TO IMPROVE WHEAT

HOPE TO DEVELOP A GRAIN WHICH WILL NOT GERMINATE

The Kentucky experiments are in a very advanced stage, and, according to PRESIDENT THOMAS W. COOK, they are to be submitted to the World's Fair of 1904. Several varieties have been developed which will not germinate, and the best of the lot is the 'Kentucky No. 1.' It is expected that this will be very successful in the field, and that it will be a valuable addition to our hard wheat varieties.

In the meantime, the experiments are being continued, and the results are very promising. It is hoped that a grain will be developed which will be resistant to disease, as well as to drought and heat. The experiment station is well equipped, and the staff is working hard to achieve these objectives.
