**Scholar’s Week Abstract**

Our Topic is the Immigration Ban Vs Mass Media, which will focus on the opinions of the ban and how media content can change the public's opinion. The problem we are addressing is the tendency of the general public to form opinions without research or knowledge of the topic they are considering. Data collection through surveying students is the best way to examine our study because we get a diverse collection of opinions on our topic. Our group is examining four classrooms with surveys, two in which we show video content and two without. Results will be shared at Scholars Week Exhibition.
