Gentleness succeeds better than violence—La Fontaine

DR. POGUE SPOKE AT C. OF C. MONDAY

Dr. Forrest C. Pogue, professor of history at Murray State College, was the guest speaker at the first fall meeting of the Chamber of Commerce here Monday night, giving a most interesting talk on "World Conditions and Problems." Several years ago Dr. Pogue made his home in France for a year and, during that time, he traveled extensively over Central Europe. Therefore, Dr. Pogue was able to draw a very accurate picture of Europe as it was a few years ago. After constant study, he is also able to speak intelligently of conditions as they are now.

He stated that many changes had been made even in one year. A year ago France was a strong nation and now it has ceased to exist as a world power. Today England is a strong nation but it is not certain that it can continue to be.

Dr. Pogue offered the opinion that Hitler erred when he did not start his invasion of England just after the flaming evacuation of Dunkirk. He said that the people of Germany would not starve this winter, though those of the conquered nations about them may. However, he pointed out that Germany must secure a better food supply to raise her standard.

A victory for the Axis, Dr. Pogue stated, will, of course, mean radical changes, but a British victory will also mean real problems. Therefore, the United States must build a foreign policy that will allow for many changes.

NEW U. S. ARMY MOVES THRU FULTON

Quietly the spearhead of the United States Army that will be whipped into shape in the South, started moving southward early this week, from encampments in Ohio, Michigan, Wisconsin, Illinois, Indiana and other states. Thirty-five trains, each bearing between 400 and 500 soldiers have already passed through or will pass through Fulton before the week has passed. In addition more than 300 motorized units, including trucks, 45 millimeter guns, anti-aircraft guns, officers car, etc., have come through this city by highway.

These advance units of the National Guard from the various states mentioned, all regulars now under the national defense program, are moving through Fulton without cheering crowds or waving flags. The National Guards from Cleveland, Ohio, traveling by special train, stopped in Fulton, and more than 400 soldiers marched through the streets, to bring the only excitement experienced here since the troop movement started.

Three to six trains have passed through Fulton daily since Sunday, while highway movement of troops has been just about as steady. It is estimated that approximately 9,000 troops have gone through the city enroute to Camp Shelby, Miss., and Camp Beauregard, La.

Fifty-two thousand soldiers of the 37th and 38th Divisions of Ohio, and other units, have been assigned to train in the forest at Camp Shelby, where a wilderness of tents and warehouses have been pitched for the encampment.

State Draft Boards Listed For Kentucky

Gov. Keen Johnson has announced the appointments of draft boards, appeal agents and examining boards for Kentucky under the National Selective Act. For Fulton and Hickman counties the appointments are as follows:

Fulton County, Local Board No. 47—Draft board: C. P. Mabry, Hickman, W. T. Browning, Fulton, R. M. Belew, Fulton; appeal agent,

E. J. Stahr, Hickman; examining physician, Dr. J. C. Morrison, Hickman.

Hickman County, Local Board No. 65—Draft board: R. T. Griffee, Clinton, Waller Brown, Columbus, R. B. Jones, Clinton; appeal agent, Rupert Latta, Fulton; examining physician, Dr. E. W. Howell, Oakton.

Local draft boards throughout the country are busy assigning serial numbers to the cards on which men 21 through 35 years of age registered last week for selective military training. After the cards have been thoroughly shuffled, the local boards will number each card and notify the Governor of their state what the highest number is. The Governor will report to Washington the highest number in the state, and officials there will determine the highest number in the country.

Officials will then number slips of paper running from 1 to the highest number and these slips will be placed in capsules and then in a large glass bowl. At noon on Tuesday, October 29, Secretary of War Stimson will draw the first number in the first peace-time draft in the history of the United States. Other high-ranking government officials will draw numbers before the drawing settles down to routine work. It is estimated that it will take about 12 hours.

Suppose the first number drawn is 3,467, every registrant in the country with that serial number on his draft board card will be the first in his area to be called to service, unless deferred. If a board in some small locality does not have a number that high, it will ignore the first number drawn and list the first one low enough.

When the time comes to call men for the army, each community will have a quota. If a community's quota is 10, then the men with order numbers 1 through 10 will be called. If either of these men is physically unfit or is deferred because of dependents, then numbers 11 and 12 will be called in order as necessary.

Assignment of the state quotas, the last major step in the draft program before the national lottery, has been announced for the 800,000 trainees to be called by July 1, and also for the first 400,000 to be called by March 1.

In Kentucky and Tennessee, tentative quotas of selective service trainees to be contributed by each state between Nov. 18 and July 1, 1941, were as follows:

THE FORUM

By J. PAUL BUSHART, Editor

A column conducted for news, views and comments, in which readers of The News are invited to participate. Mail contributions care of THE FORUM, this newspaper.

The recent registration of young men between the ages of 21 and 35 was a good example of how this country can get action when needed. Nearly 2000 registered in this county, but of this number only about one in twenty will have to go in the first draft.

Thousands of former National Guardsmen, who are now in the regular army, have passed through Fulton this week. Paul Bennett, proprietor of the radio shop near the News office, is all hot and bothered about the draft, and he won't rest until the drawing of names is over. But he is not by himself, for there are young men in every section of the county, who have businesses, who are wondering what they would do if called into service.

But aside from this President Roosevelt and our Congressmen, supported by the people back home, are giving Great Britain all the support they can in the fight against the Axis. All kinds of equipment, arms, destroyers, and aeroplanes are being shipped to England. Many American boys are already fighting with England, as are many other soldiers of other foreign nations. There is more to the European trouble than shows on the surface. Our officials at Washington are making strenuous efforts to prepare this country for what is to come.

There is no longer any doubt about the intentions of Hitler, Mussolini and Japan. Great Britain will certainly receive help from this country in increasing amount. Many of this country's long-range bombing planes will go abroad to England for attacks on military points in Germany and Italy. More guns, ammunition, destroyers and ships will likely change hands. We in this country are awake to the fact that everything these totalitarian countries of Europe represent, is entirely foreign to real Democracy and the true "American way of life." Therefore, it

America—every man and woman in it, who are real Americans—is preparing to protect the rights and liberties established by our forefathers. Patriotism is strong everywhere, and such is the spirit that makes a country great. This has been demonstrated by the brave fight put up by the people of Great Britain. So we may look for many changes, and much action by this country in the next few months.

Now Paul Bennett likes to sell radios. A farmer friend dropped in at his shop about two weeks ago and purchased a radio. That was right up Paul's alley. But this week the customer came back and told Paul that he wanted to return the radio.

"What's wrong?" Paul asked. "Well, I bought the radio to keep up with the war," the purchaser explained. But every time I go to tune in I hear Willkie, Willkie, Willkie, like a polly-parrot repeating itself, or a worn-out phonograph record. Thought maybe it was me, so asked my son to try and get some other program. He tried but he didn't do much better. Guess there's nothing to do but to return the radio."

"You should be able to get other programs," Paul declared. "Maybe there is something wrong. I'll come out tonight and check up." So that night, Paul gathered up his paraphernalia, including a flashlight, and drove out to his customer's friend. He tried to tune in other programs on the radio without success. He was worried then, sure enough. But, with flashlight in hand, he went outside, traced down the aerial and ground wires.

He found the aerial hitched to a windmill, and the ground wire attached to the privy.

Paul wiped his brow, drew a long breath, then exclaimed: "So that's the way of life." Therefore, it

tember 23 and closes January 31, 1941.

and Mrs. Average Citizen!

Don't Be MISLED!

ROOSEVELT
AND
CHANDLER

SENATOR A. B. (Happy) CHANDLER

This Is A Small Measure of Roosevelt's Service to Our People:

Under Roosevelt, Farm Income has nearly doubled. Farm Mortgage interest charges are 40 per cent less than in 1928. Soil Conservation program has saved 30,000,000 acres. Farm loans have increased the net worth of borrowers 37 per cent. One-fourth of all farms now have access to electricity.

Under Roosevelt, total non-agricultural employment is 9,000,000 greater than 7 years ago. Weekly Payrolls are \$113,000,000 greater than they were 7 years ago. Wage earners have benefited by laws enacted granting unemployment compensation, old age insurance and assistance to needy blind and dependent children. Wage and Hour Act has reduced hours and increased pay of millions of workers. Collective bargaining has brought a decrease of industrial disputes.

Under Roosevelt, National Income increased from \$40,000,000,000 in 1932 to \$69,500,000,000 in 1939. Employment increased from 37.5 million in 1932 to 45.3 million in 1939. Loans totaling \$5,000,000,000 have been made to aid banks. Government purchases of \$6,000,000,000 helped every kind of business.

Under Roosevelt, 20,000,000 depositors benefited by RFC loans to banks. Loans have been made to 1,500,000 farmers; 150,000 stockmen, 20,000 disaster sufferers and to 200,000 families for purchasing electrical appliances. Federal Housing Administration has enabled 600,000 families to build or finance homes.

Under Roosevelt in the last 7 years, public works programs have produced \$18,000,000,000 worth of public properties and services. WPA

has built 450,000 miles of roads; 93,000 bridges; 88,000 public buildings; 12,000 miles of water lines. WPA served 386,000,000 lunches to undernourished children. PWA financed work since 1933 has constituted 70 per cent of all educational construction. PWA has accounted for more than \$3,200,000,000 in orders for materials.

Under Roosevelt, the U. S. Navy, destroyed under Republican administrations, has become the most powerful in the world. The Army, which had been reduced and neglected, is being brought up to an authorized strength of 500,000 officers and men. Air forces already increased can now expand easily to a strength of 50,000 planes. When defense program is complete the United States will have a two ocean Navy or 733 fighting ships.
