IT WILL SAVE YOU CUSTOMERS ABOUT $500,000 A YEAR, BEGINNING APRIL 1

BY DIRECTION of the Public Service Commission of Kentucky, our Company is putting into effect new lower electric service rates that will save our customers approximately $500,000 a year in the cost of electricity on the basis of previous use.

For example, since January, 1940, our average domestic customer has increased his use of electricity 45 kilowatt hours a year (5.6%), but he pays us $3.46 (9.2%) a year less for service. This rate reduction, together with the other reductions during the last eight years, is now saving our customer $2,250,000 per year.

Do you know of any other necessary service or commodity (such as food, rent, fuel, etc.) that is not restricted in use and that costs you less than it cost before the war?
