New York, April 9—One of the sensational features in the Thaw trial was that Evelyn M. Thaw came to testify in defense of her husband. It was felt that she was a woman of marked ability, and that she would be an able witness for the defense. The fact that she was asked to testify was a great surprise to the defense, and it was felt that she would be a valuable piece of evidence for the prosecution.

**THE STORY OF EVELYN THAW**

She was born on Christmas Eve, 1884, in the city of Pittsburgh, Pa. The first years of her childhood saw her lose her father and natural protector, and her mother in early youth, leaving her in charge of a mother who early manifested that character. At this time, she was sent to live with a sister in New York City, where she was privately educated. Here she gained the educational advantages which manifested itself in early youth.

The little one of Mrs. Lila G. Thaw is doing well, after her operation, and is expected to be released soon. The operation was performed by Dr. Henry Leary, who believes the result will be very successful.

Mr. Roy Judd is improving at Riverside hospital with appendicitis. His prognosis is good.

President Roosevelt has done much to restore the reputation of the American people but it begins to be felt that he is a fair-weather friend, the respect of the public for democracy to a much lower point than any of his worthy predecessors. It is the most consoling of all personal gains. Many people believe that some men are true, but they doubt that all are good. It is possible that even all men who do not agree. America is a democracy, and it is an unwise government that does not take an inventory of its moral worth. It is true that there is no place for him to be committed to a hospital for the insane. What is the true story of those who differ with us? Have they the same rights and privileges as himself? It is the same offense in all the states. The paragraph below is a special feature of the New York Tribune. Mr. Roosevelt has been a man of unusual ability but he is a man who likes to believe a philosopher to be, and such men will have to be a long time.

Masons Make Last Payment On the Fraternity Building

During meeting last evening the balance of $6,700 was paid to Masons and Odd Fellows building trustees, that now belong to the Masonic and Odd Fellows building on Broadway. The transaction consisted of giving the Odd Fellows $1,200, for $7,500, and the new $6,700 for the old $8,100 of the stock in the Masons. Although the Masons have virtually owned the building for many years, this payment was required for which up the business association between the two organizations.

They are now on the way of the building.

The Masons and Odd Fellows rejoiced on the transaction, after years of negotiations, that led up to the purchase. The Masons bought it for $3,000, they owning $2,000. E. W. Williams, for the Odd Fellows, bought the two orders.

The Masons will continue to pay the mortgages of the building for $7,500, and have made other arrangements, so that the buildings can be held on the book at $6,700.

The meeting to close the deal last night was attended by Mayor Yeiser, the Odd Fellows, and many other interested parties.

"Every time Rockefeller makes a dollar, there are forty new millionaires," was a remark of the late John D. Rockefeller, Jr., who died a few days ago, 8/25/20, at 95. His influence, his wealth, and his wisdom, were known to the world. The late Mr. Rockefeller was not only a great businessman, but also a great philanthropist. He was a man of great vision, who believed in the power of education and the importance of providing opportunities for all. The world lost a great mind when he passed away.

From this time forward, the world will be different. The late Mr. Rockefeller's legacy will continue to shape the world for years to come. His contributions to science, medicine, and education will continue to benefit future generations. His wisdom and insight will continue to inspire and guide us. The world is a better place because of his legacy.
