Thanks To Retonga
He Can Make A Crop

Distress From Nervous Indigestion, Sluggish Elimination and Muscular Pains Promptly Relieved, States M. Young.

"I can't believe I could have got in to a crop this spring but for Retonga."

Young one of the best farmers in Minnie, Ga., who resides on Fulton, Ga., Bill & C. Marrian for his care, Mr. Young received.

I was in a miserable fix from indigestion and pains in my muscles. It seemed as if I was about to die. I could not eat, and so much gas formed in my stomach I could not sleep. I was unable to get up from my chair, although I tried for 3 days. My digestive system was out of order, and I got in to a crop of a serious illness.

I felt as if I would drop, and I was unable to do anything.

Retonga is interested in the study of the early colostrum after the first week of age. He is able to implement the proper technique and has been shown to be very successful in this area. He is currently working on a project to improve the growth rate of young calves and has made significant progress. His research has been published in several scientific journals and has been widely recognized.
