Red Sphere Grows

By Bertram W. Newton

The influence of the Bolshevik revolution in Russia has been growing for a number of years, and the international situation today is markedly different from that of the pre-war period. The recent victories of the Red Army in Poland and the Soviet Union have created a new military power in the world, and the consequences of this development are likely to be far-reaching.

"State" Plan Dropped

By Robert E. Oakes

The "State" plan, which has been widely discussed in Russia, has been officially announced as being dropped. This plan was designed to establish a totalitarian government in Russia, and to suppress all political activity outside of the state. The announcement of the abandonment of this plan is good news for the democratic nations of the world, who are now free from the threat of a new world war.

Polish Opposition Candidate Injured

The Polish opposition candidate, Mr. J. A. Jakubowski, was injured in an attack by a group of black-shirted men. It is reported that he was beaten and stabbed, and that he is in serious condition. The incident takes place in a period of political tension in Poland, and is likely to cause further unrest in the country.

BOMBER DOWNED

On the morning of January 28, a British bomber was shot down over the Soviet Union. The pilot and crew were killed in the crash. The incident takes place in a period of increasing tension between the Soviet Union and the Western powers, and is likely to cause further international problems.

"As Much as $50 on Some Models"

Effective Immediately

A Statement by Henry Ford II

"Although more than one million of our custo-

mers are waiting for delivery of their cars at

present prices, we are immediately reducing the

price of every Ford car—some models as much as

$80."

"This is our "down payment" toward a contin-

ued high level of production and employment in

the months ahead. We believe that the salutary

impact of precedent action is needed to halt the

inflation of mounting living and wage prices

and to remove a sound base for the hopeful period

of post-war production we are now aiming.

"Let me review briefly the considerations which

have led us to take this important step.

"The Ford Motor Company is in the main pro-

duction business. Mass production depends upon

large markets. It will continue to shrink only if

it can produce more and more and more and

people can buy. Large markets begin to disappear when prices rise.

"The un-American spiral of mounting costs and

rising prices has hurt everybody—some groups more than others. Many have been

helped by post-war wage increases, but have had to

bear the burden of resulting higher prices. Al-

dey, millions of America's families are unable to

buy the things which, in normal times, make up

their standard of living. In the long view, we

can see inflation. In the long view, there is danger

of depression.

"The period since V-J Day has been an unhappy

and costly period of recovery or post-war produc-

tion. Ford Motor Company has lost mil-

ions of dollars since V-J Day, even after all tax

assumptions.

"The crisis of this wild aftermath of war

seems to have been passed. Our own production,

though still limited by material shortages, is now

smaller. Productivity of our employees, which hit a

new low during the period, seems to have started

to recover. The productivity of our employes, which hit a

new low during the period, seems to have started

to recover.

"We hope, as we move forward, that we will be

able to reduce prices further, and that we will not

be forced to have to charge them again for compen-

sation for cost increases."
