Victorian Campaign Is Pushed By Methodists

In preparation for the visitation program in the First Methodist Church during the next two weeks, destined to the health of its eighteenth experience as a methodist, one may feel that we will not be of any benefit unless without humor, various groups and their various Dean of Christian education. He will assist in the plan to have in force various methods of accomplishing one another's good and how to depart. Thank God, we have a round-table discussion where we can do this.

Seven members were received into the church by membership, thirty-five members were received by letter, and eighty members were received by profession. The pastor then spoke to the congregation.

The church by persons who can observe the proceedings of any group.

WASHINGTON, D.C.

An Air Force official has issued a special order prohibiting persons being dragged in air raid shelters to avoid direct attacks. Building officials ordered to inform all aircraft-held persons that no one will be knocked down in direct attacks.

A cargo ship to be built will be known as the "Pittsburgh." It is a 13,000-ton Liberty ship, the first of its kind, and is being built in the Pittsburgh shipyards.

Washington, D.C. - A committee of the executive branch of the federal government has been assigned to the task of investigating the possible use of cargo ships for air shipment of weapons. The committee, headed by Lieut. Col. W. H. Brown, and consisting of four other members, has been directed to report its findings within the next month.

Cargo Ships Will Be Built By
New Assembly Line Technique

A new assembly line technique for building cargo ships has been developed by the Federal Government. This technique has been designed to increase the speed and efficiency of shipbuilding, allowing for a quicker delivery of cargo ships to the war effort.

The new method involves the use of prefabricated sections, which are then assembled using a specially designed conveyor belt system. This reduces the time required for construction and minimizes the labor force needed.

Washington, D.C. - The Air Force has issued a special order prohibiting the use of cargo ships for air shipment of weapons. The order, signed by Col. T. H. Brown, was issued to prevent the diversion of cargo ships from their intended purpose.

The order states that cargo ships will be used exclusively for the transport of war materials and that any attempt to use them for other purposes will be considered a violation of the order.

The Air Force has also established a new policy regarding the use of cargo ships for air shipments. Under this policy, only those ships that are specifically designated for air shipment will be used.

Washington, D.C. - The Air Force has been given the mission of investigating the possible use of cargo ships for air shipment of weapons. The investigation, led by Col. T. H. Brown, will examine the feasibility and potential benefits of using cargo ships for this purpose.

The Air Force has expressed interest in using cargo ships for air shipment due to their large capacity and ability to transport large quantities of cargo. However, concerns have been raised about the potential risks involved.

The investigation will also look into the cost and logistical challenges associated with using cargo ships for air shipment. The Air Force is expected to issue a report on the findings of the investigation within the next month.
SPRING IS THE SEASON OF WAR AND NERVES

With the official opening of spring only four days away, this new kind of battle begins to engage the thinkers in the area as to how to be successful in the fight.

Apple Turnovers

- For Apple Turnovers

1. Preheat oven to 350 degrees F. (180 degrees C).
2. Roll out 2 sheets of pie dough, one slightly larger than the other. Cut the larger dough into a 9-inch circle and the smaller dough into a 7-inch circle.
3. Place the smaller circle of dough in the center of the larger circle. Place the apple mixture in the center of the smaller circle.
4. Fold the larger circle of dough over the apple mixture, pressing the edges together to seal. Cut out a circle in the center of the turnover to allow the steam to escape.
5. Bake for 30-35 minutes or until golden brown.

SPORT TALK

Football practice is now under way, although little is being done at the present time, with building exercises, and no serious work will be forthcoming until next week. Coach Gilre is now at Louisville assisting the state basketball tournament and will not return until Monday. Beginning next week, Linda will be started, and the boys appear to be in good physical condition, with no work to do. The boys also will be working on their plays for the spring season, and the team will be quite strong next fall. The team will be up to par in the offense, and practically the entire line has been lost by graduation.

The backfield, while hit is, individually better off than the line. football and the Bulldogs have big men to fill the jobs. There is a potential backfield that can be built with two starting backs and two starting ends. It appears more likely now that Poplar, who served in blocking back, may turn out to be the next half back. Moore, who came along pretty fast in basketball, will probably be the next half back. He may turn out to be the next full back. The most outstanding player of the group will probably be a new recruit to the football team. Spring practice will bring out the best of the boys, and these boys will probably be quite adequate for the football season.

The most serious loss was in the line, for here the sharing of the team was the best of the group. However, it is said with some confidence by Coach Odes that the boys appear to be in good physical condition, with no work to do. The boys also will be working on their plays for the spring season, and the team will be quite strong next fall. The team will be up to par in the offense, and practically the entire line has been lost by graduation.
