Winter Returns Thruout State; Roads Are Icy
Near Blizzard Conditions In plains States
EUROPE COLD, TOO

Snow ranging from a trace to as much as four inches in the extreme eastern portions of Kentucky and in the mountains is reported on this morning. Most of the state is reported under a dusting of snow. Temperatures generally were in the single figures and the breathing hard work. Over the state today, with winds from the northwest and north.

Snow was reported in many parts of the state. Roads were hazardous in many parts of the state.

The weather bureau predicted that the cold weather conditions prevailing in the plains states, winds of from 25 to 30 miles an hour, would continue throughout the state until Thursday.

State's Attorney Observes His 75th Birthday At Work

J. H. Donovan, state's attorney, today observed his 75th birthday while up to his usual work.

Donovan, who has been state's attorney since 1928, is known for his legal acumen and has practiced law for over 50 years.

Donovan was introduced to the audience at a luncheon meeting in the Century Club in Lexington, the 600-acre forest in Breathitt county, which Donovan described as one of the state's most beautiful.

The audience was interrupted temporarily by the announcement by the pastor, the Reverend J. H. Donovan, of the First Baptist church, that a patient had just arrived at the hospital.

Donovan is known for his dedication to public service and his commitment to justice.

The audience was then given the chance to ask questions, and Donovan answered them with his usual wisdom and integrity.

The meeting ended with a round of applause for Donovan, who has served as state's attorney for over 50 years.

Donovan's career has been marked by his commitment to fairness and justice, and he is highly regarded by those who know him.

Manufacturing Crowds Farming As Kentucky's Chief Provider Of Jobs, Committee For Ky. Says

Manufacturing is the state's most important economic activity, according to the Ky. Council for Manufacturing.

The council, in its annual report, said manufacturing is now the state's largest employer, providing jobs for over 250,000 people.

The council's report, which was presented to the legislature on Wednesday, said manufacturing is more important to the state than ever before, and that it is essential to the state's economic development.

The council's report also said that manufacturing is highly competitive, and that it must be able to compete with other industries.

The council's report said that manufacturing must be able to compete with other industries, and that it must be able to compete with other industries, and that it must be able to compete with other industries.

The council's report also said that manufacturing must be able to compete with other industries, and that it must be able to compete with other industries, and that it must be able to compete with other industries.

The council's report also said that manufacturing must be able to compete with other industries, and that it must be able to compete with other industries, and that it must be able to compete with other industries.

The council's report also said that manufacturing must be able to compete with other industries, and that it must be able to compete with other industries, and that it must be able to compete with other industries.

The council's report also said that manufacturing must be able to compete with other industries, and that it must be able to compete with other industries, and that it must be able to compete with other industries.
Here's Hoping—

A report appearing in the Kentucky Educational Association's newsletter, recently released, may interest you. It is entitled, "Periodic Evaluation in Kentucky's Educational System," and has the subtitle, "A Study of Kentucky's Children, Their Teachers, Their Schools, and Their School Board's Salary Structure." The report, which is 24 pages long and costs 25 cents, is available at all Kentucky schools and may be obtained through your local school board. The study is based on the results of surveys conducted in 24 Kentucky districts, with the exception of the Sixth District.

Just One Day Early

The opening of the Fourth Estate is an annual event of the year. This year, however, the date was changed from February 4th to February 5th. The reason for this change is not known, but it is believed to be due to a typographical error.

With The Fourth Estate

The Fourth Estate is a national organization that promotes freedom of the press. It is the oldest and most respected newspaper organization in the country. The organization was founded in 1919 by a group of journalists who believed in the importance of an independent press.

Unusual Shortcut

A man was seen walking through the Forest Park area of St. Louis, Missouri, on a cold winter day. He was carrying a large bundle of newspapers under his arm and was wearing a heavy coat and hat. It is not known how he got there or where he was going.

THOMAS A EDISON 1847-1931

How genius with a charred string
L I G H T E D A W O R L D F O R B E T T E R L I V I N G

In Thomas Alva Edison's laboratory a bell jar was
dumped free of air. In this vacuum a charred cotton
string was suspended from two thin wires. Edison
closed the switch that sent electricity through the string.
It glowed brightly. The electric light was born.

The light which came out of vacuum built the great
electric industry of the United States, an industry that
today gives the American workman more cheap elec-
tric power than is available in any other nation. Because
dof this abundance of power, American workmen pro-
duce more goods, earn more money, and work shorter
hours than any other men in the world.

We have a new world. We Americans have develop-
it ourselves: with initiative, with courage, with
intelligence and ingenuity, and with hard work.

Thomas Edison grew up in a young nation accustomed
to hard work and few comforts. He knew why he
struggled because he knew the world would welcome something better. We,
our followers, feel that it is our responsibility to
and expand the usefulness of his contributions.

Thomas Edison's genius contributed to the welfare of all mankind, and on
February 11 the world will commemorate the 100th anniversary of his birth.
