FULTON ADVERTISER

Vol. 7 No. 45

FULTON, KY. SEPT. 25, 1931

R. S. Williams, Publisher

Tenn. Division Office Abolished

During the week many changes have taken place in railroad circles. You know Fulton is the hub of the great Illinois Central Railroad system. It is the only place on the entire line with five arteries leading out in every direction. It is located practically mid-way between New Orleans and Chicago, Louisville and Memphis, and many times said to be the logical point for division offices and terminals, but the higher-ups in a mighty effort to reduce operating expenses saw fit to abolish the Tennessee Division office here and consolidate it with other divisions.

The Kentucky Division takes over part of the Tennessee and another part is taken over by the Mississippi Division. The Fulton, Hickman, and Troy Districts are being taken over by the Kentucky, the Blufford District is put into the St. Louis Division, and the Cairo District, on the old line, is added to the Mississippi Division.

Many changes are made among the various officials by reason of this territorial change.

H. W. Williams, who has been superintendent of the Tennessee Division for the past several years, has been named Trainmaster in place of O. H. McFarlin, who is assigned to other duties.

S. J. Holt was appointed Division Engineer, with headquarters at Water Valley, Miss., taking the place of T. M. Pittman, Jr., who is assigned to other duties.

S. P. Critz, former assistant engineer here, has been moved to Memphis as instrumentman.

A. B. Dunning is transferred to the Kentucky Division as instrumentman.

B. Getsson, instrumentman here, moved to the Kentucky Division as additional instrumentman.

L. O. Wolf, instrumentman, goes to the Louisiana Division.

G. J. McClatchey, instrumentman here, has been transferred to the St. Louis Division at Carbondale as chairman.

There is considerable uncertainty regarding the future for many others in the local office. For the time being several dispatchers will be continued here, as well as several other employees, but no official announcement has yet been made regarding these men.

The superintendent who now has jurisdiction over this territory is T. E. Hill of the Kentucky Division.

EVERYBODY'S BUSINESS

Why is it that only those around Fulton who pay taxes seem to take an interest in taxation matters? Those who pay no taxes directly usually appear to think that the problem is only the worry of those who do. This is far from the truth. Everybody pays taxes either directly or indirectly. The person who owns a home which he rents makes the owner pay as much as he can. The merchant, the banker and everybody else in business pass taxes on to the ultimate consumer as much as they dare. In the end it is the consumer, either directly or indirectly, who pays the lion's share of the cost of government. The old saying that the only sure things are death and taxes holds good today. As a result, tax reduction, far from being a thing which affects only the rich, is a matter of tremendous personal interest to everybody. The rich may be inconvenienced to some extent by high taxes, but their standard of living is not impaired. But this cannot be said, unfortunately, of the person of average means or less.

AN IMPORTANT WEEK

Fulton citizens are not expected to "make a big fuss over it," but they are earnestly invited to join in celebrating the most important week of the calendar. That is "Fire Prevention Week," and it is to be observed throughout the nation the week of October 4 to 10.

Everybody, everywhere can participate in this celebration. If you are a property owner, celebrate by seeing to it that your flues and chimneys are in proper shape for winter, and that cellar and garret are free of rubbish and inflammable material. If you rent your home, then make sure of the same thing. If you are in business, clean up all the dark corners where a match, accidentally tossed by a smoker, may start a conflagration. If you are a school teacher, lecture the pupils two or three times during the week on the danger of playing with fire or matches. If you hunt or fish, or work in the open, practice the proper use of matches in fields and woods. No matter what your occupation, and even if you haven't a job at this time, you can join in celebrating this week by pledging yourself that no fire will ever originate through your own individual carelessness.

Don't forget "Fire prevention Week"—and don't forget to observe it. It's a form of protection that costs no actual money, only a reasonable amount of time, and that pays huge dividends in preventing disasters. Let everybody in the community keep the date in mind and observe it.

BRUCE-JONAKIN

Announcement is made of the marriage of Miss Annie Mae Bruce, daughter of Mrs. A. T. Laird of Fulton, to Mr. B. D. Jonakin, of Obion county, Tenn. The marriage was quietly solemnized in Fulton on August 22, 1931. Mr. Jonakin is a progressive farmer of Obion county, where he and his bride will make their home, on Route 6, Union City, Tenn.

LEGION POST NAMES OFFICERS

Marshall Alexander Post No. 72, the American Legion, met in regular session Sept. 17, at 7:45 p. m., with Commander Davis in the chair. After a brief business session, the election of officers for the year was taken up, resulting as follows: Commander, Cecil Weather- spoon; first vice-commander, Kelly Lowe; second vice commander, Sonnie Maddin; adjutant, Ernest Forrest; financier, Paul Hornbeak; service officer, Leland T. Bugg; historian, Mrs. J. S. Robinson; sergeant-at-arms, H. F. Rucker; chaplain, Robert Lamb; executive committee, Earl Taylor, L. Kasnow, Jess Jordan, J. T. Powell, Cecil Weatherspoon, Ernest Forrest and Paul Harnbeak.

TRAINING SCHOOL

Floors and Floor Coverings will be the topic of discussion at the second training school for leaders of Homemakers' Clubs in the project on "Back- grounds In The Livable Home" to be held Thursday, October 1 at 10:00 o'clock at Cayce High School.

Miss Ida Hagman, Field Agent in Home Management, from the University of Kentucky, trains the local leaders in the major project work this winter. At the October meetings Miss Henning, Home Dem. Agent will give a minor project on "Table Setting and Etiquette."

Exterior Decorators Are Busy

School Books Badly Needed

PEOPLE ARE ASKED TO GET BOOKS IF THEY HAVE

(By J. O. Lewis)

At the end of the first week the Fulton Schools have a total enrollment of 872, which is an increase of 49. Together with the increase in enrollment has come a added burden of trying to secure books for children whose parents are unable to purchase them. The average citizen may casually pass this matter up as of no concern to him but is he right? The state supports education institutions for the purpose of raising the level of training for all our citizens to the highest degree possible. The return of a successful democracy, however large or small, is based upon an educated citizenry. If these children, whose parents are unable to buy books for them, are allowed to grow up in ignorance, the entire citizenry of Fulton is affected. The chain is no stronger than its weakest link, therefore, this weak link is a continual menace to the happiness and well-being of Fulton, indirectly the county, the state and the nation will be affected.

The task of furnishing these books is too great for any one individual or organization to finance. There are 52 students in need of books, and the total cost would be \$140 if new books should be bought. The fiscal court will buy books up to \$50. This problem could be greatly relieved if the good people of Fulton would give to these children any of the books that were used by their children last year and which have been discarded. These books would be acceptable if in usable condition. Any one who has any of the books listed below could send them to the Chamber of Commerce or to any of the school buildings. If you have no way to send them, you could call the high school or Carr Institute, give your name and address, and the books will be called for. The cooperation of all will be highly appreciated and will help to solve a difficult problem. Below will be found a list of books that are needed:

GRADES

First Year Books
Primer, Child Story, Standard Edition, Child Story, First Reader, Standard Edition, Grade 1 Supplementary Reader, Child's Own Way, Surprise Stories, Grade 1.

Second Year Books
Child Story (Reader) Grade II My First Number Book, The Music

SOUTH FULTON SCHOOL NOTES

South Fulton school notes will be contributed to this paper by members of the eighth grade English class.

South Fulton school opened September seventh with the largest enrollment in the history of the school. Three hundred and thirty pupils have been enrolled in the elementary grades and one hundred and twenty in the high school. This is an increase of fifty-five in the elementary and twenty-four in the high school over the enrollment the first of last year.

Many new faces are to be seen among the faculty members and student body this year. We wish to welcome these new teachers and pupils into our school and community.

A football team has been organized with Mr. Ned Jonakin as coach. We did not have a team last year, so we have only four experienced players around which to build our team. Most of the boys have never played football, but they are going through some hard training and we hope to have a winning team.

The eighth grade met Monday afternoon and elected class officers for the coming year. The following officers were chosen: President, Ralph Cantrell; Vice-President, Shannon Murphy; Secretary, Almada Brown; Treasurer, Helen Jones.

Our football team went to Dyersburg Friday and played the strong Dyersburg team. The game was hard fought and though our boys were inexperienced they held their opponents to a lone touch-down. Dyersburg did their scoring the first three minutes of the game. Our boys had them well in hand the remainder of the game and had the ball within a yard of the goal when the final whistle blew. Furlong was the star for South Fulton. He made several long runs, one of which was a 40 yard run around left end.

South Fulton will go to Greenfield Friday for a game. Greenfield has a strong team, and we are expecting a hard fought game.

Mr. Priestly attended the athletic association meeting in Martin, Saturday.

Several new desks and chairs have been ordered by the board of education. These are greatly needed owing to the crowded condition of classrooms and study hall.

The South Fulton P. T. A.

has charge of the school store this year. A full line of school books and supplies are carried by the store. The profit derived from the store will be used in purchasing new materials and equipments for the school.

Brieflets

How many Fulton old-timers can remember when a rainy Sunday cut down church attendance instead of auto accidents?

The difference between an ordinary brick and a new-fangled wine brick is that a man lays the former and the latter lays the man.

Memory also carries us back to the time when the higher a man's collar was the higher his standing in the community.

Any Fulton man who is ashamed to have his neighbors see his wife washing the clothes might try buying some blinds for the windows.

Scientists say insects never cross. Then how about the political bee and the straddle-bug?

Automobiles wouldn't be so dangerous if the horse-power of the engines were in proportion to the horse-sense of the drivers.

Another thing you never heard of around Fulton in the good old days was a horse and buggy "turning turtle."

Loaning Germany more money is like giving her more chips so she can stay in the game until her luck changes.

A bumper crop did not originally mean a crop that bumps the fellow who raises it.

Many a family around Fulton that thought it was hard to get along on dad's income now feels that nothing would be easier than getting along on it if he could only get it back again.

An optimist is a fellow who believes opportunities lie in wait for him and a pessimist is one who thinks bill collectors do the same thing.

By the time the meek inherit the earth it will be in such a condition that nobody else will want it.

There are still some people left in Fulton who can remember when women covered their faces with veils instead of paint and powder.

It has been figured out that the average farmer walks 26 miles a day. And in spite of that he doesn't seem to be able to get on his feet.

The papers say a pie was recently exhibited at a fair in England the weight of which was 1200 pounds. We suppose they cut it up with a disc harrow.

The average Fulton married man knows that salesmen are not the only people who take orders.

"Why My Next Car will be A FORD"

When you buy a Ford there are two things you never have to worry about. One is reliability. The other is long life. Here's an interesting letter from a Ford owner in North Carolina:

"My Ford was purchased May 8, 1928, and has been run 121,767 miles. It has never stopped on the road for repairs of any kind whatsoever except punctures.

"The brakes were relined at 101,000 miles. My gas mileage averaged 21 miles to the gallon, and on tires, 19,000 miles per tire. I travel over all kinds of road conditions—mountainous and flat.

"I consider this a wonderful record and I assure you my next car will also be a Ford."

This is just one of many tributes to the reliability and long life of the Ford. A Ford owner in Iowa tells of driving his Ford 73,000 miles in a single year. Another writes of 120,000 miles of good service.

Think ahead when you are considering the purchase of an automobile and consider what it will be like after thousands of miles of driving. Will you still be satisfied? Will you still say "it's a great car"?

If it's a Ford, you know everything will be O. K. It will be taking you there and back in good style, just as it has always done. And you will have saved many important, worth-while dollars in cost of operation and up-keep and low yearly depreciation.

FIFTEEN BODY TYPES

\$430 to \$640

F.O.B. Detroit, plus freight and delivery. Bumpers and spare tire extra at low cost. Economical time payments through the Authorized Ford Finance Plans of the Universal Credit Company.

A Charming Family Group

This is a recent photograph of the attractive family of A. B. Chandler, Democratic candidate for Lieutenant Governor. With Mrs. Chandler in the garden of their home at Versailles are Marcella Reed, the eldest child, Mildred Watkins, the next, and Albert Benjamin, Junior.

HOMEMAKERS CLUBS

The Advisory Council of Homemakers Clubs of Fulton County met at the home of Mrs. Birdie Pewitt at Cayce Monday afternoon, Sept. 14, with seven clubs represented.

Plans were made for Annual Meeting which will be October 9. The Association voted to pro rate the \$50.00 lacking in the county appropriation from the Fiscal Court and County School Board for Agents' expenses among the clubs and take care of the \$50.00 necessary expense for office supplies, training school and Junior Club illustrative material.

A President's and Secretaries' training school was also held.

Members of the Council present were: Mrs. W. V. Little, President; Mrs. S. A. Waggoner, County Clothing Leader; Crutchfield; Mrs. Morgan Davidson, Palestine; Mrs. Jim Dawes, County Home Improvement Leader; Mrs. Dean Collier, Miss Mary Bowers, McFadden; Mrs. Birdie Pewitt, County Junior Leader; Miss Margaret Jones, Cayce; Mrs. Cleave Vaughn, Blue Pond.

PORTER COULTER PASSES AWAY AFTER BRIEF ILLNESS

Funeral services for Herschel Porter Coulter, 25 years old, son of Mr. and Mrs. H. A. Coulter, who died in the Fulton Hospital after a brief illness, was held Monday afternoon at 2:30 o'clock at the Cumberland Presbyterian church in charge of Pastor McCoy. The remains were taken to Mayfield and interred in the family burying lot.

The deceased had lived in Fulton for a number of years with his parents and was a popular young man.

Besides his parents he is survived by one brother, Wrenn, and one sister, Mrs. Clifton Linton, who have the sympathy of the entire community in their hour of bereavement.

ABOLISHING

Considerable comment has started in the newspapers of the country over the attempt being made in Cuyahoga county, Ohio, to abolish grand juries. The bar association of that county favor it, and points out that already the grand jury has been abolished in some states with good results and a saving of money to taxpayers.

Grand juries do the work the county prosecutor lays out for them. His opinions, probably more than anything else, dominate the jurors. The difference between the number of indictments returned and the number of convictions obtained shows there is a tremendous waste of time and money. There is the further objection that it gives the prosecutor too much power. The office has been used, time and again, for persecution and not prosecution. The threat of taking a case to the grand jury is terrible to timid minds, because it is easy to obtain an indictment on testimony that is all one-sided and that will not bear the light of day.

Why is it necessary to indict a person before he can be tried? If he can be brought to trial on charges preferred by an officer of the law or any reputable citizen, then there will be no need for grand juries "trying" the case before the suspected party is even placed under arrest. Fulton citizens who are eager to reduce taxes and economize on public expenditures have something to study over here. There is also the possibility that ere long they may get a chance to discuss the subject as an issue, since the movement in Ohio may spread until the abolition of grand juries becomes nationwide in its scope.

Lesson for September 27

REVIEW: THE SPREAD OF CHRISTIANITY IN ASIA

GOLDEN TEXT—And when they were come, and had gathered the church together, they rehearsed all that God had done with them, and how he had opened the door of faith unto the Gentiles.

PRIMARY TOPIC—Giving the Gospel to Asia.

JUNIOR TOPIC—The Spread of the Gospel in Asia.

INTERMEDIATE AND SENIOR TOPIC—Early Christian Triumphs.

YOUNG PEOPLE AND ADULT TOPIC—Christianity Becomes a World Religion.

The interests of the quarter are so varied, the personalities brought to view so interesting, that the grade of the class and the genius of the teacher will readily determine the method of review. Two methods are suggested for senior and adult classes. Assignment of work a week in advance is required in both cases:

1. A study of the persons actively concerned in the lessons with the object of discerning the strong and weak points in the character of each.

2. A summary of the facts and teachings of the lessons for the quarter. The following suggestions are offered for the second method:

Lesson for July 5.
The missionary program is for the gospel to be preached to the whole world, beginning at Jerusalem. The supreme obligation of the Church is to evangelize the world. This can only be done in the energy of the Holy Spirit.

Lesson for July 12.
After the Spirit came upon the disciples at Pentecost, their supreme impulse was to preach the gospel. In spite of opposition, even imprisonment and threatened death, the disciples preached Christ in the energy of the Holy Spirit.

Lesson for July 19.
The primitive Church spent much time in prayer. The Spirit of God was upon them. Therefore, they boldly testified for Christ and systematically cared for the poor and needy.

Lesson for July 26.
Christianity spread by persecution. Christ declared himself to be the way, the truth, and the life. Missionary endeavor is but the life of God expressing itself through redeemed men by the Holy Spirit. Christianity is therefore indestructible.

Lesson for August 2.
In taking the gospel to the Samaritans we see the broadening scope of the Church. The leader in this work of evangelizing is Philip, one of the seven deacons. He seems to have been the only one ever called "evangelist." If the world is ever to be evangelized, it must be done through the activities of the laity.

Lesson for August 9.
Saul was arrested in his mad effort to stamp out Christianity by the direct interference of the Lord. His conversion illustrates the transformation of the Jewish nation. One of these days the multitudes of that nation shall see Jesus Christ, their Messiah. Penitently and enthusiastically they shall proceed to complete the task for which they were ordained.

Lesson for August 16.
Gracious justification by faith is the dynamic for right living. The one thus experiencing the life of God through faith will manifest the fruit of the Spirit, living a temperate life.

Lesson for August 23.
In the conversion of Cornelius we see the missionary program widening to embrace the Gentiles. In this connection the Holy Spirit was poured out anew.

Lesson for August 30.
The sending out of Barnabas and Saul marks the beginning of foreign missions as the deliberately planned enterprise of the Church. The Holy Spirit calls and sends out missionaries.

Lesson for September 6.
When foreign missionary work began in earnest, Saul took the place of leadership, since he was called to be the apostle to the Gentiles.

Lesson for September 13.
The treatment accorded Paul in his missionary work shows the attitude of the world toward Jesus Christ. Such behavior reveals the awful need of the saving power of the gospel.

Lesson for September 20.
The speech of James at the Jerusalem council shows the outline of God's plan. It is through the preaching of the gospel to take out from the Gentiles a people for his name, which is now going on. Afterward Israel, as a nation, shall be converted, following which shall be the conversion of the whole world through the agency of converted Israel.

No Man is a Blank
"Every man is a missionary, now and forever, for good or for evil, whether he intends it or not. He may be a blot radiating his dark influence outward to the very circumference of society; or he may be a blessing, spreading benediction over the length and breadth of the world; but a blank he cannot be."—Doctor Chalmers.

Children Need Models
Children have more need of models than of critics.—Joubert.

FOR HEALTH INSURANCE

NINE days out of ten, the housewife of continental Europe serves her family with a fruit dessert. (It may be only a simple compote served with crisp cookies, or it may be nothing more elaborate than thick jam accompanied by heavy cream, but fruit in some form is almost certain to appear on her table once or twice a day. Even pretentious hotels and restaurants abroad follow this custom, and regale their guests with delicious fruit desserts. Foreign menus always include fruits.

Indeed, there is no better way of rounding out a dinner or luncheon than by the inclusion of a juicy fruit dainty. Jaded appetites respond quickly to cool, tart flavors, and fruits are important as sources of mineral elements and vitamins. Everyone, young and old, needs plenty of fruit in the summer time. It is health insurance of the best kind.

Try Something New
If your family is tired of the old standbys, try something new. There are loganberries, for instance, from the green wooded hills of the State of Washington. These purple berries have a distinct flavor of their own. Their juice makes a refreshing drink on scorching summer days. And a loganberry shortcake makes a gala occasion of any dinner.

There are fruit combinations, too, that you may never have thought of. A pear and cranberry salad is colorful and gay. Served on dainty plates with lace paper doilies, it will tempt the most capricious summer appetite. Fruit sherbets are another easy and excellent dessert for hot days. They are not hard to make, and they add a festive air to any meal.

A Shortcake and Salad

Loganberry Shortcake: Sift together two cups flour, four teaspoons baking powder, one teaspoon salt, two tablespoons sugar, and rub in six tablespoons shortening with the finger tips. Add three-fourths cup milk, stirring as little as possible. Dough should be as soft as can be handled. Turn out on a slightly floured board and pat out gently. Cut out with a biscuit cutter sixteen rounds. Brush half of them with melted butter and place the other halves on top of them. Bake in a hot oven, 450 degrees, for twelve to fifteen minutes. Split open the halves and again brush tops with butter. Cover lower halves with the slightly sweetened berries from a No. 2 can of loganberries, and place the top half on, *crust side down*. Again cover generously with berries, and top with whipped cream, if desired. This makes eight individual shortcakes.

Pear and Cranberry Salad: Remove peeling from three ripe pears, cut in halves, and scoop out the core. Place in lettuce leaves. Mash one cream cheese and three tablespoons of canned cranberry sauce, and then cream together until very smooth. Add a few grains of salt, and pipe this mixture around the edge of the pear halves. Fill the center with mayonnaise, and sprinkle with chopped preserved ginger. This recipe serves six.

Sherbet and Charlotte

Apricot and Lemon Sherbet: Dissolve one package of lemon Jello in two cups of boiling water. Add one and one-fourth cups of sugar and cool. Add one cup of cold water, and apricots from a No. 1 can, pressed through a sieve and one cup of heavy cream. Freeze. This recipe serves eight liberally.

Blueberry Charlotte: Remove crusts from eight to ten slices bread, and butter the slices well. Heat a No. 2 can of blueberries and one-fourth cup of sugar to boiling. Butter a deep dish, and then arrange alternate layers of bread and hot berries, pressing down well, until all are used up. Let stand several hours in a cold place; then turn out in a mold. Slice and serve with cream, seasoned with sugar and nutmeg, or with whipped cream. Serves six.*

Save the Liquid

WHEN you serve canned peas, do you save the liquid? We mean the peas packed in brine, of course—not the new vacuum packed peas which contain practically no liquid, and so do not present this problem. The reason we ask this question is because the Delineator Institute asked 386 of its consultant housekeepers whether they poured off the liquid in serving ordinary canned peas, and 152 of them said "yes," and only 134 said "no," and quite a number of them said "some of it," and a number of other things.

This was quite surprising because these are all wise and experienced housekeepers, and they should have known that none of the liquid should be thrown away, but all of it should be saved and used. The consultant housekeeper who answered, "Yes, but I feel guilty about it" was right. The one who answered, "Yes, but I use it in soups, etc." also had the right idea.

Contains Food Values
The reason why this liquid should not be thrown away is because, although it is largely water, it contains considerable amounts of vitamins and mineral salts extracted from the food, and, if it is thrown away, considerable food value will be lost. The way to avoid these losses is to simmer down the liquid separately until the desired amount has evaporated and then combine it with the heated peas.*

A \$2 Dinner for 6

IT'S hard work to stretch budgets these days, and even the small housewife has to do some tall thinking sometimes to make hers cover the multiple needs of the modern household. But when a grown-up housewife can serve a family of six with an appetizing dinner for two dollars, she can stick at least one feather in her cap. This menu does it, with a penny to spare.

Hot Bouillon 20¢
Assorted Cold Cuts 50¢
Pill Pickles 10¢
Potato and Bean Salad 34¢
Corn on the Cob 30¢
Egg Bread and Butter 15¢
Cherry Pie 34¢
Iced Tea 6¢

Potato and Bean Salad: Add one chopped onion and one shredded green pepper to two cups sliced, cold boiled potatoes, and marinate in part of one-third cup of French dressing, marinating one ten and one-half ounce can stringless beans in the remainder. Toss lightly together, and add one-half cup cooked dressing. Serve very cold on lettuce leaves.

Cherry Pie: Drain one can sour red cherries and pour into a pie tin, lined with pastry. Mix three tablespoons flour, one-half cup sugar and one-half cup of the cherry syrup, and pour over. Dot with one tablespoon butter. Cover with narrow strips of pastry and bake in a hot oven (425 degrees) for twenty-five minutes.*

Help our Merchants to help YOU

EVERYBODY will agree that a man succeeds and prospers only when he spends LESS money than he receives in a given period of time.

Let's apply this great economic test to the situation in this town: Our business men have invested—and continue to invest—their money in stocks of goods brought here to your very door to meet your daily needs.

Through the pages of this paper they advise you of their ability to serve this community. All of us know that they deserve our patronage. And remember, the more you trade with them the more funds they can invest in larger stocks and new lines.

PREHISTORIC BONES OFTEN FOUND HERE

United States Fertile Field for Paleontologists.

Washington.—The discovery in Texas of the fossilized remains of a giant prehistoric, a crocodile-like creature which lived more than 50,000,000 years ago, emphasizes the fact that the United States is still a fertile field for paleontologists seeking the fossils of prehistoric animals. Traces of many species of these monsters have been found from time to time.

Among the number of tracks found, the dinosaur, or "terrible reptile," seems to have been the most common in all parts of the country. Beside the Connecticut river near Northampton are preserved dinosaur tracks said to be the most perfect ever found. Nearer New York, at Woodbridge, N. J., dinosaur tracks were discovered last year measuring 20 inches across the toes. They are thought to date back to the cretaceous period of the Mesozoic age.

Haunts of the Dinosaur.

The haunts of the dinosaur in New Jersey were first discovered, however, in 1858, and a mounted skeleton is in the State museum at Trenton.

In the western states and in the Canadian province of Alberta dinosaur bones have been most frequently found and most easily excavated. Some huge tracks, 38 inches long, have been discovered in Colorado; and in Dinosaur canyon, near Flagstaff, Ariz., 300 tracks were found by one expedition. One of the largest skeletons of this beast was found in Utah in 1923—the diplodocus of the species. This specimen was 71 feet long and the pieces discovered weighed about 52,000 pounds. This creature is supposed to have lived 170,000,000 years ago.

Mastodons, it is believed, were abundant here about 25,000 years ago, whereas this animal was thought to have become extinct in Europe 1,000 centuries back. Mastodon teeth 7 inches long have been discovered in the ocean off the New Jersey coast; and the vicinity of Niagara falls has furnished a fertile field for such discoveries.

Huge Thunder Lizard.

Near Medicine Bluff, Wyo., was found the skeleton of one of the largest of the prehistoric reptiles, the brontosaurus, or thunder lizard, now in the Peabody museum at New Haven. When alive, its weight is estimated to have been about 40 tons, and it lived about 120,000,000 years ago. The jaw of a titanothere, to which family belong the modern horse, tapir and rhinoceros, was found in the White River Bad Lands of South Dakota in 1846.

Border Smuggling Cut by Help of Mexicans

Juarez, Mexico.—Smuggling operations along the Juarez-El Paso section of the Rio Grande have been cut in half since the Mexican government ordered armed patrols along the boundary. Gen. Miguel S. Gonzalez, Juarez garrison commander, declared: "While we never will be able to stamp out smuggling, we have cut activities to a minimum," General Gonzalez said.

"Our greatest trouble is in airplane smuggling. We are not yet equipped to cope with it and, as planes allow night operations at inland towns or secluded spots, we are in a difficult position."

General Gonzalez said that a large amount of merchandise being smuggled into Mexico from the United States also has been seized by his men as well as a large quantity of liquor being taken into the United States from Mexico.

Ancient Cuban Letters to Be Placed in Case

Havana, Cuba.—Valuable documents written by General Albemarle, who led the English invasion of Cuba against the Spaniards in 1762, are to be placed on display under glass in the ancient city hall of Havana. It has been announced by Mayor Tirso Mesa of Havana.

Some of the most historically valuable documents in the archives of Havana, they were written on parchment and are in a fine state of preservation. They include military orders and decrees and a number of personal letters.

Excavation Reveals Roman Jig-Saw Puzzle

London.—Excavations beneath the new building of the Royal Bank of Canada in Lothbury, E. C., have resulted in the discovery of a 1,800-year-old jig-saw puzzle in Roman pavement.

Many pieces of the old puzzle are missing, but there has emerged a picture of the substantial house of some Roman citizen.

Archaeologists are now studying the jig-saw puzzle and other remains of tessellated paving found in the area.

Work on New Cruiser Gives 1,800 Men Jobs

Philadelphia, Pa.—When the keel of the new treaty cruiser Minneapolis was laid down at the League Island navy yard here recently, it meant that 1,800 additional workmen would be employed by the Navy department. It will take two and one-half years to build the boat, according to officials of the navy yard.

LIGHTS of NEW YORK

The elevated trains in New York run past some flats which have fire escapes on the front of the buildings. The platforms of these iron stairways form little terraces for the inhabitants. On one of them, north of Fifty-third street, stands an ordinary bushel basket filled with earth. Growing there is one tall sunflower and two stalks of corn. Every time I see it I wonder if those people originally came from Kansas.

What might be termed kitchen gardens are plentiful in the city. I saw in one place a lovely hanging vine. Some one had put a sweet potato in a glass jar, which was suspended by a piece of wire. The jar was partially filled with water and the potato vine had overgrown the top and hung in long streamers. It was as pretty as many of the more expensive plants carried by florists.

I suppose many of us have, at some time or other, planted orange, lemon or grapefruit seeds. They spring up into a tiny forest of miniature trees. They tell me that one can raise tomato vines, but that in this case the seeds must be dried first, just as seed corn is dried. Those who come to the city from far away farms often raise green things in a little box on a window-sill. It reminds them of home.

Recently I learned something in this connection I never knew before. They tell me that, if you wet a sponge and sprinkle it with bird seed, you will soon find it covered with a fine, green grass. I never had any idea that bird seed would sprout. Some day I'm going to try it.

I know one owner of a penthouse who actually has some good sized trees growing in deep tubs on his terrace. He dug them up himself on a trip to the mountains. Another terrace has a framework, which supports clematis vines. The owner told me he was going to try honeysuckle, but didn't know how well it would do in this climate. Personally, I should like a canteloupe or watermelon vine.

One trouble about my planting any seeds is that there are some pigeons from a roof down the street which pay me fairly regular visits. I found one of them recently investigating a box of earth on the porch. My wife had intended to plant something in it, but had not yet done so. The joke was on the pigeon.

I know a man who took a small place in Westchester for the summer while his wife and children went on a European trip. He was delighted to see a green vine growing by the wall of the little garage and put up some strings to help it climb. When his family returned the vine had done splendidly. The children discovered what it was. It was poison ivy.

A butcher on Park avenue slapped a cigarette out of a woman's mouth and a judge later slapped a twenty-five-dollar fine on the butcher. After this, as far as the butcher is concerned, ladies may smoke.

Texas Caves and Bluffs Give Up Indian Relics

Del Rio, Texas.—The caves and bluffs of the rugged Pecos and Devil's river country near here have yielded relics which archeologists believe will do much in furnishing valuable data about the early Indian inhabitants.

Miss Emma Futzietz, principal of the Mark Twain high school and director of the Witte Memorial museum, San Antonio, headed a small expedition which found a collection of skulls, bones, primitive knives, and other Indian relics.

Miss Vivian Carson copied many paintings, in as near the original colors as possible, which were found on the rock walls of the caves and bluffs.

Survey Shows Cost of Living Has Dropped

Washington.—The cost of living has dropped 6.5 per cent since last December, it was revealed in a Labor department survey completed in 51 cities. The survey included food, clothing, rent, fuel, light and house furnishings. Food showed the biggest decline of all the items. It was down 12.81 in the first six months of this year. Rents are down 3.1 per cent and clothing is down 4.6 per cent.

Tiny Mummy Found

Vernal, Utah.—A strange discovery, the mummy of a mature person only 32 inches in height, was made in Ruin canyon recently by Lee Snyder and E. S. Noe.

Alone for 26 Years, Wife Gives Up Hope

Seattle.—The insurance of a man who has been missing 26 years was sought by Mrs. Margaret M. Oils, wife of Lieut. Frank I. Oils, missing since he left New York for San Francisco in 1905.

Mrs. Oils believes her husband is dead and seeks his \$5,000 insurance, with interest.

**CHILDREN
CRY FOR IT—**

CHILDREN hate to take medicine as a rule, but every child loves the taste of Castoria. And this pure vegetable preparation is just as good as it tastes; just as bland and just as harmless as the recipe reads.

When Baby's cry warns of colic, a few drops of Castoria has him soothed, asleep again in a jiffy. Nothing is more valuable in diarrhea. When coated tongue or bad breath tell of constipation, invoke its gentle aid to cleanse and regulate a child's bowels. In colds or children's diseases, you should use it to keep the system from clogging.

Castoria is sold in every drugstore; the genuine always bears Chas. H. Fletcher's signature.

**Fletcher's
CASTORIA**

Better Breakfasts

WE are never so national as when we are eating. That's why the American demands the substantial breakfast to which he is accustomed whether he is in Hong Kong, Tierra del Fuego, Venice or Paris. Many of us always eat the same breakfast from force of habit, but better breakfasts mean variety. Here's one with fruit and honey, a hot bread and a juicy ham omelet which will start even the drowsiest of summer days off right:

**Iced Watermelon
Ham Omelet
Toasted English Muffins
Honey in the Comb
Hot Beverage**

Ham Omelet: Beat four eggs thoroughly, add four tablespoons cold water, one-half teaspoon salt, and a few grains of pepper. Melt two tablespoons butter in a large flat heavy skillet, covering every bit of the surface. When foaming, pour in the egg mixture, which should not be very deep. Cook gently, lifting edges with a spatula to let the liquid on top run underneath until all is cooked. Don't overcook. Mash a 2½-ounce can of deviled ham with two tablespoons cream, heat and spread over the omelet. Then, beginning at one side, roll it up, using a spatula, and off onto a hot platter. This serves three. For six, make two omelets separately.

AIR MAIL SPREADS IN SOUTH AMERICA

Sao Paulo, Coffee Center, Now Gets Service.

Washington.—Sao Paulo, capital and business metropolis of Sao Paulo state, Brazil, is one of the latest cities to be enmeshed by the network of air mail routes which are spreading over the South American republics. The trip from Rio de Janeiro to Sao Paulo takes 1 1/2 hours by rail. The air mail schedule calls for a three-hour trip between the two cities.

"Sao Paulo is one of the oldest cities in South America," says a bulletin from the National Geographic society, "but its age has not deprived it of modern commercial development. Boom Started in 1875.

"Fifty years before the Capt. John Smith-Pocahontas episode at Jamestown, Va., a Portuguese sailor founded Sao Paulo and married the daughter of a native Indian chief. Later Jesuit missionaries established a church at the settlement and held the first religious service on the feast day in celebration of the conversion of St. Paul. Hence the name of the city, Sao Paulo, which means St. Paul.

"For three centuries Sao Paulo enjoyed isolation, unfettered by colonial laws of Portugal. It was about 1,000 miles from the Portuguese government officials who were, at that time, at Bahia. In 1875 the ball of commercial progress started rolling among the inhabitants, and newcomers were instilled with a boom spirit. In slightly more than 50 years the city has increased in population from 25,000 to more than half a million. New streets that were built were made broad and straight and flanked with modern buildings.

"The railway depot, municipal and state government buildings, museums, libraries, schools, and some of its new business buildings would be flattering additions to many cities of the world of the same size. Three huge public gardens and more than 50 parks break the monotony of the miles of streets.

City That Coffee Built.

"Sao Paulo might properly be called the city that coffee built. Many of the palatial residences are those of coffee barons. In Sao Paulo streets huge trucks, heavy carts, and perspiring men laden with sacks of coffee are always within eyeshot. Coffee was not introduced into Brazil until two centuries ago, but the price of coffee now largely governs the rise and fall of Sao Paulo's prosperity. While Ethiopia is the original home of coffee, Sao Paulo state has adopted the greater portion of the descendants of the original coffee. If all the coffee plantations state were in one plantation, it would cover an area as large as Delaware and Rhode Island combined. In a single year more than one and a quarter million pounds of coffee are produced in the state. There are more than seven coffee trees for every man, woman and child in the state."

To Broadcast Weather Reports for Vessels

New Orleans.—Weather forecast reports for ships in the gulf, Caribbean and other southern waters are to be broadcast from New Orleans the year round, it was announced. Heretofore this service was maintained only during the so-called hurricane season, from June 1 to November 30.

Selected ships of all nations on southern ship lanes will radio conditions in their vicinity to Washington, where the weather forecasts will be compiled and transmitted to New Orleans to be broadcast over a powerful radio station here.

Memory of Hubbard Is Kept Alive by Tree

East Aurora, N. Y.—An apple tree here is keeping alive the memory of Elbert Hubbard, philosopher and lover of man, lost in the Lusitania disaster.

Charles J. Rosen, official of the Roycroft shops, and Elbert Hubbard III dedicated the tree at simple ceremonies here recently.

"Elbert Hubbard symbolized life," Rosen said, "and that is why we chose a tree instead of a building to dedicate to his memory.

"We thank God who made this tree, for Elbert Hubbard."

Ohio Bluejays Declare War on Pedestrians

Norwalk, Ohio.—Bluejays have declared war on Norwalk.

Persons walking through a clump of trees at a street intersection have heard the warning scream of half a dozen of the birds and been driven at a run from the scene. Arthur Pearl, J. E. Osborn and Paul Clark suffered severe facial scratches from the beaks and claws of the jays.

Officials attributed the attacks to annoyances suffered by the birds from boys violating their nests and molesting their eggs and young.

Cows Recognize Calves; Man Arrested as Thief

Harper, Ore.—Four calves pastured in R. Faust's yard. Faust denied he had stolen them. So four cows belonging to Virgil Smith were driven up. The calves seemed glad to see them. The cows gave every evidence of fondness for the calves. So Faust was accused of larceny.

Current Wit and Humor

JUST THE MAN

The man was in the hospital after his first serious attempt to knock a train off the tracks.

"I fear I can be of very little assistance to you," he was comfortably assured by the doctor. "I'm a veterinary surgeon."

"Ah!" exclaimed the victim, "you're just the man for my case. I was a jackass for ever attempting to cross the track ahead of that train."

Partially Equipped

"That haughty young man must be one of our millionaires," said the inquisitive stranger.

"No," answered Miss Cayenne. "He has all the airs, but none of the millions."—Washington Star.

An Indorsement

"Do you regard the political future of this country as secure?"

"Yes," answered Senator Sorghum. "I have thought the matter over once and I still consider politics an entirely safe investment."—Washington Star.

False Alarm

"Would you still love me if I told you I'd sold my car?"

"You haven't, have you?"

"No."

"Of course I'd still love you, darling!"

HOW SHE WOULD DRESS

"I ought to dress according to book, I think."

"—Yes, dress according to book, my dear."

On Exhibition

A horse show's what they call it. Observant people know that in reality it is a human being show.

The Test

"What's the difference between dancing and marching?" asked the girl of her clumsy partner.

"I don't know," he replied.

"I thought so," she said. "Shall we sit down?"

Tough Luck

Slunks—Lamb are so scarce this year those Wall Street wolves must be going round with a lean and hungry look.

Jinks—They now can sympathize with the moths who have had to feed on the modern bathing suits.

Accommodating

Mistress—My husband writes his engagements on his shirt cuff. I hope you don't mind.

Laundry Maid—O, no, ma'am. I loves a bit of scandal.

POACHED EGGS DEFINED

Mrs. Newlywed—What are poached eggs?

Mr. Newlywed—Ones that are stolen, I guess.

Of Course Not

"I'm going to make a parachute jump from 10,000 feet tomorrow."

"What if the parachute doesn't open?"

"Oh, that won't stop me."

Lost Is Right

Mistress (Interviewing cook)—Supposing I wanted you to cook an elaborate dinner for about 15 people—would you be lost?

Cook—That's just 'ow the last folks lost me.—Humorist.

As to Size, Yes

"Junior, you really must not eat so much candy! Don't you want to grow up to be a big man like your daddy?"

"I wanna grow up to be a big man, all right."

NOW Is the time

LOW BIRTH RATE ALARMS BRITAIN

Only Sweden Has Fewer Infants Per Capita.

London.—Great Britain now has the lowest but one birth rate of any country in the world—the sole exception is Sweden—and economists are somewhat alarmed over the possibilities this forecasts.

The census, taken throughout Great Britain, reveals that there has been an almost unbroken fall in the birth rate during the last ten years. It has been reduced to the level of 16.3 per thousand population, which is more than half less than in 1890 and only about two-thirds of that recorded in prewar years.

S. P. Vivian, the registrar-general, in his report warns: "Though further slight increments in the total population may be expected during the next two decades owing to a rapidly expiring but not quite exhausted momentum imparted by the higher birth rates of the past, there can be no doubt that, failing a considerable rise above the present birth-rate figure—of which there is no sign at present—the population maximum will then be reached and will be followed in its turn by a small but increasing decline."

Vivian adds that at its present rate the birth rate is insufficient to retain a stationary population in the future.

The report points out that in spite of the fact that marriage rates have been well maintained, particularly at the younger ages at which the bulk of births occur, and of the further fact that the exceptional postwar spurt in the birth rate itself had passed its maximum at the beginning of the last period of ten years, the total births registered between 1921-1931 are more than a million and a quarter fewer than they were in the preceding period—a period which covered the war years, when the birth rate sank to levels never before recorded in this country.

The births were between 2,000,000 and 2,500,000 fewer than those of the last completely normal ten years, from 1901 to 1911.

Daguerreotype Is Only

Picture of Betsy Ross

Evansville, Ind.—A dim daguerreotype, believed to be the only existing original likeness of Betsy Ross, maker of the first American flag, is owned by Capt. John Veatch, who lives here. The Veatch family claims to be directly descended from Betsy Ross.

Veatch explained that the daguerreotype, about 100 years old, was made by D. A. Ross, a relative who lived in Cincinnati, while Betsy was near there. It was first in the possession of Abigail.

She, with her husband, lived on a farm near Mount Vernon, Ind., a quarter to Evansville. When she died the relic passed to her daughter and then to its present owner.

Miss Charlotte Veatch, Captain Veatch's youngest daughter, expects to fall heir to the daguerreotype.

Majestic Swans Again

Nesting in Yellowstone

Yellowstone Park.—The appearance of eight pairs of trumpeter swans was reported in Yellowstone National park during the month of May, which is their nesting period. Conservationists hail this as good news, for these majestic birds are one of the species which are facing extinction under changing conditions, and the Yellowstone is one of the points where it is hoped to check the apparently ebbing tide.

Unless the few remaining trumpeter swans in existence can nest and rear their young safely, the species will soon join the dodo and the passenger pigeon.

Ex-Slave, Declared Dead

at 5, Is Nearing 100

Staunton, Va.—"Aunt Annie" Johnson, former slave, who, when a child and following a serious illness, was given up for dead and placed in a coffin for burial, is nearing her one hundredth birthday anniversary at her home at nearby Waynesboro.

Pronounced dead at the age of five years, a member of her family noticed her body move as she lay in her coffin and she was nursed back to health.

The ancient colored woman, who will pass the century mark December 1, is still active and a familiar figure about the streets of Waynesboro.

Negroes Mail Carrier

Marietta, Ohio.—Helen Gibson is believed to be the only negro woman mail carrier in the government service. She was awarded the contract for a star mail route between Marietta and Cutler, Ohio, after Post Office department officials found her bondsman satisfactory.

"Baby Girl" Is a Nun

When Letter Arrives

Augusta, Maine.—Mrs. John LaFlamme recently received a letter from her sister, Mrs. Fred Pooler of Fairfield, 22 miles from here. The letter announced the birth of a daughter. Investigation revealed that the letter was mailed 20 years ago.

The "baby girl" is now a nun in the Jackman convent.

Peachy Desserts

"PEACHES for supper!" How the youngsters do shout when they get a whiff of that delicious odor from the kitchen. Even father pricks up his ears, and begins to think reminiscently of the days on the farm. And they are right, for there's nothing quite so good as a dessert of rich juicy peaches. You'll find it easy to make, too, for it's just a matter of minutes to open a can of luscious California peaches and whisk up an epicurean dessert.

Peach Topsy-Turvy Cake: Beat two egg yolks, add one cup sugar, and cream well. Sift together one cup flour, one-fourth teaspoon salt, one teaspoon baking powder. Add the sifted dry ingredients alternately with one-half cup pineapple syrup. Fold in well-beaten whites of two eggs.

Arrange a No. 1 can of well-drained sliced peaches and one-fourth cup chopped dates in bottom of greased cake pan. Pour batter over, and bake for thirty minutes. Turn upside down, and serve with whipped cream. This cake may be served hot or cold. The recipe serves eight.

This Is Heavenly

Peach Celestial: Scald four cups of milk, reserving one-half cup to mix with eight tablespoons of cornstarch, one-half cup sugar, and one-fourth teaspoon salt. Add and stir until thick and creamy. Cover and cook twenty minutes. Add one teaspoon lemon flavoring, one teaspoon orange flavoring, and pour out onto a flat serving dish. Cover top with halves of peaches and chill. Sprinkle with coconut over entire top. In serving, take up a peach with each serving. This recipe serves eight.

In Case of Emergency

When you want a thing in a hurry you rush to a local store and get it. But do you realize that the existence of our stores depends upon continued business.

If every person in this community were to use the stores only for emergencies there would soon be no more places to satisfy those urgent needs.

The Best Buying Policy

You should do your part towards keeping local business alive and in a constant state of betterment by doing *all* your trading at home. It will be profitable to you as well as to the entire community.

Cherries Always Ripe

CHERRIES every day in the year!—that's what modern canning methods have done for us. Real old-fashioned sour cherries, pitted and ready to make a juicy pie or a cobbler, are on hand now whenever we want them. There's no more regretting the shortness of the cherry season. Cherries are always ripe. And the wise housewife of today keeps several cans on her shelves so that she can concoct a delicious cherry dessert at a moment's notice. In this way she will always be ready for unexpected guests who relish unexpected desserts. Try one of these recipes for tonight's dinner.

Cold and Sweet

Cherry and Banana Sponge: Soak one tablespoon gelatin in two tablespoons cold water. Heat to boiling the syrup from a No. 2

can red pitted cherries and enough water to make one cup liquid. Add four tablespoons sugar, and pour over gelatin. When dissolved, cool. When beginning to set, add the cherries and the diced bananas. Serve cold, topped with whipped cream. This recipe serves eight.

Cherry Ice: Press three-fourths of the cherries and the juice from a No. 2 can of red pitted cherries through a sieve. Boil three-fourths cup sugar, one and one-half cups water, three tablespoons of corn syrup until it threads, then pour slowly over one stiffly beaten egg white. Add three tablespoons lemon juice and two tablespoons maraschino cherry juice, and the mashed cherries. Freeze as any ice-cream. This recipe serves from eight to ten.

MEASURE STRENGTH OF MAN IN TESTS

Public Health Service Puts 500 Through Paces.

Washington.—How strong is a man? The answer has just been made by the United States public health service through a series of tests given to 500 men. Generally, heavily built men were found to be stronger than slender men of the same weight.

The tests were made to ascertain the pulling, pushing, handgripping, lifting and lung power of men between the ages of twenty and thirty-four, between the weight of 120 and 160 pounds, and between the heights of 63 and 70 inches.

The greatest pulling power was demonstrated by men in the heaviest weight class, between 150 and 160 pounds. Men in the two heaviest classes, 150 to 159 and 160 to 169 pounds, tied as the most powerful pushers. In each of these weight groups the taller men proved to be the best pushers, with a force of 121 pounds, the record figure.

In the handgripping contest the tallest and heaviest men gave the most powerful hand grips, with a force of 108.48 pounds. But the shortest men in the heaviest group were the most powerful lifters, lifting on an average 510.2 pounds.

The men having the greatest lung power were found among the shortest in the 150-159 pound class. Their lung force was measured at 154 milliliters.

So far as general strength went, it was found that the taller men were for their weight the less strength they had on the average, and the shorter they were for their weight the stronger they were. This rule applied through practically all weight groups.

As a rule heavy men were found to be stronger than men of a lighter weight. Men in the 63-64 inch class were found to be the strongest in the 120-129 pound class, as they were in the next weight class, 130-139 pounds, and also in the 140-149 pound class. However, the tallest men in the 150-159 pound class proved to be an exception to the general rule, for they were found to be the strongest. But the general rule held again in the heaviest class, 160-169 pounds, where the shortest men were the strongest.

Chinese Population Is Placed at 474,787,000

Peking, China.—The latest census of China, compiled by the ministry of the interior, shows the population to be 474,787,000. This is 15,000,000 less than the post office estimates of 1925.

Due to disorders in some of China at present, the estimate is considered approximate. Dr. Warren S. Thompson, head of the Scripps Foundation for Study of Population Problems, who recently completed a year in China, declared that it is possible to say only that the population of China is somewhere between 250,000,000 and 500,000,000.

Army Survey May Start Vast Irrigation Project

Farmington, N. M.—The San Juan valley in the Farmington section may become a vast area of irrigation farms if a survey now being made by army engineers proves the feasibility of a great reclamation project.

An area of about 2,000 acres would benefit from the project and lands now in the public domain in San Juan county would be thrown open to new settlers.

Army engineers under Maj. W. H. Langan are making the survey to determine the wisdom of the reclamation project on the San Juan river. A dam constructed 30 miles east of Farmington may provide irrigation water for 500,000 acres.

It Costs \$2,187.75 to Prepare Child on Coast

Los Angeles.—It costs taxpayers approximately \$2,187.75 to give a boy or girl 15 years of schooling in Los Angeles city and county and equip the student for matriculation in a college or university, according to Archie M. Clifton, county superintendent of schools. He said he arrived at the estimate by dividing the average per capita cost in all branches of the city and county school system and multiplying it by 15.

Child, 5, Hypnotizes Self

Fredericktown, Ohio.—Doctors attending Clarence Fletcher, five, injured while playing, declare he possesses the rare power of self-hypnosis. The lad is able to induce upon himself an insensible sleep so deep that physicians are able to give him delicate treatment without aid of an anesthetic.

Item in Newspaper Reunites Brothers

Clyde, N. Y.—An Erie (Pa.) newspaper which mentioned the name of Edward Damm of Erie brought about the reunion of Edward and his brother, Joseph of Clyde, who had not seen each other for 34 years.

A relative noticed the name and notified Joseph. The brothers were separated when Edward decided to "see the world."

Scientific Cleaning!

Clothing to be properly cleaned and cared for should be subjected to the most advanced scientific treatment.

In our plant we have the most modern equipment and facilities for Cleaning any garment or fabric.

We are building our reputation on our work, and pride ourselves on our service. Our customers are increasing in number as a consequence.

We are better prepared than ever to render the best of service

We invite your personal inspection of our plant at any time.

Fruit Insurance

YOU can refuse to see the man who calls unheeded and unsung and offers you a peerless accident and health policy, but your doctor will tell you that there is one kind of insurance it is neither wise nor prudent to ignore at any season of the year. That is the insurance of contented good health that comes from a proper proportion of fruit in the diet. Fortunately, many fresh fruits are available at this season, and there is also one fruit that combines excellently not only with other fruits in cocktails and salads, but with meats and sauces in hot dishes, and that is available at any season. This fruit is the luscious pineapple which is picked and clipped into a can at the very moment of its prime ripeness in the many fields of Hawaii and reaches you in the same peerless (we knew we'd use that word again) condition.

An Infinite Variety

It offers you an infinite variety of ways to vary your menu at little expense during the hot summer months when appetites are lagging and finicky, and here are some of the very latest of them:

Carrot Salad: Prepare a package of lemon flavored gelatin according to directions but use pineapple syrup from the can for part of the liquid. When the gelatin begins to set, add one and one-half cups grated, raw

carrots, one medium-sized can of crushed pineapple and one-fourth cup minced green pepper. In the bottom of each individual mold place a slice of sweet tomato pickle. Pour the gelatin in the molds and place in cold place. Unmold and serve with boiled dressing and minced green pepper and parsley.

Sardine Canopy: Slice bread one-fourth inch thick and cut in rounds the size of a slice of pineapple. Toast the bread and butter it lightly. Dip slices of pineapple in flour and fry to a golden brown. Place on the toast. Spread with a mixture made by adding four chopped sour pickles and mayonnaise to two cans of boned and mashed sardines. Top with mayonnaise.

Dainty Desserts

Pineapple Betty: Mix one and one-half cups drained crushed Hawaiian pineapple, one cup soft bread crumbs, three tablespoons brown sugar and one-fourth teaspoon cinnamon. Put in a greased baking dish and over it pour one-half cup of the syrup drained from the pineapple. Dot the top with pieces of butter, using one tablespoon in all. Bake in a moderate oven until brown, and serve hot or cold with a pudding sauce or whipped cream.

Pineapple Ice Cream: Dissolve five cups sugar in one quart of milk, add one quart of cream, juice of two

lemons and three oranges, and one can of crushed pineapple. Freeze slowly, and, when of mushy consistency, add five egg whites beaten until stiff. Freeze until firm.

Pineapple Sardine Sauce: Mix one cup each of crushed pineapple, sugar, and water. Boil fifteen minutes, chill and serve on ice cream. This sauce is also good on cake or puddings.

A Salad and Souffle

Frozen Fruit Salad: Peel and dice four oranges and pour over four sliced bananas and the juice of one lemon. Add contents of a can of white cherries and a can of pineapple. Sweeten to taste and fold in one cup mayonnaise and one cup whipped cream. Freeze in molds for four hours. Unpack, slice and serve on lettuce.

Pineapple Souffle: Soak one and one-half tablespoons gelatin in cold water. Add the grated rind and juice of one lemon, one-half cup sugar and one-eighth teaspoon salt to three beaten egg yolks. Cook in double boiler until mixture thickens, stirring constantly. Remove from the heat, add gelatin and stir until dissolved. Add two-thirds cup of crushed pineapple and set in a cold place until mixture begins to stiffen. Fold in one-half cup cream, whipped, and three stiffly beaten egg whites. Pour into a mold and set in a cold place until firm.

ALL WILL BE WELL

Drought is a terrible thing while it lasts. But the rest seems to do the soil good, and when the drought finally ends all vegetation takes on new life and grows with unusual vigor. This has been shown in regions that were affected in 1930. Fulton people realize now that things never grew better, nor faster, than during the past spring and summer. It is true that the water supply throughout the country is still below normal, in spite of the fact that rains have been abundant during the entire year. But it takes a long time for the deep, underground sources to be replenished. If it isn't one thing it's another these days. Droughts, stock crashes, bank failures and low prices for farm products come in a bunch. But the country came back after the drought, and it's coming back now in the face of other drawbacks. Why isn't it reasonable to believe that, as crops did following the drought business, too, will be bigger and better when the clouds have rolled away?

REACHING THE LIMIT

The auto has been a very patient and much over-loaded tax bearer. And because it is so patient, undue advantage is being taken of it. Pretty soon one Alabama county will vote on a proposal to levy a county tax of one cent a gallon on gasoline; the revenue to go into the general school fund, instead of for roads. Already, it must be remembered, Alabama has a gas tax, the same as all other states. On top of this, there is already talk of a federal tax on gas. Now if counties are going to step in and add still another burden, where are the car-owners of the country going to get off? Every Fulton motorist will learn of this latest taxation stunt with alarm, for there is danger of it spreading, maybe into every county in the land. In view of the heavy burden the auto is now carrying, any additional tax would just about prove the straw that broke the auto-owner's back. It seems that the limit has been reached and that the time to call a halt is here.

**Gold Horseshoes**

Expense is not efficiency. Don't pay for gold horseshoes when you buy your printing. Sensible printing on sensible paper—Hammermill Bond—will save you money and get results for you.

That is the kind of work we do and the kind of paper we use.

JUST LIKE HOME FOOD

Smith's Cafe is in reality a home-like restaurant because it has been trying to overcome the prevalent idea that restaurants can't serve food like you get at home.

Scores of patrons will testify that there is no difference between our meals and the meals they get at home. That's the reason they eat here so regularly.

Years spent in catering to the appetites of particular people make it possible for us to serve wholesome, tasty meals. The next time you feel like eating away from home, bring your family here.

PRETTY NURSE WEDS RICH WOMAN-HATER**Romance Buds in Hospital After an Operation.**

Atlanta, Ga.—An unusual June-De romance that flowered in the stillness and somberness of a hospital ward culminated here in wedding bells for a pretty young nurse and a wealthy bachelor.

The principals are Miss Lane and F. M. Barberi, an official of the Southern railway.

The marriage, performed by the Georgia Baptist hospital chaplain a few hours after Miss Lane received her diploma as a graduate nurse, came as a surprise. The couple kept their engagement secret until Miss Lane could get her diploma.

Once Woman-Hater

Barberi was a woman-hater of wide reputation. Despite his good looks and wealth, he had escaped designing mothers with marriageable daughters for so long that his friends had given up hope that he would ever marry.

In fact, he had told them on innumerable occasions that he would never wed, which statements were received with considerable dismay in the debutante ranks.

"Get Barberi," became a slogan with the more forward of the debutantes and their mothers, but never a proposal did any of them get.

Then Barberi was stricken suddenly with appendicitis. He was rushed to George Baptist hospital and put under the knife. One of the nurses helping the surgeon was Miss Lane.

The pretty young nurse was instantly attracted to the patient. She was by his side when he came out from under the anesthetic. She obtained permission to work her shift in the section of the hospital in which his room was located.

Patience Wins Him

Perhaps Barberi did not pay especial attention to the pretty dark-haired nurse at first, but later her kindness and patience won him.

The woman-hater began to sit up and take notice. And he also did a little thinking.

Then one day he said: "I didn't think I needed anyone to take care of me. I thought the old saying about a woman's loving hands was money. I was mistaken. Let's get married."

Miss Lane was willing. If she could get her diploma first, so they waited until a month after Barberi was well and out of the hospital.

Now the wealthy "woman-hater" and his wife are keeping house, surrounded by the scenes of domesticity he once scorned.

He is forty and she is twenty.

Boy Problems As Cause for Two-Seater

Washington.—The younger generation's interest in aviation is not witting the least bit, according to information at the War department from Kelly field, Texas.

A thirteen-year-old youngster of Buffalo, N. Y.—his name was not disclosed—wrote recently to officers at the army's Texas air base protesting against reports he had heard that the army was planning to use two-seater planes.

"Well," the boy wrote, "I vote no." He outlined his reasons, as follows: "When the machine gunner sees an enemy airplane coming, he signals the pilot to get on the tail of the other ship, as they usually do. What if the pilot does not get there in time and while trying to get there he gets shot in the attempt. I think that you should have one-seater pursuit planes."

The youngster revealed to Kelly field officers that he plans to come down there soon and learn more about this dying business.

Heat Drives Woman of 105 to Bob Her Hair

New Lexington, Ohio.—Mrs. Susan Palmer Kennedy strode into a barber shop here, removed a neat hat and climbed into a chair.

"Just bob it," she said, waving her hand in a sweeping gesture around her wealth of white hair. "It just is a nuisance in this hot weather."

The barber gave Mrs. Kennedy the latest style of bob, cutting the hair with a special care in deference to the age of his customer.

Mrs. Kennedy is one hundred and five years old.

Bread From Seaweed Is Popular on West Coast

Obat, Calif.—There's something new under the sun all the time—if an old proverb may be contradicted.

For this describes the baking and selling of bread made of kelp, better known as "seaweed," which started in this town, located only a short distance from the Pacific ocean.

William Baker specializes in producing this bread and says there is quite a demand for it. "The kelp gives the bread a peculiar flavor," he said.

Smoker Starts Big Fire in Pennsylvania Forest

Harrisburg, Pa.—Realizing that smoking was a dangerous practice while cleaning the brush in a wood lot, a Cambria county farmer placed his pipe in the pocket of his coat. Unfortunately the pipe was not extinguished and burned through the coat, fell to the ground and started a forest fire that destroyed five acres of timberland.

Willinoham Bridge

Miss Lettie Clement filled her regular appointment at Union Sunday and as usual preached a god sermon. We always enjoy her sermons. The Woman's Missionary Society had their W. B. M. day program Sunday afternoon. It was enjoyed very much by all present.

W. P. Burnett went to Murray Monday to enter school.

Mrs. J. C. Lawson, Jr., and children, of Jackson, Tenn., visited Mrs. J. C. Lawson, Sr., and family, Sunday.

Mr. Willie Stallins of Memphis, visited Tom Stallins and family, Sunday.

Mr. and Mrs. J. C. Sugg, Jr., visited Mr. and Mrs. J. C. Sugg, Sr., Sunday.

Miss Laverne Burnett began teaching school with Miss Ruth Donoho at Palestine, Monday.

Mr. and Mrs. Willie Jeffress spent Sunday with Mr. and Mrs. Harry Sams. Harry has been very sick of typhoid fever but is improving at this time.

Miss Lettie Clement ate dinner with Mr. and Mrs. Elbert Bondurant and family, Sunday.

Mr. Jimmie Lawson finished filling his silo last week. He has a good herd of cattle which he intends to feed from it this winter. Cecil Burnett bought two milk cows from Jimmie this week.

Mr. and Mrs. Coston Sams visited Mr. and Mrs. Burnie Stallins, Sunday night.

Mrs. Joe Bedford and children spent Sunday afternoon with Mrs. Cornelia Jeffress.

Mrs. Tom Stallins spent Friday with Mrs. Charlie Stallins in Fulton.

The roads are being graded in our community. We are pleased to see them being put in good shape for winter.

Aubrey Bondurant is improving his place. He has graded and leveled his front and will soon repair his home.

McFadden News

Mr. and Mrs. Jim Tally of Wichita, Kans., visited at the home of Mr. and Mrs. Pink C. Dillon last week.

Mr. and Mrs. Herbert Howland and Mrs. Sam Hodges

and family attended church at Union Sunday morning and spent the rest of the day with Mrs. J. R. Powell.

Mr. and Mrs. H. L. Putman and Mr. Pete Ferguson spent Monday with relatives in Millburn, Ky.

Messrs. Charles Bowers and Leslie Walker spent Sunday with Mr. Layman Bard.

Mr. and Mrs. Dean Collier and family spent Sunday afternoon with Mr. and Mrs. Jim Dawes.

Mesdames Ellen Lynch and J. R. Powell and son, J. R., Jr., spent Friday with Mr. and Mrs. H. W. Howell and Mr. and Mrs. T. H. Howell.

Mr. and Mrs. Ervin Bard spent Sunday afternoon with Mr. and Mrs. Roy Bard.

Mr. and Mrs. Lubie Howell, Mrs. Fannie Herring and daughter, Nola, spent Sunday evening with Mr. and Mrs. C. L. Herring.

Mr. Jim Bard and daughter, Lillian, spent Saturday night with Mr. and Mrs. Clarence Bard in Fulton.

Mr. and Mrs. Joe Cook of Riceville spent Sunday with Mr. and Mrs. O. D. Cook and family.

Misses Lettie Clements and Anna Myrick were Sunday evening guests of Mr. and Mrs. Herbert Howell.

Mesdames Vada Bard and Lula Bard spent Sunday afternoon with Mr. and Mrs. Albert Bard.

Mr. and Mrs. A. A. Donoho and family spent Sunday with Mr. and Mrs. H. L. Putman.

On Sunday, September 20, 1931, a number of friends and relatives gathered at the home of Mr. and Mrs. Herman Sams in honor of Mrs. G. W. Sams' birthday. Those present were:

Mr. and Mrs. B. L. Austin, Mrs. C. C. Austin, Sam Austin, Mrs. Athel Slayden and children, Mrs. J. L. Reed, Weldon Austin, Mr. and Mrs. Henry Sams, Mr. and Mrs. Jake Smith, Mr. and Mrs. O. C. Wolberton and family, Mrs. Luther Veach and daughter, Magdolene, Mr. and Mrs. Jimmie Satterfield, Mr. Louis Sams, and Mrs. G. W. Sams.
