# Ben Kilgore Enters Race For Governor

Ben Kilgore, recently announced candidate for the Democratic nomination for Governor of Kentucky, is today resigning his position with the Eastern Dark Fired Tobacco Growers Association. In submitting his resignation, Mr. Kilgore said:

"This early resignation seems necessary in order that I may concentrate my time, talents and strength to a long and vigorous campaign for Governor. I shall not only seek support in every county in the next few months, but I desire to consult with my Fellow - Kentuckians throughout the state on matters of public policy. This will enable me to develop a strong program and attract a strong leadership for the future welfare of our great Commonwealth."

"I want to make this fact unmistakably clear. I am not running against any one, except as the realities of a political campaign make it essential. I am running for Governor and I am confident the people of Kentucky will elect me to this high position of public trust and heavy responsibility."

I have a deep and consuming desire to serve the people of Kentucky as Governor for the next four years. To this one task—and to none other—I will devote all the strength, talents and abilities, with which I have been endowed. When the end of my four years arrives, I will be found at my post of duty, concentrating on the single task of returning to the people, who have given me this high office, four years of devoted and dedicated service.

I shall not, when becoming Governor, begin running for the Senate. Nor shall I use the Highway Department or any other agency of government to build an organization for another political campaign.

My one great aspiration is to become Governor of Kentucky and to contribute creatively and constructively to the welfare of all my Fellow-Kentuckians. To do this one job well will be my single purpose and my only concern for the next four years. How well I succeed and the will of the people will prove sufficient to take care of the future when this first task is done.

## CONSERVATIONISTS HEAR MR. MURDOCK

The board of supervisors of the Fulton County Soil Conservation District met in the office in the City National Bank Building Tuesday afternoon on their regular monthly meeting date. One item of business to come before the board was the recommendation of a supervisor to fill the place of Clem Atwill whose time has expired. It was voted unanimously to recommend to the state committee that Mr. Atwill be reappointed. Two members of the board are appointed by the state committee and three are elected by popular vote.

The presentation of the soil conservation essay awards was discussed and the decision was to present the awards at Cayce some time during the week of February 19th most suitable to the school. Robert M. Adams, sec-treas., was named to contact the principal and make arrangement for the time.

After the business session the members listened to L. W. Murdock of Graves County, who has been named as a director of the state supervisor's association and was appointed by the governor to serve as one of the nine commissioners of the State Division of Soil and Water Resources.

## FHS PREPARES FOR DISTRICT TOURNEY

Fulton High School is making plans to play host to the First District Basketball tournament, scheduled for Carr Gym Feb. 27-28 and March 1-2-3.

Drawings for first-round games will be held Sunday in Clinton.

## Rotarians Will Hear Mark Greenstone

Mark Greenstone, past District Governor, District of Tennessee, of Paris, Tenn., will be guest speaker at Fulton Rotary Club meeting Tuesday, Feb. 20th, at which time all Rotary Clubs will celebrate the 46th Anniversary of Rotary International.

Fulton will be linked with more than 7,200 other cities and towns in 83 countries of the world as they celebrate the 46th anniversary of the founding of the international Rotary organization.

"The first Rotary Club was organized in Chicago on Feb. 23, 1905, by Paul P. Harris, a young lawyer, who suggested the idea to a group of his friends. It was called the Rotary Club, because the first meetings were held in rotation, in the offices of its members."

"For nearly half century, Rotary has continued to grow in numbers and strength. In the last twelve months, for example, more than 300 new Rotary Clubs have been organized in 38 countries of Europe, Africa, Asia, the Americas and the Islands of the Pacific. Today, Rotary is a world-wide organization of some 344,000 business and professional executives who are members of more than 7,200 Rotary Clubs. There are Rotary Clubs in almost every city in the United States and Canada and in 83 different countries and geographical regions throughout the world."

## Farm, Civic Leaders Pay Tributes To Ed Thompson

Around 125 farm and civic leaders gathered Wednesday night at the Cumberland Presbyterian Church to pay honor to recently-chosen Master Farmer Ed Thompson and his family, with glowing tributes to this progressive leader being the order of the evening.

Mr. Thompson was presented a beautiful plaque in recognition of his honor by Sally Hill, editor of Home Management of the "Progressive Farmer" magazine, on behalf of the publication. Miss Hill appeared in place of W. C. Lasseter, editor, who was unable to attend.

**TO BE BROADCAST**  
A transcription of the awarding ceremony and brief remarks by officials was made Wednesday and will be broadcast Sunday morning at 7:30 a. m. by radio station WKYB, Paducah, 570 on your dial.

In paying tribute to Mr. Thompson, Mill Hill pointed out that "less than 500 families in the Southern States have been selected for this honor in the 25 years since 1926, and not over 50 families in Kentucky". She pointed out that a very careful check of the family, its records, its farm practices, its living and its progressiveness is made before it is singled out for such honors.

Preceding Miss Hill was Harry Young, U-K Field agent in farm management, whose office collaborated with the magazine in making the selection. Mr. Young pointed out that some indication of the greatness of the honor could be gained from the fact that very detailed scoring is done on business management, living, and conveniences in farming. Out of a possible score of 1000 points, Mr. Thompson rated "very near the top."

The award is made "in recognizing achievement of a farm goal, leadership, and farm plan". Mr. Young pointed out, "In examining the records of a Master Farmer we learn that 1. It takes time to develop and do a good job; 2. One cannot improve without change; 3. Good farming is a sound business over a long time; 4. A consistently good family does well in all operations."

Roy Bard, President of the Fulton County Farm Bureau, presided at the after-dinner introductions, which included, besides the above, an address by W. P. Burnette on "A Master Farmer in his Community" and brief remarks by Mr. Mahan of the U-K Extension Service; Mr. Bohannon of Paducah; Glenn Williamson of Extension Service; John Watts, County Agent, and Mrs. McLeod.

## Men Workers Want Male Quartette On Program

Mrs. Fred Gibson, drive chairman for the 1951 Fulton Community Concert Series was loud in her praise of the enthusiastic workers engaged in selling memberships in the organization. Outstanding in this year's annual drive is the interest taken by the men in selling enough memberships to secure an outstanding male quartet such as "The Revelers." Mrs. Gibson is being assisted in the drive by Mrs. Vernon Owen, co-chairman.

C. L. "Cap" Maddox, an enthusiastic concert patron is devoting his entire efforts to securing memberships among new-comers and persons who have not previously been members of the organization. Randall Burcham, another tremendously interested worker among the "men-folks" is talking up the availability of outstanding male quartets and "beating the bushes" for that possibility.

The Fulton Community Concert Association is entering its third successful year. For the past two years attractions in the musical world have appeared here worthy of cities twice, even ten times the size of Fulton. Alice Howland, the Dranooffs, The Columbia Concert Trio, Elwood Gary, Constance Keene, The Grand Opera Quartet, all handed in stellar performances here and their visits will long be remembered by local music lovers.

Mrs. Ward Bushart president of the Fulton Group announced today that an arrangement had been entered into with the Mayfield and Dyersburg, Tenn. whereby purchasers of tickets in Fulton may enjoy the attractions coming to those cities this season. Purchase of a membership means that they may enjoy as many as nine, maybe ten or twelve concerts for the nominal price of three.

Admission to the concerts is by membership card only.

No single tickets are sold at the door and memberships may not be purchased except during the drive. Headquarters office is located at Fall and Fall Ins. Agency, phone 6.

Officers of the association are: President—Mrs. R. W. Bushart; 1st Vice—President—Mr. E. E. Williams; 2nd Vice President—Mrs. Fred Gibson; 3rd Vice President—Charles Fields; 4th Vice President—Mrs. David Sundwick; Secretary—Mrs. Hendon Wright; Treasurer—Smith Atkins; Headquarters Secretary—John Allen Austin; Concert Chairman—J. C. Suggs; Hospitality Chairman—Mrs. Parks Weeks; Publicity Chairman—Mrs. William McDade; Piano Arrangement—Mrs. Gus Bard; Drive Chairman—Mrs. Fred Gibson; Assistant—Mrs. Vernon Owen;

Directors are besides the officers: Mrs. Paul Westpheling, Mrs. H. N. Strong, Mrs. M. W. Haws, Mrs. L. A. Clifton, Vyrion Mitchell, Mrs. Clarence Maddox, Mrs. Ernest Fall, Jr., Mrs. Steve Wiley, Mrs. J. C. Hancock, Mrs. Walter Whalen, Mrs. Paul Hornbeak, W. L. Holland, Miss Andy DeMyer.

Edwin Cas Presley, 22, son of Mr. and Mrs. Claude Presley of near Crutchfield, was instantly killed last Friday morning when his Chevrolet sedan collided head-on with a Pure Milk truck about three miles north of Fulton on Highway 51.

Both truck and car were demolished in the terrific crash, with two wreckers required to pull the vehicles apart before Presley's body could be removed.

## Investment In Hearts

Exciting news about man's struggle against the heart diseases has been headlined in the nation's press. The signs indicate that we may be on the threshold of important new discoveries in the treatment and control of the gravest threat to the public health today.

The exciting news comes against the sober background of statistics which show that diseases of the heart and blood vessels kill more than 600,000 Americans annually, and that between 9,000,000 and 10,000,000 of our citizens of all ages have some form of heart disease.

In 1949, the last year for which full totals are now available, 8,029 Kentuckians died of heart disease—that number being more than the total deaths from the next three leading causes of death combined.

But it is encouraging that the increasing discoveries about heart disease are being coordinated by a national organization, the American Heart Association, and that the Kentucky Heart Association and community units in at least six Kentucky cities are affiliated with this national organization.

The 1951 Heart Fund, which is being conducted throughout February by the national organization and its State and community affiliates, offers, it seems to us, a great opportunity for individuals to make a profitable "investment in hearts". Heart disease, we are informed by doctors and scientists, can affect any one of us at any age or standing in the community. So by contributing to the research, health education and community service activities which the Heart Fund supports, we are really making a wise investment that surely will pay dividends in better community and individual health.

Great progress already has been made. Many lives being saved today would have been sacrificed to heart and blood vessel diseases a few years ago. Much suffering and disability are being prevented or lessened due to new facts uncovered by research.

Practically every one of the great disease scourges of the past has brought under control by research and the increase of medical and public knowledge. Medical men still are probing for the causes underlying 90 per cent of heart diseases—rheumatic fever, high blood pressure and hardening of the arteries. But there is no reason to believe, on past experience, that victory cannot be achieved. Our help can hasten the day when these facts become known and this great killer and disabler is sent into retreat.

Kentucky's share of responsibility in the 1951 Heart Fund has been set at \$200,000, the great majority of which total will be spent right here in our State for the services outlined above. You can mail a gift to the Kentucky Heart Association, of which Former Governor Keen Johnson is president, by simply addressing it "Heart, care of Postmaster."

## Extend City Limits

At the last regular meeting of the Fulton City Council a group of residents of the Country Club Courts, an unincorporated suburb, petitioned that body to extend the city limits to include Country Club Courts.

Chief among the reasons forwarded for extension of the city limits was the necessity in that area for fire plugs, street lights and other conveniences enjoyed by City of Fulton residents.

The extension of Fulton's city limits has long been a project of this newspaper. Long before the editors bought a home in the Highlands (another unincorporated suburb) we have cited instances where it was of vital importance to extend the city limits to include Riceville, Country Club Courts, Highlands and other areas.

We know, of course, that to extend the city limits, considerable expense must be borne by the City Council in the extension of sewage, fire prevention, street lights and a score of other things. But this extension must be made now, or in the future, and we cannot understand why our forward-looking and progressive City Council does not undertake it now.

In Highlands, we have no sewage system, as such. We have no street lights, and whatever is done for fire fighting we hardly know. Chief among our concern in not being included in the city limits is the fact that we have no immediate police protection. Being under the jurisdiction of the county law-enforcing officers, most of us shudder at the thought of needing a police officer . . . quick.

To include the outlying areas in the city limits would mean more tax revenue for the city coffers, more water meters, (only a handful of Riceville residents have sanitary running water inside) a wider area to select home sites. These and many other advantages would result from the extension of the city limits and frankly it is beyond our comprehension why

such action has been such a tremendous difficulty for the city to undertake.

If we're so foolish to promote such a project, would the good city fathers mind telling us, in a letter to the editor, why it continues to be by-passed?

## New National Party

We thought you might be interested in knowing that several prominent Mississippians, former newspaper associates of the News publishers, have formed a new National Coalition Committee, the purpose of which is to effect a coalition of all right thinking Americans—Republicans and old-line Democrats and all anti-Truman forces in support of a single ticket in the next Presidential election.

Capt. Tom L. Gibson and Mr. Joseph F. Ellis, Sr., both old-time Democrats have been instrumental in forming the organization. Both men, prominent and successful in their own rights, were States Righters, and seem determined to form a party that would, we believe, reflect the sincere views of millions of voters today.

From literature sent us today we reprint the following:

### "What Is The

### National Coalition Committee?

"Impelled by a realization that our constitutional government and free enterprise economy are in danger of destruction and that we have only a very limited time to avert that danger and preserve our liberties, there gathered together in Jackson, Miss., recently a group of business — men from seventeen states for the purpose of considering the precarious state of our national economy and government, determining the cause and fixing the blame therefor and laying down plans for the remedying of conditions and the restoration of constitutional Government to the people of the United States.

"From whatever state they came delegates to this meeting brought the same story of usurpation by the present Administration of state and local authority, in matters of no fair concern to the Federal Government of waste, extravagance and general incompetency and of a fast waning confidence in policies of the Government in matters of either domestic or foreign concern.

"Realizing that relief is to be obtained only at the polls, and that such relief is obtainable only by joining of forces of all right thinking Americans regardless of previous party affiliation, but who stand in opposition to Socialism and centralization of authority in autocratic hands, the National Coalition Committee was conceived, and is now in process of enlargement into a national organization."

In an appeal to American Voters the organization said:

"If the National Coalition Committee is to succeed it must have the assistance and active support of all intelligent people who desire and believe in the restoration of Constitutional Government in the United States.

"If you believe in the right of States to regulate their internal and domestic affairs free from interference by the Federal Government; if you believe in the right of men to engage in laudable and productive toil free from intimidation, coercion and regimentation by the Federal Government; if you stand in opposition to allowing our wealth and resources being wasted in crack-pot socialistic schemes and experiments, or being drained off into foreign lands in support of unfriendly people and hostile governments; if you oppose the making of secret agreements, of which our people are not advised, and which, unknown to them, commit them to war and death in filthy and foreign lands; if this is your position, as a right thinking American citizen, then we ask that you join with us in this undertaking to effect a coalition among all our people to support that party and candidate in the next election which will insure return of Constitutional government to the Nation.

"Memberships and contributions are the only source of revenue to the Committee, and every dollar will be applied directly to the work of broadening the scope of the Committee's efforts, with no compensation whatever to be paid to any member or officer of the Committee.

"Your interest and support will speed the work of one of the most important undertakings in the political history of the Country. With each contribution we will give a subscription to the Southern Weekly, published at Dallas, Texas, which is the official organ of the Committee and which will keep you fully informed as to the progress of the work.

"When bad men combine, the good must associate else they will fall, one by one, an unspilt sacrifice in a contemptible struggle."—Burke.

"Let us associate ourselves now — join with us in this effort to restore Constitutional government to our people.

### Dick Oberlin:

### Oberlin's Observations

For quite some time a good many people have indicated increasing admiration for the judgments of Judge William B. Ardery of Frankfort, who has tossed into his court some of the hottest legal potatoes that can be cooked.

Students of law, attorneys and some legally-versed laymen are of the opinion that Judge Ardery is completely fearless, and rigidly adheres to an absolute interpretation of the law.

In some of his judgments, this jurist has said quite bluntly that he doesn't agree morally or ethically with an inescapable legal decision. But the decision was based four-square on the law. And all he can do is rule on legal-ity.

This, of course, is what a judge should be. What we expect them to be. But, unhappily, not always what they are.

In statements from the bench, and in some of his written decisions, Judge Ardery often all, has uttered a profound truth, stated in the simplest terms.

One of these was made in connection with the investigation of the Bogie Equipment Company, which has been accused of supplying bribe money to some state officials in return for preferential treatment in state purchases of heavy — and expensive — machinery.

Judge Ardery said: "Government is not the simple process we once knew! Its ramifications are now widespread. Sometimes the expenditures of Government are very hard to trace."

Government certainly is not the

thwarting of justice—because of the very legal code itself—are the end result. In ordering the Bogie Equipment Company to make available its records, Judge Ardery said his court could not be put in the position of "concealing instead of revealing."

It seems what all this is saying indirectly is that we need men in our courtrooms who will defend the real welfare of the people. Who although they are elected by and are members of political parties can, when it is necessary, look that political party squarely in the eye and spit in its face.

We need men in public office, too, who will defend the public's welfare instead of trying to gouge in taxes the last available penny to pad payrolls and give jobs to political party workers. As our government has grown, expanded, leaped like Jack's beanstalk, there is a swiftly increasing need for one of the oldest-fashioned virtues in more men in public life. Honesty.

## WHAT ELSE DOES A GENERATOR DO?

An electric generator generates electricity, of course. And the two that Kentucky Utilities Company is adding to the Tyrone and Green River plants are capable of generating a lot of it—150,000 kilowatts hourly, or more than a billion kilowatt hours a year. Their installation will double the size of each plant.

Each of these generators can produce more than twice the electrical requirements of a metropolitan area the size of Lexington.

Each of these generators can produce more than twice the power requirements of all 18 Rural Electric Co-ops now served by KU.

BUT THAT'S NOT ALL THEY WILL GENERATE!

### \*They will generate jobs

More men will be added to the 60 already employed at each plant. Further, the two new units will use about 600,000 additional tons of Kentucky coal every year. That means nearly 100,000 man-days of work for Kentucky miners. It will require 12,000 cars to haul this coal to the plants. That means countless man-days of work for transportation employees. Additional millions of dollars will flow into Kentucky's economy to be spent on food, manufactured products and service.

### \*They will generate revenue

Money earned by these generators will be used to pay the "rent" on the money borrowed to build

them, to build new lines, and to provide more service and better service to our present customers.

### \*They will generate additional tax money

More hundreds of thousands of dollars will go to the federal government, to state, county, and local governments. This money will build roads, tanks, schools, and airplanes. It will pay the salaries of teachers, policemen, firemen, and tank drivers, pilots, and gunnery sergeants.

From these new generators will come the life blood of modern living—the power to enable us to live better and safer in the last of the great democracies.

(Continued from page One)

the age of 6, if he does become a lawyer, all of his experience then, has contributed toward this goal. Eight years grade school, four years High School, two years college, three years of law, a total of 17 years has gone into his apprenticeship, and then he must stand a three day examination to test his qualifications. He then is licensed and is admissible to the Bar Associations.

After all of this he is not guaranteed one client nor a job. He must make it from there on his own.

FOR WHAT HAS THIS INDIVIDUAL ACTUALLY PREPARED HIMSELF? "TO INTERPRET AND APPLY THE LAW TO A GIVEN STATE OF FACTS."

BEFORE HE CAN DO THIS, HOWEVER, AND HOLD HIMSELF OUT AS SUCH AND CHARGE THE CLIENT FOR SUCH SERVICE, HE MUST BECOME A JOURNEYMAN LAWYER, HAVING THE APPRENTICESHIP AS SHOWN ABOVE.

There are vagaries in any language which permit varying construction from the use of certain words. For a thousand years the use of certain words in legal instruments have been held to mean a definite thing with only one construction. This is in order that a person in a contract, deed, will, mortgage or other instrument can know actually what is intended and what will be done. We all know how easily one is misunderstood in common conversation. It is intended in the law that there, will be no misunderstanding in the conveyance of property or in agreement between persons.

After all of these centuries, however, as our language grows, the very rule itself becomes imperfect and a Court must determine the rights or intentions of the parties, or the legislative bodies must enact laws covering the intention or interpretation. But long before that, one or more trained lawyers have tried to work out the differences by applying the known law to the state of fact.

In the past, there have been many who wrote deeds, mortgages contracts and prepared Income Tax returns for a fee and the lawyers took the permissive attitude, because in many instances, the errors of the untrained created litigation, thereby making for larger fees. There are many examples of this in this particular area. If we were to continue to permit these errors to be made just because it brought about litigation, would we then be dealing fairly with the people to whom we believe we owe a responsibility?

THERE ARE NO DOUBT MANY PERSONS, NOT LAWYERS, WHO CAN WRITE DEEDS, MORTGAGES, CONTRACTS AND OTHER LEGAL INSTRUMENTS AND PREPARE INCOME TAX RETURNS, BUT IF THOSE DO NOT BECOME QUALIFIED AND PASS REQUIRED EXAMINATIONS AND SECURE LICENSE AND ARE PERMITTED TO ACT FOR OTHER PEOPLE FOR A FEE, THEN ANY OTHER PERSON CAN DO LIKEWISE. IN OTHER WORDS, IF ONE CAN BE IMMUNE FROM REGULATION, THEN ALL WILL BE IMMUNE. AND THERE WOULD THEN BE NO PROTECTION TO THE PUBLIC.

No one can write a deed, dra-

no one should be permitted to assume the relationship of attorney and client who are not so regulated. A doctor should never discuss with others his client's confidence or his diseases, and there is a reason for that, i. e., many would avoid treatment in order that they may keep their condition secret; likewise a lawyer whose main responsibility is to protect human, civil and property rights should see that every person has a chance to be heard and prepare their confidential papers in a confidential manner.

Thirdly, lawyers are not permitted to solicit; it being concluded that being permitted to solicit breeds litigation, when in fact the aggrieved party may be satisfied to leave things as they are.

To permit soliciting of any type of practice would be to permit soliciting of all types, therefore lawyers are not permitted to advertise even for Income Tax practice. The unlicensed have and do advertise. The suggestion of such advertising may well be: that the lawyers do not want this type of practice, or (2) that the lawyers cannot do this type of practice, or (3) that the advertiser charges less than the lawyers, and (4) that the advertiser is an expert.

All of these four are false. The lawyer who holds himself out to prepare Income Tax returns probably has supplied himself with

notable and trustworthy authorities and reference books on Income Taxation. The charges by the lawyers are usually the same or lower than the unlicensed, for the competition of the unlicensed would have made it so.

There will always be a Scylla and Charybdis to lure men from the issue at hand. The issue here is one of regulation and trust and not that of a "Closed Shop" or pro or anti labor.

In protection of the public as well as our profession, we do not ask for a "Closed Shop"; we only ask that the person or persons who are in competition with us

and who charge the public or accept payment for legal services become JOURNEYMEN and fulfill the qualifications, before interpreting the law or applying it, without any testing of their ability.

We realize that this a lengthy reply, but ask that in fairness you give this answer the same recognition that you gave the mentioned editorial.

Very truly yours,

Ever stopped to think how many trips your telephone saves you? Or what the transportation costs would amount to for the trips to town and across town that you avoid by telephoning?

Just think—the telephone stands ready to run errands for Kentucky homes 24 hours a day for an average charge of one-half cent an hour!

Whether you evaluate your telephone service in terms of transportation costs saved, time saved, "missions accomplished," protection in case of emergency—or just in the friendship and good times that result from keeping in touch—you'll find your telephone is still a big bargain!

C. HUNTER GREEN, Kentucky Manager
