## MORE CAPITAL.

For Hopkinsville Tobacco Manufacturing Company.

## CAPACITY ENLARGED.

New Corporation Formed. --Subscription Books Are Opened.

A company has been formed to buy out the Hopkinsville Tobacco Manufacturing Company with the purpose of making it the biggest concern of the kind in this region. Subscription books were opened this morning at the office of W. F. Givens & Co., and stock will be sold at \$100 a share.

The prime movers in the enterprise are E. M. Place, E. B. Lindsey, L. H. McKee, W. F. Taylor, E. B. Long, W. F. Garret, W. T. Tandy, G. H. Chapman, and John Batten. They hold a meeting Friday night and perfected all arrangements toward making the purchase. All the present owners of the plant will be members of the new corporation. Every one of them has increased his stock and some have doubled their holdings, thus attesting their faith in the new concern. The sale will formally be consummated and articles of incorporation filed in a few days.

The new company will begin business with a capital of \$50,000 and it is the present intention to increase this to \$100,000 in a short time. The plant will be enlarged and its facilities increased in every way.

The company's products, "Red Duke" smoking tobacco and "Kentucky Diamond" chewing tobacco, are well-known and enjoying popular throughout this and several other states. The demand for these brands has become so enormous that the company, with its present capacity, is unable to supply the trade. For months orders have been pouring in that could not be filled, and for this reason it has been necessary to reduce the traveling force. The new company with greatly increased capital will at once enlarge the capacity of the plant, put new men on the road and advertise extensively. In addition to Red Duke and Kentucky Diamond other brands of tobacco will be manufactured and their excellence made known in new territory.

Located in the center of one of the best markets in the world, where all grades of tobacco can easily be raised, in easy access to the coal mines, with strong financial backing and offered by competent business men there is no reason why the enterprise should not prove a splendid success in every way. Moreover, it will serve to increase the tobacco interests of the county and the commercial prosperity of Hopkinsville.

Considerable business was transacted, the most important being an appropriation of \$10,000 for general repairs to the building and improvements on the grounds. Fifteen hundred dollars was appropriated to complete the unfinished part of a new building for colored patients. The building committee was authorized to receive bids for the work.

Resolutions were passed expressing regret at the resignation of Dr. Laura Ketter. It is understood that Dr. Ketter's chief reason for resigning was due to her unwillingness to take charge of the female patients outside of the main building to which duty she had been assigned by the superintendent.

Dr. McCormick was authorized to employ an expert engineer to instruct the asylum employes in reference to the workings of the new updraft system.

An allowance of \$50 a month was made to provide music for the inmates. Leave of absence with expense paid was granted the superintendent to attend the Indiana State Conference of Christian and Correction which will be held at New Albany Dec. 13, 14 and 15. Rent for houses on the grounds occupied by the reformatory and one of the attendants was fixed at \$5 and \$2.50 a month, respectively. The salary of the assistant cook was increased from \$15 to \$20 a month.

# True Economy

The difference of cost between a good and a poor baking powder would not amount for a family's supply to one dollar a year. The poor powder would cost many times this in doctors' bills.

Royal Baking Powder may cost a little more per can, but it insures perfect, wholesome food. In fact, it is more economical in the end, because it goes further in leavening and never spoils the food.

Royal Baking Powder used always in making the biscuit and cake saves both health and money.

You cannot, if you value good health, afford to use cheap, low-grade, alum baking powder. They are apt to spoil the food; they endanger the health. All physicians will tell you that alum in food is poisonous.
