The police and the department's leaders claim, if we read the data, there is a perceptible increase in crime. The cause of this increase has not been determined. However, the theory is that the increase is due to the number of people moving to the city and the lack of police manpower. The police department is working on this issue, and they have stated that they are taking steps to increase their manpower. They are also working on improving their training and equipment to better serve the community.
