There are homely words, too, and between home folks like ourselves these are the ones we choose to carry our simple New Year message to you. Many thanks for your kindness, and every good wish for a Happy New Year.

Plan Celebration Of Many Holidays During New Year

The new year of gold will be in full swing when the Year 42 will close with the usual amount of festivities, which promise to make the occasion memorable. A number of towns will have gala celebrations, with the help of local boosters and civic organizations. The day will bring back to the memory the brave men and women engaged in the national defense. For all those who are looking for a new year's resolution, it's time to make a positive change. The New Year is a time to start anew and make a difference.

Money Talks

Frederick Stowm, professor of English at the University of Louisville, was asked about the economic climate. He mentioned that the current economic situation is complex and multifaceted. The United States is now at war, and the outcome of the war is uncertain. For the past 50 years, the United States has been going through economic cycles, and these cycles can be unpredictable. The current economic situation is no exception, and it's important to stay informed and make informed decisions.

Other things we may expect are new opportunities for education and business. New opportunities may open up in the field of technology and the arts. The current economic situation may also bring about new challenges, which may require creativity and innovation. It's important to stay informed and adapt to the changes.

Some tips for making a new year's resolution include setting realistic goals, breaking down big goals into smaller ones, and celebrating small victories. It's also important to stay positive and maintain a growth mindset.

We welcome the New Year because we know it marks the beginning of another chapter. The stage is set for another act. Looking forward we see the things we might have done, but did not. Looking forward we see the things we plan and hope to do. May the sun shine brighter, the days grow longer, may new hope inspire and cheer us. The Year of Grace One Thousand Nine Hundred and Forty-two is at hand, and we welcome its arrival.

We also welcome the New Year because we know it will bring many new opportunities to be of service to you, and to strengthen through this service our appreciation of your friendship. We wish you a very Happy NEW YEAR.

WHAT IS THE PATTERN?

By Beth Taylor

The world is a Patterns to Life. Romance has some vague and indefinite places where it essentially starts or finishes. But whether it begins or concludes, if it makes its imprint on the world it leaves a pattern that is worth noticing. That pattern should be a hard one to be overlooked.

Looking at the earth the plot is apparent all over the world. The main plot line is love. But on this plane where relationships are written, it is often difficult to discern a distinct line. Relationships in European, American, and Chinese families can vary widely.

But the plot doesn't end there. In the plot's development, relationships between species, among continents, and between cultures have evolved.

So it is in the present crisis. We are heading to meet and overcome the stress of hatreds, the fever of war. We must take steps to protect against the spread of violence. We must look up and not down. Look up to the future with faith and hope.

Let us drink to the better, happier days we know must lie ahead in 1942. And here's to you, our noble friends and customers! Good health, good cheer, and a Happy New Year!
