3 Cave Boys

Enter Winners In Paducah Fair

Their Jerseys Won Five Prizes There Wednesday

BOYS BEST JUDGES

Three jersey, two silver, and an iron rosette were awarded to members of the Paducah Industrial High School for best judges in the Boys Best judging contest Saturday at the 4-H and FFA judging contest.

The judging was conducted by Ellis Lee Wade, the Industrial High School agriculture teacher, and Mr. and Mrs. R. B. Evans, the high school couple.

The boys were awarded the prizes for their work in judging the cattle and goats at the 4-H and FFA judging contest.

The judging was held at the Paducah Industrial High School and was open to the public.

They, like many others, don't want to endorse anyone right now.

By PETER B. McINTOSH

Kansas City, Mo., April 18—

Missouri and Kansas Republican

leaders have not endorsed any can-

didate for president, including James

A. Garfield, the Republican nomi-
natee of 1880.

The leaders say that they have not

decided on any candidate and that they

will wait and see what happens in the

election campaign.

This "wait and see" advice was given by Senator Charles F. Crisp, Republican of Missouri, who was speaking to reporters here Saturday.

He said that any candidate who wants the party nomination for the presidency must be endorsed by the leaders of the party in the various states.

The leaders say that they will wait and see what happens in the election campaign before they endorse any candidate.

They, like many others, don't want to endorse anyone right now.

Bigger Bombs
Impractical

Can Make Them Too big as Nagasaki Type, and Fool Populations

Washington, July 9,-F-K.

A big nuclear bomb may be possible to make, but it is impractical to use, according to General Groves, director of the Manhattan project.\n
In an interview with the New York Herald Tribune, General Groves said that the ultimate magnitude of the bomb was limited by the practicality of getting the weapon to the target in a fraction of a second. Furthermore, he said, a bomb of such size would be too fragile to withstand the forces of atmospheric friction and turbulence.

"It will not be possible to build a bomb of tremendous size," General Groves said. "The amount of energy that can be packed into a specific volume is limited by the properties of matter and the laws of physics."

The general said that the Manhattan project had already accomplished its primary objectives, and that the development of a practical bomb was now in the hands of scientists and engineers. He said that the project had been successful because of the cooperation and dedication of thousands of people involved in the effort.

"The success of the Manhattan project is a testament to the power of human science and engineering," General Groves said. "It is a symbol of the human capacity to overcome the barriers of nature and to achieve our goals through ingenuity and perseverance."

Rear Admiral John Perry (right), commander of U. S. Carrier Division Six, chats with King Gustaf V of Sweden at Saro, Sweden, during a visit at which arrangements were made for the transfer of the Sam Tennis Club. The carriers were anchored 200 miles off the coast of Norway, a few weeks after the Swedish king crossed the Atlantic en route to London to attend the coronation of King George VI.

American Senator Ray Cannon of Tennessee visited the flagship "Hancock" here Sunday. Cannon came aboard in the late morning, had lunch in the Sick Bay while aboard, and returned to shore early Monday morning.

As we learn more about ap- plications for membership in the United Nations, we learn that the nations of the world are not only concerned with the admission of the United Nations to the United Nations but they are also concerned with the admission of the United Nations to the United Nations.

Seven nations have now become members of the United Nations. These nations are Canada, the United States, Australia, New Zealand, Great Britain, France, and the Soviet Union. These nations have been admitted to the United Nations on the basis of their agreement to the United Nations Charter.

The United Nations Charter was signed on June 26, 1945, by 51 nations. The charter went into effect on October 24, 1945, when the required number of nations had signed it. The United Nations Charter is an agreement between the nations of the world to work together for peace and security.

The United Nations is a world organization established to maintain international peace and security, to develop friendly relations among nations, to achieve cooperation in solving international problems, and to promote social progress and human betterment. The United Nations is composed of 71 member nations, each of which has one vote in the United Nations' General Assembly. The United Nations has a variety of specialized agencies and programs, including the United Nations Children's Fund, the United Nations Educational, Scientific, and Cultural Organization, and the United Nations Food and Agriculture Organization.

The United Nations is headquartered in New York City. The United Nations has its own system of justice, the International Court of Justice, which is located in The Hague, the Netherlands.

The United Nations has a variety of functions, including the maintenance of international peace and security, the promotion of cooperation among nations, the resolution of disputes by peaceful means, the prevention of conflicts, and the promotion of economic and social development.

The United Nations has been criticized for its slow progress in resolving conflicts and for its lack of enforcement power. However, the United Nations has been successful in maintaining international peace and security, promoting cooperation among nations, and providing a forum for discussion of international issues.

The United Nations has been criticized for its lack of representation from certain regions of the world, particularly the Middle East and Africa. However, the United Nations has made efforts to increase the representation of these regions in its decision-making bodies.

The United Nations has been criticized for its failure to take action on certain issues, such as the Israeli-Palestinian conflict and the situation in Sudan. However, the United Nations has made efforts to address these issues through its various agencies and programs.

The United Nations is a complex and evolving organization, and its role in world affairs continues to change. The United Nations is an important institution that provides a forum for the discussion of international issues and the promotion of cooperation among nations.

Big Eighth Inning Gives Chicks 8 To 6 Victory At Union City

Left Fielder Ted Williams (at the American League Park), slides into second base with a double in the fourth inning of All-Stars game at Wrigley Field, in Chicago, as National League shortstop Harry Barton actions thrown from left field American League was hit.

Past Week Saw Much Progress On State Farms

Weather Favored All Crop Growth, Though A Bit Cool

LITTLE RAIN FELL

The weather throughout most Kentucky and Tennessee last week was favorable for some crops. Light rain fell at various places, adding to crops of corn and tobacco. But the heavy rain and flooding of low-lands was not enough, and much progress was made in the fields. The harvest of soybeans was made during the week. Much Progress

Farmers Use Tile To Drain Bottom Land For Crops

Emboldened with the idea of draining a small farm with right acres of bottom land, an Iowa farmer has taken up the project to drain a small farm with right acres of bottom land. The farmer has installed a tile system on his farm and the results have been quite satisfactory. He reports that the tile system has drained the bottom land and has made it possible to grow a better crop of corn and soybeans.
