An Abstract Proposal

Governor Wills has made an extraordinary request to the legislature, a request that involves a series of proposals designed to bring about a return to normalcy in Kentucky, to reduce costs, to eliminate waste and to get the state out of the red. The Governor's requests include:

1. An across the board salary cut for all state employees.
2. A reduction in the size of the state government.
3. A moratorium on new state projects.
4. An examination of all state contracts and contracts for state services.

It is clear that the Governor feels that drastic action is necessary to save the state from bankruptcy. He has asked for the cooperation of the legislature in this effort, and the legislature has agreed to consider his proposals.

The Governor's proposals are based on the assumption that the state is facing a severe financial crisis and that drastic action is necessary to avoid bankruptcy.

The Governor's request is a welcome move in the right direction. It is clear that more drastic action will be necessary to save the state from bankruptcy.

Europe Divided

Well, the division of Europe into eastern and western blocs finally has been finalized as out-and-out war. Russia knows she warned when she said the American program for European rehabilitation would ruin the whole thing. It is especially remarkable in that it comes from a society included armed robbery, grand larceny, and insisted that he was guilty only of having signed a confession.

One wonders, by the way, what reaction we are to have to this development. It is a trick that can't be turned overnight, however.
