Abstract

Extreme isolation in any generation, but especially in the elderly generation, causes detrimental effects in the body, and the mind. The Wesley Living Center is a community based center, where individuals above the age of 62 with a yearly income of less than \$19,500 are able to live in their own apartment, provided they pass a criminal and credit background screening. This project involves creating, organizing, and delivering a Murder Mystery Luncheon with the Wesley Living Center in Murray, Ky. My goal for this project is to entertain the elderly in the Wesley Living Center, and help them socialize, to avoid risks of extreme detrimental effects of the body and mind.
