In two short months, Gulf's new lower priced quality gasoline for 1 out of 2 cars is a proven success. 1 mis of autorists have proven, in over a billion driving miles, that Gulftane is lowering their cost of driving.

Gulf research developed Gulftane specifically to meet the needs of the 50% of cars on the road that don't needin fact, can't even use - extra octanes.

All that extra octanes can do for these cars (and that includes older cars as well as many of the newer compacts on the road) is increase their gasoline costs.

Yet, for all the economy it offers, Gulftane is a quality gasoline. In your engine, it lubricates intake valves and

upper parts of the piston. It is a specially blended gasoline to give you easy starting in all seasons.

The best way to find out if Guiffane was made for your

car is to try a few tankfuls. If you are driving the one car in two that doesn't need extra octanes, Gulftane will give all the performance that was built into your engine - at a lower cost.

Your Gulf dealer has always been proud to offer the finest products for your money. Now he has done it again with Gulftane.
