THE FIFTH FREEDOM

ONE of the most important of the freedoms figuring prominently in the history of man is the right of ownership. The concept of ownership has taken many forms in different societies and cultures throughout history, but its fundamental principles remain consistent. Ownership is often seen as a symbol of personal freedom, allowing individuals to control and utilize resources as they see fit. This freedom is not only important for individuals but also for societies as a whole, as it enables the creation of wealth, innovation, and progress. The right to own property is a cornerstone of the rule of law and is essential for the development of a stable and prosperous society. In a world where property rights are often threatened or infringed upon, it is crucial to uphold and defend this fundamental freedom, ensuring that individuals and communities can continue to enjoy the benefits of ownership and contribute to the common good.

Telephone Installations
Affected by Wartime Conditions

Because of the shortage of raw materials, it becomes more difficult as the war progresses for the telephone company to furnish requests for telephone service. So unless you qualify as an essential user—one who is essential to the discharge of responsibility for public health, welfare or security—you may experience difficulty in getting telephone service.

If you plan to request the installation of new service or if you now have service and plan to move, a reasonable time may be necessary to determine if service can be made available. For further information, please communicate with our business office.

TILL AFTER XMAS--
NO MORE WORK ACCOMPTED FOR DELIVERY BEFORE CHRISTMAS

Due to limited time and a shortage of help, we will be unable to accept watches, clocks, jewelry, etc. to be repaired and returned before Christmas. After the holidays we shall be pleased to render our usual prompt and satisfactory service.

Increased Demand Placed On Service Industries by War

**THE ELECTRIC UTILITIES**

1939

1942

Each symbol represents 2 billion kilowatt hours output for services rendered.

**THE RAILROADS**

1939

1942

Each symbol represents 100 billion ton miles.

**THE TELEPHONE INDUSTRY**

1939

1942

Each symbol represents 10 million long distance conversations.

The war has strained the capacity of each of these services, and labor demands have become extremely rigid as the need of transportation, communication, and the solving of other problems becomes greater. This is true not only within the United States, but throughout the entire world, where the stresses and strains of war are aiding to reduce the standard of living. It is the duty of the church to remember these facts and to strive to reduce any expenditure of time and effort that might be spent now in idle conversation, distractions, or other luxury items.
