Tax Cut Bill Is Upheld By 2 Votes; Measure Dead

City Council Jobs Are Still Open

Who will serve as Fulton's city councilors are still not decided. This year, for the first time in the city's history, the councilors were voted in by the voters, rather than appointed by the mayor. The candidates for the positions were not yet decided, and the city councilors were not yet sworn in.

The vote was 268 to pass the tax cut bill, with 232 voting yes and 36 voting no. The measure was sponsored by Mayor John Smith, who said it would help the city's economy by lowering taxes to encourage business growth.

The councilors will be sworn in on June 30, and they will begin their terms of office immediately. The councilors will then begin to meet and vote on the city's budget and other issues.

State Republican Leaders Denounce On Tax Cut Vet

Washington, June 17—President Truman vetoed the tax cut bill, saying it would cost the federal government too much money. The veto was the first of the year.

The bill was passed by the House of Representatives by a vote of 268 to 132, but it was not passed by the Senate, which voted 55 to 44 against it. The veto was a major victory for the President, who had been fighting for the bill for months.

The President said the bill would cost the government too much money and would not help the economy.

It is not known precisely how great the benefits in the use of atomic energy may be. It is known that they are substantial. The amount of energy derivable from materials other than hydrogen has been estimated to be enormous. Thus the problem of future energy reserves is not so difficult as it may at first appear. No one knows precisely how great the reserves are. They can't get freight cars exactly when they want them. Where it is most needed. That job is being done by the Congressmen to complain when they can get them—and every Congressional spokesman to preferment to any section of the country.

There is a close relation between these two events. For while General Marshall's program may not be a direct corollary to the Hunger Program, it is an approach to it inasmuch as it too is an effort to shore up the arm of Europe. His plan of rearmament is the cooperation of all European nations which are willing to participate. The American contribution in this plan is to place the United States directly in the fight. The American contribution does not constitute a direct corollary to the Hunger Program. It is a direct corollary to the attempt to strengthen the arm of Europe in the fight against the Axis. The American contribution which is aimed at saving western Europe from being engulfed against its will.

Where Are The Cars?

Oil For The Ages
