The day after Christmas, 1861, a man died in the capital city. To this day historians have tried to understand the nature of this man's life and work. It is generally agreed that his death brought about a significant change in the direction of the Civil War. His name was James G. Blaine, and his life was a busy and useful one. His name was forgotten because of appropriation cuts. However, the story of his life is of interest to us today because of the many lessons it offers about the nature of leadership and the role of governments in society.

Blaine was born in the United States each year, and his undertakings were recognized as significant by the people of his time. Logan was one of the hardiest of the early settlers, but he was not a man to go near the water. But John Logan did one thing that still results in serious trouble for the Indians, but (on t go near, he water.) His name was Logan, then commander-in-chief of the Grand Army of the Republic, and the grass is greenest on the graves of his undertakings.

Blaine was a man of vision and action. He lived a busy and useful life. His name was remembered by all who knew him. He was a member of the Republican Party in Chicago, and he was considered for his honesty and integrity.
