1912 Wheat Marketing Regulations Given

Wheat marketing quota cards will be necessary to every wheat grower who intends to harvest any amount of wheat no matter how small, H. M. Peewitt, chairman, of Fulton County ACA stated today. All commercial allotment growers have had their planted acreage already checked and those who do not have any excess, will of course, automatically be issued a marketing card. Those having excess will be issued one after they have met with any of the necessary requirements regarding the excess. Mr. Peewitt further stated that we have quite a few cases of non-allotment farms (having planted up to 15.0 acres) checked also, and their acreage determined so that if they do not harvest over the 15 acres will be issued a market card too.

Those cases having an acreage of more than 12 acres that they expect to harvest, should notify this office at once. Those growers having 12 acres or less and they expect to harvest any of this wheat for market should come to this office and sign a statement to that effect so that they would be eligible to have a marketing card issued to them for the sale of their wheat.

Majority Workers Give Union Meeting "Snob"

Representatives of the C. I. O., labor organization seeking to unionize the local factory of Henry I. Seigel, held a meeting at the city hall here Tuesday night. For some reason only a handful of employees attended the meeting. At a recent meeting of local citizens and factory workers the hall was packed to capacity.

A good representation of workers opposed to the activity of organizers and disturbance in the local plant was present. It was brought out during the discussion, that the monthly dues would be \$1.00 per employee. Meaning a total of \$500 per month in "union" dues from employees in local plant, or \$6,000 a year, if 500 people worked. It was pointed out, Workers brought to light that other hundreds of dollars would be paid out of the workers pockets for initiation fees, it is said.

One of the employees asked for the assurance that the local factory would continue to operate, and this guarantee was withheld, it is alleged. No answer was given to the question as to what would happen to the workers in case the situation here should turn out disastrous as it did in Caruthersville, Mo.

Organizers have met stiff opposition in Fulton from both the factory workers and local citizens, who do not wish to disturb a steady income, and the satisfaction of using their own good judgment without being pressured into anything by anybody. It is the rule of the majority, striving to protect their own best interests whatever their judgment may be.

MORE SCRAP NEEDED FROM KENTUCKY FARMERS SAYS WAR BOARD HEAD

Recent reports from county US DA War Boards throughout Kentucky indicate that there is still more than enough scrap iron on farms in the State to build a 35,000 ton battleship, M. D. Roysce, Kentucky USDA War Board chairman, announces.
 These reports show, Roysce points out that less than half the scrap on farms has been collected and sold and that steps should be taken immediately to speed up collections.
 Only 46 of the county war boards reporting said that half or more of the scrap on their farms has been collected, the War Board chairman states.
 The total amount of scrap collected and moved from farms in Kentucky up to March 15 was 17,744 tons.
 "Kentucky farmers have an unusually heavy responsibility in producing hogs, soybeans for oil, milk, meat and eggs for the war program," Roysce said. "But we must spend every minute we can spare in collecting scrap to keep other vital war production industries moving."

REDDY KILOWATT says:
 What Do You Mean—
WALL STREET
 Owns Your Electric Company?

FOLKS: Sixty-two hundred of the owners of your electric company live in 116 of the 120 counties in Kentucky. Who are they? Well, 2,182 are house-keepers; 1,178 are retired people and students; 535 are business men 521 are farmers; 490 are salaried workers; 347 are salesmen and merchants; 304 are doctors, lawyers, dentists; 275 are teachers and nurses; 372 are clerks, postmen, semi-skilled workers.

Do these owners sound like Wall Street high financiers? *Nonsense!* They are your neighbors, fellow church members, lodge brothers, patrons. Like our employes, they want the company's customers to be satisfied . . . to get the best possible electric service at the lowest rates practical. In spite of what politicians say, these owners don't want the public gouged!

But the same politicians want to run the electric power industry. They want to replace business management with political management and all its evils.

Political management of business eventually means the end of free enterprise. It fosters socialism. It leads to un-American regimentation. It is dangerous.

Do You Want The Politicians To Take Over Your Business?

FARMERS APPLY TO WAR BOARDS FOR BLDG. PERMITS

Fulton County farmers, who plan to construct farm buildings costing more than \$1000 or dwellings costing more than \$500 may now apply to the Fulton County USDA war board for authorization to begin construction, it is announced by H. M. Pewitt, chairman of the board.

In line with the recent federal order halting all non-essential construction, the county war board will help examine applications for farm construction for which farmers must receive approval. Actual approval or disapproval will be made by the Federal War Production Board.

The exemption of \$1000 per farm for non-residential construction will permit many ordinary farm construction jobs needed in making adjustment to meet Food for Freedom goals, Mr. Pewitt explained.

For non-residential construction costing more than \$1000, four basic standards have been adopted as a guide for USDA war boards in making recommendations on applications.

They are: (1) necessity in terms of Food for Freedom goals; (2) practicability in terms of sound farm practice; (3) expediency in terms of war needs for scarce materials; and (4) feasibility in terms of available labor.

Most applications for construction of new farm houses costing more than \$500 will be eliminated on the basis that the family having lived in the old house until now can continue living in it for the duration. Furthermore, the house should be used by a person or family whose full-time labor is essential to the operation of the farm and a new house should not be considered if a present house can be remodeled or repaired to meet acceptable standards.

Reconstruction of farm dwellings destroyed by fire, flood or tornado requires no authorization for rebuilding. If materials cannot be obtained without a preference rating, the farmer will have to apply for priority assistance.

If you load responsibility on a man unworthy of it, he will always betray himself.

Today's pioneers are building tomorrow's progress.
