THE STATE FAIR was something really BIG. Ask any youngster who saw the animals, the exhibits and events. Mrs. Lydia Travis tells about the fair in the article below.

Sheep, Ducks Capture Fancy of Fair Visitor

Present at the Kentucky State Fair last week was Rowland Bishop, manager of the Ohio State Fair, who said, "Fairgoers are interested in animals first of all." James Blount of our State Fair must have agreed with him for the mighty Freedom Hall was thrown open to cattle judging. I counted 115 animals in the arena at one time. Ex-Governor Thornton of Colorado, Eisenhower's friend, who judged Polled Herefords, said, "This is the most fantastic set-up I've ever worked in."

I cared not a straw for the animals but for the memories they awakened. As I do every year I hurried past the hog pens. There I saw an Illinois man fairly crowing because he had won the open championship while a man from Springfield, Ky. had won state. Like a Birmingham sheep breeder of 35 years ago they had their wives tagging along. Their sheep were sheared and kept clipping, clipping as if to keep busy. I told the owners I once won at the Marshall County Fair with a lamb named Velvet that went to the state fair. They thought it funny that she won without "grooming" and one said he would name his next entry Velvet for luck.

On my way to find the wild ducks I passed the horse stalls. I thought of Tip, the slender, fleet-footed horse that I rode slide-saddle around Bald Knob and compared him with the great mountainous creatures in front of me. What possible use could they be in this machine age? Grind into cat and dog food?

The mallards were shown by the same exhibitor as last year and they appeared to be the same ducks grown old and fat. Someone said there was a baby in the children's Mother Goose tent so I ran to see it. It was sweet, and looked like a little long ago.

I felt almost disloyal for failing to search out the Marshall County 4-H entries, but the display of garments would have filled Saks Fifth Avenue. Those in charge refused to help find individual winners — I can't blame them — so I didn't look for them this time, though in other years I have attended more than one day and searched until I found Marshall County.

I walked through the art exhibit as I do every year. Have you ever seen a modern art exhibit? I laughed at a joke I heard: "They say 8 out of 10 people in this country are mentally deranged. Now I believe it."

The girl guides were something new. They sat under striped canopies giving feminine voices in their piping. I found any from Marshall County, and I couldn't help thinking that boys could have done better. When I learned

Phillips Funeral to Be Friday

Funeral services for Donald Phillips, 52, killed in a highway accident at Lake City, will be held at 2 p.m. Friday at the Filbeck-Cann Funeral Home.

Rev. W. Paul Dalley and Billy G. Hurt will conduct the services. He leaves his father, Cleet Phillips; his wife, who manages the Benton Dress Shop; a son, Larry, of Benton; a daughter, Mrs. Charles Guthrie of Detroit; a sister, Mrs. Julian Frazier of Rollo, Mo.; and three grandchildren.

He was a trustee of the Benton First Baptist Church.

Phillips was killed in a two-truck crash Wednesday morning at 7:05 at the intersection in Lake City. He died en route to a Paducah hospital in a Linn ambulance.

Also killed in the crash was William Clarence Smith, 60, of Smithland. His truck failed to stop at the intersection and hit the Phillips truck. He was killed instantly when his truck left the road and hit a car, a boat and a house trailer.

Phillips truck also left the road and hit a store building owned by Noble Barrett.

Phillips and his father, Cleet Phillips, operated a truck service, and Donald hauled limestone from the Reed Crushed Stone Co. quarry at Lake City.

Five Young County Men Inducted Into Army Last Week

Five young men of Marshall County were sent to Louisville last week for induction into the Army by the local Selective Board.

The young men were Donald R. Hendrickson, Ed Lewis Rust, Richard C. Henson, Bobby J. Culp and Jackie W. Brazel.

Eight other young men were sent to Louisville for their Army physical pre-induction examinations. They were William J. Smith, Billy E. Jones, Charles E. Rushing, W. N. Walls, Randall W. Harrell, Marvin L. Bradley and Robert L. Brockman.

Mrs. Clara Phillips, clerk of the local draft board, said that the month's quota of draftees was the largest since she had been in the board. The increase in Selective Service quotas throughout the country is due to international tensions. The October draft quota is expected to be smaller than the September quota, however.

Site For Hospital Here Approved By Health Official

A site was selected Tuesday for the proposed city-county hospital here.

Paul Hackney, of the State Health Dept., selected the site on a visit to Benton Tuesday.

Lions Plan For District Convention

Tuesday, Sept. 19, the Benton Lions Club was treated to a most interesting and informative talk. Richard R. Dudley, program chairman, presented Frank Sherman, better known as "Tennessee Jones." Mr. Sherman, a retired professor of Michigan State, gave many interesting facts concerning snakes.

On Thursday night, Sept. 21, Lions Perlman, Erickson, Farris, Ely, Kemp and Reno will meet with the Calvert City Lions to discuss further and plan for the Lions District convention to be held Sept. 30 and Oct. 1 at the Kentucky Dam Village State Park. The Benton and Calvert City Lions are hosts for this convention.

Several members have visited Lions Clubs in surrounding cities to invite them to the district convention.

In addition to Mr. Sherman, the Benton Lions were pleased to have Bill Rudolph as a guest Tuesday night.

Location of the proposed hospital will be on Stilly Estate property off the corner of Birch and 10th streets in northeast Benton.

The site consists of 5.6 acres of land, which will be purchased from the Stilly Estate. The George Cole family formerly lived on the property.

Mr. Hackney arrived in Benton at 8:30 Tuesday morning, and was met by Mayor Guy Mathis and Dr. Harold King. The Health Department executive inspected the site immediately, and approved it as suitable for the location of a hospital.

Members of the Benton City Council and Marshall County Fiscal Court also visited the site with Mr. Hackney. All of the officials were pleased that a hospital site has been approved.

Mayor Mathis said that Mr. Hackney said that Benton and Marshall County are the "top of the list" to receive funds from the federal Hill-Burton Act to help build the hospital.

Benton residents voted last November by a majority of 6 to 1 in favor of a hospital.

County voters will ballot on a similar proposal at the coming general election in November.

Well, I see where the Census Bureau come out with some more figgers on various things they has put together from the 1960 census. I was interested in one item that said a million and a half Americans quit smoking from 1953 to 1960. I reckon this was only a small fraction of them that swore off.

WHAT'S YOUR FAVORITE COLOR? You know, I'm sure, that color telephones are popular—but do you know how the colors run in popularity? White is the favorite, followed by beige, then pink, ivory, yellow and green (tied), blue and gray (another tie), and red. The Princess phone, available in five colors, ranks this way in color preference: white, beige, pink and turquoise, then blue.

ON THE SUBJECT OF EXTENSIONS, how about a Princess phone in the playroom for the teen-age-princess in your household? It'll put her in "teen-heaven," and it'll keep things quieter for grown-ups in other parts of the house! Just give us a call for your Princess in the color of your choice.

Now that colleges are gearing for an all-time record high enrollment this fall, here's a suggestion for you parents who have a son or daughter going off to school. You'll be doing them and yourself a favor if you'll keep in touch—at least once a week—by long distance.

WHAT'LL THEY THINK OF NEXT? In Switzerland, to tune a violin, you can dial a telephone number and get a perfect "A".

CATS HAVE NINE LIVES, according to stories. Telephone people have found that other things can have extra lives, too. For example, maybe you've noticed that after an installer puts in a phone, he saves the box it came in. We keep these boxes and use them over and over again. Every re-use saves 8¢. Multiply that by thousands and you get the kind of savings that help us give you more for your telephone dollar.

It takes 1000 tons of coal to build just 1 mile of concrete highway!

It takes approximately 700,000 tons of coal if Kentucky uses concrete to complete its Interstate Highways. Kentucky needs new coal markets, new highways. Concrete brings the two together. The result? Better business. Better highways. Today's new-type concrete is smooth and solid all the way... is laid flat to stay flat. It actually has a life expectancy of 50 years and longer, with upkeep expense 70% less than for asphalt (based on Kentucky records). This is vital because the Federal Government pays 90% of initial construction cost—but not a single cent for maintenance. Add it up. Concrete means greater coal usage, greater driving comfort, and greater maintenance savings.

Mr. Fred Bullard, Executive Secretary of the Kentucky Coal Association, says: "Cement and reinforcing steel are two basic ingredients of the modern concrete highway. With their consumption of coal during manufacture, we believe that paying Kentucky's Interstate Highways with concrete would be an invaluable aid to the state's coal industry."

The 1962 Ford Galaxie line features a crisp, fresh approach to Ford's classic styling. Shown here is the Galaxie 500 Sunliner convertible, one of twelve models in the Galaxie line. While the new Galaxie is slightly shorter and fractionally narrower than the 1961 model, the large passenger compartment is the same as 1961. Large door openings, coupled with Ford's convenient two-position door stops, make entering and leaving the Galaxie an easy and natural movement. The Sunliner top is anchored at each roof bow to prevent "ballooning" when underway. The vinyl-lined top is stowed under a color-keyed boot.

Rates Announced For The 1962 Wheat Program In County

The average county rates per acre for wheat acreage diverted to conservation uses under the 1962 wheat program are \$26.60 and \$27.50, according to Renloe Rudolph, chairman, County ASC Committee.

Individual farm rates are based on these county rates, depending on the farm's productivity in relation to the county average. Each wheat producer in the county with a 1962 wheat allotment, and also each producer without allotments who have grown wheat in at least one of the years 1959, 1960, or 1961, has received information on the 1962 wheat program, including two rates for his farm.

For the minimum payment, the rate is 45 per cent of the adjusted basic county support rate, multiplied first by the number of diverted acres, and then by the individual farm yield or productivity index.

The maximum payment rate is computed in the same way using 60 per cent of the adjusted basic county support rate.

Producers must use an acreage at least equal to 11.1 per cent of their 1962 farm wheat allotment for conservation in order to be eligible for price support under the 1962 program and be in compliance with their 1961 allotment.

In addition, farmers may voluntarily divert an additional one-third of their 1962 allotment. Payment for this diversion is at the maximum farm rate.

Letter to the Editor

Some one has aptly said that there are really only two kinds of people: those who are part of the problem, and those who are of the solution.

Do you think only in terms of yourself, how much you can make, what you get out of life? Those who think that way are definitely part of the problem.

Or are you concerned with the contribution you can make, how much you can give, how much you can put in? People like that are part of the answer.

Some people treat life like a slot machine, trying to put in as little as possible, and expecting to hit the jackpot. But I believe that people are wiser, happier, and have more inner peace when they think of life as a solid, intelligent investment from which

they receive in terms of what they put in. And by so doing they preserve or help our free society.

To any who may doubt the alleged duality of man and the constant strife between the upper and lower poles in human life, the attempt at handling our thoughts is recommended. No sooner is the standard raised and the battle begins by the newly assumed attitude of the man who has determined on self-conquest, than the host of combatants who have hitherto carried on only a half-hearted dispute definitely range themselves on opposite sides; and the more resolute the determination the fiercer grows the fight.

The lower nature instinctively becomes aware that its ascend-

ency is threatened, struggles with desperation against the spirit of him who has determined to assert his sovereignty. This conflict between the higher and the lower has been the theme of many epics, and far from fancy, is one of life's sternest realities.

Jesus had powerful flashes of insight into the deep nature of man-consciousness and He used every device he could try to reveal the process of the insight to those who would listen. Evidently, from general conditions in the world now, the one great idea which Jesus repeatedly tried to express was that no individual human being could know himself unless his inner honesty was complete. The peace He preached was an inner peace, and He said so always.

The light to which He so often made reference was the light of

the Truth. He did not see the necessity of obeying but He admonished, considering a life out towards matter dying life.

No one, according to the negative idea of repentance, could know himself with modern psychology. The technique of integration teaches the individual to know his real motives, his real purposes, his real instincts, escapes, lies, and vanity. We are what we see that in God's making is worth the making it makes the man.

Why build our cities of man, unbuilded growth, we build our world builder also grows.
