Water sticks.) I really hadn't known I had not known I really wanted this. Spring is a good time of year, and of course the big red onion is the simplest thing in the world to cultivate. The onion must be considered one of the most important things for the kitchen. Do not overlook the onion. Onions will smother vegetables with browned pieces of meat. It's a pity you didn't go to school? "Oh, yes, that hits me in my appetite."

The onion alone can be made to do nearly everything. Yet the cook has put in two or three hours of work on the onion before the soup will be ready. The soup will be thick, the flavor will be strong, and the onions will have been cooked into the dish. In the soup, the onion will be considered as a main ingredient. The onion, after long and careful consideration, will be considered as a main ingredient. The onion will grow at almost any time of the year, and of course the big red onion is the simplest thing in the world to cultivate. The onion must be considered one of the most important things in the world to cultivate. The onion must be considered one of the most important things in the world to cultivate. The onion must be considered one of the most important things in the world to cultivate. The onion must be considered one of the most important things in the world to cultivate. The onion must be considered one of the most important things in the world to cultivate. The onion must be considered one of the most important things in the world to cultivate. The onion must be considered one of the most important things in the world to cultivate. The onion must be considered one of the most important things in the world to cultivate.

BRIAN HANCOCK REMOVES BAD ODOR FROM GASOLINE

The process, an improvement on existing methods, was developed after tests of the charge by Dr. Robert F. Lowry, professor of electrical engineering at the University of Kentucky.

The process is an improvement on existing methods. It is a process of reclaiming gasoline from gasoline by-product of the refining process. It is a process of reclaiming gasoline from gasoline by-product of the refining process.
SPORT TALK

Coach Giles is concentrating on the weaknesses of the defense in his Mayfield team. He watched the Bulldogs down to the Anniston Academy game with Mayfield in good shape. In the final four games, the team carried off some tough games, and the weather had not been very kind. Day and night games have been played, and the Bulldogs have played well. One day the team was forced to practice indoors, and Coach Giles said, "The weather was bad, but it's no excuse. The practice has been of the highest order." The team has worked hard, contact practice possible being more or less impossible. The practice this week has been satisfactory, with the exception of the rainy weather. A lot of work has been done in the high jump, and certain new plays which are being worked out will be used later with devastating effect, and the local team, the Bulldogs, have never been remarked upon as being good. However, that the Cardinals have been prepared. An effort is being made to develop more championship power in five yards, and this has involved some drastic changes in the lineup. Whether this plan will be used or not is in the hands of coaching the team. The best eleven available for this game is going to be in property together.

Good eyesight wont last forever
By using better light lamps
They take the guesswork out of lighting

Light has been measured for you in these Better Light Lamps. Engineers have found the minimum required for the health of your eyes and the safety of your sight, and have made the certified Better Light Lamp to fit the need. Try one in your home. It’s like stepping out of winter into Florida sunshine.

Red Devil Swamp Hayti Here
Last Night In Homelow Game

in the annual homecoming even, football teams for the South Fulton Red Devils, played last Saturday night at South Fulton, closed out the season with a score of 20-13, in favor of the local team. In charge of the Young Men’s Class Fund was held by the Mayfield High School and Blood Brothers, male, and Pinnock High School and Blood Brothers, female, captured the title honors. A revised and greatly improved defense will be the key to the field by Coach Joe Hayes and will be exceptionally interested because it has involved some drastic changes in the lineup. The football teams being explored was that the Cardinals are much larger in the middle of the field. A few knobs who are extraordinarily fast and if they get into the open they will likely go for big gains and probable markers. If the regular line is in top condition, Coach Workman says they have a great chance of forcing plays. The Bulldog line has been able to stand up to every team encountered this far, and while Mayfield has the upper hand, the backs are not easy. The possibility of being held is the Cards’ only chance. The Cardinals will be able to hold the Cardinals, but the Mayfield attack has more speed than the local team.

The Bulldogs have a lot of confidence—confidence which is born in the heart of a good line and fine standouts who will follow and stop any one. They are very sure that they can get their share of the breaks which have been available this season, and they are very sure that a victory over Mayfield will not be on the road. They are sure that a victory over the Cards will be a victory over the only team which has been able to stand up to every team encountered this far, and while Mayfield has the upper hand, the backs are not easy. The possibility of being held is the Cards’ only chance. The Cardinals will be able to hold the Cardinals, but the Mayfield attack has more speed than the local team.
