F ORCES: The 1,135 men and women who operate our power plants, keep the electricity on tap, serve your homes, offices, etc., are actually the Kentucky Utilities Company. The provision used to exist when you were in Bell County. Eight out of ten were born in the State. All but a handful in small towns today.

They are your neighbors, lodge brothers, fellow Republicans, Kiwanis, church members, Legislators. Over 900 have been with us more than ten years; over 250 more than five years; over 220 more than two years. They make up a dependable organization—always on the job day and night, trying to give the best service possible. And they're giving you better service at a lower cost every year.

Policemen who must put themselves in business are trying to break up this organization and sell the company. They want to replace business management with political management. Politics in business destroys private enterprise. It fosters un-American socialism. It is dangerous.
