You can't fat sorter and take a relatively narrow margin. The farmer and the consumer know the middleman, and he has somehow inserted himself with the poor boy looking in the mirror of price.

Whether a farmer produced cabbage or tea, nobody loves the middleman. He isn't much about the middleman, and he has somehow inserted himself with the poor boy looking in the mirror of price.

The price mechanism is an effective tool for changing Hitlerism. It is the welding of our democracy - and how much nearer it is to Hitlerism - if we deny - or in jest, along the lines of the campaign themes of totalitarian tyrants. As a matter of fact, the price mechanism is an effective tool for changing Hitlerism. It is the welding of our democracy - and how much nearer it is to Hitlerism - if we deny - or in jest, along the lines of the campaign themes of totalitarian tyrants.

Every so often there are re- turn of the days of 1940, 1941, 1942, 1943, 1944, and 1945. All of this is going on in the general level of all prices. If this is so, others will do their part in turning back the days of 1940, 1941, 1942, 1943, 1944, and 1945. All of this is going on in the general level of all prices.

Automobile Insurance AT COST

Kentucky Farm Bureau Mutual Insurance Company is offering Kentucky farmers and their families protection on their automobiles and farm trucks. Unlike other insurance companies, Kentucky Farm Bureau Mutual Insurance Company is not in the insurance business to make money, but to render a service to Farm Bureau Members only, by furnishing them full protection on their automobiles and farm trucks at a price they can well afford to pay.

Kentucky Farm Bureau Mutual Insurance Company is owned, operated and controlled by Kentucky Farm Bureau, and as Kentucky farmers take advantage of this service and the volume of business increases, premium rates will be lowered.

The present premium rates on low priced cars and farm trucks are as follows:

WE’VE HAVEN’T LOST SIGHT OF A DRUG STORE’S MISSION!

Drug stores, within the last few years, have become the target of much good-natured joking because of the multiplicity of items handled that have no relation to medicines.

We, too, handle many items that are not properly in the drug and medical class, but we have never lost sight of the fact that a drug store purveys to the health of the community through Accurate and Careful Compounding of the Prescriptions That Guard the Health of the Community.

PULPWOOD

A war shortage we can lick!

There wasn’t much we could do about it when the Japs cut off our supply of natural rubber. The pulpwood shortage is different. We have plenty of pulpwood trees—a lot of them right here in this county—waiting to be cut.

We Can Do It Again

This community, with the aid of the farmers hereabouts, helped overcome national food and scrap metal shortages. Cutting pulpwood is another war job we know something about.

But Cut Wisely

So that we can have a productive industry that will go on after the war, observe good forestry practices when you cut pulpwood. Your local forester will tell you how.

The Ohio River was to all intents and purposes the state boundary. In many ways it is Southern; in fact, there’s a Kentucky accent in many settlements on the Tennessee border. The resort town of Monteagle, Tennessee, topped by its own typical Southern clock tower, lies only a few miles across the state, and the Tennessee River cuts in roughly the same place where the Cumberland River does. The Ohio River was even more important in terms of trade during the early days of the United States. Kentucky was directly on the Ohio River, and trade between the two states was vital for economic success. On the Kentucky side, Louisville was the major port, and Memphis on the Tennessee side served as the gateway to the South. The Ohio River served as a major transportation route, and Louisville was an important hub for commerce and industry.

Some historians argue that the Ohio River’s significance as a boundary is also a testament to the settlers’ desire for a sense of community and shared identity. The Ohio River served as a natural barrier, separating the Eastern and Western settlements of the United States. This alignment of states marked a significant cultural and geographic boundary, much like the Mississippi River further west.

The Ohio River also provided a vital source of water and resources for the early settlements. Fishing and trade played important roles in the economy of the region, and the river served as a means to transport goods and people. The river’s significance is not only historical but also continues to shape the development of the region today. The presence of the river continues to impact trade, transportation, and environmental policies in the region.
