Behind the Scenes
In American Business

ABNOMAL - The hours to whom sleep comes unsatisfactorily, the pressures of a busy life, the perils of war, the uncertainties of the future, and the attraction of neighborly standards have all conspired to give working men and women柬m the leisure to spend an average of 34 per cent more on commodities. OPA has been given power to control all purchases of cloth, including that for clothes closets and linen presses against threatened shortages.

Bit of Business - Quick, easy, courteous, the teller is at hand... but not as near in many a bank as at a post office, or a telephone exchange, or a gas utility. The key to a happy banking experience is being a good customer. OPA officials expect a large part of this year's buying to be done in the name of patriotism, and they are confident that the country can make a tenancy. But they are watching the movement curiously, because the tendency toward increased buying is a return to normal conditions, thus suggesting that the nation's economic condition is improving.

Financial Changes
The drastic modifications were caused by a continued expansion of the nation's credit. The sharp rise in prices, the rapid growth of the gold stock, and the increase in the money supply have had a great effect on the economy. The dollar value of the dollar has been rising, and the price of gold has been falling. The increased buying has been caused by a continued expansion of the nation's credit. The Duty of Civilians

The future may be for the better, but a little cosmetic change in the present order is not enough.

The need of a new way of thinking is not just for the business man, but for all of us. The need for a new way of living is not just for those who are in positions of power, but for everyone. The need for a new way of living is not just for those who are in positions of power, but for everyone.

Speed As Usual

Business as usual is the only real solution in military plans. But the military needs are so vast that there is no time to call business usual.

Waste Not ... Want Not

Waste not! Want not! America for every citizen!

In every part of the country there is a war on waste. This is a war not only on waste in factories, but in homes, and even in the streets. Waste not! Want not! America for every citizen!

Not Too Big

The need of a new way of thinking is not just for the business man, but for all of us. The need for a new way of living is not just for those who are in positions of power, but for everyone. WHY KEEP ADVERTISING!

WHEN BUSINESS IS SLACK WHY ADVERTISE!

Did you ever notice that it takes time and experience to accomplish anything worthwhile? You can't advertise today and expect to find your store crowded tomorrow unless you have through constant advertising educated the public to read your ads.

The majority of people are slow to act. You have to tell them the same thing over and over again before they will heed your message. Advertise now for the business you hope to do next month. It is the cumulative effect that brings results.

HOW DOES YOUR ADVERTISING INVESTMENT COMPARE WITH THE AVERAGE PROPOSED BY HARVARD RESEARCH BUREAU

The following percentage of gross sales are usual and correct for advertising expenditures for successful retail stores, according to figures compiled by the Harvard Bureau of Business Research and Northwestern University Business Bureau of Business Research:

According to the Report of Brookdell, 95 Per Cent of All Business Failures Are Non-Advertisers.

1. There is no need for the Legislature to pass the pending bill for the sale of Tennessee Valley Authority (TVA) hydroelectric power to Kentucky. (The TVA has power to sell). Conditions at that time may be entirely different than they are now.

WHY RUSH TO PASS THIS BILL?

5. Where will the Federal Government and the State of Kentucky replace the following taxes now paid by the private electric utility companies?

STATE Income Tax . . .

Federal Income Tax . . .

State Unemployment Tax . . .

State Old Age Benefit Tax . . .

State Gasoline Tax . . .

Capital State Tax . . .

Chain Store Tax . . .

Corporation Commission Tax . . .

Miscellaneous Operating Tax . . .

6. Many taxing districts in Tennessee are not getting as much ad valorem taxes as they got under private operation.

The five previous years saw a result of withdrawal from taxation of lands flooded by TVA’s Norris Lake, the tax rate on farms in Claiborne County, Tenn., jumped from $2.25 a $3.41 on the $100 valuation, an assessment for many property owners were more than doubled.

7. TVA is an electrical system owned by the Federal Government and is supposed to operate for profit. Yes TVA desires to cite its power and property and make it for profit for this very reason.

8. Proponents of TVA advocate control of electric service because it is universally used. The same might be said for food, medicine and clothing. The government with all its advantages could probably sell all such things cheaper than any private company.

9. The use of Hydro-Electric Power is cheaper than any private company.

10. The sponsors of this special legislation have nothing at stake. We in Kentucky Utilities Company have our "Business Life in Kentucky" at stake, along with the welfare of our families and our home communities.

The value of telephone service increases as more telephone subscribers are added. During the past ten years alone, a net gain of about 100,000 telephones was made in the area covered by Southern Bell. 

To make possible this unprecedented increase in telephones has required an expenditure of nearly half a million dollars and a net increase of over 1,400 employees in our service force. This has been made possible by adding more equipment, making a total of 28,000 miles of lines and installing 500,000 new telephones. 

On your next telephone bill you'll find an increase of 50 cents a month, which pays for the cost of this service. It is a small price to pay for the value it brings to our country as a whole.
