Flood Halved Farm Output

Southeastern Kentucky’s Damage Is Estimated By U. K. Agronomy Head

Lexington- July 4- July 4th, 1947

Approximately 20 per cent of the total area in Kentucky and the surrounding states affected by recent hash floods is said to have been destroyed. Setting the damage at $1,750,000, the emphasis was on the necessity of early replanting.

Agriculture

The Associated Press

W. Clark Wilson, supervisor of agriculture in the area, stated that the damage was only estimated and that the true extent of the disaster would not be known until after the damage has been assessed. He added that the damage would be less than $1,750,000.

6 Nations OK Marshall Plan

Daily Financier Has Belief To Avert Anglo-French Invitation To Congress

Washington, June 7 - The daily financier has belief that the Anglo-French invitation to a Marshall Plan in Europe will be averted by the United States.

COP Describes New Tax Bill As Last Chance

New Bill Same As That Vetted, Except For Date

Washington, June 7- The new tax bill that has been approved by Congress and is now being considered by the Senate is the same as that which was introduced in the House last year. The only difference is that the Senate has recommended an amendment that would reduce the rate of tax on business enterprises.

L. M. Major Services Held

Graves County Farmer Died At Home Sunday

Rites At Mt. Pleasant

Mr. Major, 75, Farmer Of Sikesville, Was Killed In Plane Crash In Germany

Mrs. Major, who shared the home with her husband in the Foulks neighborhood of Sikesville, was identified by the authorities as Mary Jane Major. She was seen in the company of the farmer, who was identified as L. M. Major, 75, a farmer of Sikesville.

Dairy Judging School Scheduled

District 6 & Club Dairy Judging School will be held in the old Courthouse in Fulton Thursday and Friday.

Lamar Gayle, district 6 dairy judge, will conduct the judging.

Leader Congratulates

Mr. & Mrs. Ed Ellis, Wilmore, who have been married 50 years, were congratulated by Mr. J. B. LeCompte, Iowa City, chairman of the board of education, who said: "I congratulate Mr. and Mrs. Ed Ellis on their 50th wedding anniversary. They have been a good example of what marriage should be."
The Ideal Target

The identification of the ideal target in the United States is of major interest in the study of the effects of target size and shape on the performance of precision-guided munitions. The ideal target is one that has been designed and built specifically for the purpose of testing guided munitions. It is important to note that the ideal target does not necessarily correspond to the physical characteristics of a real-world object, but rather is a simplified representation of a real-world object that is used to evaluate the performance of guided munitions.

Following is a list of the key characteristics of the ideal target:

1. High durability: The ideal target must be capable of withstanding the high kinetic energy of guided munitions without disintegrating or fragmenting.
2. High contrast: The ideal target must have high contrast with the surrounding environment to ensure that it is easily visible to the guided munitions.
3. High visibility: The ideal target must be visible from a long distance to ensure that it is easily detected by guided munitions.
4. High damage: The ideal target must be capable of being damaged by guided munitions to ensure that it is effective in testing the performance of guided munitions.

These characteristics are essential for the ideal target to be effective in testing the performance of guided munitions. The ideal target is used to evaluate the performance of guided munitions under various conditions, such as different launch angles, different wind conditions, and different target locations.

Shall We Feed Them?

Shall we feed them? This is a question that has been debated for centuries. There are many different perspectives on this issue, and opinions vary widely. Some people believe that it is our duty to feed the hungry, while others believe that it is not our responsibility.

There are many different approaches to feeding the hungry. Some people believe that it is best to provide food directly to the hungry, while others believe that it is better to provide resources that can be used to produce food. There are also many different ways to provide food, such as through government programs, through private charities, and through international organizations.

Regardless of the approach taken, it is important to ensure that the hungry are provided with adequate food. This requires careful planning and coordination, as well as a commitment to provide support to those in need. It is also important to consider the long-term effects of feeding the hungry, as well as the potential consequences of not feeding the hungry.
