## GROWN-UP—

No one excuses a strong, grown-up man for failing his responsibilities as a man. A nation, too, stands like a man and faces the world.

There are those who think that the United States is not grown up. To them ours is a child nation, fit only to play alone in the back yard, carefully avoiding the other boys who want to play for their marbles.

Other nations have fallen with that epithet. From the New York skyline to the Golden Gate bridge, the United States is a giant power crammed into a continent. We need only to believe it—to believe it as firmly as the Nazi powers believe in their own way—to really become the powerhouse of freedom.

We have the resources. We have the food. We have the machines. We have the men.

Let us look at the real picture in our mind's eye. Look first at the pictures of oil refineries and pump stations—at our ripe fields of wheat—at our mass production in aircraft factories and allied projects—at defense workers going in solid lines to their jobs. Here is the power.

Let us look at the capital in Washington, symbol of democracy and the powerhouse of freedom. Because it is our drive, our American spirit that makes it go; our American conviction, our American dream; our American devotion to the four freedoms.

We are grown-up enough to believe that every man has the right to live decently: free from discrimination because of color, creed, or place of birth; free to worship God as he sees fit; free to speak, to say how he shall be governed. These are the things we believe in. We are man-sized in these beliefs.

We are man-sized, too, in strength. But we have not yet grown up in confidence, in the conviction of that strength.

We need conviction. We need a nation united in confidence. We need only faith and the will to take our place in a free world. We need to put the powerhouse of freedom into high gear. God grant these to us now, because we may not come this way again.

We imagine the conquered peoples of Europe get a kick out of the song "There'll Always Be An England."

Every soldier in the Russian army has been killed or captured in the Berlin dispatches at least twice.

Things could always be worse. Some people owe twice as much as you do and don't worry about it in the least.

England probably believes that opportunity knocks and knocks with Russia fighting for the breath of life, they send over a few bombers.

Why worry about the Soviet's religion when it is at least as good as the German neo-paganism. There will be time to foster religion after Hitler is gone.

There is enough steel in a battleship to make 30,000 automobiles and enough death in the 30,000 automobiles to make the battleship look like a dove of peace.

A census note says 50 per cent of the women are not sure of their husband's age or salary. It might add the other 50 per cent don't care about one, but are certain to get the other.

We like these stories about the draft and the soldier boys who go when the draft board calls. This one is about a young business man who was called into military service. He decided to hold a sale to get out his stock before going, so he put an ad in the paper. It was headed, "Everything Must Go—Including Me."

## WHAT OUR NEIGHBORS THINK

## A Full Smokehouse for Defense

The higher hog prices go the more important it is that farmers make sure of saving plenty of meat for every day in the year. High prices for meat animals always mean a much larger margin of profit for packers, wholesalers and retailers; therefore, farmers should not make the costly mistake of selling themselves short of meat for 1942 just because prices are good now. It is mighty poor business for a farmer to sell meat at 10 cents a pound in the fall and then have to buy it back the next spring and summer at 30 cents per pound. It just doesn't make sense.

The same is true of home-grown fruits and vegetables. The pantry should be filled regardless of how high the market price may be for there is no better service the farmer can render his country right now than by living at home, living at home means a full smokehouse, pantry and barn.

Time for butchering and curing formulas, and thoroughly efficient inexpensive ready-prepared or home-made curing mixtures are now available to all farmers, thus making it a simple matter to cure meat properly and quickly at small cost.

A good market always exists for first-class cured hams, sausage and bacon not raised on the farm. The same thing holds true for farm-grown and farm-processed fruits and vegetables. Get your share of this business. Southern Agriculturist.

## This Week In Defense

The Navy announced the destroyer Keeney was torpedoed while on patrol duty near Iceland. The boat was able to proceed under its own power and no casualties were reported. The President told his press conference the vessel was clearly within American defensive waters when attacked.

**Arming of Ships**  
The House passed a bill modifying the Neutrality Act to permit arming of merchant ships. Navy Secretary Knox told his press conference the Navy is ready to put guns aboard American merchant ships as soon as Congress authorizes the action. He said there are sufficient guns for all merchant ships in the world.

**Land Lease Aid**  
Navy Secretary Knox announced two overseas submarines are being transferred to Britain under the lend-lease program. The President announced lend-lease transfers during September reached a record—\$155,000,000 in equipment and services—about three times the monthly average of the past six months. The President said aid is going to Britain, China, South America, and the refugee Polish and Norwegian governments. Russia, he said, is paying in gold and other commodities for supplies sent to that country.

The President reported only 5 per cent of the original \$7,000,000,000 for lend-lease remains unused. The House voted \$271,000,000 for further lend-lease activities.

**Production**  
Price Administrator Henderson, speaking in Detroit, said although the U. S. is producing 35 per cent more than ever before—45 per cent more than in 1929—only 12 to 14 per cent of national income is going into defense. He said America is giving only one-fourth of what it is capable of giving to the defense effort.

**Pin American Relations**  
Secretary of State Hull issued a statement that the U. S. has had no connection, direct or indirect, with the recent Government changes in Panama. The U. S. has no interest in Panama.

**Army**  
War Secretary Stimson announced the Army has added 1,000 new officers to its ranks. The present 35 caliber pistol. The new weapon will allow 38 per cent additional firepower.

**TVA Is Receiving Requests for Trees For Eroded Areas**  
The Tennessee Valley Authority, through the Calloway County Extension office is receiving applications from farmers for trees to be placed on eroded areas.

**Subcontracting**  
OPM Contract Distribution Division announced large defense orders will be withheld from firms that fail to furnish a sizable part of the work. The announcement said small business must be mobilized quickly because more than 60 per cent of all industrial work is done by small firms.

**Priority Unemployment**  
The Federal Reserve Bank of New York said it is working to help small business by making it easier for them to get credit.

**Agiculture**  
The Agriculture Department reported the farm labor supply is up 16 per cent of normal and 23 per cent below last year, and said farmers have been able to keep their hired men from making industrial jobs only by sharply increasing wage rates. The Agriculture Department announced national prospects for all crops improved about two per cent during September, indicating one of the largest total farm yields on record.

**Prices**  
The Bureau of Labor Statistics index of 800 wholesale prices remained unchanged during the week ended October 11 although in the past year average wholesale prices have risen 17.3 per cent and are the highest since early 1930. Price Administrator Henderson notified tire manufacturers that they should not object to advances in consumer list prices on tire and tubes to not more than nine per cent above June 1940 levels.

**Priorities**  
Director Nelson extended priority assistance to virtually all industrial plants needing maintenance and repair parts. The order was in line with EPAAP policy of keeping all industrial machines in good running order.

**Shipments**  
Mr. Nelson suspended until March 31, 1942, the aluminum operations of the Central Pattern and Foundry Co., Chicago, because it allegedly diverted aluminum to non-defense uses such as the manufacture of slot machines.

**Shipments**  
Mr. Nelson also imposed rigid controls on certain chemicals, including some used for cleaning.

**Shipments**  
The Maritime Commission awarded contracts for construction of 49 tankers which will be the largest and most modern tanker fleet in the world. Including those building or ordered by the Commission and private enterprise, 208 new tankers of 2,500 to 3,000 gross tons will be finished by the end of 1943, bringing the total available to 568.

**Shipments**  
The Commission reported launching this week of two more of these tankers and also adopted a program calling for construction of 15 reinforced concrete barges suitable for carrying oil.

## Stella Gossip

"Let's Think a Minute," an article appearing on the editorial page in a recent issue of the Ledger & Times, expressed my sentiments concerning the mustached maniac whose name is dictator Hitler. Now the U. S. Neutrality act has been repealed. I think "Did you know" that the marriage law in Germany has been abolished. "Free love!"

John Warren lost his entire crop of tobacco by fire one night last week. I reckon a dozen barns of tobacco have gone up in flame and smoke during the last two months in Calloway County. Financial hog blasted!

Mr. and Mrs. Freeman Jones' new house, which adjoins C. E. Miller's farm just south of Stella on the original Dick-Radford farm, is nearing completion. Cloyd Baurman is directing the construction.

Mr. and Mrs. El Roneh, Miss Jessie and Herman at the wheel. First Christian Church last Sunday night. Splendid.

## Dave Collie, Benton, Declares "Times Are Better"

Dave Collie of Route 5, Benton, near Maple Spring and a brother of Mrs. Nannie Stringer who is now in the hospital, declared "Old Glory" from Brooks Chapel community of this county, was in the Ledger & Times office Saturday afternoon for a chat with the editor.

Mr. Collie, who grows quite a bit of cotton on his farm in Marshall County, was bemoaning the fact that it was necessary for him to drive to Murray to sell his cotton crop as the gin at Benton was not "buying at this time."

However, Mr. Collie in his unique type of humor and philosophy declared that "Times are getting better—I know they are because I got out of my cotton gin."

He said that he was going to pay his taxes, buy a pair of overalls and a can of pink salmon. Heretofore after selling my cotton and paying for seed and labor I would go back home broke and would wonder just why I grew cotton anyhow.

In leaving the office, Mr. Collie assured the editor that if he would come down to his Marshall County home he would hear some fine and paying for seed and labor I would go back home broke and would wonder just why I grew cotton anyhow.

Mr. Collie said he was going to pay his taxes, buy a pair of overalls and a can of pink salmon. Heretofore after selling my cotton and paying for seed and labor I would go back home broke and would wonder just why I grew cotton anyhow.

## LIVING FROM THE FARM

By JNO. T. COCHRAN, County Agent

Calloway farmers are asked to marshal their strength to produce more food in 1942 than they have ever produced before. Why? Secretary Claude R. Wickard answered: "To help beat Hitler and the Nazis. Or if you wish to put it another way—we want that food to keep England on her feet."

Everything we do to help England we do to help ourselves. Thus far we have gotten off lightly. The British have endured the hardships and made the sacrifices for our common cause. After all this is our war!

In responding to the challenge to produce more food, Calloway farmers will help themselves by helping their country, since prices of farm products are at the highest level they have been for several years. Further, the Secretary of Agriculture, in accordance with Congressional authorization, has stated that, within available funds, prices of evaporated milk, dry skim milk, cheese, eggs, chickens, and hogs will be supported at not less than 85 per cent of parity during the period ending December 31, 1942.

Calloway farmers are asked to produce in 1942: 10 per cent more milk or 66,000 gallons above 1941. This is a big task and every cow in the county will have to be fed and handled so as to get maximum production from her if we reach the goal. Prices are favorable for feeding and farm people must put their country, Secretary Wickard said. "Food will win the war and write the peace."

Further, Calloway farmers are asked to produce in 1941, 14 per cent more eggs or 118,000 dozens above what they produced in 1941. This too is a big task and every hen in the county should be fed and handled so as to produce maximum production for 1942. Put them to work that this county may do this part.

CHESTNUT GROVE SCHOOL

We are giving a pie supper at our school house Friday, night, October 24. Every one is invited to come out. We are planning music for those who cannot eat pie. Come out and help us enjoy this occasion. We are going to use the proceeds for our hot lunch project.

Mr. Otis Lovins will auction our pies and also explain to the petting school the Amendment to the Constitution which will be voted on in November.

Our school term is half over. We hope the remaining half will be as successful as the first half.

We sold nine boxes of candy within two weeks and school children received our flag, ball and horse shoe game, which we are enjoying very much.

We have our room decorated for Halloween.

We are very sorry Dorothy Hurt, our only eighth grade student, is unable to attend school. We are missing her and hope she will soon be able to return.

We have had excellent attendance thus far.—Bertha Scott.

F. H. Howard of Harlan County has rebuilt his farm in three years through the use of lime and phosphate, pasture mixtures and cover crops. County Agent Gray H. Williams says the fertility has been increased at least 50 per cent.

# ON THE RECORDS

By F. E. INGLIS

To many music-lovers a true appreciation of the music of Johannes Brahms comes late. There are several reasons for this. In the first place, Brahms' music is complex, an interwoven web of several melodies. Also, his strict adherence to formal perfection precludes the excitement and novelty of program music. Yet these very barriers to any easy acceptance and love for his music make guarantees of lasting listening pleasure in repeated hearings of Brahms' finest works. At first the listener must make a conscious effort to meet the composer's half-way. Once the music is assimilated, the fascinating tonal "new world" that Brahms gives us more than recompenses for the effort we have expended and becomes a source of continued delight.

Currently, Victor releases Brahms' awe-inspiring "Double Concerto" for Violin, Cello and Orchestra, Op. 102 as played by Jascha Heifetz, Emanuel Feuermann and the Philadelphia Orchestra conducted by Eugene Ormandy. The only previous recording was an excellent one (now withdrawn) by Jacques Thibaud, Pablo Casals and the Barcelona Symphony Orchestra under Alfred Cortot. Casals' warmth of tones

Jascha Heifetz and superb musicianship can never be equaled, but otherwise the present release is superior on all counts. Thibaud's thin tone is well displayed by the magic of Heifetz's bow. Feuermann is no mean shakes as a cellist and the Philadelphia Orchestra is far superior to that of Casals' own Barcelona group. The recording and balance is all that anyone could ask for. Highly recommended.

Ellington: Les Brown and his Orchestra offer two tunes from Ellington's musical—"Jump for Joy." The first, "I Got It Bad and That Ain't Good" is one of the Duke's best torch-ballads. The reverse is "Nothin'"—fine swing with amusing lyrics. Betty Bonney does a sweet job with the vocals on both (Okeh).

## How Phosphate Can Be Applied Under The '42 AC Program

The material must be applied as a top dressing to, or in connection with a full seeding of perennial legumes such as alfalfa, alsike clover, sweet clover, white clover, red clover, kudzu and lespedeza sericea; perennial grasses such as Kentucky bluegrass, orchard grass, timothy, reedtop, meadow fescue, smooth bromegrass, Reed canary grass, winter legumes such as crimson clover, vetch, Austrian winter peas, and bur clover; annual lespedeza; erialaria; annual ryegrass; green manure crops in orchards; gardens for home use; or permanent pasture.

Credits will not be given for the application of superphosphate to a soil-depleting crop or to any of the "42" named crops when seeded or "grown" in connection with a soil-depleting crop, unless the material is applied after the soil-depleting crop is harvested or in the case of winter legumes after the soil-depleting crop has matured.

For application of superphosphate as a top dressing to winter legumes, credit will be given only if the material is applied not later than December 1, 1941. All "prospective" who are using superphosphate should adhere to the above procedure.

The AAA office has a small amount of vetch seed on hand to be used as a grant of aid.

# CHURCHES

## METHODIST CHURCH, NOTES

Sunday, October 26, 1941

The pastor will preach at the morning worship hour, 10:30 o'clock, on "God Demands First Place." From the text: "But make me there-of a little cake first." 3 Kings, 17:13. Possibly this is the most presumptuous request in the Bible. Read the whole story that you may get its meaning.

The evening service is called in that our people may cooperate with our friends of the Christian Church in their revival campaign. We hope that our members will find it possible to attend the services at the Christian Church during these days of the revival.

Our Sunday-school at 9:30 invites all of every age and station in life to share its blessings and fellowship. You are "missing something" if you are not in the Sunday-school.

Our young people meet at 6:45 each Sunday evening and your children might profit by attending this service.

We wish to remind our people that the Annual Conference, held at Dyersburg, Tenn., 26th, Wednesday, November 12, so we have only two more Sunday after this to close up the work of the conference year.

Our good stewards meet on Monday night, October 27, to perfect plans for the fourth quarterly conference on Wednesday night, November 5.

Fog more than four years we have met at our quarterly conference every penny due on the budget of the church, and we hope to be prepared to report "OUT IN FULL" on Wednesday night, November 5.

In order to do this, every member of the church will have to do his duty. We appreciate this fine cooperation we have had from the membership during these five years and we hope that this may continue.

You might ask yourself: "What sort of a giver am I?"

"The Two Givers" Who little gives, knows not the joy of giving. His shrunken soul the bliss of heaven foregoes. For earth, gain, and daily harder grows. His task the task of giving.

Who gives his all and gives with spirit willing— Yea, gives himself and mourns a gift so slight? Shall end in sacrifice supreme delight. A heavenly joy the emptied heart.

# "Telling Kentuckians of Kentucky"

(This is one of a series of articles sponsored by the Kentucky Press Association which in 1941 would tell Kentuckians of Kentucky should tell the world in 1942—Sequel-Centennial Year.)

(By Marion Rust)

In 1750, when Virginia was a Royal Province of the British Crown, the Loyal Land Company of Virginia sent Dr. Thomas Walker with five associates, Ambrose Powell, William Tomlinson, Colby Chew, Henry Lawless and John Hughes, across the Appalachian Mountains into the wilderness of Kentucky to locate lands suitable for settlement.

They left "Castle Hill," Walker's home near Charlottesville, March 6. After struggling through the rugged mountains, covered with primitive forests and dense undergrowth down through the southwestern end of the state and through eastern Tennessee, then a part of North Carolina, they observed the dip in the mountain range now known as Cumberland Gap just east of the present site of Middleboro. Pressing on through this gap they came on down northeastward through the

great gorge at Pineville where they discovered and named the Cumberland River after the Duke of Cumberland. Due to heavy rains they could not cross at the aged old Cumberland Ford and accordingly traveled on down the south side of the river.

Ascending Brush Creek and Little Brush and on over the Divide they descended Swan Pond Creek to the river again. Finding it too deep to ford they made a bark canoe and crossed on April 23. After wading through the low marsh land and up onto a knoll they, in the next seven days, built a house 8 feet wide and 12 feet long; planted some corn and peach stones as well as killed many bears, curing the meat to use for food in further travel.

On April 30th, they left for continued exploration down through central and eastern Kentucky. Returning over the rough mountainous area of West Virginia, they reached their point of starting on July 13th. During the journey of 4 months and 7 days they had killed 13 buffaloes; 8 elk; 53 bears; 20 deer; 4 wild geese and about 150 wild turkeys. Dr. Walker states in his daily Journal that they could have killed

ed three times as many had they so wished. That Kentucky's First House was built on this site is verified by folklore, proximity of the spring and Dr. Walker's Journal, a copy of which is available at the office of the Park custodian.

The Kentucky First House replica is a faithful reproduction of the type of pioneer log hut of the period. Its roof poles hold the oak clapboards in place. The door is made of rough slabs pegged together and hinged in the early pioneer fashion without iron. Other items added are the one-post bed, tripple decked; the hinged wall table; three-legged stools; and outside one is amazed at the skinning pole and salting trough.

The visitor gains respect for his ancestor. He learns from the replicas that he was strong, sensible, sturdy and unselfish. Here one becomes thankful for the very great heritage of his forebears in these days of stress. No one visiting this historic park will regret it. Come and bring others. The children will find swings, teeter boards, and a slide for their entertainment. Adults will enjoy the nearby mountains and the beautiful valley and will take stock of their blessings.

Gibbs said: "We would bat their passes down and yet some of the Buffing 'Green' boys would get under them. Another thing, it seemed that all their 'fumbles' would bounce back up in their arms, and if we mislaid, we had to chase it down like a rabbit."

The Hollanders are in good shape mentally and physically and will be ready for Marion here Friday night.

Training School Play To Be Given Nov. 6  
The junior class of Murray Training School presents "Mystery at Midnight," a three act mystery thriller, on Thursday night, November 6, at 7:45 in the little auditorium of Murray State College.

The cast is as follows:  
Rathbun: Wentworth, Buron Richardson, Mrs. Wentworth, Penelope Young, Barbara Cory, Dorothy Nell Trevathan, Alma Cdry, Larline Cunningham, Cloyd Parker, Harold Glenn Doran, Dick Lawrence, Joe Windsor, Emergence Washington, Sally Ann McMillen, Rasmus: Washington, Allen Ervin, Letty Flanders, Frances Farris, Oscar Jansen, Marvin Harris. This play is being coached by Miss Emma Sue Gibson of the Dramatics department of Murray State College.

Bowling Green's short pass right over the line of scrimmage was a "spider in the milk" for the Tigers last week. The pass play was so simple that the Murray backs haven't as yet figured out how it worked. Buchanan and

Three defeats in a row has apparently cast a cloud over the "Hoses," but never fear for cloud will have disappeared before Homecoming appears next Saturday and the Blue and Gold will be on the field fighting every inch of the way because Thorougbreds are made that way and nothing can change it.

The "Bride" wall is strong enough to hold down high scoring efforts from any opponent and the backs are good enough to get into pay dirt now and then. Just give the boys time to get accustomed to changed tactics, new set-backs in the coaching staff and get rid of some injuries, and they will do some winning on their own hook.

Did TPI quit after Vandy had knocked their pants off to a tune of over 40-0? Not hardly! They came bouncing back to take it out on the Breeds. Therefore, the Murray State gridgers have a little bouncing back to do of their own work. Homecoming day will be about the time to see some of it.

Nothing thing, too, Murray's opponents to date have been no set-ups—Eastern, Union, TPI, all good clubs and going strong. And Murray isn't through with strong opponents yet. Memphis State, another foe for the Bluebloods, slugged Union down 7-0 on Union's own field and there is Morehead, next Saturday, Delta at Cleveland, Miss. October 31, Memphis State at Murray, November 8, Middle Tennessee Teachers at Murray, November 15 and Western at Bowling Green November 22. Yet, tough enough schedule for any one.

The writer sticks with the Thorougbreds, win, lose or tie, for Thorougbreds never quit and a fellow who can't see good players

# The Birthday Of The U. S. Navy

One hundred and sixty-six years ago a committee of three men, John Adams, Silas Deane and John Langdon, purchased the merchant ship Black Prince of Philadelphia. Renamed the Alfred, this vessel had the distinction of being the first ship in the United States Navy.

These men were appointed by Congress, through the efforts of George Washington, as a Naval Committee responsible for the purchase of two vessels. An original appropriation of \$100,000 was increased several days later, making possible the purchase of four ships in all—the latter three named the Columbus, Cabot and Andrew Doria.

The Date, October 27, on which Congress in 1775 acted to establish our Navy, is celebrated annually as Navy Day. The purposes of Navy Day are to pay a deserved tribute to the splendid service the men in the Navy have rendered in making and keeping us a nation and to better inform the American people of what our Navy is and does for them. When originally chosen, October 27 marked not only one of the most important dates in U. S. Naval history, but also the birth date of Theodore Roosevelt, whose life was devoted to furthering a sound naval policy for the United States.

In its early days, the history of our Navy was a turbulent one. During the revolutionary period 73 vessels of all descriptions were used, but through sale, capture and destruction only one was left in 1865 and during that year Congress abolished the Navy, leaving the burden of the protection of our country in the hands of an army of only 80 men. In 1794 our Navy was revived by a Congressional Act authorizing the construction of several frigates to deal with the Algerine pirates and the first U. S. Navy Department was established four years later. One of these new frigates purchased as a result of this act of 1794 was the Consti-

tution—with the Constellation, United States, President, Congress and Chesapeake making up a Navy which, through successful encounters with French cruisers and privateers, established an enviable reputation for itself. In 1801 a series of engagements with the Barbary states and the ensuing treaties rendered commerce in the Mediterranean safe from attack and ended the payment of tribute by Americans.

The outstanding performance of our Navy and privateers during the War of 1812 insured freedom of the seas for our commerce and further increased our national prestige abroad.

The effective work of the Navy during the World War is still fresh in the minds of most of us. The astonishing fact that no American soldier escorted by the U. S. Navy lost his life in transit across the Atlantic amazed even those in the highest positions of authority.

All American participation in the life of the community of nations must find its expression through traffic on the seas. Ships, both commercial and naval, are the means of giving effective outlet to America's right to participation in international trade and politics.

## Arnett Makes Statement on Amendment

There is a wide variation in the ability of the different counties in Kentucky to provide an adequate educational program. If the maximum tax rate were levied in Jackson, Clinton, Elliott and Wolfe counties and added to the per capita of \$12.70 they would have approximately \$15.00 per child while Woodford County with the same procedure could raise \$80.00 per child. Calloway County with the maximum tax rate has approximately \$25.00 per child for its educational program.

About ten years ago the legislature recognized this difference in ability of the county districts to maintain an adequate school program and to give every child an equal opportunity to get an education. Therefore created by legislative act, an equalization fund to be distributed to the poor counties on the basis of need. This money was distributed one year and Calloway County received \$21,331.01. The next year the law was declared unconstitutional because the Constitution provided that state school money should be distributed on the pupil census basis.

Constitutional Amendment No. 1 is submitted to a vote of the people on November 4, 1941, so that if it is approved the legislature may create an equalization fund not to exceed 10 percent of the total school fund to be distributed to the poor counties on the basis of need.

In my opinion this amendment will mean much to the schools of Calloway County and should have the wholehearted support of every person in the county that is interested in our boys and girls.

Supt. Calloway Co. Schools

## CAUTION, SAFETY CAN PREVENT HUNTING MISHAPS

FRANKFORT, Oct. 22.—"Receiving the full charge of a 12-gauge shotgun in the back of his head when his brother, Normal Mallick, 20, of 319 E. Jefferson, stumbled while the two were dove hunting near Shepherdsville yesterday. Karen Mallick, 27, 317 E. Walnut, barber, was dead today." So reads an article carried in the Louisville Times, Monday evening, October 13.

Stories of many accidents of like nature will be carried in the papers of the state during the next three months. S. A. Wakefield, director of the division of game and fish pointed out today, and urged hunters to use extreme caution and safety while handling firearms and while roaming the woods and fields of the Commonwealth during the hunting season.

"Nowadays we hunt mostly for the pleasure of it, and it takes only one accident to mar forever the memory of a day's hunting and the pleasant companionship of what might have been a happy hunting trip," Wakefield explained.

The Division passes on TEN COMMANDMENTS OF NIMROD: 1. LAW which every hunter should memorize and observe while in the field.

1. Handle every gun as if it were loaded.  
2. Be sure of your target before you pull the trigger.  
3. Never leave your gun unattended unless you first unload it.

4. Carry your gun so that you can control the direction of the muzzle when you slip.  
5. Always make certain that the barrel and action are free of obstruction—but be sure to look into the breach of the gun not the muzzle.

6. Never point your gun at anything you do not want to shoot.  
7. Avoid horseplay while holding a gun shot at a flat hard surface, such as rocks or the surface of water.

8. Instruct your children in the proper use of firearms and explain the dangers of the weapons.  
10. Do not mix gunpowder and alcohol.

## Potato Growers Receive Help

The directors of the St. Matthew Produce Exchange at a meeting during the first of August requested help from the chain stores, independent merchants, hotels, restaurants in moving their bumper crop of Kentucky Cobscook potatoes. The large crop of potatoes throughout the United States caused Kentucky potatoes to drop to such a low price level that it was no longer possible for them to be harvested and expect a fair return.

President of Jefferson County Farm Bureau, Fred Stutenberger, presided and appealed to all concerned to help the Kentucky Growers. He called attention to the fact that Kentucky Potatoes had formerly been shipped to other markets, but that these markets were glutted and the growers would have to sell their crop at home or let them rot in the fields. Buyers of the Kroger Grocery and Baking Company, The Great Atlantic and Pacific Tea Company, and the Steiden Stores responded by purchasing the total of 115 carloads of Jefferson County Potatoes and the price rose from \$1.10 per hundred pounds to \$1.40.

In order to do this it was necessary for the chains to put on a Kentucky Potato Campaign and the result speaks for itself. They printed huge banners 3x4, used window cards, and advertised in newspapers to call to the attention of the consumer the necessity of helping Kentucky Growers.

These producer-consumer campaigns are used only at the request of the growers and some of the others that brought sensational results are the Post-cereal Campaign, Eat More Lamb Campaign, and one that will soon make its appearance is the Apple Campaign.

## Kentucky Farmers Being Pulled Out of Mud Fast

Kentucky farmers are being pulled out of the mud fast at a rapid rate by the golden flow of automotive tax dollars now being collected from the state's motorists at a record-high level. Herbert L. Clay, secretary of the Kentucky Petroleum Industrial Committee, said today.

The 1940 census of the federal government shows that 40.5 percent of the farms of this state are located on unimproved dirt roads, as compared with 47.6 per cent, in 1930. Clay said that the state has made remarkable progress during the past decade in pulling the farmers of this state out of the mud.

Striking progress also was made in extending hard-surfaced highways into all sections of the state. In 1940, the census shows, 23.4 per cent of all the farms in this state were situated on hard-surfaced highways, as compared with only 15.2 per cent in 1930. Most of the farms in Kentucky are now either located on good roads or are within comparatively short distances of such highways.

### Calloway Answers Dictator With Lime

If you are one of the many persons who are wondering where all the agricultural lime that is seen on the roads of the county these days is going and just what it is all about, here is the answer: It is a part of the Calloway County farmers' answer to the Dictator's taxes.

Elsewhere in this issue is an article by County Agent J. T. Cochran calling your attention to the fact that Calloway County farmers are being asked by our additional trucks on short term production in the county 18 percent in 1942 over the production of 1941. Farmers know that the use of lime will aid materially in bringing about this increase, in that the use of limestone will increase both the quantity and quality of pasture and hay produced per acre.

At press time some 8,500 tons of limestone had been ordered this fall. Of this amount 6,500 tons had been delivered or was in the hands of truckers for delivery. B. W. Edmonds, chairman of the Calloway Lime Cooperative, said yesterday that the efforts of the Lime Co-op; Carlin, Irby, trucker, and County Agent Cochran had resulted in the operation of eight additional trucks on short term contracts. This makes a total of 17 trucks bringing limestone into the county from the TVA quarry at the rate of 300 tons per week.
