainly will," David agreed with a slightly modified voice.

As soon as she was out of sight David arose, dashed into his own bathhouse and emerged in the most trim of white flannels.

He seated himself on the exact spot and waited.

When Elsie appeared he knew that his nerve cure was making tremendous progress and would continue to do so so long as Elsie would help him to pass away the shining hours.

She stopped in dismay at seeing the big man sitting where the old lady with the knitting had been.

She was about to turn away, when David drew from his pocket a great ball of wool and aimed it straight at Fido. That wise little animal took his cue with the same accuracy that a well trained god of love takes his arrow and shoots.

Elsie stood still, took a straight and intensely interested look at David, then walked slowly toward him. David arose to his feet and held out the remnants of that sweater.

"I'm ready now for you to reknit my sweater," he said with a boyish laugh.

Elsie, too, laughed, and Fido scampered up delighted at being so completely tangled up in the wool of romance.

The specialist had most decidedly done the right thing for David.

### Iowa Brothers Set New World's Record in Ford

Governor John Hammill of Iowa (left) and Walter Ferrell, executive secretary of the Iowa chapter of the American Automobile Association (extreme right), congratulating the Davis brothers on the establishment of a new world's non-motor, non-wheel stop automobile endurance record.

IOWA state officials and civic leaders witnessed the establishment of a new world's non-motor, non-wheel stop automobile endurance record recently, when Ralph and Rolland Davis, brothers, brought their Model A Ford to a halt at the east entrance of the state capitol in Des Moines after 2,775 hours and 46 minutes of continuous driving.

When Governor Hammill, standing with Walter Ferrell, executive secretary of the Iowa Chapter of the American Automobile Association, gave the signal to stop, the Ford had traveled a total of 47,138.3 miles over all sorts of roads in all sorts of weather and had exceeded by 33,080 miles

and more than 2,335 hours the American non-stop endurance record which, theretofore officially recognized, was made by a much heavier car under almost ideal conditions on the Indianapolis speedway last year. In the course of the endurance run, the car, known as "The City of Des Moines," covered practically the entire state of Iowa.

Engineers who examined the Ford at the conclusion of the run asserted that neither engine nor chassis showed evidence of the grueling strains to which they were subjected during the 116 days of continuous driving. Both apparently, according to the engineers, would have been good for another 50,000 miles or more.

## For a Healthy Soviet

**WHAT** effect is the vast canning industry which is being built up in Soviet Russia going to have on the public health in that ill-fed country? At present its people are living largely on root crops and salt pork, but its canning industry plans to increase its production by 1922-23 to four billion cans of 400 grams (about 14 ounces each), and in 1932-34 the output of this industry is expected to reach six billion cans. Actual orders for more than \$35,000,000 worth of American canning machinery have been placed.

### Our Health Improved

The above question can be answered by quoting the report on the effect of canned fruits and vegetables upon this nation's health made by the Committee on Fruits, Vegetables and their Products of

the American Public Health Association. "The annual production and consumption of these foods has been rapidly increasing since the Civil War," said this report, "yet we know of no impairment to the general well-being of the people resulting from it. Canned foods are cooked in hermetically sealed containers which prevent recontamination until opened. The nutritive and caloric values of the same fruit or vegetable, fresh or canned, are essentially the same." "Canned foods," it concludes, "whether prepared in the home or in commercial canneries, regardless of the type of container, are sound, wholesome and safe. Their continued use is commended. The advantages to the American health from the use of canned foods in the diet can hardly be overestimated. . . . The nation may have faith in its canned foods."

## POULTRY

RAISING GEESE IS  
NOT LABORIOUS

Marshy Land With Vigorous  
Growth of Grass Needed.

Geese may be successfully raised in almost any locality where they can have a plentiful supply of green food. The conditions required are very different from those of ducks. Geese are usually raised in comparatively small flocks. The fact that geese require very much more room than ducks has kept the business in the hands of farmers who go into it in a moderate way. There are many farms which have fields not suitable for poultry or cultivation, on account of springs or streams, but which make good pasture for geese, and, if such fields are used for geese, they can be made to return a good profit.

Somewhat low, springy or marshy land may be used to good advantage. If some part is comparatively very high and dry. Geese may be pastured at the rate of 50 to the acre on marshy land where there is a growth of grass vigorous enough to provide a plentiful supply of green food and sufficient depth of water in pools to permit them to swim about. It is never advisable to allow a large number of geese their freedom over an entire farm. A few geese will not prove objectionable, but if a large number is allowed to roam at will over pasture lands, cattle will not care to graze in the same field.

Geese do not require a great deal of attention; after the young are two weeks or so old, they are able to care for themselves largely. If a good range is given. The food is largely grass, although insects and other low forms of animal life are eaten and essential. The most common breeds are Toulouse, African, Embden, Chinese, Canada (or wild) and Egyptian.

**Chicks Should Be Out  
of Doors in Sunlight**

If practical, chicks should be out of doors in direct sunlight by the time they are ten days to two weeks old. The direct sunlight prevents leg weakness or rickets. Also it is easier to train the chicks to find their way back to the brooder house from the range during the first one or two weeks. When chicks are to be confined the windows should be opened on nice days so as to allow the direct sunlight to reach them.

A roll of fine mesh wire may be used to fence in a small area outside the door of the brooder house. This area may be enlarged as the chicks become older and can find their way back to the building. At the end of three weeks the chicks may be allowed access to the whole range.

It is usually necessary to provide a sloping runway in front of the exit door so that the chicks can easily leave or enter the house. Sod or dirt piled in front of the chick door is very satisfactory.

**Farm Poultry Keeper  
Has Many Advantages**

The farm poultry keeper has every advantage over the commercial egg farmer because he gets his feed at the lowest prices by raising it himself. He can care for his hens at the lowest cost for time. On many farms the labor of caring for flocks of from 150 to 500 hens need not be counted at all as feeding them is incidental to the regular feeding that must be done on every farm. Farm flocks can feed themselves from hoppers which are filled once a week or once in two weeks with mash. Throwing in grain for the hens is a matter of minutes.

The advent of the hatchery was the beginning of a new era in farm poultry keeping, because it gave farmers an opportunity to buy, at a low rate, enough chicks to stock their farms to capacity. During the first years of the hatchery business buying baby chicks was uncertain, but since hatcherymen have organized and insisted on certification of the hens from which they get eggs, it is quite safe to buy baby chicks from any member of the association and feel assured that the pullets will be good layers.

### Brooder House Light

The Ohio experiment station has reported very satisfactory results from using dim lights in brooder houses. They state that a 16 to 25-watt lamp is sufficient for a brooder house accommodating from 300 to 500 chicks. This amount of light could be furnished by using a kerosene lantern where electric lights are not available. The use of the light allows the chicks to move around more freely during the night. There will be some consumption of feed and water.

### Grass for Goslings

Fresh, tender grass is a good feed for goslings for the first two days. This can be followed with a mash of one part corn meal and two parts of wheat middlings five times a day. Another good mash consists of equal parts of corn meal, bran, middlings and rolled oats moistened with skim milk. Goslings are naturally grass eaters, rather than grain eaters, so a fresh green pasture and plenty of shade are essential in keeping them healthy.

## FARM POULTRY

PURE BRED HENS  
ARE PROFITABLE

Cost a Little More but Pay  
It All Back in Eggs.

April is a good time to make every effort possible to produce pure bred poultry instead of mongrels. If flocks of hens are kept on our farms that possess the colors of Joseph's coat, combined with numerous sizes and shapes, and producing a product that would take an expert to tell the shades and texture of the shell, then poultry profits will be slim. With small profits, our interest will lessen, and it takes interest to make us go after poultry in the right way. In the opinion of D. H. Hall, extension poultry husbandman, Clemson college, South Carolina.

"Have you ever seen a farmer that was interested in a mongrel flock of chickens? If you have, you have seen more than I have," says Mr. Hall. "As a rule, when the farm flock are mongrels, the farmer himself will always tell you that they belong to the wife, but when pure bred poultry comes on the farm, then this same farmer doesn't mind showing the visitors the poultry, and most of the time, will claim every one of them."

"Pure bred poultry will also attract attention to the farm. I do not care how humble the home may be or how poor the farmer is himself, people will always stop to look at a flock of pure bred chickens. When other people are interested in the things you have, there is usually a sale for them at a good profit."

"What about the cost? Pure bred chickens may cost a little more, but they will pay back in eggs and meat more than mongrels ever can. The pure bred poultry producers in each county should get behind this movement and plan pure bred poultry on each farm."

**Right Number of Males  
Required in Hen Flock**

There is no absolute rule in regard to the number of males needed in a flock, but there are some general recommendations that will prove helpful in deciding this question. For the Asiatic breeds one rooster is needed for six or eight hens. These birds are slower moving than the American breeds. The American breeds, such as Plymouth Rocks, Rhode Island Reds and Wyandottes, need one rooster for every ten or twelve hens. With Leghorns and other Mediterranean breeds one rooster to fifteen or twenty hens is usually satisfactory.

The activity of the males will make some difference in regard to the number needed. In comparatively large flocks fewer males will be needed than where the rooster and hens are closely confined. It is better to have a few more males at the beginning of the season than is needed so that there will be sufficient even though some of them may become disabled or die. If new males are added later in the season they will usually start fighting and do more harm than good. A few extra roosters early in the season is a more practical method of meeting the situation.

**Increasing Demand for  
Capons of Good Quality**

There is a steadily increasing demand for capons as the market becomes appreciative of their superior quality for table purposes.

The question is sometimes asked: "What is a capon?" The answer is: "An unsexed cockerel"—or a bird from which the reproductive organs have been removed before it has been fully developed or attains maturity.

This operation has the effect of causing a more placid temperament to develop in the bird, and the fighting instinct is lost as the result of the continuance of the infantile, undeveloped sexual nature. After the operation has been performed these birds grow rapidly; and their flesh retains the tender condition of young chickens up to the time when they are fully grown.

### Egg Hatchability

Birds which have been producing large numbers of eggs throughout the winter are usually found to produce eggs late in the season with a lower fertility and hatchability. The explanation of this is that the vitality of the birds has gone into egg production. The hatchability of these eggs can be improved, however, by giving the flock all the direct sunlight they can get during the winter. Cod liver oil is also of some value, as are the good glass substitutes.

### Mating Geese

The best results with the heavy breeds of geese come from mating in trios or using not more than three geese with each gander. On duck farms, a mating of seven ducks to one drake usually gives good results. Ganders are usually larger and coarser than geese with larger heads and thicker necks and they have a more shrill call. The cry of the goose is rather harsh. The only sure way to determine the sex will be an examination of the organs.

Mrs. Tom Sams spent Wed-

## What Is a Woman's Time Worth?

HER time is valuable — too valuable to spend endless hours at household tasks which can be done easily, efficiently and economically with the greatest household servant — electric service.

For only ONE CENT invested in electricity at average rates you can . . . .

- Toast 2 to 12 slices of toast in twenty minutes;
- Make six cups of coffee;
- Sew 300,000 stitches on a household sewing machine;
- Iron several shirts or house dresses;
- Vacuum clean for an hour;
- Wash electrically for three-quarters of an hour;
- Wash a day's dishes for the average family.

Through widespread distribution of electricity over interconnected transmission systems, this constant and efficient helper is always at your command.

ELECTRICITY IS CHEAP . . . Make it work for you.

## KENTUCKY UTILITIES COMPANY

INCORPORATED

**MOHAIR FAVORITE AUTO UPHOLSTERY FABRIC**

### CAR'S INTERIOR ATTRACTS WOMEN

Upholstery May Enhance  
Comfort, Smartness and  
Ultimate Value of Car.

WHEN it comes to selecting the family automobile, a good basis of procedure is that adopted by the right-weary American tourist who said to his partner when they came to the next important cathedral: "You do the inside and I'll do the outside." The average woman is quite content to have her husband concern himself with the body of the car, the wheel-base and general mechanics, provided she may have something to say about the inside. The car's clothing, as its upholstery may well be called, is equally important with the rest of the car, for upon it depends much of the comfort, smartness, beauty and ultimate value of the car.

In choosing the upholstery for the interior, a number of distinct features should be considered—good appearance, smart design, pleasing color, wearing quality, riding comfort, cleanliness and economy. The only material that can be depended on to embrace these important features in one fabric is velvet mohair, otherwise known as velmo, and made from the lustrous fleece of the Angora goat. Because of its original snowy whiteness, mohair can be dyed any shade, however subtle. Its lustrous sheen and soft, silky texture leave nothing to be desired in the way of beauty and luxurious appearance, while the long wearing quality of pile mohair, as contrasted with that of flat fabrics, is undisputed. A velmo upholstered car will be fresh and inviting long after the rest of the car has lost its good

appearance or even given itself up to the infirmities of age. Because of the smooth surface of individual mohair fibres, discernible only under a microscope, dirt does not readily adhere to nor penetrate them, and the material is easily cleaned with a whiskbroom or by vacuum. Actual grease or dirt spots are removed by washing with pure soap and warm water.

Easy riding, an important feature when taking long trips, is assured with mohair velvet because there is no slipping and sliding about, as with smooth fabrics, and each fibre of the pile fabric acts as a resilient spring to absorb shocks. It is easier on the clothing, too, as the reduced friction avoids rubbing and subsequent shininess.

Added to these advantages is the additional one that they all add materially to the trade-in value of the car when the time comes to get a new one. In fact, it has been conservatively estimated that anywhere from fifty to two hundred dollars' difference can be looked for in a car whose upholstery is in perfect condition and inviting to the eye.

#### Offer Prize for Old Piece of Furniture

Have you a mohair covered chair or sofa in your home? If so, you may be \$250 richer for it. An announcement was received here today from the Household Science Institute of Chicago, asking for aid in locating the oldest piece of mohair furniture in the United States. Not only will the owner be awarded \$250, but the piece will be exhibited in Chicago during the World's Fair in 1933.

Residents of this town who feel that they have such a piece of furniture should communicate with Mrs. Grace Viall Gray, Household Science Institute, Chicago.

nesday with Mrs. Coston Sams. Mr. and Mrs. Herbert Naylor of Union City, Tenn., and Mrs. Clara Naylor of Nashville, Tenn., visited Mrs. Lucy Burnett and family Sunday afternoon.

Mrs. Audrey Pewitt of Los Angeles, Calif., spent Saturday night and Sunday with Mrs. Jim Boone Inman.

Mrs. Burnie Stallins and children visited her mother, Mrs. Allen Noles, in Fulton, Friday.

Mrs. John Knighton and daughter, Alma, spent Wednesday with Mrs. Harry Sams. Miss Clarice Bondurant spent Friday night and Saturday with Mrs. Lucy Burnett and family.

Mrs. Henry Walker spent Friday with her mother, Mrs. Tom Stallins.

Mr. Bob Roper spent Saturday night with Mr. and Mrs. Harry Sams.

Miss Evelyn Bondurant spent Saturday night with Miss Jeanette Inman.

Mr. and Mrs. Joe Atteberry and Mrs. Mildred Luten spent Saturday with Mr. and Mrs. Burnie Stallins.

Little Miss Bettie Jean Fields of Fulton spent Wednesday with her grandmother, Mrs. J. C. Sugg, Sr.

Mr. and Mrs. Willie Jeffress and daughter, Louise, spent Sunday with Mr. S. F. Jeffress

and family. Mesdames Jim Boone and Malcom Inman spent Monday with Mrs. Lucy Burnett.

Mr. and Mrs. Leighman Elliott visited Mr. and Mrs. Dop Leip in Fulton Sunday afternoon.

#### Route 1, Fulton, Ky. (Ebernezer Community)

Mr. Kennett Wade of Memphis arrived Monday for a few days' visit with home folks. Misses Clarice and Evelyn Bondurant spent Sunday afternoon with Miss Edna Oliver.

Mr. and Mrs. S. B. Oliver, Mr. and Mrs. J. G. Wade, Mr. and Mrs. Coleman Evans, and Mr. and Mrs. T. Y. Jenkins attended quarterly meeting at Crutchfield Saturday. A large crowd was present and good reports were made.

Mr. and Mrs. Edward Brockman and children spent Saturday night and Sunday with Coleman Evans and family.

Mr. Wesley Campbell spent Saturday night with Clifton Campbell and family.

Joe Fred and Elmer, Jr., little sons of Mr. and Mrs. Elmer Liliker, are ill with diphtheria.

Mr. and Mrs. Fred Evans and children visited Mr. and Mrs. Lawrence Lomax of near Crutchfield, Sunday.

Mr. and Mrs. Cliff Wade and family spent Saturday night with Walter Corum and wife.

Presiding Elder B. F. Jones preached at Ebenezer Sunday afternoon. A large crowd was present and he preached an interesting sermon.

Mr. and Mrs. Turner Pursell were Saturday night guests of Mr. and Mrs. Ebner Liliker.

Mr. and Mrs. Ray Bondurant and Mrs. Mary Bondurant visited Mr. and Mrs. Clifton Campbell, Sunday.

The Cayce Home Makers Club met with Mrs. Birdie Pewitt on March 11th. Ten members were present and two new members, Mrs. Grant Demyers of Fulton and Mrs. John Varden, and one visitor, Mrs. Buford Campbell. The home improvement leaders gave the first lesson on the "Back Saving Kitchen," which was very interesting. Miss Henning asked that each one make at least ten improvements in her kitchen. Next meeting will be held on March 18th at the school building. A welcome is extended to anyone to come and be

**JUST LIKE HOME FOOD**  
Smith's Cafe is in reality a home-like restaurant because it has been trying to overcome the prevalent idea that restaurants can't serve food like you get at home.

Scores of patrons will testify that there is no difference between our meals and the meals they get at home. That's the reason they eat here so regularly.

Years spent in catering to the appetites of particular people make it possible for us to serve wholesome, tasty meals.

The next time you feel like eating away from home, bring your family here.

**THE INDIVIDUAL AND HIS BANK**

By ROME C. STEPHENSON  
President American Bankers Association

R. C. STEPHENSON

BANKERS recognize that their business carries especially heavy public responsibilities and welcome all sound measures to aid them meet the duties this imposes. Unceasing efforts to bring about continually improving methods to safeguard depositors in banks of all kinds have long been uppermost in the plans of bankers' organizations throughout the nation. They are not the outgrowth merely of the past year of business adversity, but have been carried on actively for many years and have resulted in great progress along lines of better, safer banking methods. Although banking along with all business has suffered reverses, conditions in this field have been far less severe than they would have been had not bankers been widely successful in their endeavors to develop the high standards of banking that now generally prevail.

The American Bankers Association and bankers' organizations in every state actively support the principle of government supervision of banking. The national banks, which receive their charters to do business from the federal government, are under the supervision of the Comptroller of the Currency at Washington. Through his efficient staffs of expert bank examiners in every section he has the duty and powers to keep watch of the way every national bank is being conducted, to suggest desirable changes in its policies or methods and even to step in and take control for the protection of the depositors if such action is warranted. The state banks, also, which are chartered by the various state governments, are subject to similar supervision and control by state bank officials. In addition banks in many places have long maintained voluntary clearing house associations which enforce even closer supervision over their members.

**Bankers Favor Public Supervision**

Present laws adequately enforced contain ample provisions for government supervision. Bankers universally believe in strong, capable banking departments manned by officials with the discretion and courage to enforce these laws and act under them as the common welfare demands. They believe that these public officials should be paid sufficient salaries to command the services of men of character, ability and a resolute spirit of public service. They believe also that the banking departments should be kept free from all political or other special influence in order to be able to act at all times with single-minded independence solely for the benefit of the public interest.

Although banks in the United States operating under state or national charters are thus subject to supervision of public authority, they are strictly private business enterprises. They are owned by their stockholders and administered by officials chosen through the boards of directors which their stockholders elect. No bank is owned or operated by the United States Government, nor, with one small exception in a western state, by any state government. The function of government in banking is to promote and enforce careful banking administration through the system of examination and supervision which I have described. This, however, does not relieve the individual depositor from the necessity of judging and choosing carefully as to his banking relations, just as in his other business or professional relations. He must inquire for himself into the character and type of institution and men he shall do business with, satisfying himself as to their reputation, reliability and capability. These qualities are essential to complete the element of safety and dependability in any human institution.

**An Illusory Law**

The bank deposit guaranty law in any form is a snare and a delusion, declares a banker in a state where it has been tried, adding: "It is a license and encouragement to irresponsible banks and banking and penalizes capital solvency and prudent banking. It creates a sense of security in the minds of the unthinking and uninformed that is false and impossible to be realized on ultimately. To compare it to legitimate insurance is without reason and absurd. It jeopardizes the solvency of all banks and the safety of all depositors for the theoretical safety of a few. Guaranty schemes always have been, are and always will be impotent, futile and disastrous. It is not new. Has been tried, failed and discarded at intervals for more than 100 years in this country. No well-informed, honest and intelligent mind can accept it in principle or practice. Competent bank supervision and restriction of banks to territory that will warrant sufficient capital investment and accounts is the only sane and honest course and will afford all the guaranty the depositing public is entitled to as compared with all other human affairs."

**The BEST Gray Hair Remedy is Home Made**

To half pint of water add one ounce bay rum, a small box of Barbo Compound and one-fourth ounce of glycerine. Any druggist can put this up or you can mix it at home at very little cost. Apply to the hair twice a week until the desired shade is obtained. It will gradually darken streaked, faded or gray hair and make it soft and glossy. Barbo will not color the scalp, be not sticky or greasy and does not rub off.
