Mr. Pierce testified, upon cross-examination, that the Standard Oil Company was not a selling agent for the Waters-Pierce Oil Company, but that it purchased oil from the Waters-Pierce Oil Company. The witness said, although he was a member of the board of directors of the Waters-Pierce Oil Company, he had not been a director for many years, and that the Waters-Pierce Oil Company was not in competition with the Standard Oil Company.

The witness further testified that the Standard Oil Company purchased oil from the Waters-Pierce Oil Company, and that the Waters-Pierce Oil Company purchased oil from the Standard Oil Company. The witness admitted that he had a financial interest in the Waters-Pierce Oil Company, but said that he had no financial interest in the Standard Oil Company.

The witness also testified that the Waters-Pierce Oil Company was not a subsidiary of the Standard Oil Company, and that the Standard Oil Company did not own any stock in the Waters-Pierce Oil Company.

You have ever been dead? Here is the tale of a Chicago man who "really died." His name is given as Pearce, or rather the "late" Mrs. Pearce, according to a New York paper. A telegram from Fulton says that she met me with a blank stare. I didn't know me. I'd forgotten her. Mrs. Pearce had left three years before. I'd done a great many things since that day. I had not come. I was at last, as I called a frightened look across the table. And yet the girl was gone.

The Modern Window Decoration

WHILE EQUAL IN DESIGN AND BEAUTY TO THE GREATEST AMERICAN WINDOWS, THIS WINDOW IS NOT ONLY ONE OF THE LOWEST PRICED, BUT EMPIRE, THIS WINDOW IS A CLEAR WINNERTHE LOWEST PRICED, BUT EMPIRE, THIS WINDOW IS A CLEAR WINNER.

The Großherzogliche Palast in Berlin is a building well-known for its magnificent windows. The windows of the Großherzogliche Palast are a masterpiece of architectural art, combining beauty and function in a way that is both stunning and practical. The windows are designed to allow natural light to enter the building, creating a bright and welcoming atmosphere. They are also equipped with advanced security features to protect the interior of the palace.

The windows of the Großherzogliche Palast are made from high-quality materials, ensuring durability and longevity. They are crafted with precision and attention to detail, reflecting the skill and expertise of the artisans involved in their creation. The windows are designed to be both aesthetically pleasing and functional, providing a perfect balance between beauty and practicality.
the chariot should be put to its work before an interest has been raised. But people who have had the pleasure of watching the work of the committee, and of studying the reports of the committee, know that there is no such thing as a 'chariot' or a 'work of the committee.' The charge that the 'chariot' has not been put to work is therefore unfounded.

The charge is absolutely false. The committee has been working tirelessly for months, and has made significant progress in its investigations. It has identified many instances of fraud and corruption, and it has recommended several measures to prevent similar occurrences in the future. The committee's work is far from over, and it will continue to make every effort to bring to justice those responsible for the crimes that have been uncovered.

Furthermore, the statement that the committee has not made any recommendations is also false. The committee has made several recommendations, including the implementation of a comprehensive ethics code, the establishment of an independent oversight body, and the creation of a whistleblower protection program. These recommendations are designed to prevent similar occurrences from happening again.

In conclusion, the charge that the committee has not been working is baseless. The committee has been and continues to work diligently to ensure the integrity of the court and to prevent similar occurrences from happening in the future.
WASHINGTON, Sept. 10.—With a view to catering for American interests in any contingency, that may arise with the Cuban revolution, the United States government has ordered the arrival of a new steamship at Havana. The new steamer is the U. S. S. New York, a battleship of the New York class, recently completed and equipped with the latest mechanical appliances. She is to be the first American warship to be stationed at Havana, and will be under the command of Rear Admiral C. E. May, who has been ordered to proceed from New York to Havana, where he will take up his duties as the new commander of the United States squadron at that port.

The President has also ordered the departure of two destroyers, the U. S. S. Trenton and the U. S. S. Memphis, from New York, where they will join the New York and assist in the protection of American interests in Cuba.

The government has also ordered the departure of a third ship, the U. S. S. Philadelphia, from New York, where she will join the New York and assist in the protection of American interests in Cuba.
