He Got His Free Plug
Actor John Hall and his vocalist, Mrs. W. McAlister, of Parkin, received a free plug in the dental screening program of the Arkansas Dental Association. The plug, which is a small metal cylinder, is used to clean the teeth and prevent cavities. The couple was one of many who took advantage of the program, which is available to anyone over the age of 65. The screening is conducted by dental hygienists and is designed to help older adults maintain good oral health.

The Prize Problems
By Harrison Blackman
AP Foreign News Bureau
India's technological progress toward independence - often criticized as slow and unsatisfactory - is far from negligible. A recent report by the United Nations Industrial Development Organization (UNIDO) indicates that India's industrial output has increased at an average rate of 8.5% per year during the past decade. This growth has been driven by a variety of factors, including government policies designed to encourage investment and innovation, as well as the country's rich natural resources and large labor force.

Several prominent figures and long-time observers say the report is a valuable contribution to understanding India's economic development. "The UNIDO report is an important milestone," said economist Dr. A. K. Ray. "It provides valuable insights into India's industrial growth and the challenges it faces as it moves toward self-sufficiency.
