### Hornbeak Bros. Bakery Company

Will Open Wide the Doors of  
Their Bakery Saturday,  
March 28, and Keep  
Open House.

Hornbeak Brothers cordially invite the public to their bakery establishment, on Lake street, Saturday, March 28th, to inspect the remodeled plant and see the new machinery recently installed for making their new loaf, Butter Nut Bread and other wholesome products.

Every step in the baking process will be explained to visitors, so they can realize more fully why Butter Nut Bread and other products of this establishment are so good.

There'll be music and refreshments, and each family will receive a free loaf of Butter Nut Bread.

Tell your friends about it and take the whole family. Remember the date, Saturday, March 28, 10:00 a. m. to 10:30 p. m.

#### MISS SUSIE NOONON PASSES AWAY

Funeral services for Miss Susie Noonon were held Tuesday afternoon at 2:30 o'clock at the home of her niece, Mrs. Poyner DeMyer, 408 Eddings street, the Rev. Baker, of Dyersburg, officiating. Interment followed in Fairview cemetery, in charge of the Fulton Undertaking Co. The floral offerings were fragrant and beautiful.

She died at 6:30 o'clock Sunday afternoon. Just as the day closed she went to sleep like a tired child. Surely a most fitting time for a pure spirit to take its flight heavenwards.

While she has gone from the scenes, the conflicts, the sorrows and pleasures of life, she will still live in the hearts of those who knew her best. Her retiring nature led her to hide her best qualities from public gaze, but they were revealed to those who enjoyed her acquaintance.

During all the long years of her illness everything possible was done to relieve suffering and prolong life. The tender hands and loving care of her niece, with whom she made her home, afforded her much comfort, and she lived to the ripe old age of 76 years.

She was the last of a family of pioneer citizens of Fulton county and one of the largest land owners. Mrs. DeMyer is the only surviving near relative, but she leaves many kin and friends who sincerely regret her passing.

She lived a consecrated Christian life and died a triumphant and happy death. The officiating minister was former pastor when she lived in the lower end of the county, near Brush Creek church. During his talk he paid a beautiful tribute to her memory.

#### "WIFE-SAVING KITCHEN" TRAINING SCHOOL

The training school on "The Attractive Kitchen" will be held Thursday, April 2, at 10 o'clock at Cayce for Home Improvement Leaders of Homemakers' Clubs.

Color schemes, ways of finishing floors and old linoleum and finishing of woodwork for kitchens will be given by Miss Hagman, Home Management Specialist from the University of Kentucky.

A Fulton man's hat can make the grade of two or three years and still be considered O. K., but after a few brief months of wear a woman's becomes as out-of-date as a key-wound watch.

#### HOW TIMES CHANGE

Times change so rapidly that very often we lose sight of things almost over-night. Here comes a Fulton subscriber with a little note that impresses us with this fact most forcibly. You will enjoy reading it, for it is a sort of test of memory. She writes: "Maybe most people around here do not realize it, but it has only been a few years ago since no one had appendicitis; since removing tonsils was an unusual operation; since men wore Congress gaiters; since people paid 6c a quart for milk; since women asked, 'Does my plackethole gasp?' since a hired girl never expected more than \$3 a week in wages; since girls wore cotton stockings and high-buttoned shoes, but you were not supposed to know it; since men put on their shirts by pulling them over their heads." And she might have added: "Since a fellow could take fifty cents and get a hair-cut, a shave, a shine and a stogie and still have a nickel left for the contribution box on Sunday morning."

#### NEW "SUCKER BAIT"

Almost before the ink was dry on the bill approving the construction of Boulder Dam swindlers were busy inaugurating a new graft. Today, with construction work barely started, they are reaping a rich harvest and it is with a view to preventing Fulton citizens from snapping at this new bait that we call attention to it. Real estate sharks are now offering through the mails what they call "city lots" in alleged "sub-divisions" in the town of Los Vegas, Nevada, the nearest settlement to the dam. They represent that Los Vegas, by reason of the dam, will ere long be a city of from 300,000 to 500,000 people, and they are finding many "suckers" who are willing to put up good, hard-earned money for a town lot that, investigation shows, will never be worth the price of the paper the deed is written on. They are located on a sun-baked desert, and even the Chamber of Commerce of Los Vegas is warning the outside public against investing in them. If you are wise you will follow Uncle Sam's advice—and that is to stay away from Boulder Dam and keep your money in your pocket.

#### WHY MUD ROADS?

Up to this time improved highways have been constructed more for the benefit of city motorists than for the betterment of the farmer. Main highways have been improved, but the secondary roads, the ones actually meaning most to rural residents, have been neglected. It is estimated that there are 5,000,000 farms in the nation located on dirt roads. It would be an impossibility, of course, to pave all of the roads leading to them. But a start can be made in that direction in every state; secondary roads of greatest importance can be given attention now, and the program broadened each year until eventually every farmer will have a decent highway over which to get to and from his nearest market. Farming is unprofitable enough as it is without maintaining old transportation and marketing burdens that can be removed. Mud roads should be a thing of the past. The farmer on them pays taxes just the same as if he lived on a main highway. Isn't it time he was getting the attention from our state legislature that he is entitled to?

### Homecoming

### Beautifying Carr's Park

The Junior Chamber of Commerce, under the guidance of Edwin Slaughter, are to be commended on the splendid work of beautifying Carr's Park. Every red-blooded citizen who is loyal to his home town will co-operate with this organization in the work. It is more than a one-man's job, and as we all enjoy the benefits, let's show our appreciation in a substantial way.

#### SOUTH FULTON SCHOOL NOTES

The Seniors entertained in Chapel Thursday morning with a very interesting program. The Juniors have charge of the program next Thursday. Many visitors have been attending our chapel exercises and we are always glad to have them.

The coming of the spring has awakened interest in outdoor sports. Baseball is being played by the younger boys, while the older ones are going through some rigid training for the coming track meet. A tennis club has also been organized with Virgil Patterson as president. The tennis court is being put into playing condition and practice will begin soon.

The sixth grade, under the leadership of Miss Lena Stokes, has started the work of beautifying the school campus. Shrubs and flowers are being planted on the grounds and around the buildings. This is a worth-while project, and every student and teacher in school should support it. Our school and campus should be as well kept as our home.

The elementary department is making extensive preparations for the inter-scholastic meet April 10. Our teachers are planning to attend the meeting of the State teachers association in Nashville April 2nd and 4th.

Mr. J. D. Wright spent the week-end with his home folks in Jackson.

Mr. and Mrs. H. W. Moss spent Saturday in Union City. Mr. and Mrs. Orvin Moore spent Sunday with Mr. and Mrs. Claude Simpson near Mayfield.

George Haygood, who underwent an operation for appendicitis a few days ago, is

able to be at home again.

Miss Ivora Cantrell spent Saturday in Paducah.

Mr. Will Doran continues to improve.

Several members of the eighth grade class are working for the medals offered by the American Legion to the best all-round boy and girl of the class.

#### LIONS CLUB EASTER EGG HUNT

The Easter Egg Hunt sponsored by the Lions Club of Fulton will be held at the Fair Grounds at 2:30 o'clock Easter Sunday.

All preparations are being made to make it better this year than ever.

About 5,000 eggs will be hidden, which includes 500 prize eggs. About \$50.00 will be given away in cash.

All children 12 years of age and under are eligible to participate in the hunt.

A large crowd is expected and everybody is invited.

#### L. KASNOW'S SALE STARTS TODAY

Spring Fashions Blooming in Charming Profusion.

The whole nation is busy with preparations for Easter, and L. Kasnow, Fulton's Lake Street merchant, is alive to the occasion.

Kasnow says when he shouts bargains they are in sight, both within his windows and piled high upon his counters and shelves precisely as represented. Truthful advertising, linked with genuine bargains, draw the people. This has been proven by the big crowds who pack the store.

The big pre-Easter Bargain Sale advertised in this paper today is an outstanding event of sensational values on the eve of Easter, with Spring fashions blooming in charming profusion.

"Quality, service and low prices have made this store the talk of this community and surrounding country," says L. Kasnow. "We never disappoint. Our great success is partly due to that fact. Feverish efforts on our part to make this the GREATEST sale ever, result in unheard-of bargains."

#### PASTOR, WED 50 YEARS, IS HONORED AT RIPLEY

Special Tribute Paid to the  
Rev. and Mrs. Waters.

Ripley, Tenn., March 22.—Fifty years of happy, useful married life and also of service in the Methodist ministry was climaxed here today for the Rev. and Mrs. J. W. Waters in an all-day celebration that began with a special service in the First Methodist Church this morning and ended after hundreds of friends had gone tonight, in a surprise wedding of two prominent Ripley young folks with the Rev. Mr. Waters officiating.

The young folk were Miss Anna Mai Kirkpatrick, daughter of Mr. and Mrs. S. T. Kirkpatrick, and Garland Crockett, a member of the large dry goods firm of Crockett and Dunavant and before friends knew of their plans, they had left on a honeymoon.

It was a happy climax for the golden wedding anniversary of the Rev. and Mrs. Waters, who are so widely known and beloved all over the Memphis Annual Conference, which embraces West Tennessee and West Kentucky.

#### ANNOUNCEMENT PARTY

Mr. and Mrs. C. B. Vance delightfully entertained with one of the most unique announcement bridge parties of the season at their home on Walnut street Saturday night complimentary to their daughter, Inca Mildred, who was married to Mr. Macon Batts, of this city, on the 24th day of January, 1931.

The house was attractively decorated with spring flowers, a color scheme of pink and white being carried out.

Mrs. Batts is now attending school at Washington University, St. Louis, where the marriage ceremony was performed. She will receive her A. B. degree at the end of this semester. Mr. Batts is an employee of the Kentuckian Hotel here. Mr. and Mrs. Batts will be at home to their friends in Fulton some time the early part of June.

#### MILLINERY TRAINING SCHOOL

Miss Isabelle Story will conduct the training school for Clothing Leaders of Homemakers' Clubs, which she was unable to hold last month, on April 3 at Cayce.

### Brieflets

It is the proud boast of some Fulton men that they can understand their wives. But none of them can explain why they put lace on towels.

Most of us think we deserve a lot of credit for giving things to charity that we should otherwise have to hire hauled away.

While you're blaming your troubles on the world it's a good idea to remember that you're taking up a good deal of space in it.

The average Fulton man has to be as sick as a dog before he will take castor oil, and yet he'll want to kill the children because they don't take it cheerfully.

It's a funny country. Somehow it just naturally makes a fizzle of it when it tries to be radical.

A wealth of imagination is a fine thing. The only drawback is that it won't pay your bills.

Why is it that the average woman will buy a half-dozen things that cost \$1.98 and then kick like a steer if she has to pay \$2 for something?

Word comes that icebergs are floating south. But that won't have any effect on the price of ice in Fulton this summer.

There was a time when the office sought the man, but that was away back when the people rode high-wheel bicycles and played croquet.

If some Fulton women knew they were going to fall out of an airplane they would still want time to powder up their nose and dress for the occasion.

They say love is blind, but you'll always notice that the bride's mother usually has her eyes wide open.

When a fat woman meets another fat woman who is fatter than she is, she begins to notice that the sun is shining and that it's a pretty day.

There is a general belief in this country that divorcees would be fewer if a man used the same care in picking a wife that he uses in choosing an automobile.

With new and improved can-openers constantly appearing on the market, it would seem that getting a meal nowadays is about as easy as finding fault.

#### TO CORRESPONDENTS

We regret very much that some of our news letters from correspondents have reached us too late for publication recently. Where letters fail to reach us on Monday and later than Tuesday, they are too late for publication. This is not only a disappointment for the correspondent but to the readers in general. So please do not mail news letters to us unless they can reach us not later than Tuesday afternoon, preferably on Monday.

#### TWO MEALS DAY BEST FOR STOMACH TROUBLE

Skip one meal and drink water instead. Wash out stomach and bowels each morning by drinking water with spoonful of simple glycerin, buckthorn bark, saline compound (called Adierika).

Adierika brings out poisons you never thought were in your system. If you are nervous, can't sleep, full of gas, it will surprise you. Adierika contains no harmful drugs. Get it today; by tomorrow you feel the wonderful effect of this German doctor's remedy. Bennett's Drug Store.

### BACK AND DISPOSITION SAVERS

How many times a day do you stoop in doing your work, Homemaker? And how many of those could you eliminate? Stooping and lifting is tiring, too much is hard on one physically which in turn makes it difficult to keep even temper. You know "The Cook MUST Keep Sweet."

Of course, the best back and disposition saver a woman can have is water in the house. If she can't have it in perhaps she can get it out—a funnel on the back porch or in the kitchen attached to a drain saves a lot of carrying.

Then the proper adjustment of working surfaces is important. The proper height of the ironing board is one inch lower than that of the sink, tables and stove.

One big help suggested this month at Homemakers Clubs is either of two types of wood boxes which can be filed from the outside of the house. Then to protect one's clothes and also be easier to carry is the burlap carrier, one can make, or the wood frame in which one carries in the wood and which holds it neatly stacked

by the grate or stove. The wood box should be large enough so one does not have to stoop to get to it. Being on costers helps a lot in cleaning the floor and being lined with old oilcloth makes it easy to clean inside.

An easy chair, preferably a low, small armless rocker, in the kitchen is a help. A work stool the proper height for the working surface is fine to have.

Then a kitchen carrier is the handiest thing. A little square of board on costers which one can use for the scrub bucket so one can push it with one's foot rather than lifting the bucket, or for the flour can or churn. If the kitchen is ceiled an ironing board can easily be built in and be sure to have the place for the iron and sponges on a shelf right under it.

A sanitary foot trip garbage can is large enough to hold the refuse from one meal on the farm and this one can empty into a larger pail on the back porch which the men carry away. A paper sack or newspaper lining in the can makes the cleaning of the garbage can less disagreeable. Painting the galvanized bucket makes it easier to wash too.

And so one could go on indefinitely far with kinds of equipment to make, to buy, built in equipment as cupboard, closets, etc., there is something for everyone.

You can give the average Fulton woman four pairs of scissors when she is sewing and she'll still bite off the thread.

## More Than Million in Twenty States Fed by Red Cross Volunteers

Hot School Lunches and Balanced Rations Given to Drought Victims—Seed Programs Instituted on Wide Scale

More than 1,000,000 persons in 26 drought-stricken counties of 20 States came under the care of the American Red Cross in what developed into the most extensive relief operations in half a century of ministering to stricken humanity.

Measures to lessen the severity of the blow inflicted by drought were taken as early as last September, when seed was distributed to more than 58,000 families for the planting of rye and other pastures, and to more than 27,000 families for the planting of kitchen gardens. The expenditure for this purpose amounted to \$326,800. Green seedlings were made available up to the first of January.

Early in February another Red Cross garden program got under way, and 567,000 packages of seed were distributed in 15 states. Quarter-acre plots were planted to beans, beets, cabbage, carrots, collard, sweet corn, kale, lettuce, musk, tomatoes and turnips. Once again were farm families given the opportunity to participate in their own salvation.

A comparatively mild winter contributed to the success of the Spring and Fall seed campaigns. Many habitual single-croppers were introduced to the advantages of kitchen gardens, balanced cropping and balanced diet. Numerous land-owners have expressed the opinion that this constitutes the one apparent blessing to come out of the drought catastrophe. The United States Department of Agriculture and the local county agricultural agents and home demonstration agents co-operated in making this part of the relief operations outstandingly successful.

### Balanced Meals Served

Red Cross feeding was aimed at adequacy and scientific correctness, as well as simple economy. In large numbers of schools, where children were found to be attending with little or nothing in their lunch boxes, hot meals were served at noon. A typical menu consisted of vegetable soup and bread one day; thick beef soup or stew with vegetables another day; cocoa or milk and cheese, peanut butter, or jam sandwiches, a third day.

In some places where lunches were not served in the schools, but were provided for in the regular food orders, each family having school children re-

ceived extra staples for school lunches including peanut butter, raisins, prunes and tomatoes. Red Cross nutritionists instructed mothers in the preparation of lunches.

County health officers and private physicians commended the adequacy of rations procured on orders issued by Red Cross chapters, which were filled at local stores. Besides the usual staples, such as corn meal, flour, lard, meat, beans and potatoes, such items as canned salmon, cabbage, tomatoes, vegetables and milk were provided, each order being adapted to the special needs of the family for whom it was issued. Where pellagra threatened, eggs, yeast and other preventives were given.

Thousands of Volunteer Workers. Many thousands of volunteers, through their local Red Cross chapters, gave freely of their time, experience and efforts, as in other Red Cross disaster operations. They searched out needy cases in their communities, many persons being restrained from asking assistance because of pride. Chapter committees investigated circumstances, distributed food and clothing.

More than 500 carloads of foodstuffs were contributed. These were given free haulage by railroads. Farmers of more fortunate sections embraced the opportunity to help their pastoral cousins of the affected area. Shipments ranged from live poultry to fish, from grain to grapefruit. Carloads of flour, eggs, beans, vegetables, onions, rice, corn and mixed vegetables were included.

As the result of co-ordinated Red Cross chapter efficiency, not one authenticated case of starvation as a result of drought has been uncovered.

Large quantities of new and used clothing were distributed. In direct consequence many school children resumed their studies who had been kept at home for lack of sufficient protection from the elements. In some instances, rural schools that had been closed were enabled to reopen as a result of Red Cross relief work.

States involved were: Alabama, Arkansas, Georgia, Illinois, Indiana, Kentucky, Louisiana, Maryland, Mississippi, Missouri, Montana, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, Tennessee, Texas, Virginia, West Virginia.

Many of these States had been hard hit by a succession of floods, crop failures, low prices and economic depression, and drought constituted a climax to the cycle of distress.

"Wherever I went," wrote one observer, "I made a point of asking what would have happened if the Red Cross had not been able to respond. In widely scattered points, from leading citizens, came the answer that undoubtedly there would have been many deaths directly from starvation, with epidemics preying upon the undernourished."

## FORD COMFORT

Every new Ford is equipped with four Houdaille double-acting hydraulic shock absorbers

ONE of the fine things about driving the new Ford is the way it takes you over the miles without strain or fatigue. No matter how long the trip, you know it will bring you safely, quickly, comfortably to the journey's end.

The seats are generously wide, deeply cushioned and carefully designed to conform to the curves of the body. Every new Ford has specially designed springs and four Houdaille double-acting hydraulic shock absorbers. These work both ways — up and down. They absorb the force of road shocks and also provide a cushion against the rebound of the springs.

Other features that make the new Ford a value far above the price are the Triplex shatter-proof glass windshield, silent, fully enclosed four-wheel brakes, more than twenty ball and roller bearings, extensive use of fine steel forgings, aluminum pistons, chrome silicon alloy valves, torque-tube drive, Rustless Steel and unusual accuracy in manufacturing.

In addition, you save many dollars because of the low first cost of the new Ford, low cost of operation and up-keep, and low yearly depreciation.

THE NEW  
FORD SEDAN

LOW PRICES OF FORD CARS  
\$130 to \$630

F. O. B. Detroit, plus freight and delivery. Bumpers and spare tire extra at small cost. You can purchase a Ford on economical terms through the Authorized Ford Finance Plans of the Universal Credit Company.

## The BEST Gray Hair Remedy is Home Made

To half pint of water add one ounce bay rum, a small box of Barbo Compound and one-fourth ounce of glycerine. Any druggist can put this up or you can mix it at home at very little cost. Apply to the hair twice a week until the desired shade is obtained. It will gradually darken streaked, faded or gray hair and make it soft and glossy. Barbo will not color the scalp, is not sticky or greasy and does not rub off.

## DUAL BANK SYSTEM FAVORED BY BANKER

State and National Institutions Supplement Each Other in Serving Country's Varied Financial Needs

RECENT suggestions that all banks in the United States be under Federal jurisdiction, doing away with the chartering of banks by the various states recalls the opposition to this plan presented at the recent convention of the American Bankers Association by R. S. Hecht of New Orleans, Chairman of its Economic Policy Commission. Mr. Hecht said:

"There are just as good reasons why there should be state as well as national banks, as that there should be state as well as a national government. I do not think that analogy is far-fetched. The states should not surrender all political jurisdiction to the central government, and the local business life of the states should not be made to surrender all control over financial functions to national financial instrumentalities. There are many variations of business conditions from state to state and there are special fiscal requirements of the various states.

"It is entirely logical, therefore, that the states should retain the right to charter banks so as to mold and direct their affairs in accordance with the states' governmental and business requirements and keep them adapted to localized sentiment and conditions.

"The argument is sometimes advanced that the dual system jeopardizes the life of the Federal Reserve System because under it there is a large group of banks that are free to remain out of or to withdraw from the system. Facts and figures prove that this is a specious argument.

"It is true that there has been some shifting from national to state charters especially in cases of mergers of large national banks with banks operating under state charters. However, the Federal Reserve System was not weakened in this process because the merged institutions almost universally retained their membership in the system on a voluntary basis. Moreover, the records show that state bank members are just as good members of the system as national banks and the ratio of state bank resources in the Federal Reserve System is constantly growing. In 1922, national banks held about 65 per cent of the resources of reserve members, and state banks about 35 per cent, while in 1929, the nationals held only 60 per cent and state banks 40 per cent.

### Banking Systems Help Each Other

"Reciprocally the state and national banks systems have helped each other. If the national banking law has served in some respects as something of a model code toward which state banking laws more and more have approached year by year, so have the state codes developed valuable reforms which have suggested improvements for the national laws. A great many undesirable competitive inequalities have been wiped out by this mutual evolutionary process and further progress along the line of uniformity so far as is desirable is anticipated.

"However, I do not believe that it is a disadvantage to have two banking codes that differ in some respects. It is quite probable that the state banking code in many instances represents a closer adjustment to local conditions than could be had under the national banking laws, and this is a situation that should be retained. There should, however, not be competition between the two banking codes. Competition should be between banks themselves and not between the laws under which they operate. The effort to offer too great allurements in one code as against the other could lead only to weak banking laws. But I do think that there should be the alternative opportunities that now exist which banking institutions and local business interests may choose, so that they can function or conduct their business relationships under that banking code which best meets the conditions of the times and of the place as they see them.

"This has been illustrated in both directions. In states where such sound measures as the guarantee of deposits were operative state banks had the opportunity to escape the baleful effect of such laws. On the other hand, when a court decision was handed down in Worcester, Massachusetts, which rendered uncertain the position of trust assets acquired by a national bank through a merger with a state bank, it was a real advantage for national banks affected to take out and operate under a state charter, either on a temporary or a permanent basis, as circumstances make expedient.

"In my opinion, bankers, national as well as state, should combat the thought that conceives of depriving us of the vitalizing benefits of our dual system."

### Finance Fights Erosion

Farm terracing to stop erosion is of major importance in Noble County, Oklahoma, the county agent said, and so one of the county's national banks bought five farm levels to be loaned to farmers without charge. The machines were immediately put to use and the farmers are showing keen interest in terracing. Two terracing schools were started for adults and 4-H Club boys.

**BACK AND DISPOSITION  
SAVERS**

How many times a day do you stoop in doing your work, Homemaker? And how many of those could you eliminate? Stooping and lifting is tiring, too much is hard on one physically which in turn makes it difficult to keep even tempered, and fair with the family. You know "The Cook MUST Keep Sweet."

Of course, the best back and disposition saver a woman can have is water in the house. If she can't have it in perhaps she can get it out—a funnel on the back porch or in the kitchen attached to a drain saves a lot of carrying.

Then the proper adjustment of working surfaces is important. The proper height of the ironing board is one inch lower than that of the sink, tables and stove.

One big help suggested this month at Homemakers Clubs is either of two types of wood boxes which can be filled from the outside of the house. Then to protect one's clothes and also be easier to carry is the burlap carrier, one can make, or the wood frame in which one carries in the wood and which holds it neatly stacked

by the grate or stove. The wood box should be large enough so one does not have to stoop to get to it. Being on casters helps a lot in cleaning the floor and being lined with old oilcloth makes it easy to clean inside.

An easy chair, preferably a low, small armless rocker, in the kitchen is a help. A work stool the proper height for the working surface is fine to have.

Then a kitchen carrier is the handiest thing. A little square of board on casters which we can use for the scrub bucket so one can push it with one's foot rather than lifting the bucket, or for the flour can or churn.

If the kitchen is ceiled an ironing board can easily be built in and be sure to have the place for the iron and sponges on a shelf right under it.

A sanitary foot trip garbage can is large enough to hold the refuse from one meal on the farm and this one can empty into a larger pail on the back porch which the men carry away. A paper sack or newspaper lining in the can makes the cleaning of the garbage can less disagreeable. Painting the galvanized bucket makes it easier to wash too.

And so one could go on indefinitely far with kinds of equipment to make, to buy, built in equipment as cupboard, closets, etc., there is something for everyone.

You can give the average Fulton woman four pairs of scissors when she is sewing and she'll still bite off the thread.

**More Than Million in  
Twenty States Fed by  
Red Cross Volunteers**

**Hot School Lunches and Balanced Rations Given to Drought Victims—Seed Programs Instituted on Wide Scale**

More than 1,000,000 persons in 22 drought-stricken counties of 20 States came under the care of the American Red Cross in what developed into the most extensive relief operations in half a century of ministering to stricken humanity.

Measures to lessen the severity of the blow inflicted by drought were taken as early as last September, when seed was distributed to more than 68,000 families for the planting of rye and other pastures, and to more than 27,000 families for the planting of kitchen gardens. The expenditure for this purpose amounted to \$326,800. Green vegetables were made available up to the first of January.

Early in February another Red Cross garden program got under way and 507,000 packages of seed were distributed in 15 states. Quarter-acre plots were planted to beans, beets, cabbage, carrots, collard, sweet corn, kale, lettuce, mustard, okra, onions, peas, spinach, squash, tomatoes and turnips. Once again were farm families given the opportunity to participate in their own salvation.

A comparatively mild winter contributed to the success of the Spring and Fall seed campaigns. Many habitual single-croppers were introduced to the advantages of kitchen gardens, balanced cropping and balanced diet. Numerous land-owners have expressed the opinion that this constitutes the one apparent blessing to come out of the drought catastrophe. The United States Department of Agriculture and the local county agricultural agents and home demonstration agents cooperated in making this part of the relief operations outstandingly successful.

**Balanced Meals Served**

Red Cross feeding was aimed at adequacy and scientific correctness, as well as simple economy. In large numbers of schools, where children were found to be attending with little or nothing in their lunch boxes, hot meals were served at noon. A typical menu consisted of vegetable soup and bread one day; thick beef soup or stew with vegetables another day; cocoa or milk and cheese, peanut butter, or jam sandwiches, a third day.

In some places where lunches were not served in the schools, but were provided for in the regular food orders, each family having school children received extra staples for school lunches including peanut butter, raisins, prunes and tomatoes. Red Cross nutritionists instructed mothers in the preparation of lunches.

County health officers and private physicians commended the adequacy of rations procured on orders issued by Red Cross chapters, which were filled at local stores. Besides the usual staples, such as corn meal, flour, lard, meat, beans and potatoes, such items as canned salmon, cabbage, tomatoes, vegetables and milk were provided, each order being adapted to the special needs of the family for whom it was issued. Where pellagra threatened, eggs, yeast and other preventives were given.

**Thousands of Volunteer Workers**  
Many thousands of volunteers, through their local Red Cross chapters, gave freely of their time, experience and efforts, as in other Red Cross disaster operations. They searched out needy cases in their communities, many persons being restrained from asking assistance because of pride. Chapter committees investigated circumstances, distributed food and clothing.

More than 500 carloads of foodstuffs were contributed. These were given free haulage by railroads. Farmers of more fortunate sections embraced the opportunity to help their pastoral cousins of the affected area. Shipments ranged from live poultry to fish, from grain to grapefruit. Carloads of flour, eggs, beans, vegetables, onions, rice, corn and mixed vegetables were included.

As the result of co-ordinated Red Cross chapter efficiency, not one authenticated case of starvation as a result of drought has been uncovered.

Large quantities of new and used clothing were distributed. In direct consequence many school children resumed their studies who had been kept at home for lack of sufficient protection from the elements. In some instances, rural schools that had been closed were enabled to reopen as a result of Red Cross relief work.

States involved were: Alabama, Arkansas, Georgia, Illinois, Indiana, Kentucky, Louisiana, Maryland, Mississippi, Missouri, Montana, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, Tennessee, Texas, Virginia, West Virginia.

Many of these States had been hard hit by a succession of floods, crop failures, low prices and economic depression, and drought constituted a climax to the cycle of distress.

"Wherever I went," wrote one observer, "I made a point of asking what would have happened if the Red Cross had not been able to respond. In widely scattered points, from leading cities, came the answer that undoubtedly there would have been many deaths directly from starvation, with epidemics preying upon the undernourished."

**FORD  
COMFORT**

**Every new Ford is equipped with four Houdaille double-acting hydraulic shock absorbers**

ONE of the fine things about driving the new Ford is the way it takes you over the miles without strain or fatigue. No matter how long the trip, you know it will bring you safely, quickly, comfortably to the journey's end.

The seats are generously wide, deeply cushioned and carefully designed to conform to the curves of the body. Every new Ford has specially designed springs and four Houdaille double-acting hydraulic shock absorbers. These work both ways — up and down. They absorb the force of road shocks and also provide a cushion against the rebound of the springs.

Other features that make the new Ford a value far above the price are the Triplex shatter-proof glass windshield, silent, fully enclosed four-wheel brakes, more than twenty ball and roller bearings, extensive use of fine steel forgings, aluminum pistons, chrome silicon alloy valves, torque-tube drive, Rustless Steel and unusual accuracy in manufacturing.

In addition, you save many dollars because of the low first cost of the new Ford, low cost of operation and up-keep, and low yearly depreciation.

**LOW PRICES OF FORD CARS  
\$430 to \$630**

F. O. B. Detroit, plus freight and delivery. Bumpers and spare tire extra at small cost. You can purchase a Ford on economical terms through the Authorized Ford Finance Plans of the Universal Credit Company.

## DUAL BANK SYSTEM FAVORED BY BANKER

State and National Institutions Supplement Each Other in Serving Country's Varied Financial Needs

RECENT suggestions that all banks in the United States be under Federal jurisdiction, doing away with the chartering of banks by the various states recalls the opposition to this plan presented at the recent convention of the American Bankers Association by R. S. Hecht of New Orleans, Chairman of its Economic Policy Commission. Mr. Hecht said:

"There are just as good reasons why there should be state as well as national banks, as that there should be state as well as a national government. I do not think that analogy is far-fetched. The states should not surrender all political jurisdiction to the central government, and the local business life of the states should not be made to surrender all control over financial functions to national financial instrumentalities. There are many variations of business conditions from state to state and there are special fiscal requirements of the various states.

"It is entirely logical, therefore, that the states should retain the right to charter banks so as to mold and direct their affairs in accordance with the states' governmental and business requirements and keep them adapted to localized sentiment and conditions.

"The argument is sometimes advanced that the dual system jeopardizes the life of the Federal Reserve System because under it there is a large group of banks that are free to remain out of or to withdraw from the system. Facts and figures prove that this is a specious argument.

"It is true that there has been some shifting from national to state charters especially in cases of mergers of large national banks with banks operating under state charters. However, the Federal Reserve System was not weakened in this process because the merged institutions almost universally retained their membership in the system on a voluntary basis. Moreover, the records show that state bank members are just as good members of the system as national banks and the ratio of state bank resources in the Federal Reserve System is constantly growing. In 1922, national banks held about 65 per cent of the resources of reserve members, and state banks about 35 per cent, while in 1929, the nationals held only 60 per cent and state banks 40 per cent.

### Banking Systems Help Each Other

"Reciprocally the state and national banks systems have helped each other. If the national banking law has served in some respects as something of a model code toward which state banking laws more and more have approached year by year, so have the state codes developed valuable reforms which have suggested improvements for the national laws. A great many undesirable competitive inequalities have been wiped out by this mutual evolutionary process and further progress along the line of uniformity so far as is desirable is anticipated.

"However, I do not believe that it is a disadvantage to have two banking codes that differ in some respects. It is quite probable that the state banking code in many instances represents a closer adjustment to local conditions than could be had under the national banking laws, and this is a situation that should be retained. There should, however, not be competition between the two banking codes. Competition should be between banks themselves and not between the laws under which they operate. The effort to offer too great allurements in one code as against the other could lead only to weak banking laws. But I do think that there should be the alternative opportunities that now exist which banking institutions and local business interests may choose, so that they can function or conduct their business relationships under that banking code which best meets the conditions of the times and of the place as they see them.

"This has been illustrated in both directions. In states where such sound measures as the guarantee of deposits were operative state banks had the opportunity to escape the baleful effect of such laws. On the other hand, when a court decision was handed down in Worcester, Massachusetts, which rendered uncertain the position of trust assets acquired by a national bank through a merger with a state bank, it was a real advantage for national banks affected to take out and operate under a state charter, either on a temporary or a permanent basis, as circumstances make expedient.

"In my opinion, bankers, national as well as state, should combat the thought that conceives of depriving us of the vitalizing benefits of our dual system."

### Finance Fights Erosion

Farm terracing to stop erosion is of major importance in Noble County, Oklahoma, the county agent said, and so one of the county's national banks bought five farm levels to be loaned to farmers without charge. The machines were immediately put to use and the farmers are showing keen interest in terracing. Two terracing schools were started for adults and 4-H Club boys.

Watteau, Halo and Profile  
on Spring Hat Program

In milady's "spring bonnet" there's nothing lacking in romance and charm. Bandeau types inspired by the prettily feminine headgear with which Watteau lured the lovely ladies which grace his paintings, are outstanding, which means gay little flower and ribbon trimmings after the manner of the two brimmed hats pictured at the top of this group. The hat with a halo (below to the left) is smart for immediate wear. All Paris is talking about the new profile shapes. As to their brims there are two sides to the question, according to the final sketch herewith.

Fancy Turns to Novelty  
Straws and Plaid "Sets"

There is no doubt as to the supremacy of the straw hat this season—every type of straw from fine milan to coarse novelty straws. To these add a list of exotic linen-like types not forgetting the new and popular paper panama; also many exceedingly lacy straws. The top hat pictured is of zephyr-weight shiny coarse black straw. The cloche is of novelty white straw with a mixture of black cellophane. Plaid "sets" worn with the spring suit are also in fashion.

A magnificent assemblage of unusually beautiful hats, and now is the time to buy.

## POULTRY

UNIQUE PLAN FOR  
RAISING TURKEYSTimely Hints for Using Re-  
stricted Range Idea.

The discovery that turkeys can be successfully raised in confinement is leading to more extended use of that method. Below are listed some suggestions for turkey producers who are intending to follow the restricted range plan. This plan should be followed specifically if the turkeys are to be raised successfully.

Two yard areas should be provided, one called the brooder range, the other termed the rearing range, the first being near the brooder house, the second to be used after the poults no longer need brooder heat. There should be sod ground that is not infested with blackhead and where chickens have not ranged recently. It seems to be impossible to keep turkeys free from blackhead if they are allowed to mix with chickens. Otherwise they may be brooded and fed the same as baby chicks with all feed given in hoppers.

Approximately 200 poults can be brooded in a 10 by 12 brooder house. This should be used for the first eight to ten weeks, after which the poults should be moved to the summer range quarters as no further heat will be required.

Four separate yards should be provided adjacent to the brooder house. Each should contain 500 square feet of sod and each should be used only two weeks so that the poults will have access to fresh ground every two weeks.

From the brooder house, the young turkeys should be moved to the rearing range, where a cheap roosting shelter should be provided. A range of one acre of sod is considered sufficient for 100 young turkeys from the age of eight weeks until they are marketed. This area should be divided into four sections and each section used in succession one month. The secret of successful turkey raising rests largely on providing fresh ground and hopper feeding all feed, coupled of course with strong, healthy poults and a suitable ration.

In the selection of range, it should not be chosen where chickens ranged recently or where there is a possibility of drainage from the poultry yards reaching the turkey range. It is desirable to have all of the poults the same age. There is no question but that turkeys can be successfully raised in confinement and that it does not pay to let turkeys range for their feed.

—H. L. Kempster, Missouri College of Agriculture.

## All-Mash Ration Grows

## Rapidly in Popularity

The all-mash method of feeding chicks has grown in popularity during recent years, as it assures the caretaker that each chick will get a balanced ration, rather than to consume some part of the ration, such as scratch grains, instead of the entire feed.

Successful feeding is one of the requirements in getting satisfactory growth and development of young chicks. Even though a good ration is used, it should not be assumed that every grower will be successful in raising a large proportion of the chicks which are placed in brooders. However, one cannot overlook the matter of feeding and expect to be reasonably successful.

## Better Egg Production

## During Winter Months

To get the best or even good egg production during the winter months, one should provide a green feed or a substitute. Test work at Ohio has proved that really high-grade green, leafy alfalfa and red clover are rather efficient substitutes. But even then, a green feed of some sort is helpful and gives variety. Of those that can be grown during the summer, sugar beets or mangel-wurzels are the best. A considerable supply can be grown in a small space in the garden or field. They need rich soil, should be planted by June 1 and kept clean during the growing season.

## Vitamin E Needed

Vitamin E plays an important part in the hatchability of eggs. This rather recently discovered fertility vitamin is essential to good hatches. It is not known exactly which feeds available for poultry contain this vitamin. However, it is known to exist in well-cured, green colored alfalfa. Alfalfa fed, either in a rack or as part of the mash, will provide both vitamins A and E. It is probable that the usual amount of alfalfa, about 5 per cent. in the mash is not enough.

## How Many Cockerels?

One of the problems for the flock owner who produces eggs for hatching is that of providing the proper number of pullets or hens per male bird. Opinions and experience show a variation of from eight to twenty-five females per male. Without a question, a larger number of females can be mated with Leghorn roosters than with the American breeds. Probably twelve to fifteen for Rocks, Reds and Wyandottes, and fifteen to twenty with Leghorns are satisfactory.

## Lesson for March 29

REVIEW: JESUS THE WORLD'S SAVIOR

**GOLDEN TEXT**—How God anointed Jesus of Nazareth with the Holy Ghost and with power: who went about doing good, and healing all that were oppressed of the devil; for God was with him.

**PRIMARY TOPIC**—Jesus Busy Doing Good.

**JUNIOR TOPIC**—Jesus Busy Doing Good.

**INTERMEDIATE AND SENIOR TOPIC**—Jesus the World's Savior: Preparation and Popularity.

**YOUNG PEOPLE AND ADULT TOPIC**—Jesus the World's Savior: Preparation and Popularity.

Since the lessons of the quarter center in one person and have one theme; namely, the world's Savior, the best method of review for senior and adult classes will be to refresh the mind with the principal facts and leading teachings of each lesson. Assignments should be made a week ahead. The following suggestions are offered:

## Lesson for January 4.

John the Baptist was a great preacher. He had a great heritage in his godly parents. Much can be expected from a son of such parents.

## Lesson for January 11.

Jesus, as to personality, was divine and yet his human nature developed in the normal way. He waxed strong in body, was filled with wisdom, and God's grace was upon him. Though conscious of his deity, he lived a life of filial obedience.

## Lesson for January 18.

John the Baptist came in fulfillment of prophecy, calling upon men to prepare for the coming of the Messiah by repenting of their sins. Baptism was the appointed sign of their repentance. With fine humility, John turned the attention of the people from himself to Christ.

## Lesson for January 25.

Jesus was led into the wilderness by the Holy Spirit to be tempted of the Devil. His temptation was Messianic. The purpose was to demonstrate the reality of the incarnation. Jesus went from the place of anointing and heavenly recognition as the Son of God to meet and to spoil the enemy of God and man (Heb. 2:14).

## Lesson for February 1.

Jesus demonstrated his power over various diseases and over demons, thus displaying his Lordship. Even while demonstrating his mighty power, he operated through benevolent channels.

## Lesson for February 8.

Jesus made clear to the disciples that they would be hated and opposed as they went out into the world with his message. Those who follow Christ must expect opposition and suffering.

## Lesson for February 15.

Jesus is the friend of sinners. There is no one so steeped in sin as to be shut out from him. Christ came into the world "to seek and to save that which was lost."

## Lesson for February 22.

Jesus' supreme mission was to make known the good news of salvation to a lost world. In spite of the good seed sown by him, only a small portion brought forth full fruitage owing to the unfavorable condition of the soil.

## Lesson for March 1.

The greatness of the harvest—man's lost condition moved Jesus to ask the disciples to pray the Lord to thrust out laborers. The real force back of missionary endeavor is prayer. When the church begins to pray about missions, there will be missionaries and money to sustain them.

## Lesson for March 8.

The parable of the Good Samaritan shows who is my neighbor and what being a neighbor means. My neighbor is the man needing my help, whether next door or across the world. Being a neighbor is the most important thing for me. To be a neighbor means to be on the lookout for those in need and to give sympathetically the needed help.

## Lesson for March 15.

The Bethany home was always open to the Lord. Jesus will come into such homes as will give him welcome. The inspiration of the Bethany home must have greatly helped Jesus as he went out to meet his foes. It is the inspiration of the home which gives men courage to go out and fight the battles of life.

## Lesson for March 22.

The parable of the rich fool shows the peril of allowing the heart to be set upon even the fruits of legitimate toil. To seek gold and thus forget God is to play the fool.

The next quarter continues the lessons from the gospel by Luke.

## Our Love to God

Our love to God brings us a gleam in earth's darkness to show us whither we are going. It keeps us in sympathy with God's work everywhere. It is our enlistment in the army of good will toward men.—Isaac Edwards.

## Men of Genius

Men of genius are often dull and inert in society, as a blazing meteor when it descends to earth, is only a stone.—Longfellow.

## Gospel Meeting

ADMISSION: 15c and 25c.

## Foods You Can't Forget

WE'VE all encountered them—delicious dinners with one dish especially the recipe for which you just can't help begging from your hostess. These are the foods that you can't forget, and a file of such recipes, accumulated from time to time, will go far toward making you a famous hostess.

Here are two such recipes picked up recently by a man with a reputation as an epicure.

**Stuffed Cherry Salad:** Remove the seeds from one pound or one No. 1 can of Royal Anne cherries, and stuff them with the following filling:—Mix together thoroughly one cake of cream cheese, one-third cup of crushed pecans, three tablespoons mayonnaise, a dash of cayenne pepper, and salt to

taste. Serve on lettuce leaves with French dressing. This will serve seven persons.

## A Succulent Stuffing

**Chicken Dressing:** First of all be sure to brown your bread crumbs in the oven before mixing them with the other ingredients. Then moisten with about one-quarter cup of chicken broth and mix together one quart of the browned bread crumbs, one-quarter cup butter, one cup celery, one cup chestnuts broken in pieces, and salt and pepper to taste. You'll find this far better than the ordinary chicken dressing, and it will make many of your guests wonder how you manage to make your roast chicken taste so good.

## Tea With Kate in the Kitchen

By JANE OSBORN

SATURDAY luncheon had consisted of very, very thin soup, with a few very small croissants — and there wasn't much in the plates either. Then there had been midget fish balls—one to a person—short rations of bread and butter—plenty of pickles, weak tea and—that was all. Roderick Hemstead, who occupied one of the front rooms on the second floor of the fine old-fashioned house had come home early, in time for luncheon, and intended to spend the afternoon working over some papers from the office. He had dropped in for luncheon, to which he was certainly entitled since he paid full board. Nora Lane was home, too, though on school days she bought her luncheon at a little tea-room near the school where she taught.

Now Roderick sat in his room considering his papers, but much more seriously considering how hungry he was. He'd go out and get some afternoon tea if it wasn't such an infernal nuisance.

Nora had been correcting papers, but it seemed now as if she couldn't correct another unless she had something to eat.

Starvation fare—that's what it was at Mrs. Miller's boarding house.

Just then came a curious kind of scratching noise on Nora's door. "It's just me," said a voice as Nora opened to see an oldish woman in a blue ging-ham dress. Nora knew at once that this was Kate, the cook, though she had seen her only a few times.

"I thought maybe you'd come to the kitchen for a cup of tea," suggested Kate. "Lunch was none too hearty." She laughed a little and waited for Miss Lane to accept her invitation. "You see Mrs. Miller is away. Won't possibly be back until after dinner to night. I always have my tea and toast at four, and I thought I'd see if there was anyone in that would like some."

So Nora Lane, feeling as guilty as a child about pilfering the pantry, followed the broad-backed Katie to the kitchen below. Steps on the back stairs following them proved to be those of Roderick Hemstead, who sat across the dining-room from Nora. She knew his name, thought him very good looking, and that was about all. "This young gentlemen was working in his room," explained Katie. "I knew that meal would never last him through the afternoon."

Katie was now setting tea cups and saucers and spoons on the immaculate white oilcloth top of her kitchen table. The tea was excellent, freshly brewed and piping hot, and there were sandwiches of Katie's home-made brown bread.

A half hour had passed when Nora and Roderick groped their way up the back stairs.

"Wasn't it fun?" asked Nora.

"You bet," said Roderick.

"And it isn't as if we weren't entitled to the things, either," defended Nora. "We both pay full board, and we are hardly ever here for luncheon. Wouldn't Mrs. Miller have a fit?"

"That's what makes it such good sport. Wish I sat on the same side of the dining-room that you do."

"Why?" asked Nora.

"Guess," said Roderick.

Frequently that winter Mrs. Miller had engagements on Saturday afternoon and for some reason Katie at ways found her young man and her young lady, as she called them, in their rooms, ready to be asked to a kitchen tea party.

Then came the final kitchen tea party, to which Roderick and Nora came looking so confused and self-conscious that Katie felt sure that Roderick had stolen a kiss on the back stairs. Never was a tea party more delightful, and Katie was in rare good humor. Perhaps they were to pre-occupied. Anyway they did not hear the footsteps of the ample Mrs. Miller coming through the pantry.

"Katie," she shrieked, "what do you mean by this? How dare you? I dis-charge you on the spot."

Katie and Nora looked helplessly at each other and Roderick, who had risen, bowed slightly to his landlady. "Let me explain," he said. "We have been making arrangements — Miss Lane and I—with Katie to come and keep house for us. But perhaps I had better explain. Miss Lane and I are engaged. We shall settle in our own house immediately after our wedding." Nora blushed and nodded an affirmative to the bewildered Katie.

"How dare you conspire to get my cook away from me, right here in my own house?" shrieked Mrs. Miller.

"That's just it. As a matter of fact we hadn't spoken of the matter to her. We were going to. But we felt a little reticent about making advances here as you say, in your own house. But since you have already discharged Katie, of course we need no longer feel any such scruples. Katie, do you accept our offer?"

Katie said she did. And there was a decided coolness between Mrs. Miller, her cook, and two of her best-paying boarders until the three left two days later.

### Community Christmas Trees

The various accounts of the community Christmas tree seem to agree that the first tree of light was erected in New York city on Christmas, 1912. The practice was immediately taken up by a number of other cities in the United States.

## The DAIRY

HIGH QUALITY OF DAIRY PRODUCTS

One of Most Important Concerns of Industry.

(Prepared by the United States Department of Agriculture.)

Raising the quality of the nation's supply of dairy products particularly market milk and cream, until the point is reached where all the people, whether they live in city or town or on the farm, will be universally provided with an abundance of dairy foods of high wholesomeness and quality, is one of the most important concerns of the dairy industry of the United States, says O. E. Reed, chief of the bureau of dairy industry, in his annual report to Secretary Hyde of the United States Department of Agriculture.

Reporting upon the bureau's milk quality-improvement project, Mr. Reed says that this is considered one of the most important features of the work of the bureau and the regional dairy extension specialists. Considerable progress in quality improvement has already been made in several states. This is the result of the co-operative efforts of the bureau and the extension services of the state colleges of agriculture, the report says.

"To reach the goal of general high quality is largely a matter of getting before the dairy farmer and others of the industry the facts regarding the practice which have been found to give the best results," says the report. "To stimulate the development of a comprehensive plan for improving the quality of milk, a great deal of work has been done, not only in planning programs but in making them effective in some of the states."

The importance of interesting the boys and girls of the 4-H clubs of the country in the program for improving the average quality of the milk produced on American farms, has been recognized by the bureau and the extension service in the quality-improvement activities, says Mr. Reed. He says that suggested programs for quality improvement have been drawn up for the use not only of the adults who are the dairy farmers of today, but also for the club boys and girls who will be the dairy farmers of tomorrow.

The quality-improvement work is now in progress in many places, with the bureau, the state extension services, state and city departments of health, and other agencies, all co-operating. Some dairy communities have made marked improvement in the quality of the dairy products which they produce and market, says Mr. Reed.

### Good Method of Rearing Calves With Nurse Cow

Here is a method of starting calves without skim milk that comes from a dairymen who has used it for years. The calf is left with the mother for the first four or five days. It is then removed to a Holstein nurse cow, a low tester, that can start three calves nicely at one time. If the nurse cow is producing more milk than the calves should have, the cow is partly milked before the calves are allowed to her. When the calf is three or four weeks old a mixture of equal parts of coarsely ground corn, rolled oats, bran and half part of powdered skim milk is put in a hopper in the calf pen; good alfalfa hay and water are kept before them from now on. At ten weeks the calf is eating regularly of other feeds and can be taken off the cow. The amount of powdered milk in the meal is doubled and fed twice a day, all the calves will clean up until the calf is six months old.

### Clean Milk Important for Human Consumption

No greater field of usefulness exists than in the production of milk for human consumption. Milk is the food of which growing children are reared and from which they should receive strength and vigor necessary to make them strong, useful citizens. Adults, too, especially invalids and those weakened by improper nourishment, need milk in the diet to repair waste and build up strong new tissue. Recent investigations in nutrition have shown that milk contains certain other substances which are essential for the proper growth of the human body.

Milk production also carries responsibilities. When carelessly produced and improperly handled, milk may be the means of spreading disease. Every owner of a dairy herd should consider it his duty to himself and to the community to keep only healthy cows, supply them with wholesome feed, and keep them in clean, comfortable quarters.

### Affect Milk Flavor

Outside of the unfavorable effect of moldy and decayed feed on the health of the cows, such feeds are apt to impart to milk and its products undesirable flavors resulting from these defects. Thus moldy straw and hay, moldy or sour silage and grain, decayed roots, etc., give milk and its products objectionable flavors which injure their market value. Certain feeds, such as silage, beets, turnips, cabbage, etc., give milk, cream and butter, flavors which are not desired.

## THERE AND BACK BY TELEPHONE QUICKLY AND AT SMALL COST

WHATEVER your business — whether you spend all or part of your time on the road—you can save time and avoid large expense accounts by using the modern, high speed long distance telephone service.

The personal touch that your voice alone can give, the advantage of getting an immediate answer and the low cost of the service are causing more and more people to turn to the telephone for out-of-town business and social contacts. The next time a trip seems necessary or a letter inadequate, try telephoning instead. In most cases, Station-to-Station service will answer every need, and you will be surprised at the small cost. Ask "Long Distance" for rates.

Mr. and Mrs. Will Coleman visited their daughter, Mrs. Palmer Owen, last Sunday.

Mrs. Lula Cook continues ill. It is hoped she may soon recover.

Little Citey Robey visited her aunt Ruby Coleman last Thursday night.

The men of this community are very busy starting a crop. Several plows are running and a lot of cleaning up is being done. It is hoped 1931 will be a good crop year.

### A TIME OF COLDS

Spring is a time of colds. Sudden changes in the weather bring great peril to millions of men, women and children whose health is menaced by constant variations in indoor temperatures.

It is not an uncommon thing to find at this time of year in living rooms of Fulton homes temperatures above that of an ordinary summer day. The heat is often so great as to produce perspiration, and this quickly brings on a cold. Medical authorities agree that when the skin is heated to a high degree nature pours out water upon it to cool it by evaporation, and then contact with a draught is dangerous. Overheating lowers resistance and paves the way for an attack by the army of germs that is always on the alert for victims when the changeable temperatures of spring begin.

It's hard to regulate inside temperatures when outside temperatures are jumping up and down and no man knows one hour what is only a few hours ahead. But it is a matter well worth attention if we want to escape serious illness, loss of time from work or possibly a neighborhood epidemic that might claim a number of lives. Don't keep the house too warm, and if it is necessary to open windows or doors to lower the temperature inside, be careful not to sit or lie in a draught. Keep in mind the fact that you are now passing through one of the most dangerous periods of the year, and one in which you cannot possibly be too careful.

## Gold Horseshoes

## CHILDREN CRY FOR IT—

CHILDREN hate to take medicine as a rule, but every child loves the taste of Castoria. And this pure vegetable preparation is just as good as it tastes; just as bland and just as harmless as the recipe reads.

When Baby's cry warns of colic, a few drops of Castoria has him soothed, asleep again in a jiffy. Nothing is more valuable in diarrhea. When coated tongue or bad breath tell of constipation, invoke its gentle aid to cleanse and regulate a child's bowels. In colds or children's diseases, you should use it to keep the system from clogging.

Castoria is sold in every drugstore; the genuine always bears Chas. H. Fletcher's signature.

**Fletcher's  
CASTORIA**
