CUTS THE FUEL BILL IN HALF
FOR SOFT COAL, Lignite or Hard Coal

As you know fully one-half the carbon available for heat in soft coal is gas, the entire gas supply used for fuel and illumination in many cities and towns being made from common soft coal. Coal stoves in burning soft coal will not supply the heat that is possible when the same is burned in a stove designed for this purpose.

The Paducah chapter of the Daughters of the American Revolution reported that their members are using soft coal only when absolutely necessary and will not use it when they can obtain the comfort and savings of a good hard coal.

The Paducah chapter of the Daughters of the American Revolution also reported that their members are using soft coal only when absolutely necessary and will not use it when they can obtain the comfort and savings of a good hard coal.

THE HORSE SHOW CLOSED

The grand annual horse show came to a close last evening in the presence of huge crowds, and after the last event had closed, the grand closing exercises were held. The event was characterized by the usual glitz and glamour of a horse show, and the weather was favorable for the enjoyment of the spectators.

The event began with the Parade of Horses, where the horses were dressed in various costumes and paraded around the arena. This was followed by the Grand Championship, where the champions of the show were announced. The event was highlighted by the closure of the show, where the trophy was awarded to the winner of the Grand Championship.
