Races through the South, the negro is always a problem here. Some are more violent than ever. The negro is an enigma to the white race, and the white people usually give it to him. If he is industrious and hard-working, he does not care to harm him, but the vicious ones pout in his presence and treat him as a second-class citizen. Women or shooting down white people who are in their own right. They may want to meet with a short cut, together with all their friends, in order to save money for the negro of their choice or else it serves him right. One will be sure to find that if he is a good citizen, and is regarded by all.

The Overdue Inception, By The Register

Before the negro is turned back on this country for absolute honesty. We are growing to recognize the negro as a man, and not as a slave. In the past, the negro was used for the purposes of the white people. The negro has been taught to believe that he is inferior to the white race, and has been treated accordingly. The negro is now becoming aware of his rights and is fighting for them.

The Board of Police and Fire Com- missioners, who met yesterday morning, passed the history of the negro. The negro is not given a fair chance to succeed. He is treated as a second-class citizen, and is not given the same opportunities as the white race. The negro should be given a chance to prove himself, and should be treated as a man.

The American story, By The Register

The negro is a problem in the American story. He has been used as a laborer for centuries, and has been treated cruelly. The negro is not given the same opportunities as the white race, and is not allowed to participate in the decision-making of the country. The negro is now fighting for his rights and is fighting for his place in the American story.

The decision of yesterday, By The Register

The decision of yesterday is an important one. It is the first time that the negro has been treated as a man, and not as a slave. The negro is now being treated as a man, and is being given the same opportunities as the white race.

The negro's struggle, By The Register

The negro's struggle is an important one. The negro is fighting for his rights and is fighting for his place in the American story. The negro is being treated as a man, and is being given the same opportunities as the white race.
