## CONSTRUCTION WORK STARTS ON DAM POWERHOUSE

Construction started June 24th on the powerhouse and part of the concrete section of the Kentucky Dam, when the first bucketful of concrete was dropped into the forms.  
The area where this construction work is being done extends out from the east bank of the river and is enclosed by the first section of the coffer dam. Within that area TVA construction crews have been working for several months removing approximately 500,000 cubic yards of alluvial deposit in the river bed to uncover the bedrock, upon which the dam will be placed, and in drilling and blasting operations for the dam's foundations.

## STAY ALIVE!

## Plans Discussed For New Station

Plans were discussed in a meeting of railroad officials here last week for remodeling of the present passenger station or the erection of a new one. Fulton being one of the major transfer points on the Illinois Central System, with traffic changes and improvements are being planned for this district in the past few months, some changes and improvements are necessary at the local station.  
One proposal would build a new station on Fourth street with a subway leading from it up to the tracks. This would be a handsome and modern structure, fitting for Fulton, which is a key point for those wishing to board a train north or south.

Considerable increase in freight traffic has been coming through Fulton since the opening of the Millington and Milan defense plants in West Tennessee, and if the munitions plant is erected in Graves county railroad activity in this vicinity will show a further increase.

If you hear a wise sentence or an apt phrase, commit it to your memory.—Sir Henry Sidney.

## Nothing New On Graves Defense Plant

Although there is nothing new officially about the proposed \$30,000,000 munitions plant in Graves county, there is reason to believe from reports available that this section has a good chance of obtaining it. Such a plant would employ in the neighborhood of 10,000 people, it is said, and would boost the payroll of West Kentucky.  
Government engineers have finished a survey of the proposed site, and also been back for a check of minor details. Final action will be up to the federal board in Washington, which is in charge of locating the various defense plants. Some definite decision should be reached in a few weeks, it is stated.

## FULTON AND HICKMAN JUDGES ARE UNOPPOSED

In the race for the office of police judge for the cities of Fulton and Hickman, Lon Adams and Dee L. McNeill are unopposed.  
Lon Adams has served two terms as police judge here and is a well known local attorney.

Many persons feel art, some understand it; but few both feel and understand it.—Hilliard.

## Look Ahead, Fulton!

Citizens of Fulton, there's a job ahead!  
You as citizens are vitally concerned about the future of your community. On Saturday, August 2, you will go to the polls to choose a mayor and council. The men you pick to serve you will and should endeavor to preserve the economic welfare and promote the civic progress of our community.  
Today the job of mayor requires more time and effort than ever before. The mayor, as chief executive, is the leader of the board of council. He should have vision, the initiative and determination to GET THINGS DONE.

The mayor must take the lead in molding the progress and development of the community. He should be a person deeply and sincerely interested in seeing the community go forward. He should serve and work incessantly, alone and jointly with civic groups, in interest of public affairs. He should be aggressive, able to talk privately and publicly for any given cause or purpose. He should be a SELF STARTER, for it will be necessary for him to concentrate his efforts on the jobs that will have to be done.

Changes are occurring throughout our nation. There are certain to be many more readjustments in the next few years in order to maintain economic equilibrium and preserve the American way of life. Every community in the land will be faced with problem on top of problem.

Industries are moving southward. Fulton needs more payrolls. Work is needed for men. Fulton should secure more industry. City officials and civic leaders must work toward the material and moral improvement of their community.

Fulton is a fine community. But it is up to all of us to work and strive for the best in everything for the good of our community. Public interest and sentiment help to promote and encourage the betterment of our city. Do your duty by going to the polls Saturday, August 2.

## MAYOR'S RACE TO BE A TWO-SIDED AFFAIR BETWEEN PEEPLES AND BOAZ

### Reelfoot Lake Commission To Meet July 9

The Reelfoot Lake commission, of which T. E. Parks of Union City is a member, has been summoned to meet at the lake on Wednesday, July 9, to discuss and take action on a proposal of the federal government to take over control of a portion of the lake and to inaugurate a long-range program to restore the lake to its former status. For many years, the lake has been filling up with silt carried into it by streams and with decaying vegetation.  
If the federal government is given a lease to one-third of the lake property, comprising only about one fifth of the water area, and also is given control of the spillway and the water level in the lake, a project will be started by federal wild life and fish service which will mean in time the expenditure of \$500,000 or more on the lake, it is understood.

Members of the lake commission, in addition to Mr. Parks, are Governor Cooper, R. C. Donaldson of Tiptonville, the state comptroller and the secretary of state.  
The commission, created under a law passed in the last session of the state legislature, is authorized by that law to lease the lake to the federal government.

It is expected that Dr. Ira N. Fabrieelson, director of the United States division of wildlife research, other federal government representatives, and members of the state department of conservation, including R. G. Turner, of the game and fish division, will attend the meeting.

Mr. Turner plans to have an airplane available at the lake to take the governor and other interested persons on trips over the lake so that they may obtain a good view of the territory at the north end of the lake which the federal government proposes to take over, and may see for themselves the results of the filling-up process which has been going on for years.

On part of the lake at least, the government's work will not be reclaiming but will be re-creating the lake," Mr. Parks said today. "A part of the lake has already completely filled up."

Under the government project, peat plant life would be eliminated from the lake, and through the construction of catch basins in the lake at the mouths of streams flowing into it, silt would be trapped and prevented from spreading out over the bottom of the lake.

The government plans, if it undertakes the project, to establish a CCC, WPA or Conscientious Objectors' camp at the lake.

## BUYERS RESPONSIBILITY FOR WHEAT PENALTY PAYMENT ON EXCESS

The buyer who purchases wheat from a farm producer is liable for any marketing quota penalty due on the grain unless it is identified by an officially approved marketing card or certificate showing that the wheat is free of penalty, H. M. Pewitt, chairman of the Fulton County Agricultural Conservation Association, said today.

While the buyer is personally liable for the penalty on excess marketings of wheat under marketing quota law, Mr. Pewitt pointed out, he may deduct the amount of the penalty from the price paid for the wheat. The penalty on excess wheat is 49c a bushel.

Wheat marketing quotas, approved by more than 4 out of 5 growers voting in the referendum on May 31, are established for each farm subject to quota provisions, Mr. Pewitt said. On a farm having wheat in excess of the quota, he added, all wheat produced is subject to a lien in favor of the United States for the amount of the penalty.

This means that each bushel of wheat from the farm is subject to penalty until the full amount of the penalty has been paid or until quota provisions have been met.

Wheat from farms not subject to penalty—both from those exempt quotas and from those within their acreage allotments—will be identified by marketing cards or marketing certificates showing that the wheat is free of penalty. Wheat not identified by such "penalty free" cards or certificates should be considered as subject to penalty.

Prudence is not poverty; it is the thorny road to wealth.—Charles Reade.

### Seven Men Have Filed for City Council—Six Councilmen Compose a Board

The mayor's race in Fulton has settled down to a race between R. C. Peoples and T. T. Boaz, according to present records at the office of the county court clerk. Seven men had filed for the city council up to Wednesday at noon. It takes six men to compose a board of council. Here are the names of candidates filed:  
J. N. McNeilly, present councilman, East Fulton.  
Frank Brady, garageman, East Fulton.  
Smith Atkins, insurance and bottler, East Fulton.  
C. C. McCollum, gasoline wholesaler, East Fulton.  
J. Paul Bushart, editor Fulton County News, West Fulton.  
H. H. Murphy, hardware, West Fulton.  
R. C. Pickering, railroader, West Fulton.

R. C. Peoples, local laundryman, and former member of the city council, announced some time back that he expected to make the race for mayor. Many of his friends and local citizens and businessmen solicited him to make the race when it was learned that Paul DeMyer would not announce again for the office. He is a man who made a good councilman, and he is wholeheartedly for the improvement of the community. He took an active part in the early steps which were necessary in obtaining the garment factory in Fulton. He believes that other efforts along this line can be exerted to improve the payroll in Fulton, and better the economic welfare of its citizens. Mr. Peoples will make a personal announcement in the next few days, setting out his candidacy and soliciting the support and influence of the people whom he will serve, it was stated to The News this week.

## FIVE INJURED IN CAR ACCIDENT

Five persons were injured Saturday night on the gravel road near Fulham when the car in which they were riding overturned three times. The accident was caused by loose gravel.

Occupants of the car were Mr. and Mrs. Jessie Latham, Herschel Matheny, Jane Cunningham of Fulham, and Margaret Via of Clinton. Mr. and Mrs. Latham and Mr. Matheny were painfully, though not seriously, injured and were given treatment at the Haws clinic. Miss Cunningham received a broken collar bone, and was carried to the Fulton hospital. Miss Via suffered a back injury.

The car was badly damaged.

An unusual request was made the other day by Congressman Clare E. Hofman of Michigan, who asked that the Congressional Record be corrected. He said: "On page 5027 at the end of the talk I made yesterday appears the word 'applause.' There was no applause, and I ask that the word be stricken out."

Whom the Lord loveth He chasteneth.—Hebrews.  
Whatever advice you give, be short.—Horace.  
An old man is twice a child.—Shakespeare.

Where there is plenty, charity is a duty, not a courtesy.—Feltman.  
We live by admiration, hope, and love.—Wordsworth.

Clark Gable and Vivien Leigh, who appear as Rhett Butler and Scarlett O'Hara in the fabulous Technicolor production of Margaret Mitchell's famous "Gone With the Wind" playing Thursday and Friday of this week at the Orpheum Theatre. The production will be shown in its entirety, exactly as originally presented. Manager W.L. Chisholm promises. Two performances will be given each day, at 1:30 and 7:30 p. m.

Wedding bells again rang in this community, on Saturday night, the two daughters of Mr. and Mrs. Dewey Barber were married. Miss Mary Alice Barber became the wife of Mr. Lamb of Dresden; and Miss Nadine Barber became the bride of the son of Mr. and Mrs. Leman Teague of this community. We

wish for both couples much success and happiness throughout their married lives.

Harrell Brundige, son of Mr. and Mrs. E. I. Brundige has returned from New Jersey where he has been employed in the White Castle Cafes. On Sunday his brother and sister, Mr. and Mrs. Garrett Brundige and son, Don, of Hatler's Camp Ground; and Mr. and Mrs. Buren Smith of Martin, came home for the day, however Mr. Brundige was unable to be with his family for he was called back to work at Milan and left early Sunday morning.

Mr. Ewei Oliver was awakened early Sunday morning with a pain in his left shoulder, and to his amazement found that his left shoulder was out of place. He first went to Mr. Will Reed's, but Mr. Reed was unable to be of much assistance because of a lame back. He then went to the home of Mr. Jack Hannah, who pulled the shoulder back in place.

Mrs. Van Brann returned to Memphis on Monday after a visit with her sister, Mrs. Orvin Moore.

Man about to become  
an owner of the electric company

**WAIT** a minute—this man is taking a medical examination, isn't he? That's right—and what's more he is passing it.

But what in the world does that have to do with owning an electric company?

It's this way:

The man is applying for life insurance. And when he becomes a policy owner he will automatically become a part owner of some electric company. The same thing would be true if he were depositing money in a bank. For everyone who has a bank account or a life insurance policy is part owner of some electric company.

How is that?

Because the money you put in the bank, or buy a life insurance policy with, is invested in various businesses, including electric companies.

This makes you one of the millions of people who have a personal stake in the electric companies—an extra "plus" benefit to you from a business operation which has not only steadily improved your electric service, but has also succeeded in reducing your electric rate about 50% in the past 10 to 15 years. And it is the aim of the people who have accomplished these things—the employees of your electric company—to keep on bringing you more and more of the benefits of electricity at less and less cost.

IT COSTS LESS TO LIVE BETTER ELECTRICALLY

The problem of meeting the tremendous cost of the national defense program has focused attention once again on the subject of savings. Too often, we think of national defense in terms of government taxes and borrowing. But we forget because of thrift (savings) in previous years, the present manufacturing plants and equipment, railroads, trucks and communication facilities, and countless other assets are today available for the production of necessary goods. Our present in-
