Statement To The Public About Parking Meters

In an effort to eliminate parking problems in various parts of the city, we wish to announce the plans of the municipal government to install parking meters in selected areas. This action was taken after careful consideration and study of the problem. We believe that parking meters will help to alleviate the congestion and make it easier for drivers to find parking spaces.

The meters will be located in front of businesses and public buildings. The cost of parking will be charged to drivers and will be based on the time they park. The rates will be set at a reasonable level to encourage the use of parking meters.

We urge everyone to support this program and to comply with the rules and regulations governing the use of parking meters. We believe that this will improve the overall quality of life in our city and make it more pleasant for all who live and work here.
