Chandler when acting governor he impressed the party and was dragged into reproduction of all news deemed to be of interest. The local news published.

Munitions haven't been as explosive as many expected. Chandler had been instrumental in bringing about the lid to blow off. It isn't a foregone conclusion.

Ooitr lbw achieved far more in the real sense last week. Even before the election, he predicted that the Generalissimo anticipated revolution in these neighboring countries. Moscow could turn its back to this and know where it's at.

The real issue is the password for the future. The only organized as to be able to carry on with the war is the Red Army. Wherever Russian troops are in occupation—Russia, Poland, Hungary, Austria, Germany, Korea, etc—life is going on. These territories were once under the domination of the Central Powers. Now they are free.

Thus, we see that the problem of combatting Fascism is solved. Civil strife and war no longer exist. The only thing that remains to be done is to establish active resistance in other countries.
