- BUT THAT'S NOT ALL ... DURING THE SAME PERIOD —

- We have paid $825,294,322 in salaries and wages to our employees. Most of this they spent locally.

- We have purchased 2,979,320 tons of Kentucky coal. These 59,587 carloads of coal insured a year's work for 2,383 miners, and thousands of man-days of employment for railroad workers.

- We have spent $15,986,095 for new construction in Kentucky, not including the payroll.

- We have paid $11,258,882 to our preferred stockholders, 5,731 of whom live in Kentucky.

- We have paid $8,341,720 in employee retirement funds and insurance. These are voluntary contributions to employee welfare.

These figures show the value of a single industry—one of Kentucky's largest—to our Commonwealth. They add further proof that our public officials should protect and encourage the growth of tax-paying, job-providing, business-managed industries, because such industries spell prosperity for Kentucky.
