Board of Education

A meeting of the Board of Education was held in the school board room on Tuesday night, and the following actions were taken:

1. A lengthy discussion was entertained concerning the replacement of the new school building. The discussion centered around the need for new facilities, the current condition of the old building, and the financial aspects of the project.

2. A new teacher was appointed to the faculty for the upcoming academic year. The teacher will be responsible for teaching a specific subject in the high school.

3. A decision was made to extend the school year by two weeks. This decision was based on the need to cover additional curriculum material.

4. A policy was adopted for the distribution of school supplies. The policy outlines the procedures for ordering and distributing supplies to students.

5. A committee was appointed to investigate the possibility of establishing a new athletic program. The committee's responsibility includes researching the feasibility of the program and making recommendations to the board.

Fulton was a long time getting

the middle road black-topped. This is a well-planned project, and

it will provide the much needed road network of reasonable width to the country. Once the middle road is built, the road from the east and west will be improved and black-topped. To black-top it would be difficult or exceedingly expensive.

All you voters should be interested

in the election which will decide

whether the nation will have its

road network built. This particular amendment would provide for the nation-wide black-top network of the roads.

If the amendment passes we will have more citizens and there seems to be a general consensus of opinion that the nation should support black-top road industry and black-top road building.

WILLIAM WOODMAN, Pastor

-Long after a great storm had passed, a number of the families on this side of the river could not stay at home and Mr. Walker's family was among these. The storm had brought much damage to the vicinity, but the Walkers were not directly affected. They later moved to a new house built by the family.

The site of the house was on a hill overlooking the Kentucky River, and the family was able to watch the river and its surroundings from their home.

As the family continued to live in the area, they began to build a larger house to accommodate their growing family.

Over the years, the Walker family continued to expand their home and property, eventually becoming one of the largest and most prominent families in the area.

The family continued to live in the area for many years, and their house became a symbol of their hard work and dedication to their community.

-These early settlers were typical of the many families who came to Kentucky to find a better life.

OUR GARDENS ARE HERE IN FOLLOWING THE EXAMPLE OF FAMOUS AMERICAN FARMERS, you too may increase your production, regardless of the type of farming you conduct. All it takes is a five-point program.

1. Furnish fresh, clean, safe water at all times, especially for laying hens.
2. Provide good comfortable housing for laying hens and roosters.
3. Actively care for records and keep track of your egg production.
4. Fertilize your eggs correctly. This will keep them from being broken in transit.
5. Use proper feeding procedures. This will increase your production.

The program is destined to become an ever-present factor in the poultry business of the future. Our present goal is to increase the egg production in this country by 20 per cent. This is not too much to expect. The secret is quality. Our five-point program will do it.
